Risk Factors

THE FUTURE OPERATION OF BUY BATON Rouge, LLC (COMPANY) IS SPECULATIVE AND INVOLVES A DEGREE OF RISK. THERE IS NO GUARANTEE OR COMMITMENT OR OBLIGATION OF THE COMPANY THAT IT WILL BE SUCCESSFUL OR THAT IT WILL REMAIN IN EXISTENCE LONG ENOUGH FOR THE COMPANY WILL PAY BACK ALL OF THE INVESTMENT THAT IT HAS RECEIVED.

1. Operations of the Company. The likelihood of success of the Company must be considered in case of problems, expenses, complications and delays encountered in connection with the building and operating business enterprises.
2. Dependence upon Key Personnel: Potential Conflicts of Interest. The Company is dependent in its operations upon the services of its management and service providers.

3. Economy. An increase in interest rates or a depressed job market would hinder our ability to find suitable renters and purchasers for our properties.

4. Competition. The Baton Rouge, LA real estate market continues to attract investment capital from other local operators and national and international investors. We will be in direct competition with these market participants and may be outbid on target properties.

5. Force Majeure. Operation of any business contemplates the risk that natural or other disasters may cause significant interruptions. The Company may incur losses from natural disasters that are not insurable.

6. Lack of Liquidity. There is no established market or exchange for the resale of the Units. An Investor seeking to sell their Units may have great difficulty in finding a buyer and may find no buyers for their Units.

7. Limited Transferability of Securities. The Investor should be fully aware of the long-term nature of his or her financial support of the Company. The Units may be transferred only if certain requirements are satisfied. The Investor has represented to the Company that it is acquiring the Units for his or her own investment only and without a view to their immediate resale or distribution. Even if the Investor offers to sell his or her Units after meeting all requirements, there may be no buyers for the Units. There is no market or exchange where the Support may offer their Units for sale. The Investor should consider any investment as 'illiquid' and one that cannot be readily converted into cash. Accordingly, purchasers of the Units must bear the economic risk inherent in the investment for an indefinite period of time.

8. Risk of Litigation. If the Company is subjected to lawsuits or proceedings by government entities or private parties, or other investors, then expenses or liabilities of the Company arising from any such suit would be borne by the Company. While the Company will seek to obtain a general liability insurance policy covering its activities, such insurance may not cover all costs and expenses related to litigation.

9. Income Taxes Imposed on Investors. It is anticipated that any distributions made to Investors above the amount of their investment will be taxed as ordinary income and treated as a passive investment for tax purposes. However, the tax circumstances of each Investor may vary, and Investors should check with their personal tax advisor to determine how they may be Taxed.

10. Speculative Determination of Offering Price. The price of the Units being offered hereby was speculatively determined by the Company based upon a large number of assumptions regarding future events that may or may not happen. Accordingly, the price per Unit indicated on the cover of this Memorandum must be considered in terms of the likelihood that all of these future events may occur and the accuracy of the assumptions in terms of their impact on future value. The price for Units in this Offering bears no direct relationship to the current book

value, assets or earnings of the Company or any other objective criteria of value.

11. New Business. The Company is newly formed and has no operating history. Therefore, a prospective Investor has no prior performance of the Company upon which they may rely in assessing the future performance of the Company.

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

Risk Factors

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering documents or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

Material factors that make an investment in Buy Back Baton Rouge, LLC speculative or risky:

1. If Buy Back Baton Rouge, LLC is unable to raise additional capital on acceptable terms, it may be unable to maintain enough growth. There can be no assurance that additional funding will be available on acceptable terms. Failure to satisfy our capital requirements will adversely affect the Company's business, financial condition and results of operations because the Company would be left without the capital required to complete development or establish sales and marketing capabilities.
2. Our business is recently formed and has a limited operating history. We face the general risks associated with any new business operating in a competitive industry, including the ability to fund our operations from unpredictable cash flow and capital raising transactions. There can be no assurance that we will achieve our anticipated investment objectives or operate profitably.

3. The Company is faced with all the risks associated with a company in the early stage of development. In addition, the Company's business is subject to numerous risks associated with a new company engaged in real estate development. Such risks include, among other things, competition from well-established and well-capitalized companies and unanticipated development difficulties and risks associated with the need for regulatory approval.
4. New competitors could enter the market and could therefore prevent the company from growing as anticipated. This can result in significantly reduced revenues and larger operating losses.
5. We are highly dependent on the services of our founder. Our future business and results of operations depend in significant part upon the continued contributions of our CEO and founders. If we lose those services or if any founder fails to perform in their current position, or if we are not able to attract and retain skilled employees in addition to our CEO and the current team, this could adversely affect the development of our business plan and harm our business.
6. Start-up investing is risky. Investing in early-stage companies is very risky, highly speculative, and should not be made by anyone who cannot afford to lose their entire investment. Unlike an investment in a mature business where there is a track record of revenue and income, the success of a startup or early-stage venture often relies on the development of a new service that may or may not find a market. Before investing, you should carefully consider the specific risks and disclosures related to both this offering type and the company.
7. Our future growth depends on our ability to acquire and renovate houses and commercial properties. Our future growth depends to a large extent on our ability to effectively anticipate and adapt to market requirements and offer homes that meet renter demands. If we are unable to attract renters and/or retain renters, our business, results of operations and financial condition may be materially adversely affected.
8. Any forecasts we make about our operations may prove to be inaccurate. We must, among other things, determine appropriate risks, rewards, and level of investment in our properties, respond to economic and market variables outside of our control, respond to competitive developments and continue to attract, retain, and motivate qualified employees. There can be no assurance that we will be successful in meeting these challenges and addressing such risks and the failure to do so could have a materially adverse effect on our business, results of operations, and financial condition. Our prospects must be considered in light of the risks, expenses, and difficulties frequently encountered by companies in the early stage of development. As a result of these risks, challenges, and uncertainties, the value of your investment could be significantly reduced or completely lost.
9. Maintaining our reputation is critical to our ability to attract and retain clients, and our failure, or perceived failure, to appropriately operate our business or deal with matters that give rise to reputation risk may materially and adversely harm our business, prospects and results of operations. Our failure to deliver appropriate standards of service and quality could result in customer dissatisfaction, litigation and heightened

regulatory scrutiny, all of which can lead to lost revenue, higher operating costs and harm to our reputation. Further, negative publicity regarding us, whether or not true, may be detrimental to our business.

10. These documents have not been reviewed or approved by the government. No government agency or authority has reviewed or approved this offering or any of the documents provided to you relating to our crowd funding efforts, including these Risk Factors. You are expected to conduct your own review and analysis before deciding whether to purchase the securities.
11. As a non-reporting company, the Company is not required to provide you with annual audited financial statements or quarterly unaudited financial statements.

In entering into an agreement on the Buy the Block Funding Portal to purchase securities, both investors and Buy Back Baton Rouge, LLC must agree that a transfer agent, which keeps records of our outstanding Common Stock (the "Securities"), will issue digital Securities in the investor's name (a paper certificate will not be printed). Similar to other online investment accounts, the transfer agent will give investors access to a web site to see the number of Securities that they own in our company. These Securities will be issued to investors after the deadline date for investing has passed, as long as the targeted offering amount has been reached. The transfer agent will record the issuance when we have received the purchase proceeds from the escrow agent who is holding your investment commitment.

[How can an investor cancel an investment commitment?](#)

You may cancel an investment commitment for any reason until 48 hours prior to the deadline identified in the offering by logging in to your account with Buy the Block, browsing to the

Investments screen, and clicking to cancel your investment commitment. Buy the Block will notify investors when the target offering amount has been met. If the issuer reaches the target offering amount prior to the deadline identified in the offering materials, it may close the offering early if it provides notice about the new offering deadline at least five business days prior to such new offering deadline (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). If an investor does not cancel an investment commitment before the 48- hour period prior to the offering deadline, the funds will be released to the issuer upon closing of the offering and the investor will receive securities in exchange for his or her investment. If an investor does not reconfirm his or her investment commitment after a material change is made to the offering, the investor's investment commitment will be cancelled, and the committed funds will be returned.

Can the Company perform multiple closings or rolling closings for the offering?

If we reach the target offering amount prior to the offering deadline, we may conduct the first of multiple closings of the offering early, if we provide notice about the new offering deadline at least five business days prior (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). Thereafter, we may conduct additional closings until the offering deadline. We will issue Securities in connection with each closing. Oversubscriptions will be allocated on a first come, first served basis. Changes to the offering, material or otherwise, occurring after a closing, will only impact investments which have yet to be closed.

Your reconfirmation must be completed within five business days of receipt of the notice of a material change, and if you do not reconfirm, your investment will be canceled, and your money will be returned to you.

18. Are there any differences not reflected above between the securities being offered and each other class of security of the issuer?

No.

19. How could the exercise of rights held by the principal owners identified in Question 5 above affect the purchasers of Securities being offered?

As minority owners, the crowdfunding investors are subject to the decisions made by the

majority owners. The issued and outstanding shares of common stock give management voting control of the company. As a minority owner, you may be outvoted on issues that impact your investment, such as the issuance of new shares, or the sale of debt, convertible debt or assets of the company.

20. How are the securities being offered being valued?

Securities will be valued based on professional appraisals conducted by our lenders upon post-construction refinance or market rate offers to buy properties in our portfolio. Appraisals are based on comparative market analysis, which evaluates the sales price of similar recently sold properties and takes into account the income that the our portfolio is producing.

21. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

The holder of a majority of the shares in the company may make decisions with which you disagree, or that negatively affect the value of your investment in the company, and you will have no recourse to change those decisions. Your interests may conflict with the interests of other investors, and there is no guarantee that the company will develop in a way that is advantageous to you. For example, the majority shareholder may decide to issue additional shares to new investors, sell convertible debt instruments with beneficial conversion features, or make decisions that affect the tax treatment of the company in ways that may be unfavorable to you. Based on the risks described above, you may lose all or part of your investment in the securities that you purchase, and you may never see positive returns.

22. What are the risks to purchasers associated with corporate actions including:

- additional issuances of securities,
- issuer repurchases of securities,
- a sale of the issuer or of assets of the issuer
- or transactions with related parties?

The issuance of additional shares of our common stock will dilute the ownership of the Buy the Block investors. As a result, if we achieve profitable operations in the future, our net income per share will be reduced because of dilution, and the market price of our common stock, if there is a market price, could decline as a result of the additional issuances of securities. If we repurchase securities, so that the above risk is mitigated, and there are fewer shares of common stock outstanding, we may not have enough cash available for marketing expenses, growth, or operating expenses to reach our goals. If we do not have enough cash to operate and grow, we anticipate the market price of our common stock would decline. A sale of our company or of the assets of our company may result in an entire loss of your investment. We cannot predict the market value of our company or our assets, and the proceeds of a sale may not be cash, but instead, unmarketable securities, or an assumption of liabilities. It is unlikely that in the near term, a sale would result in a premium that is significant enough over book value to generate a return to our investors. We may need to ask related parties to lend us money. Such financing may not be available when needed. Even if such financing is available, it

may be on terms that are materially adverse to your interests with respect to dilution of book value, dividend preferences, liquidation preferences, or other terms. No assurance can be given that such funds will be available or, if available, will be on commercially reasonable terms satisfactory to minority owners. There can be no assurance that we will be able to obtain financing when it is needed on terms we deem acceptable.
