GORGE TRAINING FACILITY, LLC
\$100,000 in Senior Secured Promissory Notes
\$1,000.00 per Note

SUMMARY

The following summary is qualified in its entirety by the detailed information appearing elsewhere in this investment memorandum. See "Risk Factors" for information to be considered by prospective investors.

Gorge Training Facility, LLC, an Oregon limited liability company ("Issuer"), is issuing \$100,000 in construction bonds ("Bonds") to partially finance the construction of a single-turbine 2.3 MW wind energy project outside of Arlington Oregon (the "Project"). Proceeds from the offering will be used to pay for a portion of the foundation works for the Project, consisting of highly engineered precast post-tensioned concrete beams and anchors (the "Foundation") designed and installed by RUTE Foundation Systems, Inc., which is also the sponsor of the Issuer. The Bonds, which will pay 10% simple accruing interest, will be secured by the Foundation.

When constructed, the Project will serve as an educational resource, training both professional and secondary students about servicing, maintaining, and operating wind energy equipment. This training will be conducted by both county and state agencies, as well as the Columbia Gorge Community College. The Project will also serve as a showcase for RUTE's innovative precast wind turbine foundation technology.

RISK FACTORS

For purposes of this section, the terms "we," "us," and "our" refer to the Company, and the term "you" refers to Purchaser. You are urged to consider carefully, with your advisers, all of the risks described below before deciding whether to purchase the Note. Each of the risks identified below could have a material adverse effect on your investment in the Note and may result in the loss of your entire investment.

Nothing contained in these Risk Factors is or may be relied on as a promise or representation as to any future performance or event. These Risk Factors speak only as of the date of this Agreement, and we have no duty to update these Risk Factors. These Risk Factors do not purport to contain all information that might be required to evaluate your decision to purchase the Note, and you must conduct your own independent analysis.

These Risk Factors contain forward-looking statements that are based on our expectations, assumptions, estimates, and projections about our business and its future. These forwardlooking statements involve risks and uncertainties that could cause actual results to differ materially from those described in these Risk Factors. In addition to the risks specifically identified in these Risk Factors, we may face additional risks and uncertainties not presently known to us or that we currently deem immaterial, which risks or uncertainties may ultimately have a material adverse effect on your investment.

No person has been authorized to give any information or to make any representation other than those contained in this memorandum. You should not rely on any information or representations other than those contained in this offering statement.

Company Risks

1. We have a limited operating history. Our business is recently formed and has a limited operating history. We face the general risks associated with any new business operating in a competitive industry, including the ability to fund our operations from unpredictable

cash flow and capital-raising transactions. There can be no assurance that we will achieve our anticipated investment objectives or operate profitably.

2. Our ability to repay the Note is dependent on the success of the Project. We will be able to repay the Note in full only if development of the Project occurs, which is dependent on the Company securing additional funds for construction. There is no certainty that the Company will be able to secure such funds.

3. We have no financial statements. We currently have no actual financial statements. Consequently, your ability to assess our financial condition, our results of operations, and our cash flow is severely limited. We encourage you to consult with your legal and financial advisors to determine whether you have sufficient financial information to evaluate the merits and risks of purchasing the Note.

4. Any financial projections that may have been disclosed to you (in writing, orally, or otherwise) were for illustrative purposes only. Any financial projections that may have been disclosed to you, were based on a variety of estimates and assumptions which may not be realized, and are inherently subject to significant business, economic, legal, regulatory, and competitive uncertainties, most of which are beyond our control. There can be no assurance that any projections that may have been disclosed to you will be realized, and actual results may differ materially from such projections.

5. We will need to raise additional financing. Our ability to implement our business plan will depend on our ability to obtain additional financing in the future. We intend to borrow additional funds from persons on terms that are substantially similar to the terms of the Note, as well as raising additional funds through the issuance of equity and senior debt. However, we cannot assure you that we will be able to do this or that additional financing will be available on terms favorable to us. If adequate funds are not available on acceptable terms, our ability to continue and grow our businesses would be dependent on the cash from your loan and on the cash flow, if any, from our operations, which may not be sufficient.

6. We may not generate sufficient cash flow to make payments to you. There is no assurance that we will ever have income sufficient to cover our expenses and repay you. Your rights under the Note are secured, but you will be responsible for working with the Collateral Agent to collect the Collateral.

7. Our success depends on the skills and expertise of Douglas Krause ("Executive Team"). Our success substantially depends on the skills, talents, abilities, and continued services of the Executive Team. There is no guarantee that Executive Team will manage our business successfully. We do not carry life or disability insurance on the Executive Team. The loss of the services of the Executive Team, for any reason, may have a material adverse effect on your investment.

8. You will not have any right to control management. You will be a creditor of the Company without any right to control the management of the Company. Douglas Krause, in his capacities as our manager, President and CEO, will have complete control over all of the decisions related to our business. Mr. Krause could cause the Company to take actions over your objections. Additionally, Mr. Krause will not be obligated to cause the Company to pursue any alternative course of action that may be suggested or advocated by you.

9. There will be significant restrictions on your ability to assign the Note. The Note is nonnegotiable, and you may not assign the Note to any person. Additionally, federal and state securities laws may place additional restrictions on your ability to transfer your units. Because of these restrictions, you may be unable to liquidate your investment in the event of an emergency or for any other reason. As a result, you should purchase the Note only if you are prepared to hold the Note for an indefinite period of time, or at least until the

maturity date of the Note.

10. This memorandum has not been reviewed or approved by the government. No government agency or authority has reviewed or approved this Agreement or any of the documents provided to you relating to this memorandum, including these Risk Factors. Further, no government agency or authority will review or approve any of the documents provided to you if the Note is converted into units of the Company. You are expected to conduct your own review and analysis before deciding whether to purchase the Note.

11. An investment in the Note has tax consequences. The tax consequences of purchasing the Notes may vary depending on your particular tax situation. We strongly encourage you to consult with your legal and tax advisors to determine the tax implications of purchasing the Note.

OFFERING

Gorge Training Facility, LLC (the “Issuer”) is issuing \$100,000 in Senior Secured Notes (each, a “Note”) in denominations of \$1,000 (the “Offering”). Proceeds from the Offering will be used to pay for approximately one-third of the cost of the foundation works (the “Foundation”) required for the erection and operation of a single 2.3 megawatt wind turbine generator.

The principal balance on the Notes will accrue simple interest at a rate of ten percent per annum until the maturity date, which is the earlier of (a) the second anniversary of the date on which the offering closes or (b) a change of control of the Issuer (the “Maturity Date”). For example, if you were to purchase \$1,000 worth of Notes, on the second anniversary of the date on which your investment goes to the Issuer, the Issuer would pay you \$1,200. If the Issuer is acquired by another company, you would be paid your principal plus the interest that has accrued up to the sale date.

The Notes will be secured by a first position lien on the Foundation, which (unlike traditional wind turbine foundations) can be removed and reused. This means if the Issuer does not pay you the amount due under the Note, you have a right to possession of a portion of the Foundation, and you can require its removal unless you get paid.

ABOUT THE ISSUER

The Issuer is a limited liability company organized under the laws of the State of Oregon, and was formed for the sole purpose of financing the Project, as hereinafter defined.

The Issuer is:

- Organized under, and subject to, the laws of a State or territory of the United States or the District of Columbia.
- Not subject to the requirement to file reports pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934.
- Not an investment company registered or required to be registered under the Investment Company Act of 1940.
- Not ineligible to rely on this exemption under Section 4(a)(6) of the Securities Act as a result of a disqualification specified in Rule 503(a) of Regulation Crowdfunding.
- Has filed with the Commission and provided to investors, to the extent required, the ongoing annual reports required by Regulation Crowdfunding during the two years immediately preceding the filing of this offering statement (or for such shorter period that the issuer was required to file such reports).
- Not a development stage company that (a) has no specific business plan or (b) has indicated that its business plan is to engage in a merger or acquisition with an unidentified company or companies.

Neither the Issuer nor any of its predecessors has previously failed to comply with the ongoing reporting requirements of Rule 202 of Regulation Crowdfunding.

The Issuer's Manager is Doug Krause, who is also the owner of the Issuer. Mr. Krause has 25 years of venture relevant experience in wind farm development, precast manufacturing, and heavy construction. He is now applying these skills to a de novo entrepreneurial firm, RUTE Foundations, to bring to market a superior, patented concrete foundation system for the wind industry. BSE University of Michigan, Mechanical Engineering..

USE OF PROCEEDS

Proceeds from the offering will be used to pay for a portion of the foundation works for the Project, consisting of highly engineered precast post-tensioned concrete beams and anchors (the "Foundation") designed and installed by the Sponsor. Repayment of the Notes, which pay 10% simple accruing interest, will be secured by the Foundation.

When constructed, the Project will serve as an educational resource, training both professional and secondary students about servicing, maintaining, and operating wind energy equipment. This training will be conducted by both county and state agencies, as well as the Columbia Gorge Community College. The Project will also serve as a showcase for RUTE's innovative precast wind turbine foundation technology.

The Issuer will use the proceeds to build a live showroom to demonstrate and validate RUTE design. Revenues to support at least two regional career technology education teachers.

ABOUT THE PROJECT

GTF will serve many purposes. First and foremost, it will serve as a much-needed resource for technical and secondary students to learn about servicing, maintaining, and operating modern wind energy equipment. This training will be conducted by programs implemented by both Gilliam County and the Columbia Gorge Community College's wind technician program.

Because the Project is located in the heart of wind energy country in Oregon, local students can receive state of the art training and be able to secure a job locally, allowing them to remain in their community. Second, the Project will serve as a demonstration center for RUTE's innovative foundation technology. It is the first foundation that can be fully removed economically, thereby enabling full restoration of the ground upon decommissioning of the wind turbine. Last, it will provide cost-effective wind energy to customers in eastern Oregon.

ABOUT THE SPONSOR

RUTE, an Oregon corporation, which is the sole member of the Sponsor, designs and installs wind turbine generator foundations using its patent pending technology. Based on bridge engineering, RUTE's technology combines a precast, post-tensioned concrete beam and hub assembly with site specific anchors. The result is a cost-effective foundation that is delivered on-site and ready in days rather than months. RUTE will contract with GTF for the sale of the Foundation.
