The IOT solution for sustainable e-commerce shipping logistics

the right solution for sustainable e-commerce shipping logistics.

For e-commerce brands that need to quickly and economically send and receive goods, LimeLoop is an insight-driven sustainable logistic solution that increases visibility, security, and predictive analytics in one platform. Unlike single-use shipping packaging that is expensive and wasteful, LimeLoop leverages technology-enabled reusable packaging to enhance the double bottom line through positive and measurable environmental impact while optimizing the cost of goods and customer loyalty.
