OUR DESIGNS

At UNYQ, we do individuality. We create prosthetic covers that protect you or reflect you, mentally and physically.

We've unlocked the power of choice. Our design process enables innovative and individuality in every object we create. In a sense you have made it yourself!

CAMELLIA

2020 NEW DESIGNS

It's all in the details.

Strong and shining like diamonds, elegant like flowers and butterflies.

Intense or delicate, it just depend on the colors you play with. The details of combining coloured lines with a base color open your possibilities to the fullest.

01

FOR ALL

We design protective covers for almost all the prosthetic components on the market, including lower and upper extremity. Our covers are available for above and below knee amputees, including bilaterals, Genium X3 knee, osseointegration and polycentric knees, using different solutions to avoid interference with functionality.

the U

U, our basic design, is a blank canvas to start creating your own style. Plain or metallic colors, carbon, denim, skintones, matt or glossy... infinite options to choose from to design your very own cover. Adding an engrave or vinyl will give you the personal touch to make it even more yours!

A COVER THAT WRAPS YOUR LEG

Our protective covers really cover your prosthesis. Designed in 2 pieces/parts, they don't let the back part open, unlike others, so you have the power to choose whether you want to show your prosthesis.

02

RIBBONS

RIVET

TROOPER

03

PROTECTION

Like a bumper of a car, our covers protect your expensive prosthetic components from damage. They also avoid clothes being pinched or get caught in your prosthetic components.

04

TRULY PERSONALIZED

Why do we need photos and measurements? Because our covers are not standard or semi-standard size. Each of them is designed specifically for each person, combining the fitting to their prosthetic components in order to have the best symmetry with the sound leg.

STYLE

05

Not only functionality, now it's time to give style to your prosthesis and express your personality! Combine your favourite design with the colors of your choice, and include extras, as vinyls or engraved images, to create your own UNYQ style.

ATLANTIS

06

HIGH QUALITY FINISHING

Our 3D printing process, together with a handmade post-processing and painting, gives to our UNYQ covers the highest quality finishing. Our colors don't stain or transfer onto clothes and the smooth surface allows a quick and easy cleaning of the cover.

07

EASY FITTING

Fit your cover in just a few seconds! The front part of our covers attaches safely and quickly to the pylon of the prosthesis with our Fast-Clamp, while the rear part of the cover is connected to it with strong magnets in just a 'click'. The easy fitting allows you to easily access your prosthetic components to charge knees, feet, to clean them or just to change your style!

FLOW

WATER RESISTANT

Our covers are water resistant. Just make sure that your prosthesis is water resistant too and that you clean and dry everything afterwards. If you like swimming with your cover on, we recommend the attachment option with screws.

ODISSEY

AMBRA

VITTRA

09

LIGHTWEIGHT

Our covers are 3D printed in a lightweight material (polyamide): they don't add too much weight to the prosthesis (usually less than 500 gr, depending on the design and anatomy of the user).

The final result is a hard plastic protector that stays dimensionally stable over time, not changing its shape with use, unlike stockings or silicone cosmetics.

WAVE

10

ADJUSTED TO YOUR PROSTHESIS

Knee, foot, socket, length, alignment... each prosthetic combination is completely different from the other. Our designers work on each cover one by one, so that each one goes specifically with a prosthesis. The result? The adjustment is perfect and you don't need to adapt it by yourself. We take care of everything so you just receive it ready to wear!

FLORAL

HERRINGBONE

SAFE AND STEADY

Our Fast-clamp fitting system has been developed in order for our covers to stay fixed on the prosthesis so that they don't flap around. No need to worry! But in case you want to be even more cautious, we offer the option of a clamp attachment with screws.

11

AND MORE...

Choose your EXTRAS

Vinyl

To customize even more your own cover. Whether you choose a vinyl in colors or an engrave with your name or a detail, it will give your cover a personal touch.

Engrave

Knee protector

For those who usually kneel down with their covers on, the knee protector is the best option to keep that part safe from scratches.

Magnets & Fast-clamp or Screws & C-clamp

Our covers are attached to the prosthesis with magnets and our easy fast-clamp system by default. You can choose Screws & C-Clamp instead for even safer attachment.

Your CUSTOM design

'Like no other' expresses what we aim for. Customization is in our DNA, and this is why we are eager to work with you on creating a special design of your taste, with your inspiration and preferences. Just let flow your imagination and we'll make it real! These are just some examples...

UNYQ for **EVERYONE**

3D STUDIO

'Because we are all UNYQ' doesn't apply anymore to just prosthetic users! UNYQ is much more than just prosthetic wears.

Our brand new 3D Studio came to life to bring style and uniqueness to the orthotic community. 3D printed in polyamide following our proven quality standard. They are light and resistant and now they can be a fashion accessory in your favourite design and color.

Hand orthosis, helmets... These are only a few examples of all that we can do.

You create, we make it real!

A low-angle shot of two men on an escalator. The man on the left is wearing a pink t-shirt and dark shorts, and has a prosthetic leg. The man on the right is wearing a white t-shirt and denim shorts, and has a prosthetic leg. They are both smiling and looking towards the camera. The background is a modern building with a glass and metal facade.

A UNYQ[®] REBELLION

UNYQ is about more than our wears.

We're a philosophy – a way of life.

Together, we're a community
with bravery and rebellion at its core.

We laugh in the face of normal.
