SECOND SURGICAL
CORNELL DIVISION
1965 - 1966

India: 1963

An aerial photograph of an industrial facility, likely a refinery or chemical plant, situated in a valley. The facility features several tall, dark smokestacks, some of which are emitting white plumes of smoke or steam. The buildings are mostly dark-colored with flat roofs. In the foreground, there is a dense residential area with many small, light-colored houses. The background consists of large, rugged mountains under a hazy sky. The text "La Oroya, Peru" is overlaid on the left side of the image.

La Oroya, Peru

Eniware— A Small Company, Doing Big Things

“When you come to the end of the innovations that business and government are willing to invest in, you still find a **vast, unexplored space of innovation where the returns can be fantastic.**”

“While private markets foster many stunning innovations in medicine, science and technology, the private sector still under-invests in innovation—dramatically. **There are huge opportunities for innovation that the market ignores.**”

-Bill Gates

We cannot afford to wait!

Try not to become a man of success, but a man of value. Look around at how people want to get more out of life than they put in. A man of value will give more than he receives. Be creative, but make sure that what you create is not a curse for mankind.

(Albert Einstein)
