SIZIGI

## SUPERCHARGING THE JOB HUNT
The Average Job Hunt:
too long, generic, & lacks feedback

5
months

200
applications

10
interviews

1 job offer...maybe

joinsizigi.com

Your all-in-one tool for a supercharged job hunt

One professional journey, one tool.

Join the Digital Transformation

01 Application Tracking

Every job hunt starts with a job search.

Sizigi provides a search engine to look up, filter, and select the careers users are interested in pursuing.

Our best practices task list can be used as designed or customized to our user's likings. We'll move triggered job cards to the proper swimlanes, or users have the power to do everything themselves.

joinsizigi.com

02 Custom Job Pitches

Jobs aren't one-size-fits-all, so let's stop pretending that one resume should be submitted for every job.
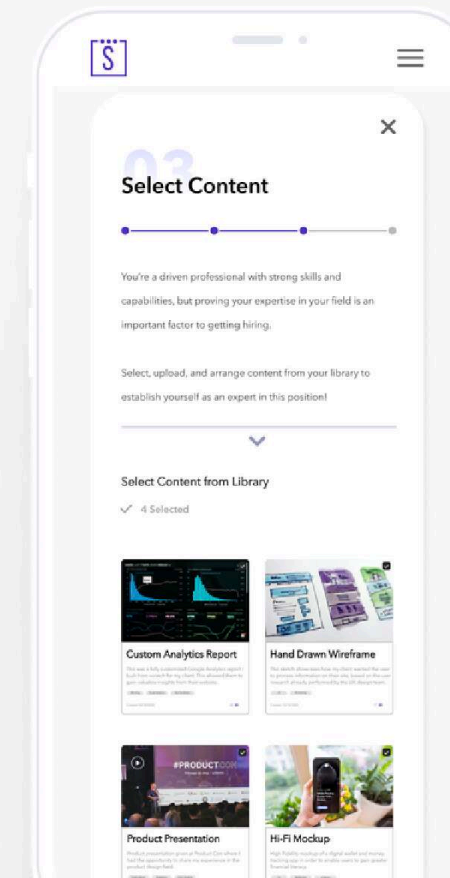

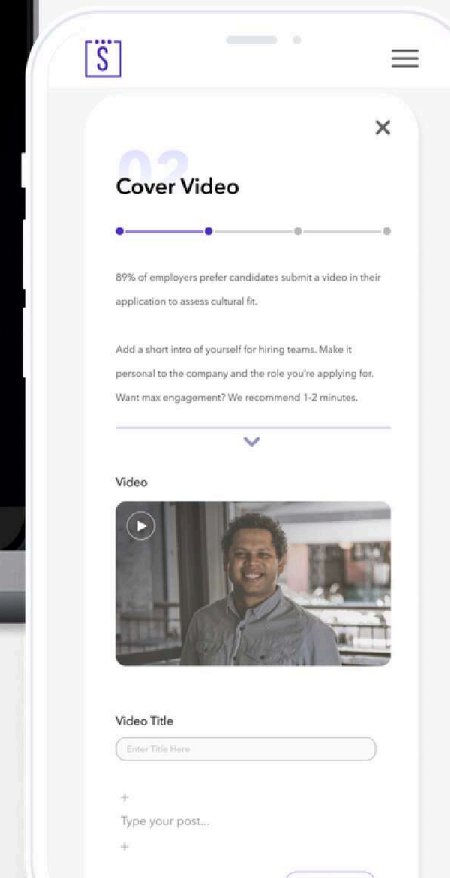

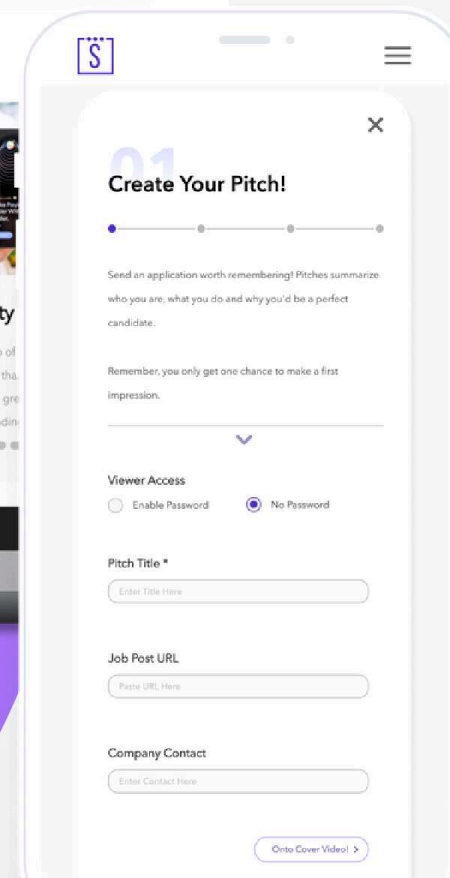

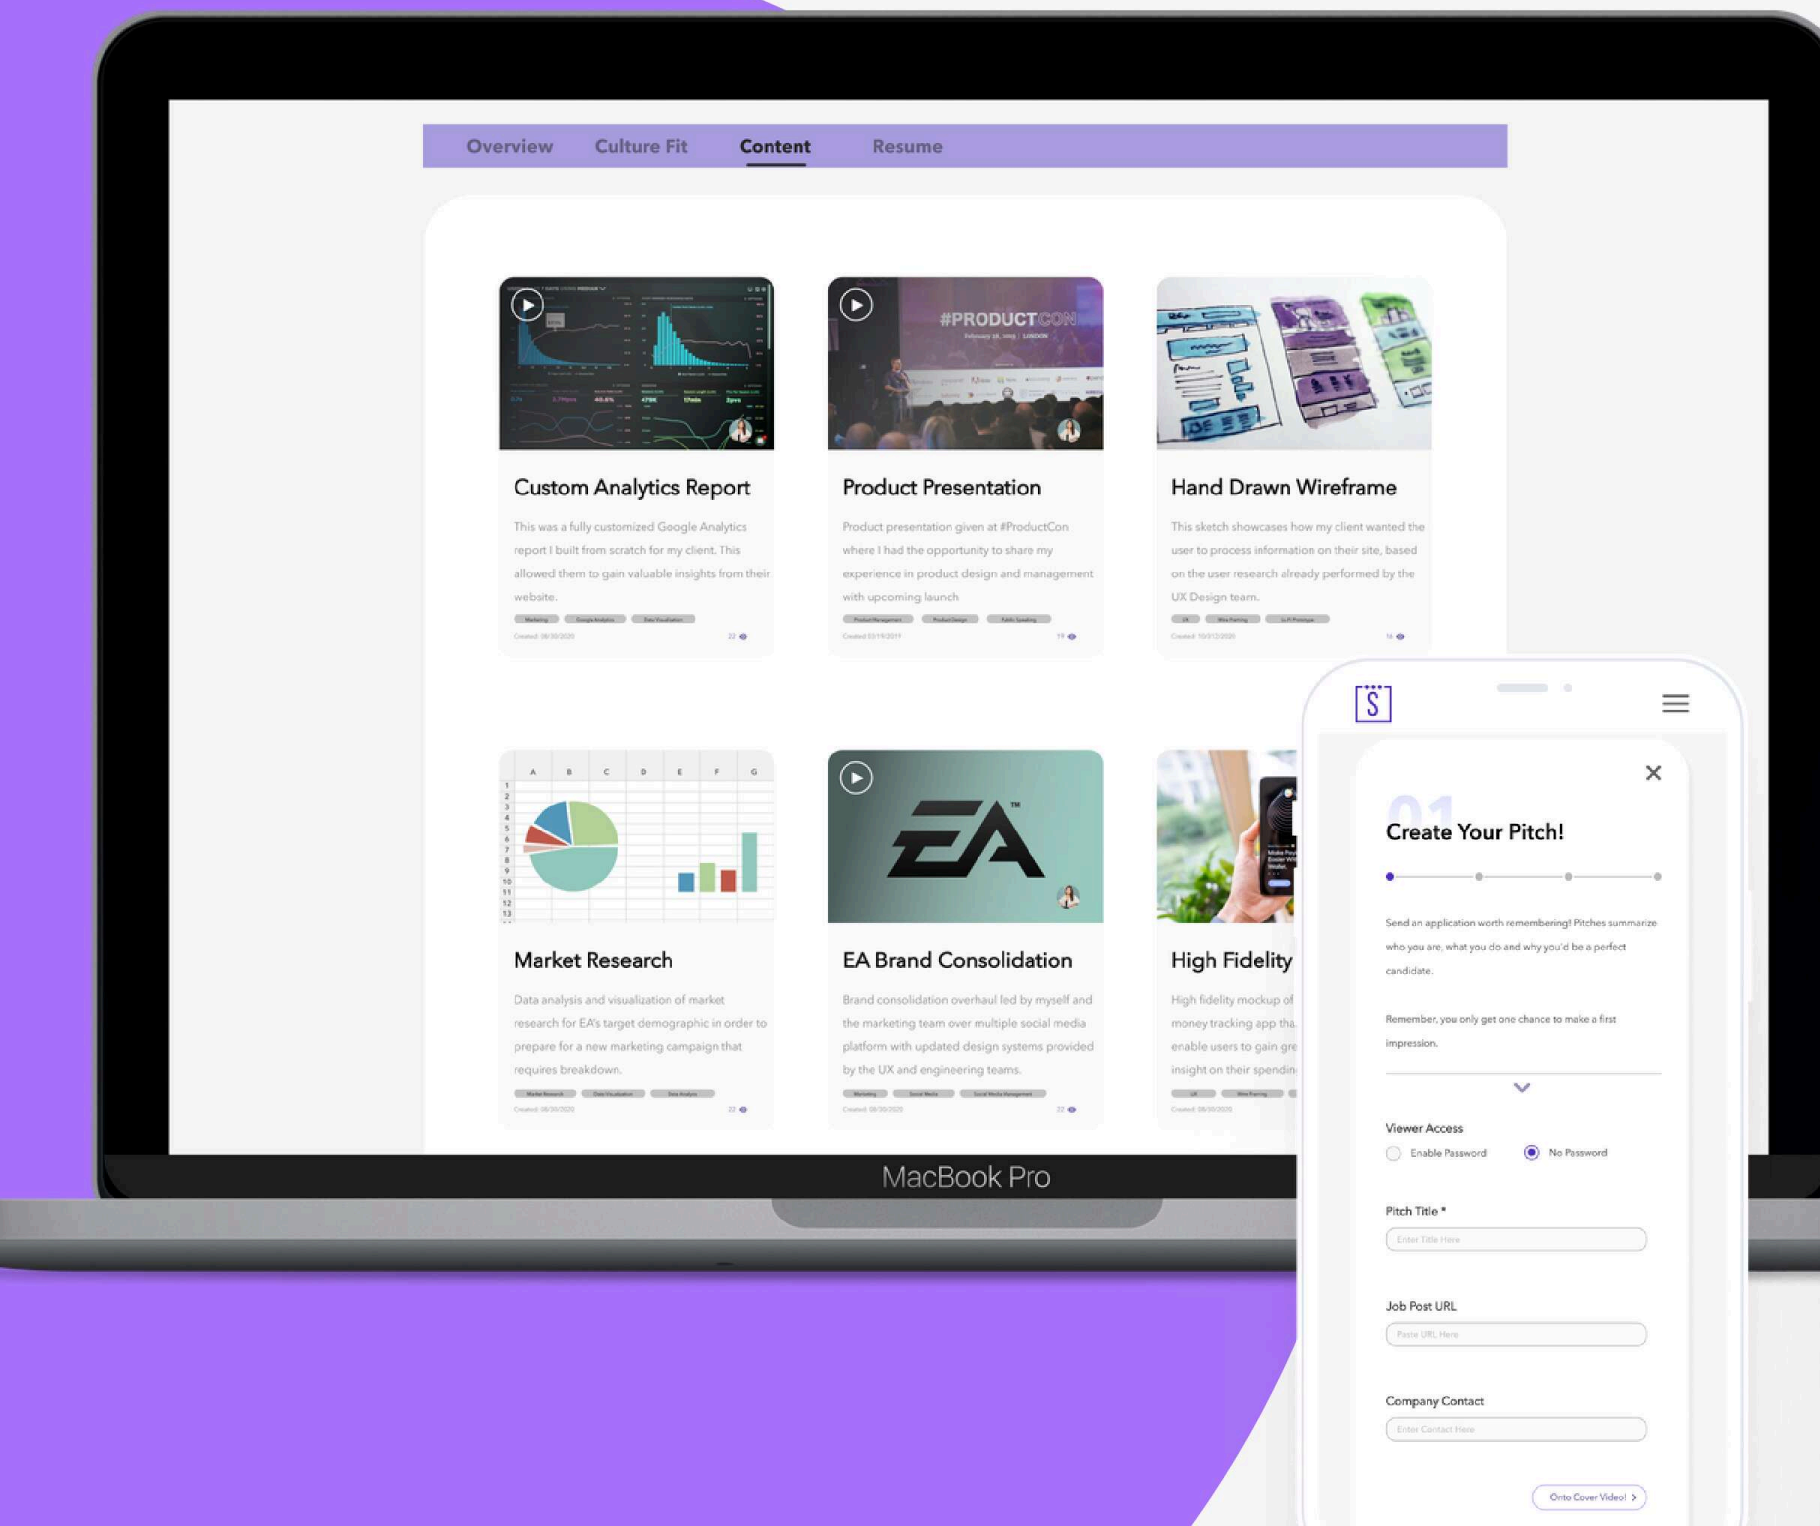

Or that one page properly captures one's entire professional career.
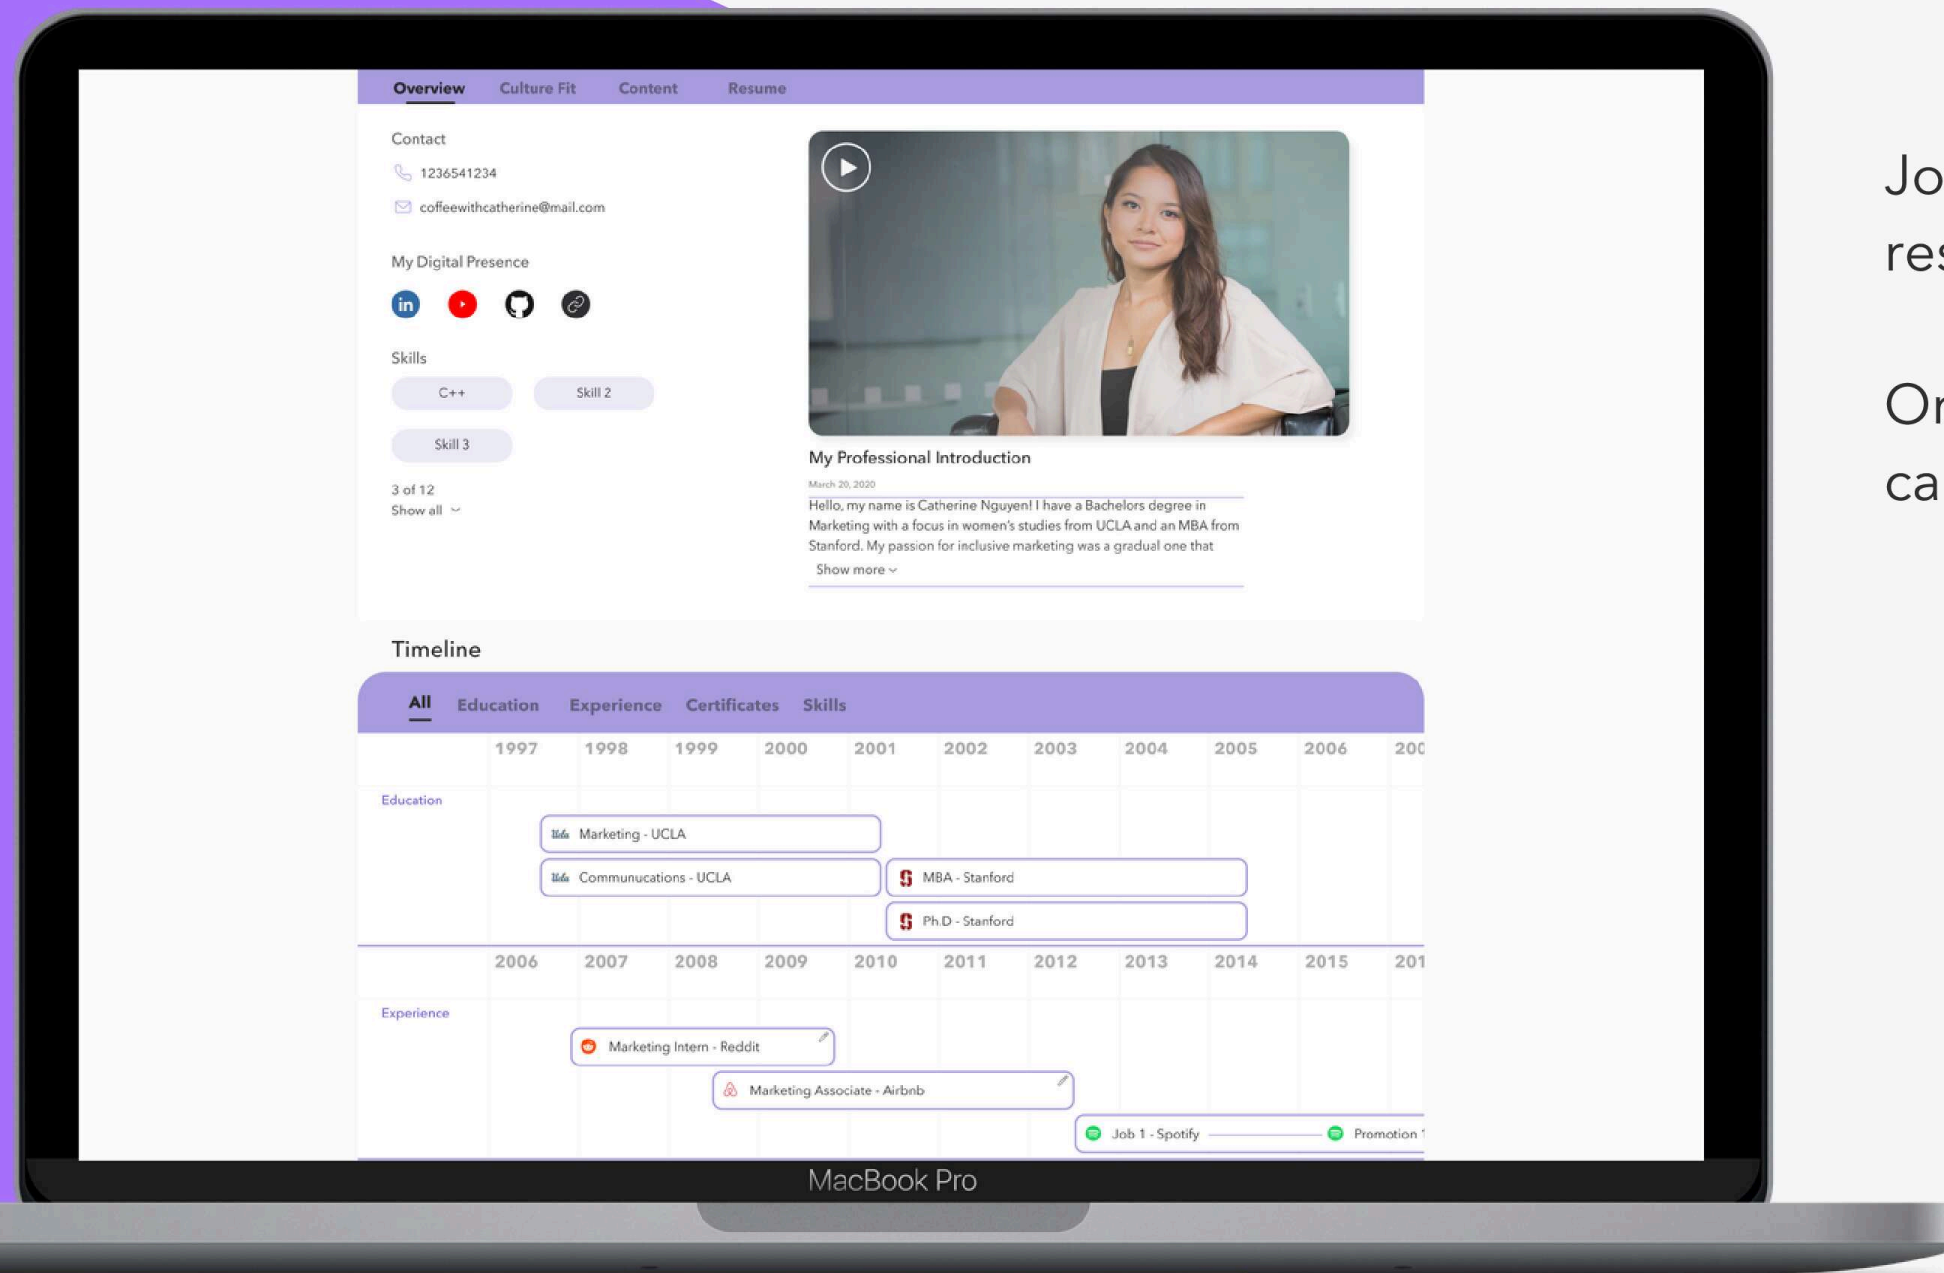

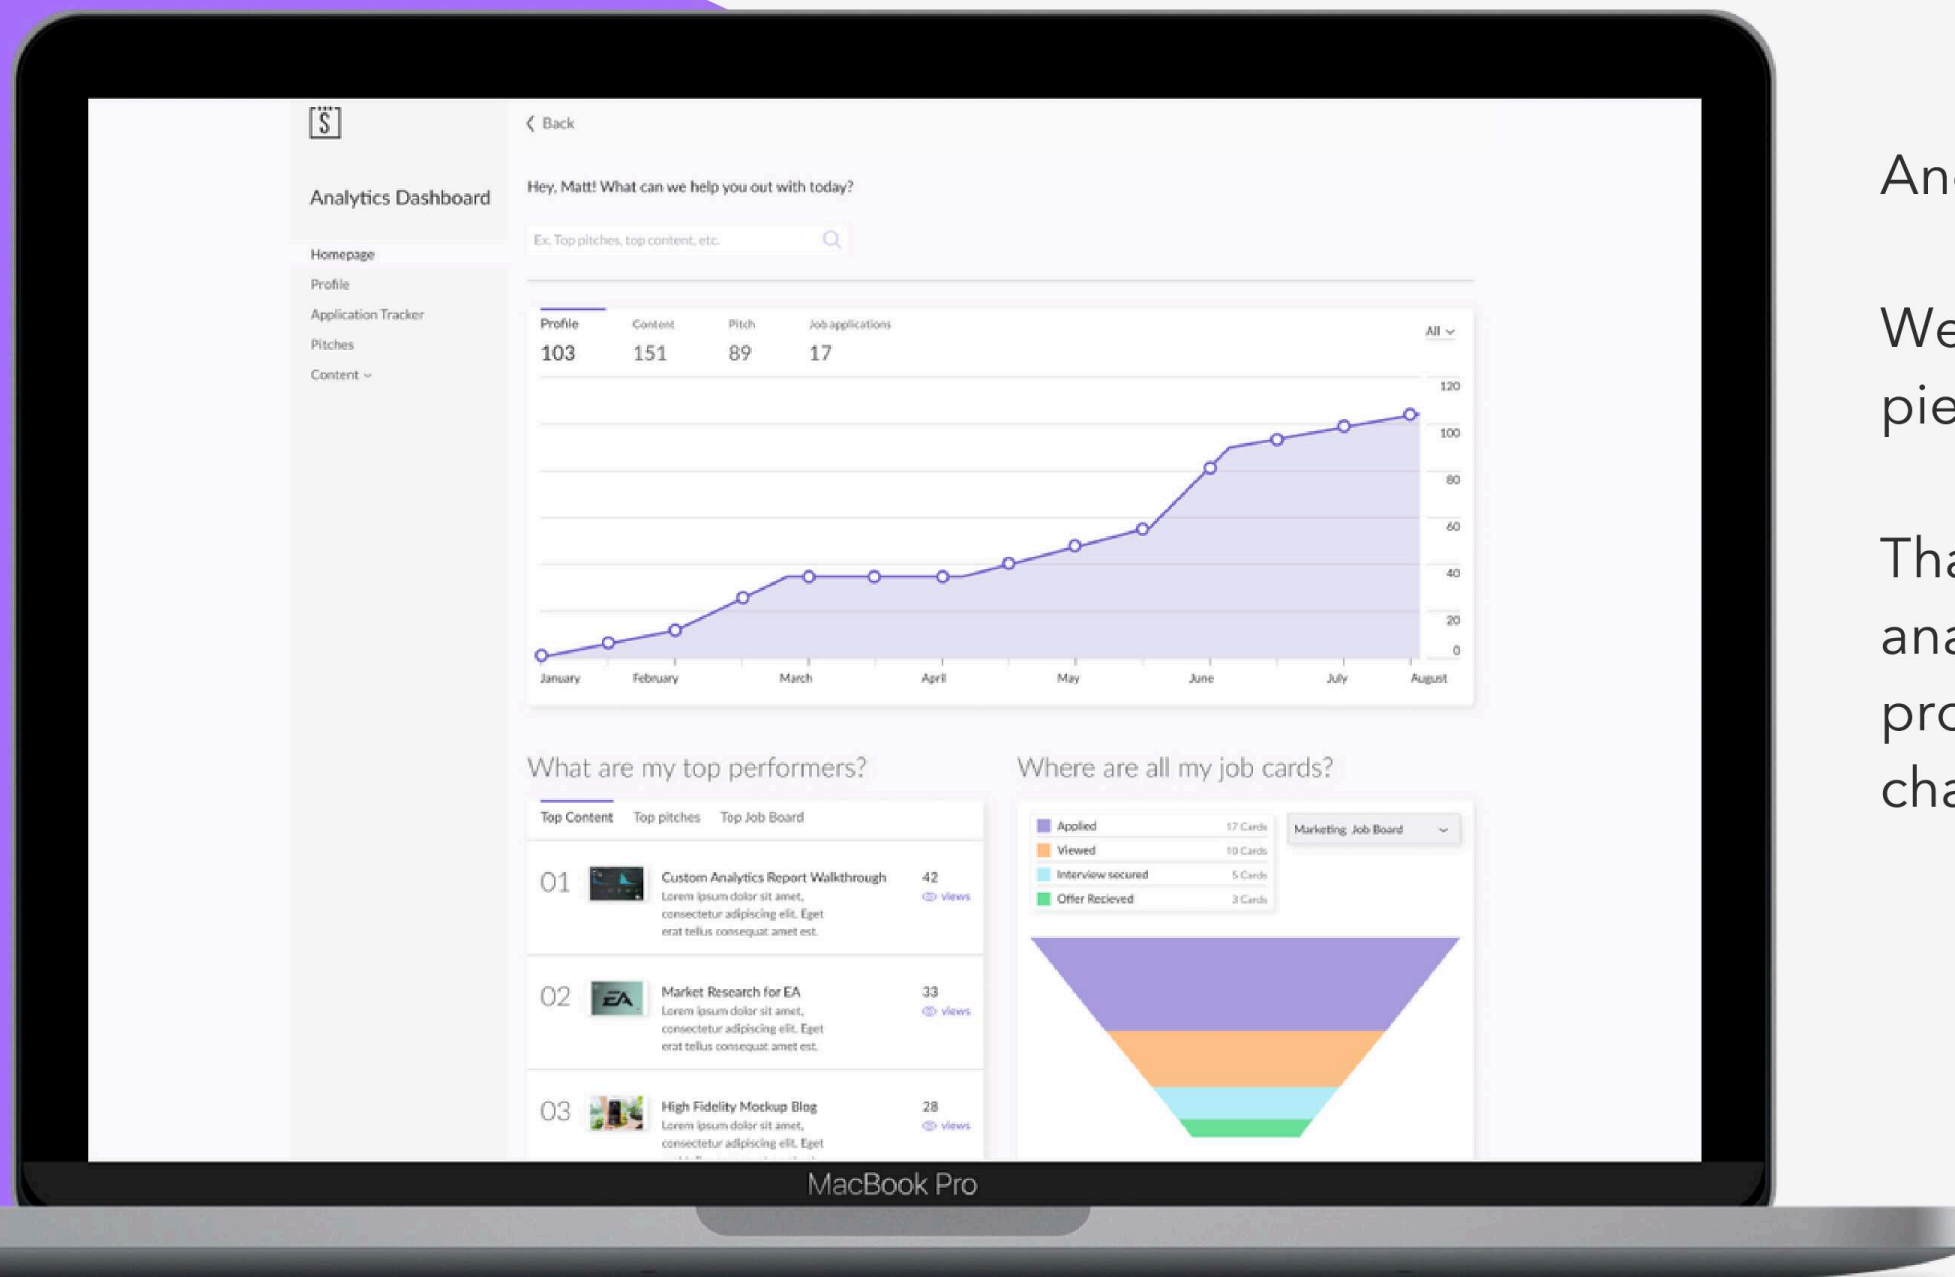

02 Custom Job Pitches

continued...

Sizigi allows users to tailor each job pitch to whichever position they're applying for by updating their intro video, relevant skills, and featuring content that properly pertains to each job opening.

Actionable Analytics

And the secret sauce. Alerts that provide actionable analytics.

We provide data on how a user's profile, pitches, and individual pieces of content perform and provide actionable insights.

That's right. No more confusing "what do I do with this data" analytics. Sizigi provides straightforward data interpretation that prompts users to perform certain actions that increase their chances of getting hired.
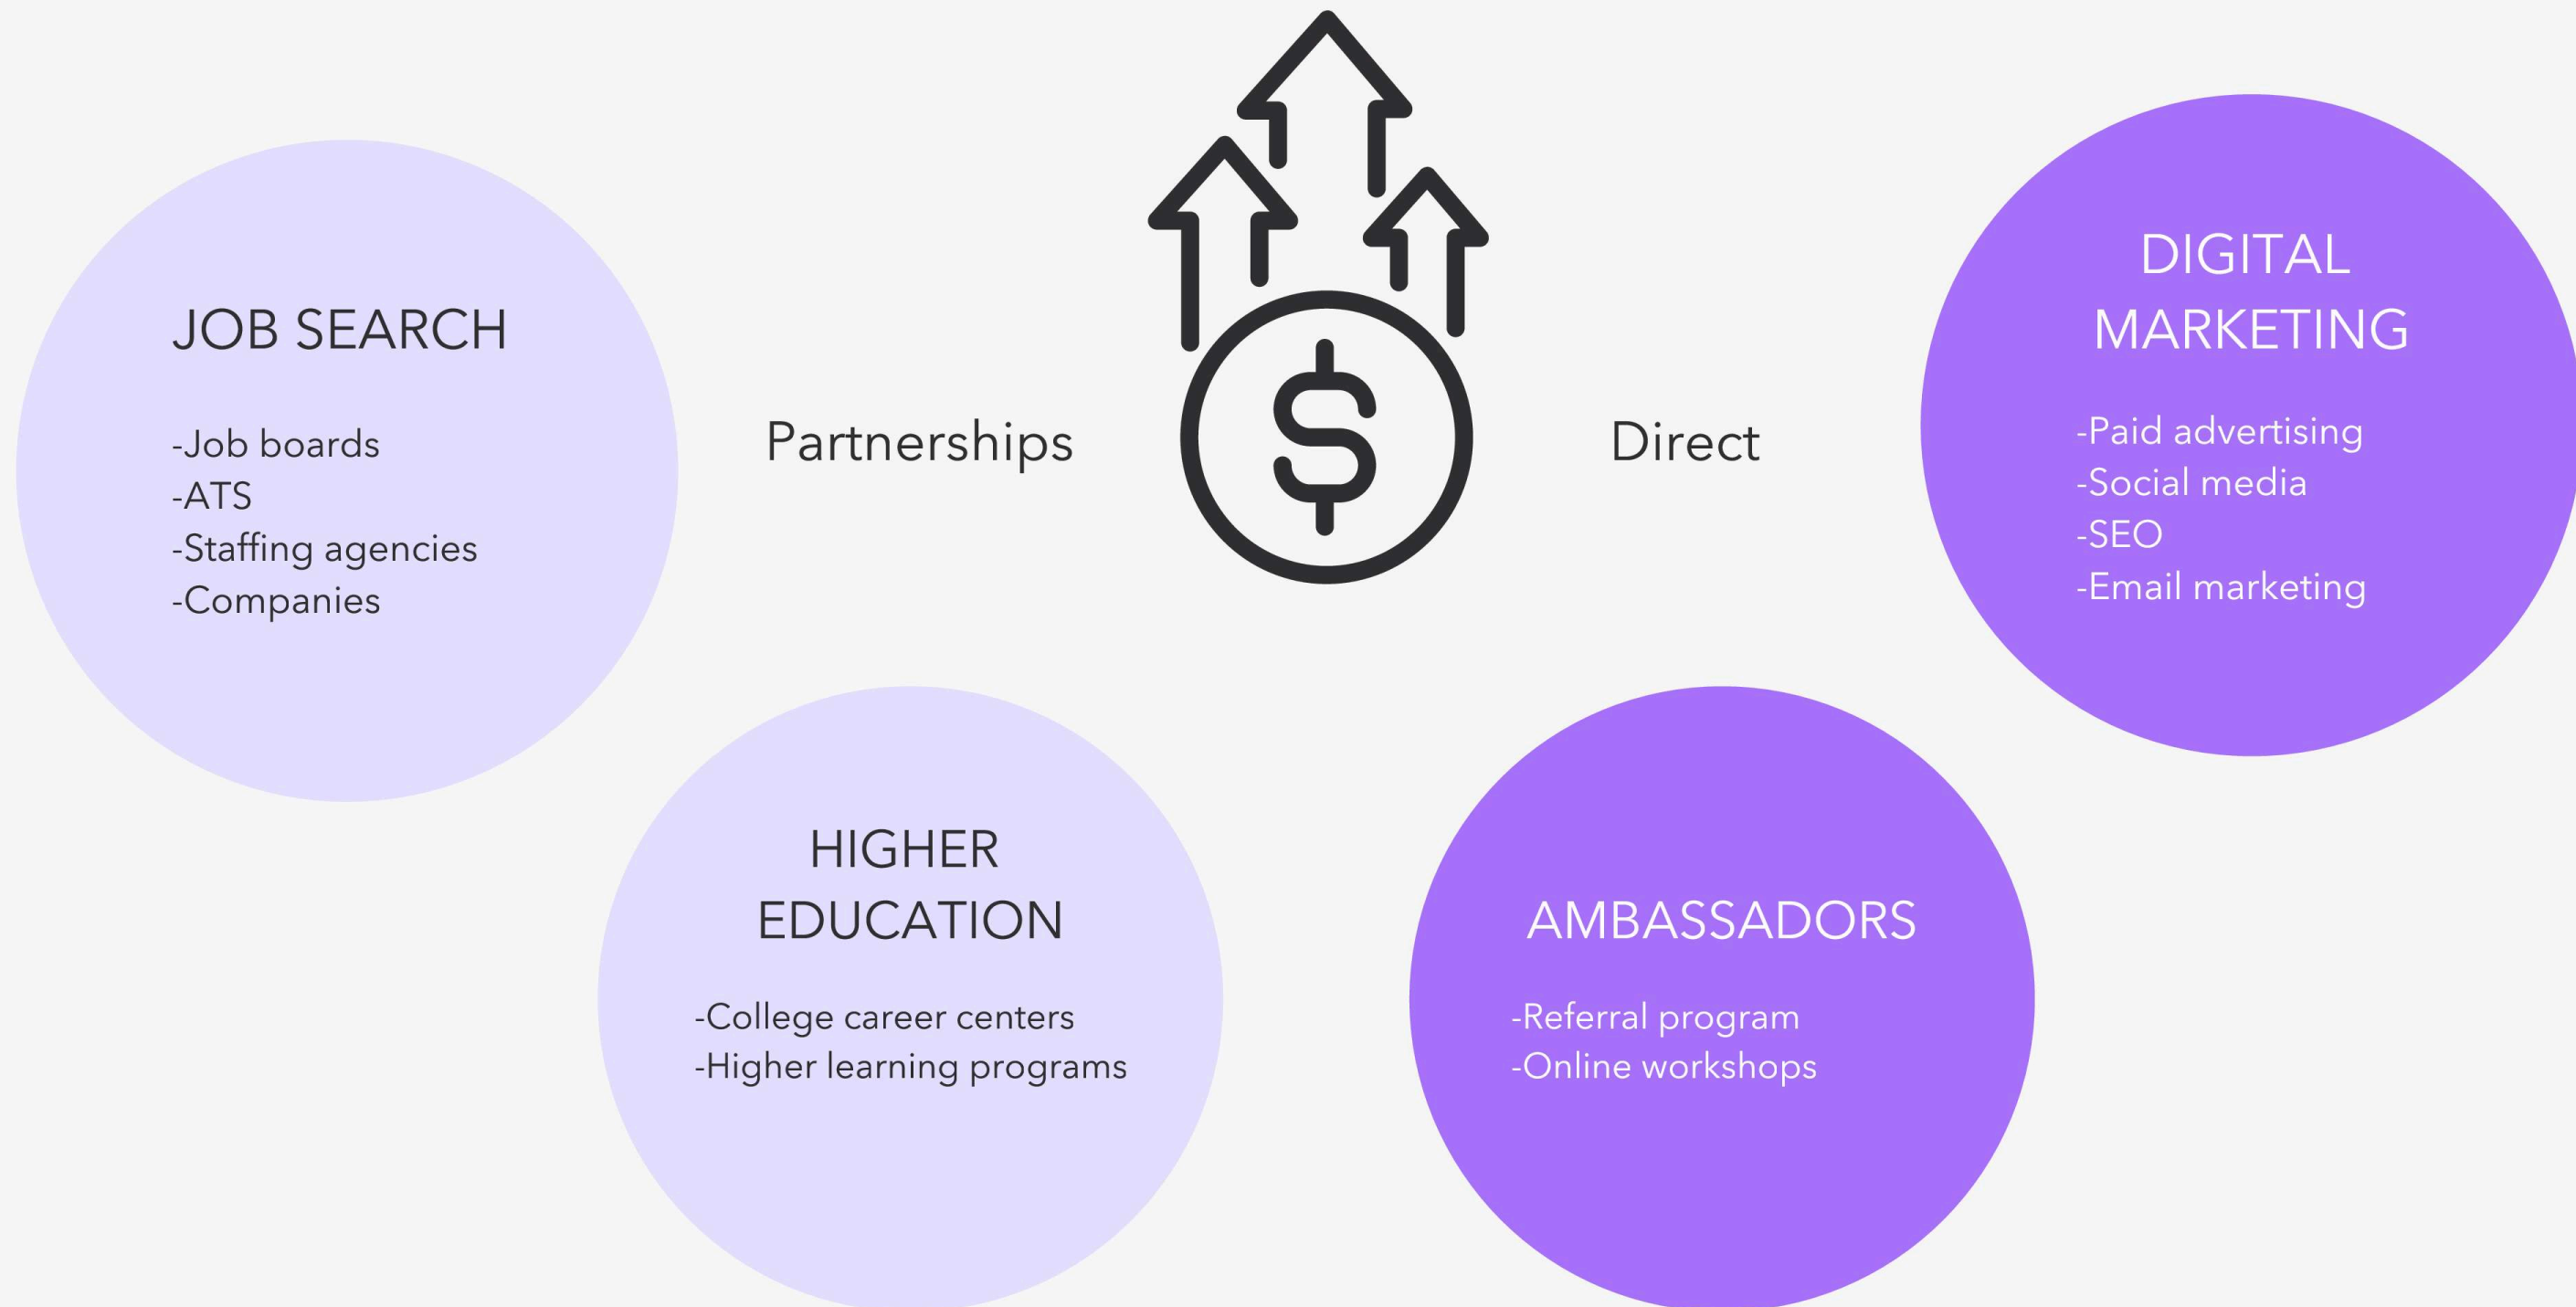

Plans & Pricing

Get the power, control, and customization you need to supercharge your job search.
