The world’s smallest portable flying camera — changing personal photography forever

Who said selfies were confined to sticks? With this ground-breaking camera, you’ll be able to snap aerial photos directly from your phone. The sky’s the limit.

We have developed a new market category that never existed before— personal aerial digital cameras. The global aerial imaging market is projected to reach \$4.12 billion by the end of 2025. However, no one has dominated the personal aerial cameras market yet.

We’ve come a long way in a very short time.

Back in 2014, we had a vision of a new way to take hands-free selfies ... from the air. Countless hours of research, innumerable sketches, and early prototypes later the world’s

first aerial camera took flight.

Since we introduced the original generation of AirSelfie aerial cameras we've made many industry disruptive advancements and ground-breaking innovations that have reimagined selfie-taking.

Capture the moment, the whole moment

No more missing friends in group photos and videos, misframed or mistimed self-timers, or awkward selfie angles. AIR PIX gives you the perfect full-frame shot quickly and easily.

Small, light-weight, and easy to use

Easily take stunning aerial HD photos and video selfies (from unique angles and heights impossible with a handheld camera), edit them right in the app, and then share them

Invest \$100 today

Investor Q&A

What does your company do? ▾

— COLLAPSE ALL

AirSelfie is a technology company that operates in the photography sector and realizes aerial cameras that allow and enhance the photography experiences of its users. AIRPIX by AirSelfie a pocket-sized aerial camera that elevates your selfie game to the new heights. We are on a mission to change personal photography forever.

Why did you choose this idea? ▾

The original inspiration came from the real need of smartphone users of having the possibility of taking photos in brand new ways, as they continuously search for novelties and the aerial photos are an evolutionary step in shooting.
