Your Health At Your Fingertips

Invest in Patientory

Did you know? A large number of readmissions occur due to poor care coordination caused by siloed EHR systems and varying state regulations.

Patientory is a global population health management software that gives users access to actionable insights from their health data. Patientory empowers patients, clinicians, and healthcare organizations to access, store, and transfer information safely, thus improving care coordination while ensuring data security.

Changing Healthcare form the ground up. We believe better health care starts with the people.What We Have Accomplished So Far

Our team has successfully modified Ethereum, created a private Blockchain Network called **PToyMatrix**, which minimizes breaches for health providers due to the inherent access control properties of the system; acts as a channel for facilitated care coordination, cross-institutional sharing of critical patient information to reduce medical errors and increase interoperability.

Our Dapp Beta test for product-market fit and overall effectiveness solution has received positive feedback from our Beta users of over 500 participants out of our 35,000 community subscription. 90% of respondents found the entire app useful with no elements irrelevant, 80% of respondents said that they did not find any parts of the app unnecessarily complicated. More than half of the respondents found the app 'very engaging' and most useful for fitness-related activity and health adherence.

We have received the following awards and recognition as a reward for our team efforts:

2016-Top 5 Cutting-Edge Health Apps Improving the World by Empowering the Patient

Top 11 Company Disrupting Healthcare in 2017

Our Products

How does it work?

Centralizing all your medical data in one place to manage, share and track your healthcare.

Community: Thousands of people like you are also already on the Patientory network. Discuss your health concern with others in the community and learn from their experience.

Secure: Encrypted middleware to meet the high-volume demands of modern-day Health IT.

You: The most secure way of preventing your patients' sensitive health information from cyber attacks.

Doctor: Your doctors can securely share information with patients, family members, caregivers, specialists, and nurses, or chat via our HIPAA-compliant messaging platform.

What makes us unique?

View: You can share your complete medical history with your doctors via aggregated data across different providers and medical facilities, all in one place.

Manage: Doctors can manage their schedules, place electronic orders, and send or receive referrals online easily. Automation tools and reminders will help your doctors and save you time!

Share: You can securely share information with your doctors, family members, caregivers

share. You can securely share information with your doctors, family members, caregivers, specialists, and nurses, or chat via our secure messaging platform.

Secure: Encrypted middleware to meet the high-volume demands of modern-day Health IT. HIPAA-compliant protected data storage that adheres to region-specific regulatory guidelines

Pandemic Response tools, E.g: COVID-19 contact tracing, case report, uploading testing results, immunity passport, Travel QR code, and self-inspection quiz.

How Our Products Are Different From the Rest

Investor Q&A

– COLLAPSE ALL

What does your company do? ⌄
Global population health data analytics management software

Where will your company be in 5 years? ⌄
In the next 3-5 years, we hope to have 200,000 registrations of interest. 150,000,000 Chronic Disease Patients require risk stratification. These projections cannot be guaranteed.

How has the company been funded to date? ⌄

Patientory has received prior grants and investments from organizations such as the Patientory Foundation, a non profit geared towards the advancement of health equity. Patientory Foundation raised $7M via a token sale in 2017. Patientory has also received funding from Novartis, Women Who Tech, Southeast Medical Device Association, Colorado Permanente Medical Group/Boomtown HealthTech Accelerator and RGA Ventures.

What's the relationship between Patientory Foundation and Patientory, Inc.? ⌄

Patientory, Inc is a founding and participating storage node member of the PTOYMatrix HIPAA compliant Health Information Exchange System owned by the Patientory Foundation. Their 2 dapps Neith Enterprise and Patientory Consumer facing applications are built on this network.

Patientory, Inc. is conducting this offering.
