

## TIM KOOGLE

Part engineer, part entrepreneur and businessman, and part philanthropist, Tim Koogle's sweet spot is bringing good ideas to scale. Having spent over 30 years starting, growing, and running significant businesses, Tim is perhaps best known as the founding CEO of Yahoo!. As Employee #6, he led the company's growth from \$0 to well over \$1 billion in revenue, profitably, in six short years. For his lasting impact on the organization well beyond his 2001 tenure, in 2013 *Harvard Business Review* named Tim one of the 100 Best-Performing CEOs of all time and #1 for his ability to consistently deliver results over the long haul. Tim continues to bring a passion for solving tough challenges in the business sector. Today he divides his time between building young businesses and investing in and advising social sector organizations. In both cases, he is driven to increase impact quickly, sustainably and for the long haul.

---
