The Ohio State University

Experience

CTO & Cofounder

Lexria · Full-time

Apr 2019 – Present · 2 yrs

Columbus, Ohio Area

Lexria helps consumers with the process of including their student loans in bankruptcy. We're solving the $1.6 Trillion student loan crisis by making justice accessible to the middle class.

For years, there's been a misconception that student loans can't be included in bankruptcy. Turns out this narrative is completely false.

Lexria connects qualified consumers with an affiliated lawyer who has specific experience discharging student debt in bankruptcy.   ...see more

Head of Engineering

MineralSoft

May 2016 – Jun 2019 · 3 yrs 2 mos

Columbus, Ohio Area

MineralSoft (YC W2016) helps mineral rights owners manage their complex data assets to ensure they are being paid correctly and assets are properly valued. I joined as employee #2 leading all of product development and grew the team to ~12. We built a wonderful culture focused on a passion for learning, open respectful communication, love of challenς …see more

Director

AllClear ID

Jul 2013 – May 2016 · 2 yrs 11 mos

Austin, Texas Area

AllClear ID offers data breach response services to business that have experienced security incidents affecting their customers. I joined when AllClear ID was a small company of about ~30 people to help build a differentiated product vision put together by the CEO and VP of Operations. We were able to maintain and modernize a legacy J2EE stack to scale …see more

Manager

Alcatel-Lucent Motive

Apr 2010 – Jul 2013 · 3 yrs 4 mos

Austin, Texas Area

Motive helps telecommunications companies provide differentiated self and assisted service experiences. I managed a team in Austin and helped hire remote engineers in the U.S. and in India to expand the team. We helped develop great solutions for home and mobile device management for companies like AT&T and Verizon Wireless in both on-premise anς …see more

Software Engineer (Team Lead)

GXS

Aug 2006 – Apr 2010 · 3 yrs 9 mos

Cleveland/Akron, Ohio Area

GXS helps businesses connect and exchange documents like purchase orders to enable a modern backend for B2B exchanges. I rapidly moved from intern to software engineer and eventually led a team of 6 globally distributed remote engineers working on our core messaging products.

Education

The Ohio State University

B.S., Mathematics

2004 – 2006
