We help people & businesses in emerging markets join the modern economy.

1. Introduction

Makeba is a financial ecosystem that combines remittances, payments and other financial services into a platform that is fast, frictionless and very low cost.

Makeba has approximately 40% of the remaining Africa where the demand is high and the market is fragmented.

2. African Opportunity

Remittance Costs – The average cost of remittance in Africa is very high at 9.5% on average. Despite the high cost Africa remains one of remittance corridors with the highest volumes.

Cash Transaction – In Africa 65% of transactions are still done strictly in cash. A practice that is very time consuming, inefficient and very expensive. Cash is still the preferred method of payment for most people in Africa.

Credit Cards – Card payments are still not the norm in Africa – only 4% of the adult population possess a bank account, of that, 4% have a credit card and 2% have a debit card. Mobile Money is the most popular form of payment in Sub-Saharan Africa.

Smartphones – Africa is the fastest growing market for smartphones. Smartphone Use and Internet Use is growing at a very fast pace. Smartphones are now affordable and Internet Data is very affordable. Mobile Money and Mobile Internet are the future of Financial Services in Africa.

Growing Economies – Africa is the fastest growing region in the world. Economic Growth is very impressive. Africa is home to some of the fastest growing economies in the world. Africa's Economic Growth is very impressive. Africa is home to some of the fastest growing economies in the world.

Young and Growing – Africa is the youngest continent in the world. The average age of a person in Africa is 19 years old. Africa is home to the largest number of people under the age of 35. Africa's economy is also on an upward trend – GDP growth for 2058 is 3.5%.

3. Our Idea

We can Makeba an complete financial ecosystem that removes the need for cash, credit cards and money transfer agents – and replaces them with mobile payments.

By cutting out the middlemen Makeba transactions are able to move between sender and receiver at a fraction of the cost. Our customers can send money to family members and merchants and businesses in Africa at a fraction of the cost of traditional remittance and card payments.

The goal is for our customers to pay for everything in their lives with Makeba. Cross-Border remittances, Bill payments, Merchant payments and Peer-to-Peer payments.

90% cheaper remittances from US & EU

90% cheaper point of sale transactions

US & Europe remittances fees in US Dollars vs Sub-Saharan Africa remittances fees in US Dollars

Makeba fees are significantly lower than credit cards

Product Security

Security is our top priority – we've made sure to build Makeba with the latest encryption technology and security protocols to help keep our platform safe.

With Makeba Blockchain Wallet we have implemented the latest encryption requires the user's private key to be stored on their device and not on our servers. Makeba transactions are also protected by two factor authentication.

Also, all our transactions are done via Blockchain and we have also implemented a blockchain and transaction back ups below involves each account for suspicious activity.

5. Proof of Concept

To test our new technology we launched Makeba in the West African country of Cape Verde earlier this year, and the everyone has been great.

We already have a pre-customers in Cape Verde, and the customer base keeps growing this month.

Together with our local partner Banco Fibra we are currently offering our customers:

- mobile payments
- international remittances
- airtime purchase
- payment of SMS Value
- airtime deposits

6. Expansion Goals

Our immediate goal is to raise enough funds to launch our MVP and then we will focus on the expansion of our product and our customer base. We have a very ambitious goal of being the leading Cross-Border Payment Platform in Africa. Our initial goal is to establish Makeba as a multinational Fintech company with operations in West Africa and Europe.

Our long term goal is to be the Cross-Border Payment Platform of choice for people and businesses in Africa.

Our initial expansion plan is to enter into markets in Africa and Europe.

7. Customer Acquisition

Leveraging our Partners Network

We will focus on Sales leveraging a network of merchants that we have. Makeba Merchants will be our sales force and will be incentivized to do so.

Strong Referral Program

We have a generous incentivized referral program for merchants and individuals who refer new customers to Makeba.

Community Events

We will be attending events in Europe and West Africa where we will hand out flyers.

Email marketing

We will use Mailchimp to engage & distribute

Social Media Marketing

Ethnicity and Diaspora the audience for the Makeba services. Facebook the international Diaspora and Instagram the local Diaspora.

Will use the Diaspora through social media channels like Facebook, Twitter and Instagram to reach our customers.

Influencer Marketing and PR Buzz

Social influencers have a lot of influence in Africa and we will use a target pool. Community partnering and word-of-mouth marketing will be a key strategy.

Our focus is on the customer acquisition cost and the lifetime value of our customers. We have a very ambitious goal of being the leading Cross-Border Payment Platform in Africa.

The above chart contains future leading projections which cannot be guaranteed.

8. Let's know moving forward together

- Please reach out if you have any questions or would like to be a part of our journey.
- Please let us know if you would like to see a product demo or a presentation of our product.

Thank you,
Vamandou Alexander
CEO Makeba

Investor Q&A

What does your company do?

Makeba is a cross-border payment platform that combines money transfers and commercial payments. Digital transactions that is faster more lightweight and, much less cost. Customers can send money to family members and merchants and businesses in Africa at a fraction of the cost of traditional remittances.

Where will your company be in 3 years?

We are currently operating in Cabo Verde and we are exploring other pilots in the demand-rich markets in Sub-Saharan Africa and Europe. We are also in discussions with several Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with several Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with several Fintechs and Telecoms Operators in Africa and Europe.

Why did you choose this idea?

Africa is the fastest growing region in the world. Despite the challenges it faces. Technology drives Africa's economic growth and it is the future. Africa is home to some of the fastest growing economies in the world. Africa's economic growth is very impressive. Africa is home to some of the fastest growing economies in the world. Africa's economic growth is very impressive.

How far along are you? What's your biggest obstacle?

We have developed the technology and have created a pilot of products. We are currently working on our first pilot with our partner Banco Fibra and we are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe.

The biggest obstacle right now is getting people to invest in our startup – most investments are US and Europe.

Who competes with you? What do you understand that they don't?

We compete against our customers who are currently using cash. We also compete against other Fintechs and Telecoms Operators in Africa and Europe. We also compete against other Fintechs and Telecoms Operators in Africa and Europe. We also compete against other Fintechs and Telecoms Operators in Africa and Europe.

How will you make money?

Our main sources of revenue are going to be:
- Remittance Transaction Fees (Cross-Border)
- Merchant Transaction Fees (Cross-Border)
- Payment processing fees (Cross-Border)
- Currency Exchange Fees
- Payment Processing Fees (Domestic)
- Merchant Transaction Fees (Domestic, Transfer, payroll and services)

What are the biggest risks? If you fail, what would be the reason? What has to go right for you to succeed?

Our biggest risk is that we are running out of cash before we can reach the end of our pre-seed round.

Fifty Kobo Ventures has agreed to provide our African customers and merchants with the Makeba Wallet and Payment Platform. We are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe. We are also in discussions with other Fintechs and Telecoms Operators in Africa and Europe.
