BUSINESS AND ANTICIPATED BUSINESS PLAN

7. Describe in detail the business of the issuer and the anticipated business plan of the issuer.

Pegasus Tel, Inc will be acquiring Fortuna Ragazzi which is a Dutch holding company that was created specifically due to the recent COVID pandemic economic conditions in Europe and around the world. As a result of COVID many businesses in Europe were forced to shut down for a prolong period of time and as a result lost key skilled employees. The hospitality and entertainment industry, were particularly affected and got into serious economic troubles. This created unique opportunities to make acquisitions for triple A locations for restaurants and bars, in particularly in Amsterdam in the Netherlands at a fraction of the actual value. Many times, these establishments are willing to sell their establishment for release of their outstanding debts to their creditors, suppliers and landlords. Fortuna Ragazzi responds to this opportunity by taking over and consolidating these companies at a greatly reduced price. Many times creditors, suppliers and landlords are willing to compromise a large percentage of what is owed to them in exchange for a solid management team that is adequately financed especially since the future of COVID is unpredictable.

8. Discuss the material factors that make an investment in the issuer speculative or risky:

RISK FACTORS

Readers and prospective investors in our common stock should carefully consider the following risk factors as well as the other information contained or incorporated by reference in this prospectus.

If any of the following risks actually occurs, our financial condition, results of operations and liquidity could be materially adversely affected. If this were to happen, the value of our common stock could decline, and if you invest in our common stock, you could lose all or part of your investment.

The discussion below highlights some important risks we have identified related to our business and operations and an investment in shares of our common stock, but these should not be assumed to be the only factors that could affect our future performance and condition, financial and otherwise. We do not have a policy of updating or revising forward-looking statements except as otherwise required by law, and silence by management over time should not be construed to mean that actual events are occurring as estimated in such forward-looking statements.

Risks Relating to Investing in a Start-up Company

Investing in early-stage companies is very risky, highly speculative, and should not be made by anyone who cannot afford to lose their entire investment. Unlike an investment in a mature business where there is a track record of revenue and income, the success of a startup or early-stage venture often relies on the development of a new product or service that may or may not find a market. Before investing, you should carefully consider the specific risks and disclosures related to both this offering type and the company.

Risks Relating to Our Securities

If a market for our common stock does not develop, shareholders may be unable to sell their shares.

Our common stock is quoted under the symbol "PTEL" on the OTC PINK Market operated by OTC Markets Group, Inc., an electronic inter-dealer quotation medium for equity securities. We do not currently have an active trading market. There can be no assurance that an active and liquid trading market will develop or, if developed, that it will be sustained.

Our securities are very thinly traded. Accordingly, it may be difficult to sell shares of our common stock without significantly depressing the value of the stock. Unless we are successful in developing continued investor interest in our stock, sales of our stock could continue to result in major fluctuations in the price of the stock.

Because we are subject to the "Penny Stock" rules, the level of trading activity in our stock may be reduced.

The Securities and Exchange Commission has adopted regulations which generally define "penny stock" to be any listed, trading equity security that has a market price less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exemptions. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document that provides information about penny stocks and the risks in the penny stock market. The broker-dealer must also provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction, and monthly account statements showing the market value of each penny stock held in the customer's

account. In addition, the penny stock rules generally require that prior to a transaction in a penny stock, the broker-dealer make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for a stock that becomes subject to the penny stock rules which may increase the difficulty Purchasers may experience in attempting to liquidate such securities.

Effect of Amended Rule 15c2-11 on the Company's securities.

The SEC released and published a Final Rulemaking on Publication or Submission of Quotations without Specified Information amending Rule 15c2-11 under the Exchange Act ("Rule 15c2-11," the "Amended Rule 15c2-11"). To be eligible for public quotations on an ongoing basis, Amended Rule 15c2-11's modified the "piggyback exemption" that required that (i) the specified current information about the company is publicly available, and (ii) the security is subject to a one-sided (i.e. a bid or offer) priced quotation, with no more than four business days in succession without a quotation. Under Amended Rule 15c2-11, shell companies like the Company (and formerly suspended securities) may only rely on the piggyback exemption in certain limited circumstances. The Amended Rule 15c2-11 will require, among other requirements, that a broker-dealer has a reasonable basis for believing that information about the issuer of securities is accurate. Our security holders may find it more difficult to deposit common stock with a broker-dealer, and if deposited, more difficult to trade the securities on the Pink Sheets. The Company intends to provide the specified current information under the Exchange Act but there is no assurance that a broker-dealer will accept our common stock or if accepted, that the broker-dealer will rely on our disclosure of the specified current information.

We do not expect to pay dividends in the foreseeable future. Any return on investment may be limited to the value of our common stock.

We do not anticipate paying cash dividends on our common stock in the foreseeable future. The payment of dividends on our common stock will depend on earnings, financial condition and other business and economic factors affecting it at such time as the board of directors may consider relevant. If we do not pay dividends, our common stock may be less valuable because a return on your investment will occur only if our stock price appreciates.

Provisions in the Delaware Revised Statutes and our Bylaws could make it very difficult for an investor to bring any legal actions against our directors or officers for violations of their fiduciary duties or could require us to pay any amounts incurred by our directors or officers in any such actions.

Members of our board of directors and our officers will have no liability for breaches of their fiduciary duty of care as a director or officer, except in limited circumstances, pursuant to provisions in the Delaware Revised Statutes and our Bylaws as authorized by the Delaware Revised Statutes. Specifically, Section 78.138 of the Delaware Revised Statutes provides that a director or officer is not individually liable to the company or its shareholders or creditors for any damages as a result of any act or failure to act in his or her capacity as a director or officer unless it is proven that (1) the director's or officer's act or failure to act constituted a breach of his or her fiduciary duties as a director or officer and (2) his or her breach of those duties involved intentional misconduct, fraud or a knowing violation of law. This provision is intended to afford directors' and officers' protection against and to limit their potential liability for monetary damages resulting from suits alleging a breach of the duty of care by a director or officer. Accordingly, you may be unable to prevail in a legal action against our directors or officers even if they have breached their fiduciary duty of care. In addition, our Bylaws allow us to indemnify our directors and officers from and against

any and all costs,

	<i># Of Shares</i>	<i>Total Proceeds</i>	<i>Net Proceeds</i>

charges and expenses resulting from their acting in such capacities with us. This means that if you were able to enforce an action against our directors or officers, in all likelihood, we would be required to pay any expenses they incurred in defending the lawsuit and any judgment or settlement they otherwise would be required to pay. Accordingly, our indemnification obligations could divert needed financial resources and may adversely affect our business, financial conditions, results of operations and cash flows, and adversely affect prevailing market prices for our common stock.

Management has broad discretion as to the use of proceeds. The net proceeds from this Securities Offering will be used for the purposes described under “USE OF PROCEEDS.” The Company reserves the right to use the funds obtained from this Offering for other similar purposes not presently contemplated, which it deems to be in the best interests of the Company in order to address changed circumstances or opportunities. This poses a risk to an investor should they be relying on current use of proceeds forecasts for the investment as business conditions may require a change of the use of these funds.

Public health epidemics or outbreaks could adversely impact our business. In December 2019, a novel strain of coronavirus (COVID-19) emerged in Wuhan, Hubei Province, China. While initially the outbreak was largely concentrated in China and caused significant disruptions to its economy, it has now spread to several other countries and infections have been reported globally. The extent to which the coronavirus impacts our operations will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the duration of the outbreak, new information which may emerge concerning the severity of the coronavirus and the actions to contain the coronavirus or treat its impact, among others. In particular, the continued spread of the coronavirus globally could adversely impact our operations, and could have an adverse impact on our business and our financial results.

If we make mistakes or have unforeseen things happen to us, our suppliers, partners, vendors, etc, or the world, we can make little or no profit and can be driven out of business.

THE BOTTOM LINE:

Investment in the securities of smaller companies can involve greater risk than is generally associated with investment in larger, more established companies. All investments can result in significant or total loss of your loan and/or investment. If we do well, the stock should do well also, yet life offers no guarantees and neither can we. If we make mistakes or have unforeseen things happen to us, our suppliers or the world, we can make little or no profit and can be driven out of business. We cannot guarantee success, return on investment, or repayment of loans.

of profits. By establishing generous reserves for future expenses, paying a salary to herself or her relatives at the high range of what is reasonable, pre-paying expenses, investing in new business or new equipment, leasing expensive cars, etc., a majority owner can spend enough that there are rarely any profits to be distributed. So long as the expenses are not grossly unreasonable, the investor, probably, won't be able to force the company to allow you to share in any of the current income of the company.

No right to participate in any management decisions of the company. The majority owner may make a decision that the investor thinks is bad and puts your interest in the company at risk. The investor may see the majority owner running the company into the ground. The investor can try to convince him that it is the wrong decision, but he doesn't have to take your calls.

The investor has limited rights, if any, to have your interest bought out. You may want to cash out your interest and do other things with the money. State law may give you the right to force the company to buy you out, but these rights are limited.

While the investor would be entitled to a share of any profits on sale of the entire business, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

15. What are the risks to purchasers associated with corporate actions including:

- **Additional issuances of securities:**

Following the investor's investment in the Company, the Company may sell interest to additional investors, which will dilute the percentage interest of the investor in the Company. The Investor might have the opportunity to increase its investment in the Company in such a transaction, but such opportunity cannot be assured. The amount of additional capital needed by the Company, if any, will depend upon the maturity and the objectives of the Company.

- **Issuer repurchases of securities:**

The company may have the authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the investor to sell its securities to the Company concurrently.

- **A sale of the issuer or of assets of the issuer:**

As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders.

- **Transactions with related parties:**

The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and the Board of Directors of the Company will be guided by their good faith judgment as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its shareholders. By acquiring and interest in the company, the investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

NOTE 1 - ORGANIZATION AND BUSINESS BACKGROUND

This summary of accounting policies for Pegasus Tel, Inc. is presented to assist in understanding the Company's financial statements. The accounting policies conform to generally accepted accounting principles and have been consistently applied in the preparation of the financial statements.

Basis of Presentation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Management further acknowledges that it is solely responsible for adopting sound accounting practices, establishing, and maintaining a system of internal accounting control and preventing and detecting fraud. The Company's system of internal accounting control is designed to assure, among other items, that 1) recorded transactions are valid; 2) valid transactions are recorded; and 3) transactions are recorded in the proper period in a timely manner to produce financial statements which present fairly the financial condition, results of operations and cash flows of the Company for the respective periods being presented

Nature of Operations and Going Concern

The accompanying financial statements have been prepared based on accounting principles applicable to a "going concern", which assume that Pegasus Tel., Inc. (hereto referred to as the "Company") will continue in operation for at least one year and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The Company has no revenues and requires additional financing in order to finance its business activities on an ongoing basis. The Company is actively pursuing alternative financing and has had discussions with various third parties, although no firm commitments have been obtained. In the interim, shareholders of the Company have committed to meeting its operating expenses. Management believes that actions presently being taken to revise the Company's operating and financial requirements provide them with the opportunity to continue as a "going concern".

PEGASUS TEL, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

NOTE 1 - ORGANIZATION AND BUSINESS BACKGROUND Continued

These financial statements do not reflect adjustments that would be necessary if the Company were unable to continue as a “going concern”. While management believes that the actions already taken or planned, will mitigate the adverse conditions and events which raise doubt about the validity of the “going concern” assumption used in preparing these financial statements, there can be no assurance that these actions will be successful.

If the Company were unable to continue as a “going concern,” then substantial adjustments would be necessary to the carrying values of assets, the reported amounts of its liabilities, the reported revenues and expenses, and the balance sheet classifications used.

On March 21, 2012, the Company signed an acquisition agreement with Total-Invest International B.V. (sole owner of Blue Bull Ventures B.V.) to buy 100% of the outstanding stock of Blue Bull Ventures B.V. In consideration for 100% of the issued and outstanding capital stock of Blue Bull Ventures B.V. the Company issued 2,436,453 series D preferred shares.

On August 2, 2021, the Company signed an Agreement to acquire Fortuna Ragazzi, B.V. as filed with the Netherland Chamber of Commerce, CCI number 81872704 on February 2, 2021. Fortuna Ragazzi is in the process of acquiring restaurants and bars, initially in the Netherlands, and thereafter in other parts of Europe and the globally.

For accounting purposes, the shares exchange has been treated as a reverse merger since the acquired entity now forms the basis for operations and the transaction resulted in a change of control. Accordingly, a new reporting entity was created and Blue Bull Ventures B.V. is treated as the successor issuer for reporting purposes. The accompanying financial statements have been prepared to reflect the assets, liabilities and operations of Blue Bull Ventures and Pegasus Tel, Inc. For equity purposes, the shares issued to acquire Blue Bull Ventures (2,436,453 series D preferred shares) have been shown to be issued and outstanding since inception, with the previous outstanding (3,510,496,677 common shares and 1,000,000 series C preferred shares) treated as a new issuance as of the date of the merger. The additional paid-in capital and retained deficit shown are those of the new reporting entity.

Organization and Basis of Presentation

On February 19, 2002, Pegasus Tel, Inc., a Delaware company, was formed as a wholly owned subsidiary of American Industries.

NOTE 1 - ORGANIZATION AND BUSINESS BACKGROUND Continued

On March 28, 2002, American Industries, Inc. and Pegasus Tel, Inc. entered into an agreement with Pegasus Communications, Inc., a New York corporation, to acquire 100% of the outstanding shares of Pegasus Communications, Inc. in exchange for 72,721,966 shares of common stock of American Industries, Inc. Pegasus Tel, Inc. continued as the surviving corporation and Pegasus Communications, Inc. was merged out of existence.

On March 21, 2012 the Company consummated an acquisition agreement to purchase 100% of the outstanding shares of Blue Bull Ventures B.V. for the issuance of 2,436,453 shares of preferred stock series D (referenced in note 10).

On August 2, 2021, the Company signed an Agreement to acquire Fortuna Ragazzi, B.V. as filed with the Netherland Chamber of Commerce, CCI number 81872704 on February 2, 2021. Fortuna Ragazzi is in the process of acquiring restaurants and bars, initially in the Netherlands, and thereafter in other parts of Europe and the globally.

The Company is in the development stage and has not commenced planned principal operations. The Company has a December 31 year end.

Going Concern

These unaudited consolidated financial statements have been prepared on a going concern basis, which implies that the Company will continue to realize its assets and discharge its liabilities in the normal course of business. The Company has generated no revenues to date and has never paid any dividends and is unlikely to pay dividends or generate significant earnings in the immediate or foreseeable future. As of December 31, 2020, the Company had no revenues and an accumulated deficit of \$374,094. The continuation of the Company as a going concern is dependent upon the continued financial support from its shareholders, the ability to raise equity or debt financing, and the attainment of profitable operations from the Company's future business. These factors raise substantial doubt regarding the Company's ability to continue as a going concern for a period of one year from the issuance of these consolidated financial statements. These financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of presentation

These accompanying unaudited consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (“US GAAP”).

Basis of consolidation

The unaudited consolidated financial statements include the financial statements of Pegasus Tel, Inc.

Use of estimates

The preparation of the financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates. These estimates and assumptions include valuing equity securities issued in share-based payment arrangements, determining the fair value of our common stock, the collectability of accounts receivable and deferred taxes and related valuation allowances. Certain of our estimates, including evaluating the collectability of accounts receivable, could be affected by external conditions, including those unique to our industry, and general economic conditions. It is possible that these external factors could have an effect on our estimates that could cause actual results to differ from our estimates. We re-evaluate all of our accounting estimates at least quarterly based on these conditions and record adjustments when necessary.

Accounts receivable and allowance for doubtful accounts

Accounts receivable consists of amounts due from customers. The Company extends unsecured credit to its customers in the ordinary course of business but mitigates the associated risks by performing credit checks and actively pursuing past due accounts. An allowance for doubtful accounts is established and determined based on management’s assessment of known requirements, aging of receivables, payment history, the customer’s current credit worthiness and the economic environment.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

Inventories

Inventories include direct materials, labor and factory overhead and are stated at lower of cost or market value, cost being determined on a first-in, first-out basis. The Company periodically reviews historical sales activity to determine excess, slow-moving items and potentially obsolete items and also evaluates the impact of any anticipated changes in future demand. The Company provides inventory allowances based on excess and obsolete inventories.

Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation is calculated on the straight-line basis over the following expected useful lives from the date on which they become fully operational and after taking into account their estimated residual values. Property, plant and equipment are depreciated over their estimated useful lives as follows:

Depreciable life

Buildings	6-50
years Plant and machinery	10 years
Office equipment	7 years
Motor vehicles	7 years
Computer equipment	3 years

Goodwill and intangible assets

We account for business combinations in accordance with current authoritative guidance, which requires that the acquisition method of accounting be used for all business combinations. It requires intangible assets acquired in a business combination to be recognized and reported separately from goodwill.

Furthermore, it requires purchased intangible assets other than goodwill to be amortized over their useful lives unless these lives are determined to be indefinite. No impairment of intangibles has been identified since the date of acquisition.

Goodwill represents the cost of the acquired businesses in excess of the fair value of identifiable tangible and intangible net assets purchased. The company generally seeks the assistance of independent valuation experts in determining the fair value of the identifiable tangible and intangible net assets of the acquired business.

PEGASUS TEL, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

We test goodwill for impairment on an annual basis. In this process, we rely on a number of factors including operating results, business plans and future cash flows. Recoverability of goodwill is evaluated using a two-step process. The first step involves a comparison of the fair value of a reporting unit with its carrying value. If the carrying amount of the reporting unit exceeds its fair value, the second step of the process involves a comparison of the fair value and carrying value of the goodwill of that reporting unit. If the carrying value of the goodwill of a reporting unit exceeds the fair value of that goodwill, an impairment loss is recognized in an amount equal to the excess. Goodwill of a reporting unit will be tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of the reporting unit below its carrying amount.

We evaluate intangible assets for recoverability whenever events or changes in circumstances indicate that their carrying amounts may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted net cash flows expected to be generated by the asset. If these assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying value of the assets exceeds the fair value of the assets. In the opinion of management, there was no impairment for the year ended December 31, 2020.

Impairment of long-lived assets

Long-lived assets and certain identifiable intangible assets held and used by the Company are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is evaluated by a comparison of the carrying amount of assets to estimated undiscounted net cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amounts of the assets exceed the fair value of the assets. In the opinion of management, there has been no impairment for the year ended December 31, 2020.

Investments

The Company accounts for non-marketable investments using the equity method of accounting if the investment gives us the ability to exercise significant influence over, but not control of, an investee. Significant influence generally exists if the Company has an ownership interest representing between 20% and 50% of the voting stock of the investee. Under the equity method of accounting, investments are stated at initial cost and are adjusted for subsequent additional investments and our proportionate share of earnings or losses and distributions. The Company records its share of the investee's earnings or losses in earnings (losses) from unconsolidated

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

entities, net of income taxes in the accompanying consolidated statements of operations. The Company evaluates its equity method investment for impairment when events or changes in circumstances indicate, in management's judgment, that the carrying value of such investment may have experienced other than temporary decline in value. When evidence of loss in value has occurred, management compares the estimated fair value of the investment to the carrying value of the investment to determine whether an impairment has occurred. If the estimated fair value is less than the carrying value and management considers the decline in value to be other than temporary value, the excess of the carrying value over the estimated fair value is recognized in the financial statements as an impairment. In the opinion of management, there was no impairment for the year ended December 31, 2020.

Deferred income taxes

We use the asset and liability method of accounting for income taxes in accordance with ASC Topic 740, "Income Taxes." Under this method, income tax expense is recognized for the amount of: (i) taxes payable or refundable for the current year and (ii) deferred tax consequences of temporary differences resulting from matters that have been recognized in an entity's financial statements or tax returns. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of operations in the period that includes the enactment date. A valuation allowance is provided to reduce the deferred tax assets reported if based on the weight of the available positive and negative evidence, it is more likely than not some portion or all of the deferred tax assets will not be realized.

ASC Topic 740.10.30 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. ASC Topic 740.10.40 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition. We have no material uncertain tax positions for any of the reporting periods presented.

Net income per share

Basic net income per share is computed by dividing the net income by the weighted-average number of common shares outstanding during the period. Diluted income per share is computed similar to basic income per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common stock equivalents had been issued and if the additional common shares were dilutive.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES Continued

Stock-Based Compensation

We recognize compensation expense for stock-based compensation in accordance with ASC Topic 718. For employee stock-based awards, we calculate the fair value of the award on the date of grant using the Black-Scholes method for stock options and the quoted price of our common stock for unrestricted shares; the expense is recognized over the service period for awards expected to vest. For non-employee stock-based awards, we calculate the fair value of the award on the date of grant in the same manner as employee awards, however, the awards are revalued at the end of each reporting period and the pro rata compensation expense is adjusted accordingly until such time the nonemployee award is fully vested, at which time the total compensation recognized to date equals the fair value of the stock-based award as calculated on the measurement date, which is the date at which the award recipient's performance is complete. The estimation of stock-based awards that will ultimately vest requires judgment, and to the extent actual results or updated estimates differ from original estimates, such amounts are recorded as a cumulative adjustment in the period estimates are revised. We consider many factors when estimating expected forfeitures, including types of awards, employee class, and historical experience.

Fair value of financial instruments

We have adopted the provisions of ASC Topic 820, "Fair Value Measurements and Disclosures", which defines fair value as used in numerous accounting pronouncements, establishes a framework for measuring fair value and expands disclosure of fair value measurements.

The estimated fair value of certain financial instruments, including cash and cash equivalents, accounts receivable, accounts payable and accrued expenses are carried at historical cost basis, which approximates fair values because of the short-term maturing of these instruments. The carrying amounts of our short- and long-term credit obligations approximate fair value because the effective yields on these obligations, which include contractual interest rates which are comparable to rates of returns for instruments of similar credit risk and because of the short-term maturity of these instruments.

ASC 820 defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. ASC 820 also establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 describes three levels of inputs that may be used to measure fair value:

Level 1 – quoted prices in active markets for identical assets or liabilities.

Level 2 – quoted prices for similar assets and liabilities in active markets or inputs that are observable

Level 3 – inputs that are unobservable (for example cash flow modeling inputs based on assumptions)

2. SUBSEQUENT EVENTS

On August 2, 2021, the Company signed an Agreement to acquire Fortuna Ragazzi, B.V. as filed with the Netherland Chamber of Commerce, CCI number 81872704 on February 2, 2021.
