

Hire additional sales and marketing staff to engage more customers.

Is this your first company in payments offering dynamic CVV2? ▾

It is our second company. Robert, Lester, Bryan, & Rusty were all with a previous startup that offered dCVV2, but ended up closing. We learned a lot of what works, what does not work, and that it is truly the team that makes the difference. Keyno has a cohesive team, a concise plan, focuses on what is important, and is collaborating with major companies to quicken bank adoption and simplify integration.
