RISK FACTORS

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

Any one or more of the foregoing occurrences could have a material adverse effect on our business, financial condition and results of operations, or could cause our business to fail.

We may fail if our **c** Crowdfunding for early stage companies is relatively new. Crowdfunding (defined as online offerings of the securities of early stage companies to retail investors) is a relatively new industry that has only started to develop with the SEC's adoption of Regulation A+ in June 2015 and Regulation Crowdfunding on May 16, 2016. Early stage companies may be slow to adopt crowdfunding as a method of capital formation, which would mean fewer deals for investors to choose from and less research for us to prepare. Alternatively, investors may be slow to adopt crowdfunding as a viable investment substitute, which would mean fewer early stage companies raising

money and a smaller potential customer base. As a result, a risk exists that we acquire fewer customers or acquire customers at a slower pace than we anticipate.

- **This is a brand-new company.** We were formed in 2020, have only recently launched our website, and have little revenues. If you are investing in this company, it's because you believe in MStreetX idea and its fintech strategy, the quality of the team, and the direction of the business to date.

- **We depend on a small initial management team.** Although our management team has broad industry experience with investing in small businesses, as a team they have not raised money together on Crowdfunding. Everyone on the management team is working for equity in the company and if we raise the intended capital on crowdfunding, then the team will be paid. The CEO of the company is working full-time and there are other staff that are assisting part-time until the funds can be raised on crowdfunding.

- **We are controlled by our officers and directors.** Our officers and directors currently hold all of our voting stock, and at the conclusion of this offering will continue to hold a majority of the company's common stock. Investors in this offering will not have the ability to control a vote by the stockholders or the board of directors.

- **The company will raise additional money in the future.** The company will need to raise additional funds to its operating needs to grow and scale the business and be able to fulfill its plans. The ability to raise funds will always be a risk until we achieve sustainable profitability, which we currently cannot predict. Even if we do successfully raise more funds after this offering, the terms of that offering could result in a reduction in value of your investment in the company, as later stage investors may get more favorable terms.

- **It is difficult for us to accurately predict our earnings potential.** Because of our short operating history, it is more difficult to accurately assess growth rate and earnings potential. It is possible that our company will face many difficulties typical for early stage companies.

Since we do not offer investment advice or analysis nor make investment recommendations in our research reports, we have not registered as an investment adviser with any state or federal securities regulators. As crowdfunding grows, the SEC or other securities regulators may determine that firms such as ours that engage with crowdfunding investors should be regulated. If we do become subject to regulation, we do not know the time and expense it would take to manage compliance issues.

General Risks Associated with an Early Stage Company

As a new company we have a limited operating history. The Company was organized on September 2020. We have a limited operating history upon which you may evaluate our business and prospects. Accordingly, we are in the initial revenue phase, and our activities to date have involved target marketing, economic agency development, business planning, small business hospitality strategy and development and efforts to raise startup capital. Our business reach is across many states in the US and it is important that they work with us so that we can assist their business network and onboard small businesses through our hospitality portal on TruCrowd. If we are unable to effectively allocate our resources or grow our customer base, our business operating results and financial condition would be adversely affected and we may be unable to execute our business plan, and our business could fail. Investors could therefore be at risk of losing their investment.

Our success is dependent on our key personnel. We believe that our success will depend on the continued employment of our senior management and key personnel. If one or more members of our senior management were unable or unwilling to continue in their present positions, our business and operations could be disrupted and this could put the overall business at risk, and therefore investors could be at risk of losing their investments.

Projections are speculative and are based upon a number of assumptions. Any projected financial results prepared by or on behalf of the Company have not been independently reviewed, analyzed, or otherwise passed upon. Such “forward-looking” statements are based on various assumptions, which assumptions may prove to be incorrect. Such assumptions include, but are not limited to (i) the future status of local, regional and international economies, (ii) anticipated demand for our products, (iii) anticipated costs associated with the development, marketing, sales and distribution of our products, and (iv) anticipated procurement and retention of a customer base. Accordingly, there can be no assurance that such projections, assumptions, and statements will accurately predict future events or actual performance. Any projections of cash flow should be considered speculative and are qualified in their entirety by the assumptions, information and risks disclosed in this Memorandum. Investors are advised to consult with their own independent tax and business advisors concerning the validity and reasonableness of the factual, accounting and tax assumptions. No representations or warranties whatsoever are made by the Company, its affiliates or any other person or entity as to the future profitability of the Company or the results of making an investment in the Shares. If our future projections end up being significantly different than currently projected, our business could be greatly impacted. Our business therefore may not be able to sustain itself without the projected future revenues. The business could be at risk of closing, and investors may therefore be at risk of losing their investments.

We expect our expenses to grow as the Company grows. Our expenses will increase as we build infrastructure to implement our business plan. We may hire additional employees, expand our product offerings, increase our digital technology footprint, and incur costs for office space. This poses a risk to the financial forecasts and current financial model of the Company.

The Company may not reach its sales goals. The Company has forecasted its capitalization requirements based on sales goals and cost containment measures; any reduction to these forecasts could make it difficult for the company to achieve its projected growth, which would affect available cash and working capital, ultimately affecting the Company’s financial condition. This could put the investor at risk of losing their investment.

The Company may require additional financing to support working capital needs. The Company may need to explore additional financing transactions that management determines are in the best interest of the Company, including, without limitation, commercial debt transactions, private offerings of debt or equity securities, a rights offering, and other strategic alternatives. Such additional financing may not be available to the Company, or, if available, the Company may be unable to undertake such additional financing on terms that are advantageous to the Company. If the Company fails to raise additional capital in such an offering, or through other fund raising efforts, such a failure could have a material adverse effect on the Company, and investors in this Offering could be at greater risk of losing their investments due to the inability of the business to proceed with enough working capital to effectively run the Company.

Management has broad discretion as to the use of proceeds. The net proceeds from this Offering will be used for the purposes described under “USE OF PROCEEDS.” The Company reserves the right to use the funds obtained from this Offering and the Debt Offering for other similar purposes not presently contemplated, which it deems to be in the best interests of the Company in order to address changed circumstances or opportunities. This poses a risk to an investor should they be relying on current use of proceed forecasts for the investment as business conditions may require a change of the use of these funds.

Management has voting control of the Company. Management of the Company presently holds a majority of the issued and outstanding voting common stock in the Company. Due to their stock ownership and positions with the Company, the current officers will be in a position to continue to control the affairs and management of the Company after the Offering. Investors must rely entirely on our management to govern the affairs of the Company.

There may be unanticipated obstacles to the execution of the Company’s business plan. The Company’s business plans may change. We believe that our chosen activities and strategies are achievable in light of current

Risks Associated with the Business of the Company

You can lose 100% of your investment. Many small business startups like the Company fail. Real estate is a risky venture and it may fail to achieve its goals or carry out its business plans. Each investor bears the risk of losing all or part of his/her/its investment.

Failure to adapt to technological changes may render our technology obsolete or decrease the attractiveness of our solutions to our customers. Although we believe our current technology and processes will be suitable for operations well into the foreseeable future, if new industry standards and practices emerge, or if competitors introduce new solutions embodying new services or technologies, our technology and processes may become obsolete. Our future success will depend in part on our ability to:

- integrate digital technology to streamline our processes and efficiently work with small businesses.
- we have plans to integrate AI into our platform and while we have an experience CTO, we will need to ensure the technology integration is effective.
- respond to changes in industry standards and practices on a cost-effective and timely basis.

We need to continue to enhance the features and functionality of our technology and product offerings. The effective performance, reliability and availability of our technology and product offerings are critical to our reputation and our ability to attract and retain users and customers.

We operate in intensely competitive and dynamic industries, and our ability to successfully compete and continue to grow our business depends on our ability to respond quickly to market changes and changing technologies and to bring competitive new solutions and services to market in a timely fashion. Development of new proprietary technology or products is complex, entails significant time and expense and may not be successful. We cannot guarantee that we will be able to introduce new solutions or products on schedule, nor can we guarantee that such solutions or products will achieve market acceptance. Moreover, we cannot guarantee that errors will not be found in our new solution releases or products before or after commercial release, which could result in solution or product delivery redevelopment costs, harm to our reputation, lost sales, license terminations or renegotiations, product liability claims, diversion of resources to remedy errors and loss of, or delay in, market acceptance.

If our technology or products are found to infringe the proprietary rights of others, we may be required to change our business practices or redevelop our products, and may also become subject to significant costs and monetary penalties. As our technology and products develop, we may become increasingly subject to infringement claims. We are developing proprietary technologies, processes, software, and products relating to the second screen mobile accessories space. Although reasonable efforts will be taken to protect the rights to our intellectual property, the complexity of international trade secret, copyright, trademark and patent law, coupled with our limited resources and the demands of quick delivery of products and services to market, create risk that our efforts will prove inadequate.

Team risks. Our core strategic team is small, consisting of three co-founders with extensive industry experience. For most of 2020, this team has been working together for the purpose assisting small businesses with funding for growth and expansion. The founders have developed a collegial working relationship and will be establishing best practices for the company and working together. Unknowns are likely to occur as the company is initially funded and grows and adds additional team members.

OFFERING STATEMENT

10,000 Crowdfunding Shares at \$1 per Share			
	<i># Of Units</i>	<i>Total Proceeds</i>	<i>Net Proceeds</i>
<i>Target Offering</i>	10,000	\$10,000	\$9,300
<i>Maximum Amount</i>	1,070,000	\$1,070,000	\$995,100

Financial risks. Initially as a small company with limited resources, we need the market to accept our plans and offerings, and we may encounter downstream financing challenges. Additionally, if the market conditions are difficult the business may not achieve the scale that it intends or profitability to realize a liquidity event through IPO or acquisition, which could limit or prevent a return on investment for our investors.

Risks Associated with an Investment in Securities

Best efforts offering. This Offering is being made on a “best efforts” basis with no minimum number of Shares required to be sold. As subscriptions are accepted (and any required rescission periods expire), the subscription funds will be available for use by the Company immediately for its intended use of proceeds. Subscriptions are irrevocable (after expiration of any rescission period) and subscribers will not have the opportunity to have their funds returned notwithstanding any future lack of success in recruiting other investors. Accordingly, initial subscribers will necessarily have a greater degree of risk. The Company has not engaged the services of an underwriter with respect to the Offering, and there is no guarantee that any number of Shares are sold, and proceeds will be realized by the Company.

There is no minimum capitalization for this offering and investors’ subscription funds will be used by us as soon as they are received. There is no minimum capitalization required in this Offering. There is no assurance that all or a significant number of Shares may be sold in this Offering. We will use investors’ subscription funds as soon as they are received. If only small portions of the Shares are placed, then we may not have sufficient capital to operate. There is no assurance that we could obtain additional financing or capital from any source, or that such financing or capital would be available to us on terms acceptable to us. Under such circumstances, the project would need to be scaled down, and would have a material adverse effect on our business.

Shares are not guaranteed and could become worthless. The Shares are not guaranteed or insured by any government agency or by any private party. The amount of earnings is not guaranteed and can vary with market conditions. The return of all or any portion of capital invested in the Shares is not guaranteed, and the Shares could become worthless.

Future capital needs; Dilution. The Company believes that the net proceeds of the Offering of the Shares will be sufficient to fund the implementation of the Company’s business plan, operations and growth for the foreseeable future. Nevertheless, in the event that additional capital is required, no assurance can be given that additional financing will be available at all or on terms favorable to the Company. If adequate funds were not available to satisfy either short or long term capital requirements, the Company may be unable to continue in business, with a resulting loss of all or part of investments made by the Company’s investors. Moreover, if additional equity securities are issued in connection with future financings, the ownership percentages of then shareholders could be diluted. Dilution of ownership percentages may also occur as a result of equity securities issued pursuant to possible sales or grants to existing shareholders, officers, managers, consultants, advisors, and/or employees.

We are relying on certain exemptions from registration. The Shares are being offered for sale in reliance upon certain exemptions from the registration requirements of the Securities Act and applicable state securities laws. If the sale of the Shares were to fail to qualify for these exemptions, purchasers may seek rescission of their purchases of the Shares. If a number of purchasers were to obtain rescission, the Company would face significant financial demands, which could adversely affect the Company as a whole, as well as any non-rescinding purchasers.

The Shares are restricted securities and a market for such securities may never develop. Investors should be aware of the potentially long-term nature of their investment. Each purchaser of Shares will be required to represent that it is purchasing such securities for its own account for investment purposes and not with a view to resale or distribution. Purchasers may be required to bear the economic risks of the investment for an indefinite period of time. The Company has neither registered the Shares, nor any other securities under the Securities Act. Consequently,

<i>Target Offering</i>	10,000	\$10,000	\$9,300

shareholders may not be able to sell or transfer their securities under applicable federal and state securities laws. Moreover, there is no public market for the Company's securities, such a market is not likely to develop prior to a registration undertaken by the Company for the public offering of its securities for its own account or the account of others, and there can be no assurance that the Company will ever have such a public offering of its securities. Ultimately, each investor's risk with respect to this Offering includes the potential for a complete loss of his or her investment.

We may be required to register under the Securities Exchange Act. The Company will be required to conform to the rules and regulations promulgated under the various federal and state securities laws applicable to the conduct of its business. Management does not believe that the Company's activities, as presently contemplated, will require registration or qualification of the Company with any federal or state agency.

It is possible that the Securities and Exchange Commission (the "SEC") may require the Company to so register under the 1934 Securities Act. For example, under Section 12(g)(1) of the Securities Exchange Act (as amended by the JOBS Act of 2012), private companies with over 2,000 shareholders and over \$10,000,000 in assets, may be required to register with the SEC within 120 days after their fiscal year end. Such registration would increase the operational expenses of the Company and would restrict its activities, thereby possibly having an adverse effect on its business.

The Offering price is arbitrary. The price of the Shares offered has been arbitrarily established by the Company, without considering such matters as the state of the Company's business development and the general condition of the industry in which it operates. The price of the Shares bears little relationship to the assets, net worth, or any other objective criteria of value applicable to the Company.

Additional unforeseen risks. In addition to the risks described in this section, "RISK FACTORS," and elsewhere in this Memorandum, other risks not presently foreseeable could negatively impact our business, could disrupt our operations and could cause the Company to fail. Ultimately, each investor in the Shares bears the risk of a complete and total loss of his/her/its investment.

A crowdfunding investment involves risk. You should not invest any funds in this offering unless you can afford to lose your entire investment.

In making an investment decision, investors must rely on their own examination of the issuer and the terms of the offering, including the merits and risks involved. These securities have not been recommended or approved by any federal or state securities commission or regulatory authority. Furthermore, these authorities have not passed upon the accuracy or adequacy of this document.

The U.S. Securities and Exchange Commission does not pass upon the merits of any securities offered or the terms of the offering, nor does it pass upon the accuracy or completeness of any offering document or literature.

These securities are offered under an exemption from registration; however, the U.S. Securities and Exchange Commission has not made an independent determination that these securities are exempt from registration.

We are subject to government regulations.

Aspects of our business and our products will be regulated at the local, state, and federal levels. Our products may be subject to state, local and Federal environmental laws and regulations, including those relating to the handling and storage of hazardous materials. We and our products will also be subject to significant governmental regulation relating to labor conditions, safety in the workplace, healthcare and other human resource issues. The nature and scope of future legislation, regulations and programs cannot be predicted. While we anticipate that we and our

products will be in compliance with all applicable governmental regulations, there still may be risks that such laws and regulations may change with respect to present or future operations. Such additional costs would increase the cost of investments and operations and decrease the demand for products and services. We and our products will be ultimately responsible for compliance with such regulations and for obtaining and maintaining all required permits and licenses. Such compliance may be time consuming and costly, and such expenses may materially affect our future ability to break even or generate profits.

Our aggressive growth strategy may not be achievable.

For the foreseeable future, we intend to pursue an aggressive growth strategy for the expansion of our business, and our future operating results will depend largely upon our ability to adequately capitalize our company and develop successful products, find suitable investments and acquisitions, develop our business, build key relationships and successfully develop and manage our business. Our ability to grow will depend upon many factors, including our ability to identify and invest in businesses that have products and services that are in demand, to identify and enter new markets, and to obtain adequate capital resources on acceptable terms. Any limitations on our ability to accomplish any of these and other goals will have a material adverse effect on our business, results of operations, and financial objectives. There is no assurance that our operations will be successful or achieve anticipated or any operating results.

MStreetX does not plan to pay dividends to its shareholders in the near future and there is no guarantee it will ever receive any profit from its operations so as to be able to declare and pay dividends to its shareholders.

The principal investment objective of the Company is to make business profits that present opportunities for significant appreciation to the Company. It is anticipated that certain product research and development will be leveraged and will not provide the Company with any significant cash distributions until new products are sold. Accordingly, the Company may not be able to pay dividends. There can be no assurance with respect to the amount and timing of dividends to the Company's shareholders, or that they will ever be made. The Company initially intends to retain cash from its operations to fund the development and growth of its business.

We will have broad discretion on how the net proceeds of this private placement are utilized. The Company has broad discretion on how to allocate the proceeds received as a result of this private placement and may use the proceeds in ways that differ from the proposed uses discussed in this Offering Statement. If the Company fails to spend the proceeds effectively, our business and financial condition could be harmed and there may be the need to seek additional financing sooner than expected.

We will present only unaudited financial statements, which may not be reliable. In addition to the unaudited financial statement presented with this Offering Statement, we expect to prepare financial statements on a periodic basis. The financial data presented with this Offering Statement has not been audited, certified, or reviewed.

We may not be able to protect our intellectual property. We intend to explore options for protection of certain intellectual property, primarily in the form of trademarks and trade secrets but have not made any filings to date. We anticipate developing certain trade secrets and may handle trade secrets that are the property of others. We regard the legal protection of our intellectual property (and the intellectual property of others) as important to future success and will rely on a combination of trade secret laws, copyright, and trademark laws, confidentiality procedures and contractual restrictions to establish and protect our proprietary rights in products and services. There can be no assurance that the steps we take to protect our proprietary rights will prove sufficient to prevent misappropriation of such proprietary rights.

Management may have significant conflicts of interest. Management and certain affiliates will devote as much of their time to the business of the Company as they believe, in their sole judgment, is reasonably required. Accordingly, there may be conflicts of interest between investments made by the Company and other investments or business ventures in which management or affiliates are participants. Any agreement between the Company and the

management and affiliates shall contain terms at least as favorable to the Company as the fair market terms offered by other similar companies to third-party providers of comparable services.

There is significant risk associated with the Company's indemnification of affiliated parties. Our Directors and executive officers will be relieved of liability to the Company or our Shareholders for monetary damages for conduct as Directors and executive officers to the maximum extent permitted by Delaware law. Further, our certificate of incorporation and bylaws permit us to indemnify, to the fullest extent provided or allowed by law, our Directors and executive officers against damages that we or our shareholders incur in connection with our business. We may also enter into indemnity agreements with our Directors and executive officers. The exculpation provisions contained therein may have the effect of preventing shareholders from recovering damages against our Directors and executive officers caused by poor judgment or other circumstances. The indemnification provisions may require us to use our assets to defend our Directors and executive officers against claims, including claims arising out of negligence, poor judgment, or other circumstances. Our Directors and executive officers may not be liable to the Company or shareholders for any act or omission performed or omitted by them in good faith on our behalf and in a manner reasonably believed by them to be within the scope of their authority and in our best interests. The Company will be required to indemnify the officers of the Company and certain persons affiliated therewith for losses, costs, liabilities and expenses incurred by such parties in connection with the business of the Company and investment decisions made on its behalf, except for actions taken in bad faith or which constitute gross negligence or willful misconduct. Such liabilities may be material and may have an adverse impact on the returns to the shareholders unless insurance proceeds are available. The indemnification obligations of the Company will be payable from the assets of the Company.

Certain future relationships have not been established. The Company has established and will establish certain relationships with others. We will need to maintain such relationships and, in some cases, establish new ones or replace existing ones. There will be several agreements and documents that remain to be negotiated, executed, and implemented with respect to certain aspects of our planned operations. In some cases, the parties with whom we would need to establish a relationship may not yet be identified. If we are unable to enter into these agreements or relationships on satisfactory terms, our operations could be delayed or curtailed, expenses could be increased, and profitability and the likelihood of returns to Shareholders could be adversely affected.

There is no public market for the Shares and you will have to hold your Shares indefinitely, subject only to a private sale to a qualified counterparty that is exempt from registration, or a registration of your common shares, or a sale of the business. Currently, there is no public or other trading market for the Shares, and there can be no assurance that MStreetX will be able to facilitate a private sale of your Shares or that any other market will develop. Thus, there can be no assurance that you will be able to liquidate your investment in case of an emergency or if you otherwise desire to do so. Investment in the Shares is of a long-term nature. Accordingly, purchasers of Shares will bear the economic risk of investment for an indefinite period of time.

Our Shareholders' Agreement imposes significant restrictions on transfer of Shares. Investors that purchase Shares in this Offering will be required to become bound by our Shareholders' Agreement. A copy of the Shareholders' Agreement is available upon request from the Company. The Shares may be transferred only if certain legal requirements as well as requirements imposed by our Shareholders' Agreement are satisfied and only with our consent. The Shareholders' Agreement imposes certain requirements and restrictions on the ability of a shareholder to sell or transfer the Shares. Among other requirements, in most circumstances, the shareholder must first offer the Shares to the Company and then the other shareholders before the shareholder may transfer the Shares to a third party. Certificates representing the Shares will also bear a legend indicating that the Shares are subject to the restrictions on transfer imposed by the Shareholders' Agreement.

Public health epidemics or outbreaks could adversely impact our business. In December 2019, a novel strain of coronavirus (COVID-19) emerged in Wuhan, Hubei Province, China. While initially the outbreak was largely

concentrated in China and caused significant disruptions to its economy, it has now spread to several other countries and infections have been reported globally. The extent to which the coronavirus impacts our operations will depend on future developments, which are highly uncertain and cannot be predicted with confidence, including the duration of the outbreak, new information which may emerge concerning the severity of the coronavirus and the actions to contain the coronavirus or treat its impact, among others. In particular, the continued spread of the coronavirus globally could adversely impact our operations, and could have an adverse impact on our business and our financial results.

If we make mistakes or have unforeseen things happen to us, our suppliers or the world, we can make little or no profit and can be driven out of business.

THE BOTTOM LINE:

Investment in the securities of smaller companies can involve greater risk than is generally associated with investment in larger, more established companies. All investments can result in significant or total loss of your loan and/or investment. If we do well, the stock should do well also, yet life offers no guarantees and neither can we. If we make mistakes or have unforeseen things happen to us, our suppliers or the world, we can make little or no profit and can be driven out of business. We cannot guarantee success, return on investment, or repayment of loans.

Please only invest what you can afford to lose.

Target Offering	10,000	\$10,000	\$9,300
Maximum Amount	1,070,000	\$1,070,000	\$995,100

The valuation of the company has been performed based on the issuers' qualitative and financial information, including but not limited to: 1. the quality, size and experience of the management team; 2.- the market of reference and business model; 3. the product/service and customers' feedback; 4. - the presence of strategic partnerships as well as external investors; 5. - the presence of relevant IP and/or legal risks; 6. - the current financial performance of the company; 7. - the projected financial performance of the company.

This information is combined with market-industry data, provided by a comprehensive valuation software, to come up with a comprehensive valuation estimate based on 5 different valuation models, 2 based on a qualitative assessment (named Scorecard and Check-List) and 3 based financial projections (namely: VC method, Discounted Cash Flows with Multiples, and Discounted Cash Flows with Long-Term Growth).

These methods are combined in a weighted average that applies the weights (see above image) according to the stage of development of the company (assessed by the valuation software), giving more emphasis on the 2 qualitative methods for early-stage businesses, and vice versa.

The weights for the above mentioned valuation methods are: Scorecard (30%), Check-list (30%), Venture Capital (16%), DCF- Long Term Growth (12%), and DCF with Multiples (12%).

The full valuation report (17 pages) is part of this offering and is to be found in the Offering's Documents Section.

The valuation was calculated at pre money **\$12,548,145**.

The company has elected to go with a slightly more conservative valuation of \$12,000,000.

22. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

OFFERING STATEMENT

10,000 Crowdfunding Shares at \$1 per Share			
	# Of Units	Total Proceeds	Net Proceeds
Target Offering	10,000	\$10,000	\$9,300
Maximum Amount	1,070,000	\$1,070,000	\$995,100

The right to demand current distributions from an operating business is limited. A majority owner, if she is committed to avoiding any distributions to a minority owner, can usually avoid making any distributions of profits. By establishing generous reserves for future expenses, paying a salary to herself or her relatives at the high range of what is reasonable, pre-paying expenses, investing in new business or new equipment, leasing expensive cars, etc., a majority owner can spend enough that there are rarely any profits to be distributed. So long as the expenses are not grossly unreasonable, the investor, probably, won't be able to force the company to allow you to share in any of the current income of the company.

No right to participate in any management decisions of the company. The majority owner may make a decision that the investor think is bad and puts your interest in the company at risk. The investor may see the majority owner running the company into the ground. The investor can try to convince him that it is the wrong decision, but he doesn't have to take your calls.

The investor has limited rights, if any, to have your interest bought out. You may want to cash out your interest and do other things with the money. State law may give you the right to force the company to buy you out, but these rights are limited.

While the investor would be entitled to a share of any profits on sale of the entire business, a sale can be structured in a way to avoid any payout to minority owners, such as a sale of assets over time with the proceeds reinvested in another business.

23. What are the risks to purchasers associated with corporate actions including:

- **Additional issuances of securities:**

Following the investor's investment in the Company, the Company may sell interest to additional investors, which will dilute the percentage interest of the investor in the Company. The Investor might have the opportunity to increase its investment in the Company in such transaction, but such opportunity cannot be assured. The amount of additional capital needed by the Company, if any, will depend upon the maturity and the objectives of the Company.

- **Issuer repurchases of securities:**

The company may have the authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the investor to sell its securities to the Company concurrently.

- **A sale of the issuer or of assets of the issuer:**

As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders.

- **Transactions with related parties:**

The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and the Board of Directors of the Company will be guided by their good faith judgement as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its shareholders. By acquiring an interest in the company, the investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of

Notes to Financial Statements (continued) October 31, 2020

Property and Equipment, Net

Property and equipment are recorded at cost. Depreciation is computed using a straight-line mid-Period convention method over the estimated useful lives of the assets, which for furniture and fixtures, auto and most computer equipment ranges primarily from five to seven years.

In addition, repairs and maintenance performed on equipment or software are expensed as incurred.

Cash and Cash Equivalents

Cash equivalents consist primarily of short-term investments in overnight money market funds.

Accounting Method

The Company's financial statements are prepared using the accrual method of accounting. In accordance with this method of accounting, revenue is recognized in the period in which it is earned and expenses are recognized in the period in which they are incurred. All revenue and expenses that are applicable to future periods are presented as deferred income or prepaid expenses on the accompanying balance sheets.

Income Taxes

The Company is taxed as a Corporation. The Company files income tax returns in the U.S federal jurisdiction and Delaware State Jurisdiction. The tax benefit asset for federal and state taxes is \$818 and 339, respectively, which is due to expire in 2040. Due to lack of history, the Company has decided to set up valuation allowance account until they can better estimate the realization date.
