Business Overview

Twenty-six states and the District of Columbia currently have laws broadly legalizing Cannabis in some form. Three other states will soon join them after recently passing measures permitting use of medical Cannabis.

These developments create a multitude of new opportunities—not only for businesses that produce, distribute, and sell Cannabis, but also for those who provide services to these businesses, as well as practitioners and caregivers. With large communities comes the need to use technology to connect, inform, and transform them. Technology is playing an increasingly important role in the marijuana world, especially when it comes to connecting doctors with patients and patients with reliable medicine. Considering the rapid growth of the legal marijuana industry in the US which easily topped \$6 billion in sales last year and the fact that public support for legal Cannabis is at an all-time high, we felt it was time to harness the significant breadth of knowledge of this sizable community. The idea perfectly marries our passions for "the people's plant" and educating the public about this incredible font of medicinal healing.

The Healing Budz app covers a spectrum that includes everything from social interactions to education. The excitement around the cannabis industry means there are quite a few pot-related mobile app options out there, but none are like Healing Budz; a broad platform with a lot of options wrapped in an easy-to-use interface and with an unwavering focus on the users experience.

.

We need to raise capital to position ourselves in this industry as one of the leaders. It is important to be one of the first in and one of the few who are adequately funded. Our focus will be to get the word out to people everywhere that Healing Budz exists and is here to help. .

The Company must secure investor commitments that equal or exceed the minimum target amount for the Offering prior to the applicable closing date, or the Offering will be canceled and investor funds committed in connection with the Offering will be returned. An investor commitment is conditional after being made, but only up until the time that is 48 hours before the applicable closing date. For the 48-hour period prior to the applicable closing date, investor commitments may not be cancelled by the investor but in certain circumstances may still be returned (e.g. if the target minimum amount is not met). As a reminder, investors are required to reconfirm their investment commitment after receiving notice of a material change to the Offering. USE OF PROCEEDS

The Company intends to apply the proceeds of this Offering substantially as set forth herein, subject to reallocation by management as it deems in the best interests of the Company. The actual use of proceeds of this Offering is subject to the discretion of management and the board of directors, and may include general corporate purposes.

Our Target Offering of \$10,000 will net \$4,400 after expenses. Every effort will be made to minimize these expenses. The only existing contract covers the Commissions and Broker Expenses with GrowthFountain Capital, LLC. The legal, marketing and administrative costs are estimates and could be higher or lower.

The Proceeds will be used as follows:

Salaries, Benefits and Wages are estimated to be \$1,000. We try to minimize all fixed costs. There are some tasks that cannot be done by consultants and thus are done by our small staff.

Product Development of \$1,000 will be used primarily to continue development of the application.

Marketing of \$1,000 will be used primarily for web based advertising. Most of our marketing is done electronically, by word of mouth, and social media.

Operations costs of \$600 will be used to maintain our database of clients and

FORM C Offering Material for

legal/accounting procedures.

Travel, Conference and Events will cost \$800. We prospect through small meetings in facilities appropriate to the audience.

Our Maximum Offering of \$1,000,000 will net \$910,000 after expenses. Every effort will be made to minimize these expenses. The only existing contract covers the Commissions and Broker Expenses with GrowthFountain Capital, LLC. The legal, marketing and administrative costs are estimates and could be higher or lower but are proportionally lower than the Target cost because of economies of scale.

The Proceeds will be used as follows:

Salaries, Benefits and Wages are estimated to be \$185,000. We try to minimize all fixed costs. Some tasks cannot be done by consultants and thus are done by our growing staff.

Product Development of \$52000 will be used primarily to continue development of the application. We will have more products to sell.

Marketing of \$535000 will be used primarily for web based advertising. Most of our marketing is done electronically, by word of mouth, and social media. This cost has increased over the Target Offering cost because of a significant volume cost. It has enjoyed economy of scale savings.

Operations costs of \$98000 will be used to maintain our database of clients and legal/accounting procedures.

Travel, Conference and Events will cost \$40,000. We continue to prospect through meetings in facilities appropriate to the audience but the meetings will be larger with an increased frequency.

All expense items with the exception of Commissions and Brokerage Fees are variable and based on our best estimate

The following table reflects our anticipated estimated use of proceeds:

Results of Operations

The following is a description of the financial condition of the Company, including any items that have had a material impact on the Company, for each year when financial statements are provided. This discussion also includes an identification of any known material changes or trends in the financial condition and results of operations of the Company during any time period subsequent to the period for which financial statements are provided.

Healing Budz, Inc has a desire and need to maintain large amounts of liquid and near liquid assets. As a startup company, we are subject to close scrutiny to our customers. Our liquidity position will to some extent determine the amount of business we can do. We start business with sufficient liquidity to begin a profitable business. The CF raise should put us in a position to do over \$4 million in sales during the first year.

Material Indebtedness

The Company has indicated that it has no outstanding material indebtedness.

Previous Issuer Offerings

The Company has indicated that it has not conducted any prior exempt offerings in the past three years.

Financial Statements

The issuer's financial statements are attached as Exhibit B.

For an offering conducted in the first 120 days of a fiscal year, the financial statements provided may be for the two fiscal years prior to the issuer's most recently completed fiscal year; however, financial statements for the two most recently completed fiscal years must be provided if they are otherwise available. If more than 120 days have passed since the end of the issuer's most recently completed fiscal year, the financial statements provided must be for the issuer's two most recently completed fiscal years.

CROWDFUNDING RISK FACTORS

An investment in the Company's securities involves substantial risk. Prospective investors should carefully consider the risk factors referred to in this Material. An investor should not

FORM C Offering Material for

Healing Budz, Inc as Issuer

invest any funds in the Offering unless he or she can afford to lose his or her entire investment. In making an investment decision, investors must rely on their own examination of the Company and the terms of the Offering, including the merits and risks involved. The Shares have not been recommended or reviewed by any federal or state securities commission or regulatory authority. There is no ready market for the sale of the Shares and it may be difficult or impossible for an investor to sell or otherwise dispose of the Shares.

Risks from Relying on Issuer Supplied Information

There is the risk that some of the information supplied by the Company may be inaccurate. The management of the Company has provided all of the information stated in this Material without any third party verifying or investigating such information. The Company makes no express or implied representation or warranty as to the completeness of this information or, in the case of projections, estimates, future plans, or forward looking assumptions or statements, as to their attainability or the accuracy and completeness of the assumptions from which they are derived. It is expected that each prospective investor will pursue their own independent investigation. Forward-looking statements are subject to certain risks, trends and uncertainties that could cause actual results to differ materially from those projected.

Risks as a Minority Holder

Purchasers of a minority ownership have risks relating to limited control, limited information and limited rights. Minority owners have no control over the marketability and value of their purchased securities and they may be required to hold onto their minority ownership position for an indefinite period. Additionally, minority owners must address the following risks:

Minority owners have no right to participate in any management decisions of the Company or the day-to-day operations. There is the risk that the majority owners make decisions or take actions that a minority owner thinks is bad for the Company. A minority owner has limited ability to influence the governance and operations of a Company.

Minority owners have limited rights to information beyond those filings that are required by law to be made available. There is the risk that minority owners may be denied immediate information about the Company's performance or corporate affairs.

Minority owners have limited rights, if any, to demand current distributions from an operating business. Majority owners likely have the right and power to avoid making any distributions of profits at their discretion. There is also the risk that the management of the

FORM C Offering Material for

Healing Budz, Inc as Issuer

Company pursues a spending plan that causes the Company not to generate any profits to be distributed.

Minority owners have limited rights, if any, to have their interest bought out. There is the risk that a minority owner will want to sell their interest and they will have no right to force the Company to buy them out. There will also be liquidity risk if there is no secondary market for the Company's securities.

Minority owners have limited input into fundamental corporate changes such as sale of the Company. There is a risk that a sale could be structured in a way to avoid certain payouts to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

Minority owners may have interests that are different than shareholder-officers or shareholders that are part of the management team of the Company. There is the risk that minority owners perceive a conflict of interest if, for example, the managers that are shareholders receive a significant raise. Additionally, there is the risk that a minority owner will want to remove a manager or board member but have no independent power to do so.

Risks Regarding Corporate Actions

The Company may take certain corporate actions that could impact investors that purchase the Shares.

Regarding the additional issuances of securities, there is the risk that an investor has their ownership percentage diluted if, for example, the Company decides to raise additional amounts in the future. There is also the risk that an investor is excluded from the opportunity to participate in future fund-raising so that they are unable to maintain their ownership percentage.

Regarding the authorization of new securities with different rights, there is the risk that a future investor is able to obtain rights that are superior to the rights afforded to the purchasers of the security available in this offering.

To the extent that there is ever an offer to repurchase the Shares by the Company, there is the risk that investors may feel pressured to sell their Shares to the Company without fully participating in or capturing the potential increase in value of such Shares.

Regarding a sale of the Company or of assets of the Company, there is the risk that any such transaction fails to maximize the value of the Company's securities. The investor will be required to rely on the business judgement of the management team and the Board of Directors of the Company so there can be no guarantee that the investor will receive the full market value of their Shares

Regarding transactions with related parties, there is the risk that the Company is placed in a position that creates the possibility of a conflict of interest. The Company may choose to

FORM C Offering Material for

Healing Budz, Inc as Issuer

participate in transactions with affiliates and related persons, with limited disclosure required to investors.

Risks from an Investment in Securities

This Offering is being made on a conditional basis with no minimum number of Shares guaranteed to be sold. The Company has not engaged the services of an underwriter with respect to the Offering, and there is no guarantee that the minimum required amount of proceeds will be realized by the Company.

The Shares are not guaranteed or insured by any government agency or by any private party. The amount of earnings is not guaranteed and can vary with market conditions. The return of all or any portion of capital invested in the Shares is not guaranteed, and the Shares could become worthless.

Investors should be aware of the potentially long-term nature of their investment. Each purchaser of Shares will be required to represent that it is purchasing such securities for its own account for investment purposes and not with an intention to resell or distribute. Purchasers may be required to bear the economic risks of the investment for an indefinite period of time. There is currently no public market for the Company's securities. Ultimately, each investor's risk with respect to this Offering includes the potential for a complete loss of their investment.

Risks from Uncertain Capital Needs

The Company believes that the net proceeds of the Offering will be sufficient to fund the implementation of the Company's business plan, operations and growth for the foreseeable future. Nevertheless, in the event that additional capital is required, no assurance can be given that additional financing will be available at all or on terms favorable to the Company. If adequate funds were not available to satisfy either short or long-term capital requirements, the Company may be unable to continue in business, with a resulting loss of all or part of investments made by the Company's investors. Moreover, if additional equity securities are issued in connection with future financings, the ownership percentages of then shareholders could be diluted. Dilution of ownership percentages may also occur as a result of equity securities issued pursuant to possible sales or grants to existing shareholders, officers, managers, consultants, advisors, and/or employees.

Risks from Relying on an Exemption from Registration

FORM C Offering Material for

Healing Budz, Inc as Issuer

The Shares are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act and applicable state securities laws. If the sale of the Shares were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of the Shares. If a number of purchasers were to obtain rescission, the Company would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

ISSUER-SPECIFIC RISK FACTORS

MARKET AND CUSTOMER RISK FACTORS

There is a limited market for the Company's product or services.

Although Healing Budz has identified what we believe to be a need in the medical cannabis market for our products and services, there can be no assurance that demand or a market will develop or that we will be able to create a viable business. Our future financial performance will depend, at least in part, upon the introduction and market acceptance of our products and services. Potential customers may be unwilling to accept, utilize or recommend any of our proposed products or services. If we are unable to commercialize and market such products or services when planned, we may not achieve any market acceptance or generate revenue.

Limited Market for Products Services

Although we believe there to be a need for our product, there are no guarantees that demand for our product will develop. Our financial outlook will depend on market acceptance or our service. Potential customers may be unwilling to accept, utilize, or recommend any of our proposed services. If we are unable to commercialize our product into the marketplace we may not be able to generate revenues. We must correctly identify and interpret changes in the market, and how practitioner and customers utilize our platform.

Our success depends on our ability to predict, identify, and interpret the habits of consumers and to offer a product that appeals to their preference. If we do not offer products that appeal to consumers then our sales will decrease. Or if we fail to introduce ew

FORM C Offering Material for

Healing Budz, Inc as Issuer

and improved products to satisfy those preferences then sales could decline. If we do not rapidly develop our product in faster growing and more profitable categories then demand for our product could decrease.

FINANCIAL RISK FACTORS

The amount of capital the Company is attempting to raise in the Offering is not enough to sustain the Company's current business plan.

In order to achieve Healing Budz' near and long-term goals, the company will need to procure funds in addition to the amount raised in this offering. There is no guarantee the company will be able to raise such funds on acceptable terms or at all. If we are not able to raise sufficient capital in the future, we will not be able to execute our business plan, our continued operations will be in jeopardy and we may be forced to cease operations and sell or otherwise transfer all or substantially all of our remaining assets.

Our company may be required to take on debt which could result in limitations on our business.

If Healing Budz incurs indebtedness, a portion of its cash flow will have to be dedicated to the payment of principal and interest on such indebtedness. Typical loan agreements also might contain restrictive covenants, which may impair the companies operating flexibility. Such loan agreements would also provide for default under certain circumstances, such as failure to meet certain financial covenants. A default under a loan agreement could result in the loan becoming immediately due and payable and, if unpaid, a judgment in favor of such lender which would be senior to the rights of shareholders of the company. A judgment creditor would have the right to foreclose on any of the companies assets resulting in a material adverse effect on the companies business, operating results or financial condition.

Future losses and early stages of the busniess

The company is currently not profitable. The company anticipates that it will lose money in the foreseeable future, and the company may not be able to achieve profitable operations. In order to achieve future profits the company needs to complete development of its sports betting feature, achieve favorable legislation in our industry, and achieve significant gains in our customer base.

Loss of investment

Anyone purchasing the shares should be able to withstand the loss of his or hers investments, and should understand that such a possibility exists.

The company has prepared only unaudited financial statements in connection with this offering.

In addition to the reviewed financial statement presented, we expect to prepare financial statements on a periodic basis. The financial data presented has been reviewed by an independent CPA. In preparing proforma financial statements we have made certain assumptions concerning our business and the market which may not be accurate. Investors are encouraged to review any statements with an independent accountant and should not invest if they believe that they have insufficient information.

OPERATIONAL RISK FACTORS

Our operating costs are unpredictable and our operating results may fluctuate due to factors that are difficult to forecast

In addition to general economic conditions and market fluctuations, significant operating cost increases could adversely affect us due to numerous factors. Many of which are beyond our control. Increase in operating costs would likely negatively impact our operating income and could undermine our ability to grow our business.

We may experience defects and system failures which would harm our business and reputation and expose us to potential liability

Healing Budz may encounter delays when developing our application. Alternatively, any new products and services may in the future contain undetected errors or defects when first introduced. Defects, errors, or delays in development of our products or services could result in an interruption of business operations.

COMPETITIVE RISK FACTORS

The development and commercialization of our services is highly competitive.

Our potential competitors have significantly greater financial, technical and human resources than we have. Accordingly, our competitors may commercialize products more rapidly or effectively than we are able to, which would adversely affect our competitive position.

New competitors may enter our market in a manner that could make it difficult to differentiate our Company.

While Healing Budz is aware of certain competitors will develop in the market, there is the possibility that new competitors may enter and that they may be better funded. To the extent that the market becomes more crowded, this may make it more difficult for us to differentiate our value proposition or to get in front of right partners and customers. It may be difficult to compete with new entrants if there is pricing pressure or changes in market demand. The Company may also have a hard time competing against companies who can negotiate for better prices from suppliers, produce goods and services on a large scale more economically, or take advantage of bigger marketing budgets.

PERSONNEL AND THIRD PARTY RISK FACTORS

Although dependent on certain key personnel, the Company does not have any life insurance policies on any such individuals.

While the company is dependent on key personnel in order to conduct its operations and execute its business plan, Healing Budz has not purchased any insurance policies with respect to the death or disability of those individuals. Therefore, in the event that any of the Company's employees die or become disabled, the company will not receive any insurance proceeds as compensation for such person's absence. The loss of such person could negatively affect the company and its operations.

The Company relies on third-parties over which the Company has little control; third party failures could negatively affect the Company's business.

While Healing Budz intends to implement rigorous standards in selecting third party relationships and vendors, if a third-party fails to meet its obligations or provide the

FORM C Offering Material for

Healing Budz, Inc as Issuer

products or services required by the company, the Company's operations and reputation may suffer.

LEGAL AND REGULATORY RISK FACTORS

We rely on various intellectual property rights in order to operate our business and these rights may be challenged.

Healing Budz intellectual property rights may not be sufficiently broad and may not provide a significant competitive advantage. The steps that the company has taken to maintain and protect its intellectual property may not prevent it from being challenged, invalidated or circumvented. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons. The Company's failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect its intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact the Company's competitive position and results of operations.

There is risk associated with the Company's indemnification of affiliated parties.

Our executive officers will be relieved of liability to the Company or our Shareholders for monetary damages for conduct as Directors and executive officers. We may also enter into indemnity agreements with our Directors and executive officers. The exculpation provisions contained therein may have the effect of preventing shareholders from recovering damages against our Directors and executive officers caused by poor judgment or other circumstances. The indemnification provisions may require us to use our assets to defend our Directors and executive officers against claims, including claims arising out of negligence, poor judgment, or other circumstances. The indemnification obligations of the Company will be payable from the assets of the Company.
