Experience

Logistics Manager

Revivn

Oct 2019 – Present · 2 mos

Greater New York City Area

Repurposing outdated technology as an alternative to traditional recycling. The majority of used computer equipment will end up being improperly discarded but, through a focus on remanufacturing, we can reduce the risk of climate change and create lower cost computer options while building a sustainable supply of computers for donation. Our vision is to build the first company in the category, that gets people excited about the end of life process by showing the positive effects it can have on local community.
