Founder at ABV Technology  
Santa Barbara, California, United States

## Summary

We have developed technology to filter beer/cider into 2 beverages. One output is a great NA beer at 0.5% ABV. It retains much of the original character. The other output is a clear FMB at the same ABV % as the input, a great base for hard seltzer. We are looking for partners to expand our service model through North America

## Experience

### ABV Technology

Founder - VP Business Development  
September 2018 - Present (6 years 2 months)  
Greater Minneapolis-St. Paul Area

ABV Technology is creating a machine to sell to craft brewers that will allow them to make great tasting non-alcoholic (NA) beer. Worldwide demand for NA and low alcohol (LA) beer is growing. Our machine will allow craft brewers to meet this demand using existing recipes. <https://www.abvtechnology.com/>

Honeywell Acquires RSI Video Technologies, A Leading Provider Of Intrusion Detection With Video Verification

- Addresses Growing Demand for Video Verification to Reduce False Alarms
- Advanced Motion Detection Technology with Integrated Cameras Delivers Live Video Streaming of Indoor and Outdoor Intrusion Alerts
- Complements Honeywell's Core Security Portfolio and Benefits from Honeywell's Global Channel

MELVILLE, N.Y., March 1, 2016 /PRNewswire/ -- Honeywell (NYSE: HON) announced that it has acquired privately held RSI Video Technologies (RSI),

a leading global provider of intrusion detection systems for commercial and residential security applications under the brand Videofied®, for approximately \$123 million (€113 million).

RSI's wireless battery-powered motion detectors with built-in cameras deliver live, high-quality video over the cloud to central monitoring stations and end-users. The acquisition enhances Honeywell's ability to meet the increasing global customer need for video verification, and it also brings a unique do-it-yourself (DIY) offering combined with professional monitoring.
