LEAF AND ASH

LEAF and ASH is a startup company focusing on becoming Oklahoma’s premier cannabis real estate owner. Realizing the advantages of diversifying, we will purchase potential indoor and outdoor grow operations for hemp and cannabis on a very large scale that will be leased to licensed growers. There will also be designated leasable space for an onsite processor, or for the grower to use if they have a processing license as well. The facility will be setup with state of the art equipment that most facilities cannot have on this scale at this point in their business. This will enable us to lease for top dollar and also create a community of success within the complex. With no limit on how many plants can be grown per license the sky is the limit on size of this operation. We are hoping to one day own the largest off grid, organic, growing facility in the United States and beyond carbon neutral.

WORDS OF FOUNDER

After fifteen years of working in communications, I opened a residential painting business with my husband Adam. We have had five very successful years and I am ready to start my own business in something that I am very passionate about... Cannabis.

Growing up very religious I never thought I would turn to cannabis. After years of being on prescriptions, when it became legal in Oklahoma, it was my only hope to be able to have quality of life. Having once been on thirteen prescription medications, cannabis not only provided me relief, but allowed

“To allow small businesses to not only survive, but to thrive, in this fast moving market.”

me to discontinue use of all them.

Knowing the advantages of owning real estate, and seeing the ongoing issues with shortages of high quality product, I decided to create LEAF and ASH. I want to help companies, not buy loaning them money for expansion, but creating a place for them that is move in ready. To allow small businesses to not only survive, but to thrive, in this fast moving market. Having been a small business owner already I know the hard work it takes not only help my business thrive but to help others grow their

business to it's full potential. With my husband's extensive knowledge of building, I feel LEAF and ASH is the answer for many Oklahoma cannabis businesses. I look forward to the next few years and how Oklahoma will continue to be at the forefront of the cannabis and hemp industries.

IMPRESSIVE RESULTS

Oklahoma is the fastest growing medical market to date. Every week the patient numbers continue to grow and the current production can not keep up.

This represents per 20,000 patients. As of August 26, 2019 there were 168,575 approved patients with applications received for over 189,000. The projections show we will have well over 200,000 licensed patients and caregivers by the end of 2019. Current growers continue to express the difficulty with meeting demands of dispensaries and processors. Several dispensaries have had growers back out on orders they could not fulfill. We need large turn key facilities to help with this issue.

BUSINESS TARGET

With almost 4,000 licensed growers in the state there is a huge misconception about the availability of high quality flower for dispensaries and processors. The over 1,000 licensed processors are in great need of large quantities for the numerous products they are creating on a daily basis. The smaller scale growers are trying to keep up with demand but the upfront costs of lights alone is a huge financial burden. Most dispensaries are growing their own plus sourcing flower from 3-4 growers to keep up with demand. These growers are wanting to expand to meet those demands and that's where LEAF and ASH can step in and help.

A GROWING MARKET

Oklahoma is the fastest-growing medical marijuana market in the average number of daily patient increases, and MMJ patients represent 4.1% of the state’s total population - one of the highest rates in the nation. Growth is bolstered by low barriers of entry, including the fact there’s no list of qualifying conditions for patients.

TURNKEY FOR SUCCESS

Creating a large enough facility that multiple companies can lease from not only helps more than one grower have the opportunity to lease in the beginning; it also creates a community working together for the common goal of serving patients in Oklahoma.

We will be purchasing large properties, that can be leased to multiple entities, for growing and processing. This will allow a grower to move into a turn key facility with no upfront costs but the lease payment. They will be charged a percentage of revenue over the base lease amount after six months of being in the facility. This will allow them to settle in before the percentage of revenue kicks in to help them be as successful as possible.

Once the first property is fully leased out we will purchase new properties and have them available for lease to other growers and processors. We hope to also have all the properties fully off grid within five years. This will allow our lessees to no longer have to pay huge electric bills to grow indoors. Solar and wind energy will be part of the ongoing property improvements each year.

SERVICE & PRODUCT SECTION 02

OKLAHOMA EASE

As stated previously there are almost 4,000 licensed growers and over 1,000 licensed processors in the state. We feel about half are actually being used at this time with only a few true large scale growers and processors that have a presence in the market. We are catering to the growers that are wanting to expand but stuck with trying to find a property that will lease to them or the hindrance of the cost of lights and other expansion costs. Large scale processing equipment can also be very pricey especially to have access to the top of the line ovens, freezers, etc.

Competition

Currently there are no other companies creating turnkey real estate for the cannabis market in Oklahoma.

EXPECTATIONS

Forecast

Charging a percentage over base amount it is very fluid as to how much we could make. In the financial section these are very low ballpark figures. We will be charging a standard lease rate plus a percentage of gross receipts which will kick in after a few months of the lease inception. This allows the lessee to settle into the facility and get to growing. We feel the first year may in essence be a break even after recouping the initial investments into the property and setting it up. Year two will obviously be much more profitable which we then hope to purchase a second property to be able to lease out to other growers.

EXECUTION

As in all new businesses have a plan for execution is key to being successful.

Marketing and Sales

Through our network on social media we have already secured quite a bit of interest in what we plan to do. In so doing we currently have a grower and processor who are committed to be our first leasees. Once we have completed the first property, if there is space available, we will reach out to others that have expressed interest in leasing a turn-key space. We market this through social media, our website and network if need be. When we purchase a second property we hope to have a wait-list for future developments already in place.

Operations

Locations & Facilities

We are currently looking at buildings and properties outside the metro areas of Oklahoma due to the cost difference. We feel being able to purchase larger facilities for a lesser price will enable us to install more improvements for the first leasees than if we purchased more expensive properties in Oklahoma City or Tulsa. All properties we are looking at have easy access to a highway for transportation purposes.

We hope to have facilities in the future located across the state.

Technology

Depending on what our first leasees what/need is still to be determined. We intend on installing state of the art automation for all lighting and watering systems. This will allow the grower to monitor everything even while offsite. We will also have state of the art security systems which will only allow employees and approved guests access to the building and facilities.

We intend to purchase a mid range expandable extraction system. Along with that system pre-processing, two kinds of post processing and distillation equipment will be procured for the processor to have access to.

FINANCIAL PLAN

Forecast Key Assumptions

Financing

The financial forecasts are based on market value lease rates and percentage of gross receipt we believe we will receive. The base amount is charged on a regular monthly basis. Depending on sales for the grower and processor will determine the actual amount of we will receive from the gross receipts. These numbers are based on the grower selling the bare minimum that could be grown in a single year by the grower sold at \$1,000 a pound which is an extremely low price. This does not include anything from the processor because those values are too volatile for us to predict.

100% of Fundanna funds will go directly for the purchase of the first property and improvements to said property. The breakdown of how those funds will be used is not concrete yet as to the changing real estate market and what properties will be available once the fund is complete.

RISK FACTORS

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

8. Discuss the material factors that make an investment in the issuer speculative or risky:
- (1) This is a brand-new company. We were formed in 2019, have only recently launched our website, and have no revenues. If you are investing in this company, it's because you believe in the idea and the market opportunity, the quality of the team, and the direction of the business to date.
 - (2) Management has broad discretion as to the use of proceeds. The net proceeds from this Offering will be used for the purposes described under "USE OF PROCEEDS." The Company reserves the right to use the funds obtained from this Offering and the Debt Offering for other similar purposes not presently contemplated, which it deems to be in the best interests of the Company in order to address changed circumstances or opportunities. This poses a risk to an investor should they be relying on current use of proceed forecasts for the investment as business conditions may require a change of the use of these funds.
 - (3) Management has voting control of the Company. Management of the Company presently holds a majority of the issued and outstanding voting common stock in the Company. Due to their stock ownership and positions with the Company, the current officers will be in a position to continue to control the affairs and management of the Company after the Offering. Investors must rely entirely on our management to govern the affairs of the Company.
 - (4) Best efforts offering. This Offering is being made on a "best efforts" basis with no minimum number of Shares required to be sold. As subscriptions are accepted (and any required rescission periods expire), the subscription funds will be available for use by the Company immediately for its intended use of proceeds. Subscriptions are irrevocable (after expiration of any rescission period) and subscribers will not have the opportunity to have their funds returned notwithstanding any future lack of success in recruiting other investors. Accordingly, initial subscribers will necessarily have a greater degree of risk. The Company has not engaged the services of an underwriter with respect to the Offering, and there is no guarantee that any number of Shares are sold and proceeds will be realized by the Company.
 - (5) There is no minimum capitalization for this offering and investors' subscription funds will be used by us as soon as they are received. There is no minimum capitalization required in this Offering. There is no assurance that all or a significant number of Shares may be sold in this Offering. We will use investors' subscription funds as soon as they are received. If only small portions of the Shares are placed, then we may not have sufficient capital to operate. There is no assurance that we could obtain additional financing or capital from any source, or that such

financing or capital would be available to us on terms acceptable to us. Under such circumstances, the project would need to be scaled down, and would have a material adverse effect on our business.

- (6) Shares are not guaranteed and could become worthless. The Shares are not guaranteed or insured by any government agency or by any private party. The amount of earnings is not guaranteed and can vary with market conditions. The return of all or any portion of capital invested in the Shares is not guaranteed, and the Shares could become worthless.
- (7) Additional unforeseen risks. In addition to the risks described in this section, “RISK FACTORS,” and elsewhere in this Memorandum, other risks not presently foreseeable could negatively impact our business, could disrupt our operations and could cause the Company to fail. Ultimately, each investor in the Shares bears the risk of a complete and total loss of his/her/its investment.
- (8) Crowdfunding for early stage companies is relatively new. Crowdfunding (defined as online offerings of the securities of early stage companies to retail investors) is a relatively new industry that has only started to develop with the SEC’s adoption of Regulation A+ in June 2015 and Regulation Crowdfunding on May 16, 2016. Early stage companies may be slow to adopt crowdfunding as a method of capital formation, which would mean fewer deals for investors to choose from and less research for us to prepare. Alternatively, investors may be slow to adopt crowdfunding as a viable investment substitute, which would mean fewer early stage companies raising money and a smaller potential customer base. As a result, a risk exists that we acquire fewer customers or acquire customers at a slower pace than we anticipate.
- (9) We could become subject to regulation. Our business model involves providing retail investors with online educational content and independent research reports on early stage companies. Since we do not offer investment advice or analysis nor make investment recommendations in our research reports, we have not registered as an investment adviser with any state or federal securities regulators. As crowdfunding grows, the SEC or other securities regulators may determine that firms such as ours that engage with crowdfunding investors should be regulated. If we do become subject to regulation, we do not know the time and expense it would take to manage compliance issues.
- (10) As a new company we have a limited operating history. The Company was organized on April 8, 2019. We have a limited operating history upon which you may evaluate our business and prospects. We are in the early stages of our business and have not yet commenced full-scale operations. Accordingly, we are in the initial revenue phase, and our activities to date have involved research and development, business planning and efforts to raise startup capital. Our business and prospects must be considered in light of the risk, expense and difficulties frequently encountered by prerevenue companies in early stages of development, particularly companies in highly competitive and evolving markets. If we are unable to effectively allocate our resources and maintain leases, our business operating results and financial condition would be adversely affected and we may be unable to execute our business plan, and our business could fail. Investors could therefore be at risk of losing their investment.
- (11) Our success is dependent on our key personnel. We believe that our success will depend on the continued employment of our senior management. If they were unable or unwilling to continue in their present positions, our business and operations could be disrupted and this could put the overall business at risk, and therefore investors could be at risk of losing their investments.
- (12) Projections are speculative and are based upon a number of assumptions. Any projected financial results prepared by or on behalf of the Company have not been independently reviewed, analyzed, or otherwise passed upon. Such “forward-looking” statements are based on various assumptions, which assumptions may

Such assumptions include, but are not limited to (i) the future status of local, regional and international economies, (ii) anticipated demand for our products, (iii) anticipated costs associated with the development, marketing, sales and distribution of our products, and (iv) anticipated procurement and retention of a customer base. Accordingly, there can be no assurance that such projections, assumptions, and statements will accurately predict future events or actual performance. Any projections of cash flow should be considered speculative and are qualified in their entirety by the assumptions, information and risks disclosed in this Memorandum. Investors are advised to consult with their own independent tax and business advisors concerning the validity and reasonableness of the factual, accounting and tax assumptions. No representations or warranties whatsoever are made by the Company, its affiliates or any other person or entity as to the future profitability of the Company or the results of making an investment in the Shares. If our future projections end up being significantly different than currently projected, our business could be greatly impacted. Our business therefore may not be able to sustain itself without the projected future revenues. The business could be at risk of closing, and investors may therefore be at risk of losing their investments.

All investments can result in significant or total loss of your loan and/or investment. We cannot guaranty success, return on investment, or repayment of loans.

Please only invest what you can afford to lose.

22. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

The right to demand current distributions from an operating business is limited. A majority owner, if she is committed to avoiding any distributions to a minority owner, can usually avoid making any distributions of profits. By establishing generous reserves for future expenses, paying a salary to herself or her relatives at the high range of what is reasonable, pre-paying expenses, investing in new business or new equipment, leasing expensive cars, etc., a majority owner can spend enough that there are rarely any profits to be distributed. So long as the expenses are not grossly unreasonable, the investor, probably, won't be able to force the company to allow you to share in any of the current income of the company.

No right to participate in any management decisions of the company. The majority owner may make a decision that the investor think is bad and puts your interest in the company at risk. The investor may see the majority owner running the company into the ground. The investor can try to convince him that it is the wrong decision, but he doesn't have to take your calls.

The investor has limited rights, if any, to have your interest bought out. You may want to cash out your interest and do other things with the money. State law may give you the right to force the company to buy you out, but these rights are limited.

While the investor would be entitled to a share of any profits on sale of the entire business, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

23. What are the risks to purchasers associated with corporate actions including:

- **Additional issuances of securities:**

Following the investor's investment in the Company, the Company may sell interest to additional investors, which will dilute the percentage interest of the investor in the Company. The Investor might have the opportunity to increase its investment in the Company in such transaction, but such opportunity cannot be assured. The amount of additional capital needed by the Company, if any, will depend upon the maturity and the objectives of the Company.

- **Issuer repurchases of securities:**

The company may have the authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the investor to sell its securities to the Company concurrently.

- **A sale of the issuer or of assets of the issuer:**

As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders.

- **Transactions with related parties:**

The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and the Board of Directors of the Company will be guided by their good faith judgement as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its shareholders. By acquiring an interest in the company, the investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

24. Describe the material terms of any indebtedness of the issuer:

No indebtedness

Was or is the issuer or any entities controlled by or under common control with the issuer a party to any transaction since the beginning of the issuer's last fiscal year, or any currently proposed transaction, where the amount involved exceeds five percent of the aggregate amount of capital raised by the issuer in reliance on Section 4(a)(6) of the Securities Act during the preceding 12-month period, including the amount the issuer seeks to raise in the current offering, in which any of the following persons had or is to have a direct or indirect material interest:

Independent Accountant's Review Report

The Board of Directors
Leaf and Ash LLC

I have reviewed the accompanying financial statements of Leaf and Ash LLC, which comprises the balance sheet as of July 31, 2019, and the related statements of income, changes in members' equity, and cash flow for the seven months then ended, and the related notes to the financial statements. A review includes primarily applying analytical procedures to management's financial data and making inquiries of company management. A review is substantially less in scope than an audit, the objective of which is the expression of an opinion regarding the financial statements as a whole. Accordingly, I do not express such an opinion.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement whether due to fraud or error.

Accountant's Responsibility

My responsibility is to conduct the review engagements in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the American Institute of Certified Public Accountants. Those standards require me to perform procedures to obtain limited assurance as a basis for reporting whether I am aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. I believe that the results of my procedures provide a reasonable basis for our report.

Accountant's Conclusion

Based on my reviews, I am not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in accordance with accounting principles generally accepted in the United States of America.

Use of estimates:

Repairs and maintenance performed on equipment or software are expensed as incurred.

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, the services have been provided to the customer, payments are considered fixed or determinable, and collectability from the customer is reasonably assured.
