Experience

CEO

Foodnome

Dec 2016 – Present · 1 yr 11 mos

Foodnome is a web platform which allows homebased Cooks to start, operate, and market their own home restaurant allowing everyone to socialize and enjoy local, authentic, homemade meals!

We strive to unearth the food underground, uproot traditional food systems, brush the dirt off a homegrown dining experience. We want you to be able to go anywhere and be immersed in any community through homemade meals. Whether you're on a distant adventure, or just traveling across the street, Foodnome is here to bring us together over a dining table.... [See more](#)

Project Lead

Center for Neuroscience

Sep 2014 – Jan 2016 · 1 yr 5 mos

UC Davis Sutter Lab

Our lab researches how the brain analyzes sounds, how attention influences this neural analysis, and how this leads to decisions and actions in response to sound. To do this we use a multidisciplinary approach combining neuroscience (recording the electrical activity of single neurons), behavior, psychology, and quantitative approaches.
