EXPERIENCE

CISO / Co-Founder / Evangelist   *Feb 2020 – Present*
Mobileyme Inc.
Co-founded and in charge of managing all information security for Mobileyme Inc as well as actiong as an evangelist for the company due to public speaking platform. Responsible for corporate infrastructure, web application security and penetration testing.

Senior Security Engineer   *Mar 2018 – Mar 2020*
Lighthouse Document Technologies
Senior security engineer for Seattle based eDiscovery firm, Lighthouse Document Technologies. Responsible for security for windows infrastructure of more than 4000 servers and laptops. Servers were virtualized, in geo-redundant datacenters.

Managed the deployment and configuration of Tenable Security Center (Tenable.sc) as well as nessus and passive scanners, vulnerability reports and infrastructure testing.

Responsible for leading pentesting efforts and coordination with thirdparty pentesting organizations as required by our corporate clients. Responsible for mitigating and fixing all the findings from pentests and getting them retested for compliance.

Systems Architect   *Jun 2015 – Mar 2017*
J4 Capital Investments

This was an engineering / architecture role building 2 datacenters from scratch to support over 1000 servers with over 32000 cores.

-Responsible for the design, architecture and configuration of 2 full scale data centers to support machine learning applications for a cutting edge financial services firm. Built both facilities from scratch, including alarm systems, video surveillance, motion sensors, NFC keycard entry, server racks, additional power circuits, air flow management and much more.

-Implemented and managed intrusion detection systems as well as Security Incident and Event Management systems.

-Implemented vulnerability scanning procedures and managed corporate red & blue Team activities.

-Created corporate security policy, disaster recovery plans, mobile device policy, and ensured we were compliant with PCI, SOC, SOX and all SEC regulations.

-Managed and effectively mitigated dozens of advanced persistent threats and DDoS attacks over 2 year period.

-Heavy usage of Powershell and python for automation as well as chef for Linux OS deployment.

Production Environment
Cisco Switches and Firewalls, SonicWall Firewalls
1000 SuperMicro Servers / IBM Servers deployed with Red Hat Enterprise Linux & 50 Windows Server 2012. Several Honeypots, numerous VLAN's, SEIM & IDS appliances and 2 classified security appliances built on military grade technology.

Sr. Systems Engineer   Mar 2014 – May 2015
Fuse Networks   *Seattle, WA*

Senior Engineer role at Managed Services provider in Seattle. Supporting 100+ organizations with heavy use of Office 365, Azure, AWS and a self hosted cloud environment.

-Primary duties were to be the final escalation point for service and support tickets as well as designing and architecting new projects for professional services deployments.

-Lync / SfB Subject Matter Expert duties were to architect new Office 365 / Lync / Skype for Business for several clients in the area. Configurations ranging from full self-hosted (on-prem), hybrid cloud and fully Office 365 contained.

-Migrated dozens of small and medium sized businesses to Microsoft Office 365 and developed migration procedures to streamline / reduce downtime.

- Managed internal training of support staff, engineers and created support documentation to include knowledge base article writing, SOP development, staff mentoring and training sessions and official PowerPoint / media for employees.

-Conducted firewall audits, infrastructure penetration testing and optimized client firewalls after audits were completed.

Sr. Lync & Exchange Engineer

Apr 2013 – Feb 2014

Avanade

Seattle, WA

This was a tier 3 / 4 engineering role at the second largest hosted Office 365 environment in the world. Senior Lync & Exchange resource with over 1.5 million seats on Lync and 2.5 million Exchange seats.

-Duties as Senior Lync Engineer were to handle all ticket escalations at the tier 3-4 level for all products (Lync, Exchange, Azure), assist with deployments, and troubleshoot outages on these products as well as being a technical expert on the infrastructure that supported the individual services.

-Acted as a senior F5 Load Balancer resource which became an official Load Balancer support team with on-call rotation.

-Investigated call quality issues for our global clients by investigating SIP traffic with wireshark, proprietary SIP analysis tools, and extensive log / event reviewer analysis.

-Tested and became certified by Microsoft at the MCSE level for both Lync 2010 and Lync 2013 and passed 2 higher level PSLP exams as well.

Consultant

2010 - 2017

Self Employed

Worked as an independent IT & security consultant over the last 7-10 years. Primarily handling security engagements, VoIP / Lync deployments and other Office 365 / cloud projects.

-Conducted internal & external penetration tests on network / computer infrastructure, web applications, as well as mobile devices and other hardware.

-Architected and deployed several Lync / Skype for business environments for up to 2000 seats in one organization.

-Brought to F5 networks as a subject matter expert to troubleshoot their on-premise Lync environment as their pilot deployment was experiencing several call quality / disconnect issues especially when calls were made to other continents. Redesigned their Lync topology, redeployed and was ultimately able to fix their environment and scale it to support 10,000 users.

Corporal - Linguist

2002 - 2004

United States Marine Corps

Joined the United States Marine Corps, obtained a TS/SCI Clearance working in cryptographic / signals intelligence. Honorable discharge.
