Remo Moomiaie-Qajar M.D.

Founder, Chairman and CEO at Axiom Biosciences
Hollywood, Florida, United States

Summary

I'm a physician-entrepreneur, biotech founder, and venture architect passionate about translating scientific innovation into real-world impact. My work sits at the intersection of advanced drug delivery, regenerative medicine, and early-stage biotech investing. I've founded and led multiple ventures including Axiom Biosciences and Zerigo Health, with a focus on pioneering new treatment modalities and building world class teams to support them. I'm also a board member of the Alliance for mRNA Medicines (AMM), where I collaborate with global leaders to shape the future of RNA-based therapies and delivery technologies. Across all my ventures, I bridge science, strategy, and storytelling building coalitions across geographies, capital markets, and research institutions to advance bold, meaningful technologies. I believe the future of medicine lies not just in discovering new targets and molecules, but in reimagining how we deliver them, finance them, and scale them. If you're an investor, founder, scientist, or policymaker interested in next-generation drug delivery, biotech venture building, or innovative funding models let's connect.

Experience

Inventa Capital

General Partner

March 2015 - Present (11 years 8 months)

San Diego County, California, United States

At Inventa Capital, our mission is to reimagine what's possible in biotechnology. We are builders of what does not yet exist driven by operational rigor, visionary leadership, and a deep belief in the power of innovation. By investing in overlooked opportunities and advancing transformative science, we aim to accelerate the development of breakthrough therapies.
