

WHOOSH H INNOVATIO NS

By adding Whooshh fish passage solutions to existing dams, hydropower efficiency can be increased up to 10% worldwide, invasive species can be removed, and native fish populations can rebound, all at a fraction of the cost and time of any other approach. It's a win for the fish, the planet, and clean energy.

Overview:

Whooshh is using its proprietary technologies to help save the fish, feed the planet, and grow clean energy by enabling fish to migrate over any dam or barrier through its novel fish passage and fish monitoring systems. We are now delivering a suite of proprietary products to the market to tackle the fish passage problem worldwide.

Today, our solutions are available for selective fish passage over dams, invasive species management and removal, commercial aquaculture where fish welfare is paramount and in processing plants where hygiene is critical and water is expensive.

TERMS:

Offering Type:	Regulation CF
Security Type:	Common Stock
Maximum Offering:	\$4,000,000
Minimum Offering:	\$10,000
Minimum Investment:	\$249.00
Broker Dealer:	Andes Capital Group, LLC
Transfer Agent:	KoreTransfer USA LLC
Escrow Agent:	West Town Bank and Trust

- Timing: The politics are right, the products are ready; and the market is enormous.
- Time: The need is great. Our fish passage solutions enable a faster transition to clean energy, a necessity for our future and the fish that live in our planets waters.
- AI Advantage: We are years ahead in the use of AI derived algorithms for Fish Species Recognition and selective fish passage sorting. We can become the de facto standard.
- Cash: We are already producing revenue today, and are raising capital

Customer Return on Investment

- **Commitment:** Nearly every country in the world has pledged huge reductions in its CO2 emissions. History making dollars have already been appropriated for fish passage projects over the next 10 years to assure hydropower plays a central role in our future.
- **Value:** Not only do our solutions cost substantially less, they are much more efficient in their water use, and as such the value for the owner and operator can be measured in months rather than years.

SAVE THE FISH

We deploy novel products designed and developed to improve fish welfare, fish passage and spawning success.

FEED THE PLANET

By passing fish over barriers and improving native fish numbers, our products help provide critical nutrients for the planet's ecosystems and are the number one protein for the people on it.

GROW CLEAN ENERGY

By enabling more efficient use of our water resources, we enable the growth of hydropower and all clean renewable energy.

HEAL THE ENVIRONMENT

Reducing CO2 emissions as quickly as possible, cools the planet, its waters, and the fish politics.

Invest Now

Problem:

There are more than one million dams in the world. Most of these dams do not have any fish passage. Migrating fish species are threatened with extinction. The rules and the climate have changed. To continue operating a hydropower dam, or to build a new dam, installation of a viable fish passage solution is usually required.

Solution

We have developed award winning core technologies and created new product categories, using modular designs, so that we can offer fish passage and monitoring solutions that are best suited to the fish and the river while substantially reducing the time and cost to deploy.

"The fish pass through without so much as a scratch. Also, you won't have to divert water, as you do in a ladder system. Out here, the economy is all about agriculture, and water is gold. That's what makes Whooshh such a great concept."

Mark Johnston – Yakama Nation Fisheries Biologist

Our systems assist native fish to pass over dams in seconds to reclaim access to their spawning grounds. This means fish expend far less energy, experience less stress, and are therefore reaching cleaner, safer, water and spawning habitat, with fewer pre-spawning mortalities.

We also do not require concrete infrastructure or any extra, unnecessary use of water or impose a permanent environmental footprint.

Our gentle handling of fish without producing waste water, reduces injuries, mortalities, and stress – overall improving survivability, fecundity, and ultimately our product value.

Passage Portal™

FishL Recognition™

Our Passage Portal™ products permit fish to swim in on their own, and the automated FishL Recognition™ system selectively sorts the fish before they glide through our Migrator™ tubes, regardless of geography, height of obstacle, water temperatures or changing water levels, all in less than a minute.

We have integrated scanning, sorting and invasive species removal features in order to enable selective fish passage. This way, we never stop collecting images and data and learning about the local habitat – and the fish who call it home.

After many pilot programs and studies, and more than a million fish that have used our systems around the world, we are ready to scale up and speed up deployments while the transition to a clean electric grid accelerates.

The maximum capacity of one Passage Portal™ is 40 fish per minute or 57,600 fish per day, more than many rivers see in an entire year. In short, we enable fish to glide over barriers without stress or injury, all in a flexible, misted, temperature-controlled Migrator tube. Fish float over land or infrastructure barriers from point A to Point B in seconds, without requiring huge amounts of water and power as is often required for traditional systems.

Leadership:

The leadership of the company embody talent, grit and subject matter expertise. At the helm is a proactive founder and CEO with an impressive 20-year track record of executive experience launching and growing startups since earning his stripes in senior management positions at Adobe Systems. With a well-rounded business background and boasting a J.D. and an L.L.M in International Business Transactions, the CEO brings a unique blend of global business knowledge and legal acumen to the table for the company's multinational aspirations.

The rest of the company's officers are a testament to the commitment to excellence that defines the organization. With a lineup boasting advanced specialty degrees including a CPA, PHD, MBA, and ME, the officers exhibit a remarkable dedication to their respective fields, constantly driving innovation and growth. This is represented by the

numerous patents that have been issued under their work. Their unyielding determination and unwavering support are evident in the number of new, innovative, and importantly commercialized products and services they have led, both at the Company and through their prior employment. From multi-billion-dollar vaccines to electric transportation, this blend of successful and seasoned expertise and experience creates a culture of trust, innovation, and success. Their collective efforts have redefined the market and will continue to drive the company's future growth.

The cohesiveness and synergy at the board level is equally impressive, with all board members accomplished CEOs, collectively amassing 100 years of invaluable business and regulatory experience, in a wide range of fields: medical device companies, investment banking, high-tech, hospitality and law. Such a combination of strategic insight ensures that the company's technical and business direction is both well rounded, informed, and forward-thinking.

Regulation CF FAQ:

- What are Investment Limits for Reg CF funds?

Anyone can invest in a Regulation Crowdfunding offering. Because of the risks involved with this type of investing, however, you may be limited in how much you can invest during any 12-month period in these transactions. If you are an accredited investor (see definition below), then there are no limits on how much you can invest. For Non-Accredited Investors (most fall into this category) the limitation on how much you can invest depends on your net worth and annual income. If either your annual income or your net worth is less than \$124,000, then during any 12-month period, you can invest up to the greater of either \$2,500 or 5% of the greater of your annual income or net worth. If both your annual income and your net worth are equal to or more than \$124,000, then during any 12-month period, you can invest up to 10% of annual income or net worth, whichever is greater, but not to exceed \$124,000.
