RISK FACTORS

Risks Related to the Company's Business and Industry

We have limited history upon which you can evaluate our performance, and accordingly, our prospects must be considered in light of the risks that any new company encounters.

Joolez LLC was formed May 9, 2016, and Joolez, Inc. was incorporated December 4, 2020. The acquisition of the assets and liabilities of the LLC by the c-corp was completed in January 2021. Accordingly, we have little history upon which an evaluation of our prospects and future performance can be made. Our proposed operations are subject to all business risks associated with a new enterprise. The likelihood of our creation of a viable business must be considered in light of the problems, expenses, difficulties, complications, and delays frequently encountered in connection with the inception of a business, operation in a competitive industry, and the continued development of advertising, promotions, and a corresponding client base. We anticipate that our operating expenses will increase for the near future. There can be no assurances that we will ever operate profitably. You should consider the Company's business, operations and prospects in light of the risks, expenses and challenges faced as an early-stage company.

We may face potential difficulties in obtaining capital.

We may have difficulty raising needed capital in the future as a result of, among other factors, our lack of an approved product and revenues from sales, as well as the inherent business risks associated with our company and present and future market conditions. Our business currently does not generate any sales and future sources of revenue may not be sufficient to meet our future capital requirements. We will require additional funds to execute our business strategy and conduct our operations. If adequate funds are unavailable, we may be required to delay, reduce the scope of or eliminate one or more of our development or commercialization programs, any of which may materially harm our business, financial condition and results of operations.

In order for the Company to compete and grow, it must attract, recruit, retain and develop the necessary personnel who have the needed experience.

Recruiting and retaining highly qualified personnel is critical to our success. These demands may require us to hire additional personnel and will require our existing management personnel to develop additional expertise. We face intense competition for personnel. The failure to attract and retain personnel or to develop such expertise could delay or halt the development and commercialization of our product candidates. If we experience difficulties in hiring and retaining personnel in key positions, we could suffer from delays in product development, loss of customers and sales and diversion of management resources, which could adversely affect operating results. Our consultants and advisors may be employed by third parties and may have commitments under consulting or advisory contracts with third parties that may limit their availability to us.

The development and commercialization of our AI powered diamond ring e-commerce platform is highly competitive.

We face competition with respect to any products that we may seek to develop or commercialize in the future. Our competitors include major companies worldwide. Many of our competitors have significantly greater financial, technical and human resources than we have and superior expertise in research and development and marketing AI powered diamond ring e-commerce platforms and jewelry products and thus may be better equipped than us to develop and commercialize the Joolez diamond ring e-commerce website. These competitors also compete with us in recruiting and retaining qualified personnel and acquiring technologies. Smaller or early-stage companies may also prove to be significant competitors, particularly through collaborative arrangements with large and established companies. Accordingly, our competitors may commercialize products more rapidly or effectively than we are able to, which would adversely affect our competitive position, the likelihood that our AI powered diamond ring e-commerce platform will achieve initial market acceptance and our ability to generate meaningful additional revenues from our products.

We rely on other companies to provide precious stones, ring settings, and packaging materials for our products.

We depend on these suppliers and subcontractors to meet our contractual obligations to our customers and conduct our operations. Our ability to meet our obligations to our customers may be adversely affected if suppliers or subcontractors do not provide the agreed-upon supplies or perform the agreed-upon services in compliance with customer requirements and in a timely and cost-effective manner. Likewise, the quality of our products may be adversely impacted if companies to whom we delegate manufacture of major components or subsystems for our products, or from whom we acquire such items, do not provide precious stones, ring settings, and packaging materials which meet required specifications and perform to our and our customers' expectations. Our suppliers may be less likely than us to be able to quickly recover from natural disasters and other events beyond their control and may be subject to additional risks such as financial problems that limit their ability to conduct their operations. The risk of these adverse effects may be greater in circumstances where we rely on only one or two subcontractors or suppliers for a particular precious stone, ring setting, or packaging material.

We depend on third-party service providers and outsource providers for a variety of services and we outsource a number of our non-core functions and operations.

In certain instances, we rely on single or limited service providers and outsourcing vendors around the world because the relationship is advantageous due to quality, price, or lack of alternative sources. If production or service was interrupted and we were not able to find alternate third-party providers, we could experience disruptions in manufacturing and operations including product shortages, higher freight costs and re-engineering costs. If outsourcing services are interrupted or not performed or the performance is poor, this could impact our ability to process, record and report transactions with our customers and other constituents. Such interruptions in the provision of supplies and/or services could result in our inability to meet customer demand, damage our reputation and customer relationships and adversely affect our business.

We depend on third party providers, suppliers and licensors to supply some of the hardware, software and operational support necessary to provide some of our services.

We obtain these materials from a limited number of vendors, some of which do not have a long operating history, or which may not be able to continue to supply the equipment and services we desire. Some of our hardware, software and operational support vendors represent our sole source of supply or have, either through contract or as a result of intellectual property rights, a position of some exclusivity. If demand exceeds these vendors' capacity or if these vendors

experience operating or financial difficulties or are otherwise unable to provide the equipment or services we need in a timely manner, at our specifications and at reasonable prices, our ability to provide some services might be materially adversely affected, or the need to procure or develop alternative sources of the affected materials or services might delay our ability to serve our customers. These events could materially and adversely affect our ability to retain and attract customers, and have a material negative impact on our operations, business, financial results and financial condition.

As a distributor of diamond rings, our business depends on developing and maintaining close and productive relationships with our vendors.

We depend on our vendors to sell us quality products at favorable prices. Many factors outside our control, including, without limitation, raw material shortages, inadequate manufacturing capacity, labor disputes, transportation disruptions or weather conditions, could adversely affect our vendors' ability to deliver to us quality merchandise at favorable prices in a timely manner. Furthermore, financial or operational difficulties with a particular vendor could cause that vendor to increase the cost of the products or decrease the quality of the products we purchase from it. Vendor consolidation could also limit the number of suppliers from which we may purchase products and could materially affect the prices we pay for these products. We will suffer an adverse impact if our vendors limit or cancel the return privileges that currently protect us from inventory obsolescence.

In general, demand for our products and services is highly correlated with general economic conditions.

A substantial portion of our revenue is derived from discretionary spending by individuals, which typically falls during times of economic instability. Declines in economic conditions in the U.S. or in other countries in which we operate may adversely impact our consolidated financial results. Because such declines in demand are difficult to predict, we or the industry may have increased excess capacity as a result. An increase in excess capacity may result in declines in prices for our products and services.

Security breaches and other disruptions could compromise our information and expose us to liability, which would cause our business and reputation to suffer.

We collect and store sensitive data, including intellectual property, our proprietary business information and that of our customers, suppliers and business partners, and personally identifiable information of our customers, on our networks. The secure maintenance of this information is critical to our operations. Despite our security measures, our information technology and infrastructure may be vulnerable to attacks by hackers or breached due to employee error, malfeasance or other disruptions. Any such breach could compromise our networks and the information stored there could be accessed, publicly disclosed, lost or stolen. Any such access, disclosure or other loss of information could result in legal claims or proceedings, disrupt our operations and the services we provide to customers, and damage our reputation, which could adversely affect our business/operating margins, revenues and competitive position.

An intentional or unintentional disruption, failure, misappropriation or corruption of our network and information systems could severely affect our business.

Such an event might be caused by computer hacking, computer viruses, worms and other destructive or disruptive software, "cyber attacks" and other malicious activity, as well as natural disasters, power outages, terrorist attacks and similar events. Such events could have an adverse impact on us and our customers, including degradation of service, service disruption, excessive

call volume to call centers and damage to our plant, equipment and data. In addition, our future results could be adversely affected due to the theft, destruction, loss, misappropriation or release of confidential customer data or intellectual property. Operational or business delays may result from the disruption of network or information systems and the subsequent remediation activities. Moreover, these events may create negative publicity resulting in reputation or brand damage with customers.

The Company's success depends on the experience and skill of the board of directors, its executive officers and key employees.

In particular, the Company is dependent on Yuri Iskhakov who is the Chief Executive Officer and sole director of the Company. The Company has or intends to enter into employment agreement with Yuri Iskhakov in the future when resources allow, although there can be no assurance that it will do so or that he will continue to be employed by the Company for a particular period of time. The loss of Yuri Iskhakov or any member of the board of directors, executive officers, or key employees could harm the Company's business, financial condition, cash flow and results of operations.

We rely on various intellectual property rights, including trademarks in order to operate our business.

Such intellectual property rights, however, may not be sufficiently broad or otherwise may not provide us a significant competitive advantage. In addition, the steps that we have taken to maintain and protect our intellectual property may not prevent it from being challenged, invalidated, circumvented or designed around, particularly in countries where intellectual property rights are not highly developed or protected. In some circumstances, enforcement may not be available to us because an infringer has a dominant intellectual property position or for other business reasons, or countries may require compulsory licensing of our intellectual property. Our failure to obtain or maintain intellectual property rights that convey competitive advantage, adequately protect our intellectual property or detect or prevent circumvention or unauthorized use of such property, could adversely impact our competitive position and results of operations. We also rely on nondisclosure and noncompetition agreements with employees, consultants and other parties to protect, in part, trade secrets and other proprietary rights. There can be no assurance that these agreements will adequately protect our trade secrets and other proprietary rights and will not be breached, that we will have adequate remedies for any breach, that others will not independently develop substantially equivalent proprietary information or that third parties will not otherwise gain access to our trade secrets or other proprietary rights.

As we expand our business, protecting our intellectual property will become increasingly important. The protective steps we have taken may be inadequate to deter our competitors from using our proprietary information. In order to protect or enforce our patent rights, we may be required to initiate litigation against third parties, such as infringement lawsuits. Also, these third parties may assert claims against us with or without provocation. These lawsuits could be expensive, take significant time and could divert management's attention from other business concerns. The law relating to the scope and validity of claims in the technology field in which we operate is still evolving and, consequently, intellectual property positions in our industry are generally uncertain. We cannot assure you that we will prevail in any of these potential suits or that the damages or other remedies awarded, if any, would be commercially valuable.

From time to time, third parties may claim that one or more of our products or services infringe their intellectual property rights.

Any dispute or litigation regarding patents or other intellectual property could be costly and time-consuming due to the complexity of our technology and the uncertainty of intellectual property litigation and could divert our management and key personnel from our business operations. A claim of intellectual property infringement could force us to enter into a costly or restrictive license agreement, which might not be available under acceptable terms or at all, could require us to redesign our products, which would be costly and time-consuming, and/or could subject us to an injunction against development and sale of certain of our products or services. We may have to pay substantial damages, including damages for past infringement if it is ultimately determined that our products infringe on a third party's proprietary rights. Even if these claims are without merit, defending a lawsuit takes significant time, may be expensive and may divert management's attention from other business concerns. Any public announcements related to litigation or interference proceedings initiated or threatened against us could cause our business to be harmed. Our intellectual property portfolio may not be useful in asserting a counterclaim, or negotiating a license, in response to a claim of intellectual property infringement. We rely on third party intellectual property licenses and we cannot ensure that these licenses will be available to us in the future on favorable terms or at all.

Although dependent on certain key personnel, the Company does not have any key man life insurance policies on any such people.

The Company is dependent on Yuri Iskhakov in order to conduct its operations and execute its business plan, however, the Company has not purchased any insurance policies with respect to that individual in the event of his death or disability. Therefore, if Yuri Iskhakov dies or becomes disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and its operations.

We have not prepared any audited or reviewed financial statements.

Therefore, you have no independent registered accounting firm's audited or reviewed financial information regarding the Company's capitalization or assets or liabilities on which to make your investment decision. If you feel the information provided is insufficient, you should not invest in the Company.

We are subject to income taxes as well as non-income based taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes, in the U.S.

Significant judgment is required in determining our provision for income taxes and other tax liabilities. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe that our tax estimates are reasonable: (i) there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our income tax provisions, expense amounts for non-income based taxes and accruals and (ii) any material differences could have an adverse effect on our financial position and results of operations in the period or periods for which determination is made.

We are not subject to Sarbanes-Oxley regulations and lack the financial controls and safeguards required of public companies.

We do not have the internal infrastructure necessary, and are not required, to complete an attestation about our financial controls that would be required under Section 404 of the Sarbanes-Oxley Act of 2002. There can be no assurance that there are no significant deficiencies or material weaknesses in the quality of our financial controls. We expect to incur additional expenses and diversion of management's time if and when it becomes necessary to perform the

system and process evaluation, testing and remediation required in order to comply with the management certification and auditor attestation requirements.

The Company has indicated that it has engaged in certain transactions with related persons.

Please see the section of this Memorandum entitled "Transactions with Related Persons and Conflicts of Interest" for further details.

Through our operations, we collect and store certain personal information that our customers provide to purchase products or services, enroll in promotional programs, register on our web site, or otherwise communicate and interact with us.

We may share information about such persons with vendors that assist with certain aspects of our business. Security could be compromised, and confidential customer or business information misappropriated. Loss of customer or business information could disrupt our operations, damage our reputation, and expose us to claims from customers, financial institutions, payment card associations and other persons, any of which could have an adverse effect on our business, financial condition and results of operations. In addition, compliance with tougher privacy and information security laws and standards may result in significant expense due to increased investment in technology and the development of new operational processes.

The collection, processing, storage, use and disclosure of personal data could give rise to liabilities as a result of governmental regulation, conflicting legal requirements or differing views of personal privacy rights.

We receive, collect, process, transmit, store and use a large volume of personally identifiable information and other sensitive data from customers and potential customers. There are federal, state and foreign laws regarding privacy, recording telephone calls and the storing, sharing, use, disclosure and protection of personally identifiable information and sensitive data. Specifically, personally identifiable information is increasingly subject to legislation and regulations to protect the privacy of personal information that is collected, processed and transmitted. Any violations of these laws and regulations may require us to change our business practices or operational structure, address legal claims and sustain monetary penalties and/or other harms to our business.

The regulatory framework for privacy issues in the United States and internationally is constantly evolving and is likely to remain uncertain for the foreseeable future. The interpretation and application of such laws is often uncertain, and such laws may be interpreted and applied in a manner inconsistent with our current policies and practices or require changes to the features of our platform. If either we or our third party service providers are unable to address any privacy concerns, even if unfounded, or to comply with applicable laws and regulations, it could result in additional costs and liability, damage our reputation and harm our business.

Changes in employment laws or regulation could harm our performance.

Various federal and state labor laws govern our relationship with our employees and affect operating costs. These laws include minimum wage requirements, overtime pay, healthcare reform and the implementation of the Patient Protection and Affordable Care Act, unemployment tax rates, workers' compensation rates, citizenship requirements, union membership and sales taxes. A number of factors could adversely affect our operating results, including additional government-imposed increases in minimum wages, overtime pay, paid leaves of absence and mandated health benefits, mandated training for employees, increased tax reporting and tax payment changing regulations from the National Labor Relations Board and increased employee litigation including claims relating to the Fair Labor Standards Act.

The Company's business operations may be materially adversely affected by a pandemic such as the Coronavirus (COVID-19) outbreak.

In December 2019, a novel strain of coronavirus was reported to have surfaced in Wuhan, China, which spread throughout other parts of the world, including the U.S. On January 30, 2020, the World Health Organization declared the outbreak of the coronavirus disease (COVID-19) a "Public Health Emergency of International Concern." On January 31, 2020, U.S. Health and Human Services Secretary Alex M. Azar II declared a public health emergency for the U.S to aid the U.S. healthcare community in responding to COVID-19, and on March 11, 2020 the World Health Organization characterized the outbreak as a "pandemic." COVID-19 resulted in a widespread health crisis that adversely affected the economies and financial markets worldwide. The Company's business could be materially and adversely affected. The extent to which COVID-19 impacts the Company's business will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19 and the actions to contain COVID-19 or treat its impact, among others. If the disruptions posed by COVID-19 or other matters of global concern continue for an extended period of time, the Company's operations may be materially adversely affected.

We face risks related to health epidemics and other outbreaks, which could significantly disrupt the Company's operations and could have a material adverse impact on us.

The outbreak of pandemics and epidemics could materially and adversely affect the Company's business, financial condition, and results of operations. If a pandemic occurs in areas in which we have material operations or sales, the Company's business activities originating from affected areas, including sales, materials, and supply chain related activities, could be adversely affected. Disruptive activities could include the temporary closure of facilities used in the Company's supply chain processes, restrictions on the export or shipment of products necessary to run the Company's business, business closures in impacted areas, and restrictions on the Company's employees' or consultants' ability to travel and to meet with customers, vendors or other business relationships. The extent to which a pandemic or other health outbreak impacts the Company's results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of a virus and the actions to contain it or treat its impact, among others. Pandemics can also result in social, economic, and labor instability which may adversely impact the Company's business.

If the Company's employees or employees of any of the Company's vendors, suppliers or customers become ill or are quarantined and in either or both events are therefore unable to work, the Company's operations could be subject to disruption. The extent to which a pandemic affects the Company's results will depend on future developments that are highly uncertain and cannot be predicted.

The seasonality of our business places increased strain on our operations.

A disproportionate amount of our sales are expected to occur during our fourth quarter. If we do not stock or are otherwise unable to source products sufficient to meet customer demand, our business would be adversely affected. If we liquidate products, as we have in the past, we may be required to take significant inventory markdowns or write-offs, which could reduce profits. We may experience an increase in our shipping cost due to complimentary upgrades, split-shipments, and additional long-zone shipments necessary to ensure timely delivery for the holiday season. If too many customers access our Website within a short period of time due to increased holiday demand, we may experience system interruptions that make our Website unavailable or prevent us from efficiently fulfilling orders, which may reduce the volume of goods we sell and the attractiveness of our products and services. In addition, we may be unable to adequately staff our

fulfillment and customer service centers during peak periods, and delivery services and other fulfillment companies and customer service providers may be unable to meet the seasonal demand.

Our profitability may be negatively affected by inventory shrinkage.

We are subject to the risk of inventory loss and theft. We experience significant inventory shrinkage and cannot be sure that incidences of inventory loss and theft will decrease in the future or that the measures we are taking will effectively reduce the problem of inventory shrinkage. Although some level of inventory shrinkage is an unavoidable cost of doing business, if we were to experience higher rates of inventory shrinkage or incur increased security costs to combat inventory theft, our business and results of operations could be affected adversely.

Our business could suffer if we are unsuccessful in making, integrating, and maintaining commercial agreements, strategic alliances, and other business relationships.

We provide e-commerce and other services to businesses through commercial agreements, strategic alliances, and business relationships. Under these agreements, we enable sellers to offer products or services through our websites. These arrangements are complex and require substantial infrastructure capacity, personnel, and other resource commitments, which may limit the amount of business we can service. We may not be able to implement, maintain, and develop the components of these commercial relationships, which may include web services, fulfillment, customer service, payment processing, hardware, content, and third-party software, and engaging third parties to perform services. The amount of compensation we receive under certain of our commercial agreements is partially dependent on the volume of the other company's sales. Therefore, if the other company's offering is not successful, the compensation we receive may be lower than expected or the agreement may be terminated. Moreover, we may not be able to enter into additional commercial relationships and strategic alliances on favorable terms. We also may be subject to claims from businesses to which we provide these services if we are unsuccessful in implementing, maintaining, or developing these services.

As our agreements terminate, we may be unable to renew or replace these agreements on comparable terms, or at all. We may in the future enter into amendments on less favorable terms or encounter parties that have difficulty meeting their contractual obligations to us, which could adversely affect our operating results.

Our present and future e-commerce services agreements, other commercial agreements, and strategic alliances create additional risks such as: disruption of our ongoing business, including loss of management focus on existing businesses; impairment of other relationships; variability in revenue and income from entering into, amending, or terminating such agreements or relationships; and difficulty integrating under the commercial agreements.

Our business may be adversely affected by catastrophic events and extreme or unseasonable weather conditions.

Unforeseen events, including war, terrorism and other international conflicts, public health issues and natural disasters such as earthquakes, hurricanes or tornadoes, whether occurring in the U.S or abroad, could disrupt supply chain operations or result in political or economic instability. Any of the foregoing events could result in property losses, reduce demand for our products or make it difficult or impossible to obtain merchandise from our suppliers.

We may not timely identify or effectively respond to consumer trends or preferences, whether involving physical retail, e-commerce retail or a combination of both retail offerings, which could negatively affect our relationship with our customers and the demand for our products and services.

It is difficult to predict consistently and successfully the products and services our customers will demand. The success of our business depends in part on how accurately we predict consumer demand, availability of merchandise, the related impact on the demand for existing products and the competitive environment, whether for customers purchasing products at our stores and clubs, through our e-commerce businesses or through the combination of both retail offerings. A critical piece of identifying consumer preferences involves price transparency, assortment of products, customer experience and convenience. These factors are of primary importance to customers and they continue to increase in importance, particularly as a result of digital tools and social media available to consumers and the choices available to consumers for purchasing products online, at physical locations or through a combination of both retail offerings. Failure to timely identify or effectively respond to changing consumer tastes, preferences (including the key factors described above) and spending patterns, whether for our physical retail offerings, e-commerce offerings or through a combination of these retail offerings, could negatively affect our relationship with our customers and the demand for our products and services.

Decreases in discretionary consumer spending may have an adverse effect on us.

A substantial portion of the products and services we offer are products or services that consumers may view as discretionary items rather than necessities. As a result, our results of operations are sensitive to changes in macroeconomic conditions that impact consumer spending, including discretionary spending. Difficult macroeconomic conditions, particularly high levels of unemployment, also impact our customers' ability to obtain consumer credit. Other factors, including consumer confidence, employment levels, interest rates, tax rates, consumer debt levels, and fuel and energy costs could reduce consumer spending or change consumer purchasing habits. Slowdowns in the U.S. or global economy, or an uncertain economic outlook, could adversely affect consumer spending habits and our results of operations.

Our business and results of operations may be adversely affected if we are unable to maintain our customer experience or provide high quality customer service.

The success of our business largely depends on our ability to provide superior customer experience and high-quality customer service, which in turn depends on a variety of factors, such as our ability to continue to provide a reliable and user-friendly website interface for our customers to browse and purchase our products, reliable and timely delivery of our products, and superior after sales services. Our sales may decrease if our website services are severely interrupted or otherwise fail to meet our customer requests. Should we or our third-party delivery companies fail to provide our product delivery and return services in a convenient or reliable manner, or if our customers are not satisfied with our product quality, our reputation and customer loyalty could be negatively affected. As a result, if we are unable to continue to maintain our customer experience and provide high quality customer service, we may not be able to retain existing customers or attract new customers, which could have an adverse effect on our business and results of operations.

Our advertising and marketing efforts may be costly and may not achieve desired results.

We incur substantial expense in connection with our advertising and marketing efforts. Although we target our advertising and marketing efforts on current and potential customers who we believe are likely to be in the market for the products we sell, we cannot assure you that our advertising and marketing efforts will achieve our desired results. In addition, we periodically

adjust our advertising expenditures in an effort to optimize the return on such expenditures. Any decrease in the level of our advertising expenditures, which may be made to optimize such return could adversely affect our sales.

Government regulation is evolving, and unfavorable changes could harm our business.

We are subject to general business regulations and laws, as well as regulations and laws specifically governing the Internet, e-commerce, electronic devices, and other services. Existing and future laws and regulations may impede our growth. These regulations and laws may cover taxation, privacy, data protection, pricing, content, copyrights, distribution, mobile communications, electronic device certification, electronic waste, energy consumption, environmental regulation, electronic contracts and other communications, competition, consumer protection, web services, the provision of online payment services, information reporting requirements, unencumbered Internet access to our services, the design and operation of websites, the characteristics and quality of products and services, and the commercial operation of unmanned aircraft systems. It is not clear how existing laws governing issues such as property ownership, libel, and personal privacy apply to the Internet, e-commerce, digital content, and web services. Jurisdictions may regulate consumer-to-consumer online businesses, including certain aspects of our seller programs. Unfavorable regulations and laws could diminish the demand for our products and services and increase our cost of doing business.

Changes in federal, state or local laws and regulations could increase our expenses and adversely affect our results of operations.

Our business is subject to a wide array of laws and regulations. The current political environment, financial reform legislation, the current high level of government intervention and activism and regulatory reform may result in substantial new regulations and disclosure obligations and/or changes in the interpretation of existing laws and regulations, which may lead to additional compliance costs as well as the diversion of our management's time and attention from strategic initiatives. If we fail to comply with applicable laws and regulations we could be subject to legal risk, including government enforcement action and class action civil litigation that could disrupt our operations and increase our costs of doing business. Changes in the regulatory environment regarding topics such as privacy and information security, product safety or environmental protection, including regulations in response to concerns regarding climate change, collective bargaining activities, minimum wage laws and health care mandates, among others, could also cause our compliance costs to increase and adversely affect our business and results of operations.

Industry consolidation may result in increased competition, which could result in a loss of customers or a reduction in revenue.

Some of our competitors have made or may make acquisitions or may enter into partnerships or other strategic relationships to offer more comprehensive services than they individually had offered or achieve greater economies of scale. In addition, new entrants not currently considered to be competitors may enter our market through acquisitions, partnerships or strategic relationships. We expect these trends to continue as companies attempt to strengthen or maintain their market positions. The potential entrants may have competitive advantages over us, such as greater name recognition, longer operating histories, more varied services and larger marketing budgets, as well as greater financial, technical and other resources. The companies resulting from combinations or that expand or vertically integrate their business to include the market that we address may create more compelling service offerings and may offer greater pricing flexibility than we can or may engage in business practices that make it more difficult for us to compete effectively, including on the basis of price, sales and marketing programs, technology or service

functionality. These pressures could result in a substantial loss of our customers or a reduction in our revenue.

If we do not respond to technological changes or upgrade our websites and technology systems, our growth prospects and results of operations could be adversely affected.

To remain competitive, we must continue to enhance and improve the functionality and features of our websites and technology infrastructure. As a result, we will need to continue to improve and expand our hosting and network infrastructure and related software capabilities. These improvements may require greater levels of spending than we have experienced in the past. Without such improvements, our operations might suffer from unanticipated system disruptions, slow application performance or unreliable service levels, any of which could negatively affect our reputation and ability to attract and retain customers and contributors. Furthermore, in order to continue to attract and retain new customers, we are likely to incur expenses in connection with continuously updating and improving our user interface and experience. We may face significant delays in introducing new services, products and enhancements. If competitors introduce new products and services using new technologies or if new industry standards and practices emerge, our existing websites and our proprietary technology and systems may become obsolete or less competitive, and our business may be harmed. In addition, the expansion and improvement of our systems and infrastructure may require us to commit substantial financial, operational and technical resources, with no assurance that our business will improve.

We currently obtain components from single or limited sources, and are subject to significant supply and pricing risks.

Many components, including those that are available from multiple sources, are at times subject to industry-wide shortages and significant commodity pricing fluctuations. While the Company has entered into agreements for the supply of many components, there can be no assurance that we will be able to extend or renew these agreements on similar terms, or at all. A number of suppliers of components may suffer from poor financial conditions, which can lead to business failure for the supplier or consolidation within a particular industry, further limiting our ability to obtain sufficient quantities of components. The follow-on effects from global economic conditions on our suppliers, also could affect our ability to obtain components. Therefore, we remain subject to significant risks of supply shortages and price increases.

Our products often utilize custom components available from only one source. Continued availability of these components at acceptable prices, or at all, may be affected for any number of reasons, including if those suppliers decide to concentrate on the production of common components instead of components customized to meet our requirements. The supply of components for a new or existing product could be delayed or constrained, or a key manufacturing vendor could delay shipments of completed products to us adversely affecting our business and results of operations.

Risks Related to the Securities

The Crowd Notes and underlying securities will not be freely tradable until one year from the initial purchase date. Although the Crowd Note and underlying securities may be tradable under federal securities law, state securities regulations may apply and each Purchaser should consult with his or her attorney.

You should be aware of the long-term nature of this investment. There is not now and likely will not be a public market for the Crowd Note and the underlying securities. Because the Crowd Note and the underlying securities have not been registered under the Securities Act or under the

securities laws of any state or non-United States jurisdiction, the Crowd Note have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be effected. Limitations on the transfer of the Crowd Note may also adversely affect the price that you might be able to obtain for the Crowd Note in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

Neither the Offering nor the Securities nor the underlying securities have been registered under federal or state securities laws, leading to an absence of certain regulation applicable to the Company.

No governmental agency has reviewed or passed upon this Offering, the Company or any Securities or the underlying securities of the Company. The Company also has relied on exemptions from securities registration requirements under applicable state securities laws. Investors in the Company, therefore, will not receive any of the benefits that such registration would otherwise provide. Prospective investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering on their own or in conjunction with their personal advisors.

No Guarantee of Return on Investment

There is no assurance that a Purchaser will realize a return on its investment or that it will not lose its entire investment. For this reason, each Purchaser should read the Form C and all Exhibits carefully and should consult with its own attorney and business advisor prior to making any investment decision.

You will not have a vote or influence on the management of the Company.

All decisions with respect to the management of the Company will be made exclusively by the officers, directors, managers or employees of the Company. You, as a Purchaser of Crowd Notes, will have no ability to vote on issues of Company management and will not have the right or power to take part in the management of the company and will not be represented on the board of directors or managers of the Company. Accordingly, no person should purchase a Security unless he or she is willing to entrust all aspects of management to the Company.

There is no present market for the Securities, and we have arbitrarily set the price.

We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities should not be considered an indication of the actual value of the Securities and is not based on our net worth or prior earnings. We cannot assure you that the Securities could be resold by you at the Offering price or at any other price.

Purchasers will be unable to declare the Security in “default” and demand repayment.

Unlike convertible notes and some other securities, the Securities do not have any “default” provisions upon which the Purchasers will be able to demand repayment of their investment. With respect to Purchasers who invest less than \$25,000 in the Securities, the Company has ultimate discretion as to whether or not to convert the Securities upon a future equity financing and may convert such Securities at its sole discretion and such Purchasers have no right to demand such conversion. Only in limited circumstances, such as a liquidity event, may Such Purchasers demand payment and even then, such payments will be limited to the amount of cash available to the Company.

Upon conversion of the Crowd Notes, Purchasers who are not “Major Investors” will grant a proxy to vote their underlying securities to the intermediary or its affiliate, and, thus, will not have the right to vote on any matters coming before the shareholders of the Company for a vote. By granting this proxy Purchasers are giving up the right to vote on important matters, including significant corporate actions like mergers, amendments to the Company’s certificate of incorporation, a liquidation of the Company and the election of directors.

Upon conversion of the Crowd Notes and by virtue of a provision contained in the Crowd Notes, if you are not a Major Investor, that is, an investor who has purchased at least \$25,000 in principal amount of the Crowd Notes, you will grant a proxy to the intermediary or its affiliate to vote the underlying securities that you will acquire upon conversion on all matters coming before the unitholders for a vote. The intermediary does not have any fiduciary duty to you to vote in a manner that is in your best interests. Accordingly, the intermediary may vote its proxy in a manner that may not be in the best interests of you as a security holder. For example, the intermediary may vote the proxy in favor of an amendment to our charter that adversely affects the rights of the holders of your class of securities in order to allow for a new investment to occur where the new investor requires senior rights.

The Company may never elect to convert the Securities or undergo a liquidity event.

The Company may never receive a future equity financing or, with respect to those Purchasers who invest less than \$25,000, elect to convert the Securities upon such future financing. In addition, the Company may never undergo a liquidity event such as a sale of the Company or an IPO. If neither the conversion of the Securities nor a liquidity event occurs, the Purchasers could be left holding the Securities in perpetuity. The Securities have numerous transfer restrictions and will likely be highly illiquid, with no secondary market on which to sell them. The Securities are not equity interests, have no ownership rights, have no rights to the Company’s assets or profits and have no voting rights or ability to direct the Company or its actions.

Affiliates of the Company, including officers, directors and existing shareholders of the Company, may invest in this Offering and their funds will be counted toward the Company achieving the Minimum Amount.

There is no restriction on affiliates of the Company, including its officers, directors and existing shareholders, investing in the Offering. As a result, it is possible that if the Company has raised some funds, but not reached the Minimum Amount, affiliates can contribute the balance so that there will be a closing. The Minimum Amount is typically intended to be a protection for investors and gives investors confidence that other investors, along with them, are sufficiently interested in the Offering and the Company and its prospects to make an investment of at least the Minimum Amount. By permitting affiliates to invest in the offering and make up any shortfall between what non-affiliate investors have invested and the Minimum Amount, this protection is largely eliminated. Investors should be aware that no funds other than their own and those of affiliates investing along with them may be invested in this Offering.

The Company has the right to conduct multiple closings during the Offering. If the Company meets certain terms and conditions, an intermediate close of the Offering can occur, which will allow the Company to draw down on a portion of the proceeds of the offering committed and captured during the relevant period. The Company may choose to continue the Offering thereafter. Purchasers should be mindful that this means they can make multiple investment commitments in the offering, which may be subject to different cancellation rights. For example, if an intermediate close occurs and later a material change occurs as the Offering continues, Purchasers previously closed upon will not have the right to re-confirm their investment as it will be deemed completed.

The Company has the right to extend the Offering deadline.

The Company may extend the Offering deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Minimum Amount even after the Offering deadline stated herein is reached. Your investment will not be accruing interest during this time and will simply be held until such time as the new Offering deadline is reached without the Company receiving the Minimum Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Minimum Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after release of such funds to the Company, the Securities will be issued and distributed to you.

The Company has the right to end the Offering early.

The Company may also end the Offering early; if the Offering reaches its target Offering amount after 30-calendar days but before the deadline, the Company can end the Offering with five business days' notice. This means your failure to participate in the Offering in a timely manner, may prevent you from being able to participate – it also means the Company may limit the amount of capital it can raise during the Offering by ending it early.

A majority of the Company is owned by a small number of owners.

Prior to the Offering the Company's current owners of 20% or more beneficially own up to 92.5% of the Company. Subject to any fiduciary duties owed to our other owners or investors under Delaware law, these owners may be able to exercise significant influence over matters requiring owner approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. Some of these persons may have interests that are different from yours. For example, these owners may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, these owners could use their voting influence to maintain the Company's existing management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to owner approval.

In addition to the risks listed above, businesses are often subject to risks not foreseen or fully appreciated by the management. It is not possible to foresee all risks that may affect us. Moreover, the Company cannot predict whether the Company will successfully effectuate the Company's current business plan. Each prospective Purchaser is encouraged to carefully analyze the risks and merits of an investment in the Securities and should take into consideration when making such analysis, among other, the Risk Factors discussed above.

THE SECURITIES OFFERED INVOLVE A HIGH DEGREE OF RISK AND MAY RESULT IN THE LOSS OF YOUR ENTIRE INVESTMENT. ANY PERSON CONSIDERING THE PURCHASE OF THESE SECURITIES SHOULD BE AWARE OF THESE AND OTHER FACTORS SET FORTH IN THIS FORM C AND SHOULD CONSULT WITH HIS OR HER LEGAL, TAX AND FINANCIAL ADVISORS PRIOR TO MAKING AN INVESTMENT IN THE SECURITIES. THE SECURITIES SHOULD ONLY BE PURCHASED BY PERSONS WHO CAN AFFORD TO LOSE ALL OF THEIR INVESTMENT.

BUSINESS

Description of the Business

Joolez provides an AI powered platform shopping experience for diamonds and engagement rings. The Company has engineered an e-commerce marketplace with AI algorithms, behavioral science, and a global diamond supplier network to offer a bias-free, personalized product discovery experience that is fast, easy, and comforting even for those without prior diamond knowledge.

Business Plan

Joolez aims to become the go-to marketplace for diamond engagement rings. The Company is committed to providing the best user experience for its customers via its innovative e-commerce platform, powered by AI, to deliver a personalized diamond discovery tour. The Company leverages its global diamond network membership to provide an array of stones to meet a customer's wants and wishes. It is also continuously exploring relationships with other jewelry vendors to expand inventory options at very low cost. As part of its strategy, Joolez continues to expand its platform with new innovative ways to shop for rings online. The next phase of growth includes the addition of a social shopping feature "Shop Together" to expand the diamond ring purchasing experience to couples instead of the traditional one-sided transaction. The social shopping experience would allow couples to shop for rings together via the platform. The company is currently building the feature. Joolez's next update to its product recommendation algorithm is intended to create an advanced product recommendation engine for rings revolving around fashion preferences and persona relevance. As the customer network grows, the AI recommendation engine should begin to learn new shopping behaviors and create smarter product recommendations in real-time.

Joolez's New York City location handles all products coming in and out for the Company. Once a diamond or ring is purchased online, the Company appropriates the items from its network of vendors, and its GIA certified gemologist validates each ring after assembly prior to shipping.

The Company must receive commitments from investors in an amount totaling the Minimum Amount by September 6, 2021 (the "Offering Deadline") in order to receive any funds. If the sum of the investment commitments does not equal or exceed the Minimum Amount by the Offering Deadline, no Securities will be sold in the Offering, investment commitments will be cancelled and committed funds will be returned to potential investors without interest or deductions. The Company has the right to extend the Offering Deadline at its discretion. The Company will accept investments in excess of the Minimum Amount up to \$250,000.00 (the "Maximum Amount") and the additional Securities will be allocated on a At the Company's discretion.

The price of the Securities does not necessarily bear any relationship to the Company's asset value, net worth, revenues or other established criteria of value, and should not be considered indicative of the actual value of the Securities.

In order to purchase the Securities, you must make a commitment to purchase by completing the Subscription Agreement. Purchaser funds will be held in escrow with Evolve Bank & Trust until the Minimum Amount of investments is reached. Purchasers may cancel an investment commitment until 48 hours prior to the Offering Deadline or the Closing, whichever comes first, using the cancellation mechanism provided by the Intermediary. The Company will notify Purchasers when the Minimum Amount has been reached. If the Company reaches the Minimum Amount prior to the Offering Deadline, it may close the Offering at least five (5) days after reaching the Minimum Amount and providing notice to the Purchasers. If any material change (other than reaching the Minimum Amount) occurs related to the Offering prior to the Offering Deadline, the Company will provide notice to Purchasers and receive reconfirmations from Purchasers who have already made commitments. If a Purchaser does not reconfirm his or her investment commitment after a material change is made to the terms of the Offering, the Purchaser's investment commitment will be cancelled, and the committed funds will be returned without interest or deductions.

In the event that at least \$75,000 in investments is committed and received by the escrow agent and more than thirty (30) days remain before the Offering Deadline, the Company may, at the discretion of the Intermediary, conduct the first of multiple closings of the Offering (an “Intermediate Close”) and withdraw funds from escrow, provided that all investors receive notice that an Intermediate Close will occur and funds will be released to the Company, at least five (5) business days prior to the Intermediate Close (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). Investors who committed on or before such notice will have until 48 hours before the Intermediate Close to cancel their investment commitment.

Thereafter, the Company may, at the discretion of the Intermediary, only conduct another Intermediate Close before the Offering Deadline if (i) the amount of investment commitments made and received in escrow exceeds \$125,000 since the time of the last Intermediate Close, and (ii) more than thirty (30) days remain before the Offering Deadline.

If a Purchaser does not cancel an investment commitment before an Intermediate Close or before the Offering Deadline, the funds will be released to the Company upon closing of the Offering, and the Purchaser will receive the Securities in exchange for his or her investment. Any Purchaser funds received after the initial closing will be released to the Company upon a subsequent closing, and the Purchaser will receive Securities in exchange for his or her investment as soon as practicable thereafter.

The Company has agreed to return all funds to investors in the event a Form C-W is ultimately filed in relation to this Offering, regardless of any subsequent closes.

The Securities

We request that you please review our offering materials in conjunction with the following summary information.

Authorized Capitalization

See “CAPITALIZATION AND OWNERSHIP” above.

General

A Crowd Note is similar to a SAFE (Simple Agreement for Future Equity) security where an investor makes a cash investment in our company, but gets company stock at a later date in connection with a specific event. Although the security is called a Crowd Note, the Crowd Note is not a debt instrument. It is intended to be an alternative to a convertible note that is beneficial for both our company and you as an investor

Events Triggering Conversion of Crowd Notes

If you are a Major Investor, which is defined as an investor who invests at least \$25,000.00 in this offering, then the specified event upon which the Crowd Notes would convert into capital stock of our company is (i) a Qualified Equity Financing, which we define below, or (ii) a Corporate Transaction, which we define below, if instead of receiving two times (2X) the outstanding principal of your Crowd Note, your Crowd Note is converted immediately prior to the closing of the Corporate Transaction.

If you are not a Major Investor, then the Crowd Notes will only convert into capital stock of our company upon the earlier of (i) our company’s election to convert your Crowd Note, including upon a Qualified Equity Financing if our company elects to convert your Crowd Note then, or (ii) a Corporate Transaction, if instead of receiving two times (2X) the outstanding principal of your Crowd Note, your Crowd Note is converted immediately prior to the closing of the Corporate Transaction.

Qualified Equity Financing

The Crowd Note defines “Qualified Equity Financing” as the first sale (or series of related sales) by us of our preferred stock following the closing of this offering from which we receive gross proceeds of not less than \$1,000,000.00 (excluding the aggregate amount of securities converted into preferred stock in connection with such sale (or series of related sales)).

If the Crowd Note converts into equity in connection with a Qualified Equity Financing, then we will convert the Crowd Note into shares of our preferred stock that are issued in connection with the Qualified Equity Financing, which we refer to as Conversion Shares, equal to the quotient obtained by dividing the outstanding principal amount of the Crowd Note by the Conversion Price, which is defined below. The issuance of Conversion Shares will be on the same terms and conditions applicable to the stock sold in the Qualified Equity Financing; provided, however, that if you are not

a Major Investor, you will receive shares of a shadow series, as we describe below, with certain limited rights. The Conversion Price applicable to a Qualified Equity Financing is the lower of:

- (i) the product of (a) one minus any applicable Discount, and (b) the price paid per share for preferred stock by the investors in the Qualified Equity Financing, or
- (ii) the quotient resulting from dividing (a) the Valuation Cap (\$3.4 million or \$4 million, depending on whether the Purchaser is an early bird investor), as defined below by (b) the total number of our shares of capital stock that are outstanding on a fully diluted basis (assuming for this purpose the exercise, exchange or conversion of all securities exercisable or exchangeable for, or convertible into, our capital stock), immediately prior to the closing of the Qualified Equity Financing.

Any investor who is not a Major Investor will receive a shadow series of preferred stock upon conversion of such investor's Crowd Note. A shadow series is a series of our preferred stock that is identical in all respects to the shares of preferred stock issued in the Qualified Equity Financing (e.g., if the Company sells Series A Preferred Stock in the Qualified Equity Financing, the shadow series would be Series A-1 Preferred Stock), except that the liquidation preference per share of the shadow series shall equal the Conversion Price and the following additional differences will apply:

- (i) shadow series shareholders will grant their vote on any matter that is submitted to a vote or for the consent of the stockholders of our company (except for on matters required by law) by irrevocable proxy; and
- (ii) shadow series shareholders will receive quarterly business updates from the company through the Platform but will have no additional information or inspection rights (except with respect to such rights which are required by law).

Corporate Transaction and Corporate Transaction Payment

The Crowd Note defines "Corporate Transaction" as

- (i) the closing of the sale, transfer or other disposition of all or substantially all of our assets,
- (ii) the consummation of the merger or consolidation of our company with or into another entity (except a merger or consolidation in which the holders of capital stock of our company immediately prior to such merger or consolidation continue to hold at least 50% of the voting power of the capital stock of our company or the surviving or acquiring entity),
- (iii) the closing of the transfer (whether by merger, consolidation or otherwise), in one transaction or a series of related transactions, to a person or group of affiliated persons (other than an underwriter of our securities), of securities of our company if, after such closing, such person or group of affiliated persons would hold 50% or more of the outstanding voting stock of our company (or the surviving or acquiring entity), or
- (iv) the initial public offering, liquidation, dissolution or winding up of our company; provided, however, that a transaction shall not constitute a Corporate Transaction if its sole purpose is to change the state of our incorporation or to create a holding company that will be owned in

substantially the same proportions by the persons who held our securities immediately prior to such transaction.

In the event of a Corporate Transaction (defined above), you will receive the higher value of (i) an amount equal to two times (2X) the price you paid for your Crowd Note (i.e., 2x your principal amount) or (ii) the number of shares of preferred stock of the Company calculated by (a) multiplying the price you paid for your Crowd Note by the total number of our shares of capital stock that are outstanding on a fully diluted basis (assuming for this purpose the exercise, exchange or conversion of all securities exercisable or exchangeable for, or convertible into, our capital stock), immediately prior to the closing of the Qualified Equity Financing, and (b) dividing the product of that calculation by the Valuation Cap.

If there are not enough funds to pay you and other Crowd Note investors in full, then proceeds from the respective transaction will be distributed with equal priority and pro rata among the Crowd Note investors in proportion to their Purchase Price.

Termination of Crowd Note

The Crowd Notes will terminate upon the earlier of (i) a conversion of the entire purchase price under the Crowd Notes into Conversion Shares; or (ii) the payment of amounts due to the investor pursuant to a Corporate Transaction.

No Voting Rights, No Shareholders Agreement and No Anti-Dilution Rights

The Crowd Notes do not have any voting rights. Further, upon conversion of the Crowd Notes into Conversion Shares, shadow series shareholders shall grant their vote on any matter that is submitted to a vote or for the consent of the members of the Company (except for on matters required by law) by irrevocable proxy.

The Company does not have any shareholder/equity holder agreements in place.

The Securities do not have anti-dilution rights.

Restrictions on Transfer

Any Securities sold pursuant to Regulation CF being offered may not be transferred by any Purchaser of such Securities during the one-year holding period beginning when the Securities were issued, unless such Securities are transferred: i) to the Company, ii) to an accredited investor, as defined by Rule 501(d) of Regulation D promulgated under the Securities Act, iii) as part of an IPO or iv) to a member of the family of the Investor or the equivalent, to a trust controlled by the Purchaser, to a trust created for the benefit of a member of the family of the Investor or the equivalent, or in connection with the death or divorce of the Investor or other similar circumstances. "Member of the family" as used herein means a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother / father / daughter / son / sister / brother-in-law, and includes adoptive relationships. Remember that although you may legally be able to transfer the Securities, you may not be able to find another party willing to purchase them.

In addition to the foregoing restrictions, prior to making any transfer of the Securities or any Securities into which they are convertible, such transferring Purchaser must either make such

transfer pursuant to an effective registration statement filed with the SEC or provide the Company with an opinion of counsel stating that a registration statement is not necessary to effect such transfer.

Additional Transfer Restrictions

The Purchaser may not transfer the Securities or any Securities into which they are convertible to any of the Company's competitors, as determined by the Company in good faith.

IPO Lock Up

Upon the event of an IPO, the capital stock into which the Securities are converted will be subject to a lock-up period and may not be sold for up to 180 days following such IPO.

Other Material Terms

The Company does not have the right to repurchase the Crowd Note.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 - Basis of Presentation and Description of the Company:

Operations and Organization – Joolez, Inc. established in 2021 and its wholly-owned subsidiary Joolez LLC is a robust marketing platform powered by artificial intelligence which aims to curate and facilitate sales of fine jewelry and diamonds between vendors and consumers.

Principles of Consolidation -The consolidated financial statements include the accounts of Joolez Inc. and its wholly-owned subsidiary, Joolez LLC, collectively (the “Company”). All significant intercompany accounts and transactions have been eliminated in consolidation.

Note 2 - Summary of Significant Accounting Policies:

Estimates and Uncertainties - The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“U.S. GAAP”), which requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition - Equipment revenue is recognized on the sale of cellular phones when the equipment is shipped. Commissions earned from the carrier begin upon activation of the cellular service and are recognized over the course of the service period until the subscription is terminated.

Cash - The Company maintains its cash balances in financial institutions and brokerage houses. The balances in financial institutions are insured by the Federal Deposit Insurance Corporation. At times, cash balances may exceed insured limits.

Sales Taxes - The Company does business in a state and local jurisdiction which imposes a sales tax on the Company’s services provided to non-exempt customers. The Company collects that sales tax and remits the entire amount to the state and local jurisdiction. The Company’s accounting policy excludes the tax collected and remitted to the state and local jurisdiction from revenue and cost of sales.

Advertising and Promotion Costs - Advertising costs are expensed as incurred and totaled \$4,309 at year end December 31, 2020. There were no advertising expenses in 2019.

Income Taxes –Joolez, Inc. is a C-Corporation and income taxes are provided for the tax effects of transactions reported in the consolidated financial statements and consist of taxes currently due plus deferred taxes.

Deferred tax assets and liabilities are recognized for the estimated future tax consequences attributable to temporary differences between the consolidated financial statement carrying amounts of existing assets and liabilities and their respective tax bases, principally for accrued expenses, inventory capitalization and depreciation and amortization. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities from a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amount expected to be realized.

AND SUBSIDIARY**

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Accounting principles generally accepted in the United States of America require Company management to evaluate tax positions taken by the Company and recognize a tax liability (or asset) if the Company has taken an uncertain tax position that more likely than not would be sustained upon examination by the Internal Revenue Service, or other tax authority. Company management has analyzed the tax positions the Company has taken and has concluded that as of December 31, 2020 and 2019, there are no uncertain tax positions taken or expected to be taken that would require recognition of a liability, or disclosure in the consolidated financial statements.

COMPANY SUMMARY

Opportunity

Getting engaged and popping the question can be a wonderful experience but purchasing a diamond engagement ring can be quite nerve-wracking. The need to buy a diamond ring doesn't come around often, and knowledge about the diamond buying process isn't common. Often, the fear of paying too much, or worse, choosing the wrong ring, can create a lot of unease. Joolez is a diamond ring marketplace powered by behavioral science and artificial intelligence to help couples find the perfect diamond ring.

Headquartered in New York's Diamond District, Joolez aims to become the go-to online marketplace for diamond engagement rings. The company is committed to providing the best user experience for its customers via its innovative e-commerce platform, powered by AI, to deliver a personalized diamond discovery tour. The company leverages its global diamond network membership to provide an array of stones to meet a customer's wants and wishes and is continuously exploring relationships with other jewelry vendors to expand inventory options at low costs. Over the years, the team at Joolez has interviewed hundreds of couples and gained insight into what makes the diamond ring purchase experience less fraught and more joyous. The company uses AI technology to learn what is important to the customer based on the customer's shopping journey. The model analyzes diamond variables such as cut, carat, clarity, and color, comparing them against the user's preferences, trends and demographics, to curate the most relevant diamond recommendation from hundreds of thousands of diamonds. A virtual diamond assistant advises the difference between selected diamonds and even highlights a "good deal" when one is available based on size, quality or overall value.

The company is now developing a "Shop Together" feature to address a growing demand for both parties to be involved in the decision-making process of buying a diamond engagement ring. This is intended to allow the

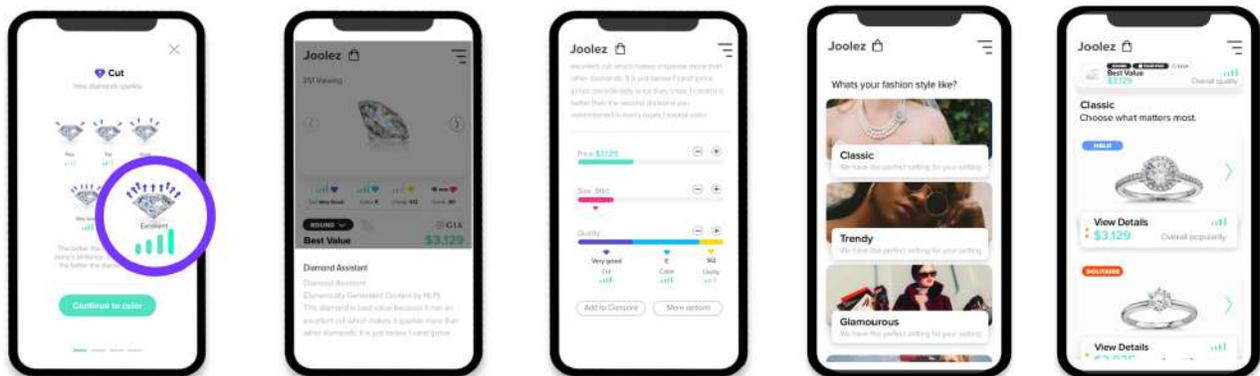

MICROVENTURES

couples to make a decision together as a team, helping ensure the proposer doesn't pick the wrong ring which could cause conflict or resentment.

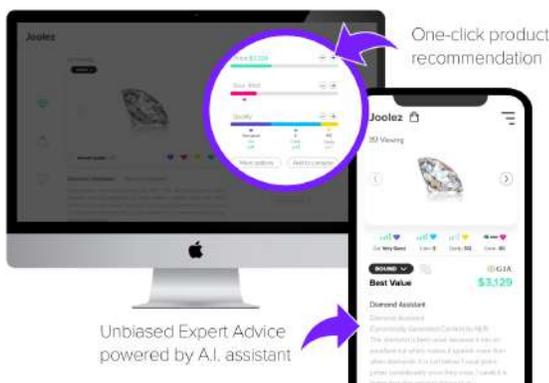

Product

Rings recommended by Joolez's AI recommendation engine are handcrafted in-house at the company's affiliated fulfilment shop in New York City's Diamond District. Joolez offers pre-designed ring settings in many styles to fit a variety of taste, fashion, and personality preferences. Its rings are curated from its vendor base and offered in a variety of precious metals such as white gold, yellow gold, and platinum. Joolez is committed to ethically and responsibly sourced diamonds and materials curated from trusted vendors around the world. All of Joolez's listed diamonds are certified by major industry labs such as the Gemological Institute of America (GIA) from sources that have pledged to follow the Kimberley Process Certification Scheme (KPCS) as part of its commitment to help reduce the flow of conflict diamonds.

The technology

Creating a ring with Joolez starts with picking the right diamond. Customers pick their preferred shopping journey i.e. shop by price, size, or shape and move on to selecting what is important to them in a diamond such as Best Value, Biggest Size, or Best Quality. The system makes certain predictions to recommend a diamond to reflect your choices.

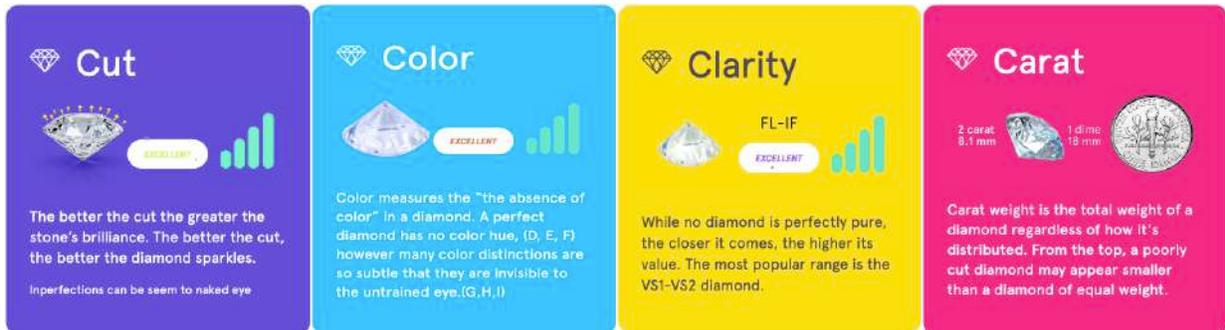

Customers can use levers within the featured category to toggle back and forth between the various levels of the diamond; Price, Size and Quality. With every click and change in feature preference, Joolez's algorithm will make a deep-analysis of multiple unique properties of currently available diamonds on its worldwide network in real-time to recommend the best possible option and prompt bias-free advice on a good deal when one is available.

Education

The Joollez platform also provides diamond education and explanations of the four Cs considered when grading a diamond: cut, color, clarity, and carat. Each topic provides descriptions of the category and provides visuals for reference.

Once a diamond is selected, a ring setting can be chosen. Joollez offers several ring settings to choose from to fit any style or preference.

Once the diamond and ring setting is selected, the company appropriates the items from its vendor network, and its GIA-certified gemologist validates the ring after assembly before shipping. All rings are handcrafted and set in Joollez's New York City fulfillment center located in New York City's Diamond District.

Product Roadmap

Joolez's next update to its product recommendation algorithm is intended to make advanced ring recommendations revolving around fashion preferences and personality. As the vendor network grows, the AI recommendation engine leverages behavioral science to learn new shopping behaviors and create smarter product recommendations in real-time. The next phase of growth includes the addition of a social shopping feature, "Shop Together," to expand the diamond ring purchasing experience to couples instead of the traditional one-sided transaction. The social shopping experience would allow couples to shop for rings together via the platform. The company is currently building this feature.

HISTORICAL FINANCIALS

Joolez is a pre-revenue company. At the close of December 2020, the company had \$1,552 in cash assets and incurred a net operating loss of \$58,854. Consulting expenses, attributed to costs associated with building the company's technology, made up the largest expense category (59%) in 2020.

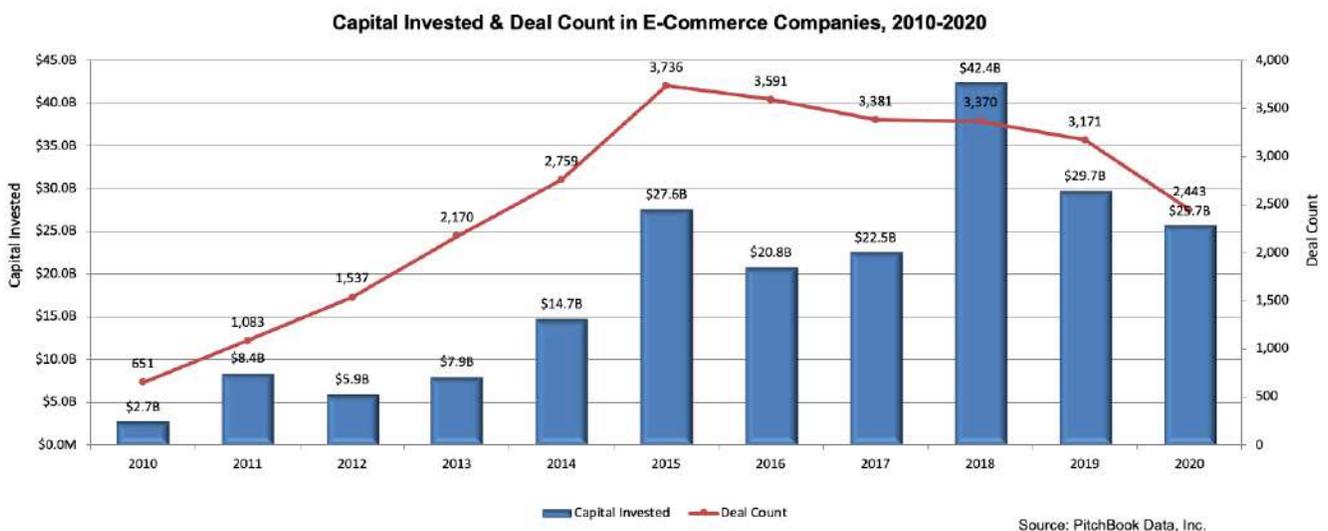

According to MarketWatch, the global diamond jewelry market was valued at \$89 billion in 2020 and is expected to reach \$97 billion by the end of 2026, growing at a compound annual growth rate (CAGR) of 1.2% during 2021-2026.ⁱⁱ For the diamond engagement ring market, Verified Market Research reports that the U.S. and Canada markets were valued at \$28.6 billion in 2019 and are projected to grow at a CAGR of 4.31% from 2020 to 2027.ⁱⁱⁱ Although some analysts forecast a drop in global luxury sales due to COVID-19, the news is not all bad. The pandemic’s lasting effects are still to be seen, but one trend predicted to continue is the migration from brick-and-mortar shopping to e-commerce.^{iv}

The online jewelry industry vertical has experienced slow adoption on the e-commerce front, with most sales conducted in local retail shops. However, market trends have begun to show improvement in e-commerce adoption for jewelry retailers. From 2017 to 2018, online jewelry sales increased over 14%,^v and according to Research and Markets, is anticipated to reach \$19.9 billion from 2020 to 2024, representing a CAGR of 15%.^{vi} In 2020, a recent Global Diamond Report by Bain & Company found that Covid-19 had accelerated the convergence of online and offline channels, and up to 20% of diamond retail sales occurred online, up from 13% the previous year.^{vii}

In 2019, Millennials and Gen Z represented 32% of all global luxury spending, but by 2025 this demographic group is expected to make up 50% of the total market, with 130% of forecasted market growth attributed to the age group. New studies show that coming of age millennials will vastly transform the luxury market by 2025, and according to Forbes, the demographic has radically different expectations from luxury brands and retailers. The trends anticipated to drive market demand include social media engagement, online sales, and influencers’ impact on consumer preferences.^{viii}

In 2020, the e-commerce industry received over \$25.7 billion in venture capital investment across 2,443 deals.

Other notable industry funding information includes the following points:^{ix}

- Funding in 2020 decreased 13.6% relative to 2019, along with a 23% decrease in deal count.

- Median post-money valuation reached \$10 million in 2020, matching 2019.
- Median deal size reached \$1.6 million in 2020. As of March 2021, median deal size has grown 29% reaching \$2 million in 2021.
- Over \$208.2 billion was invested between 2010 and 2020 across a total of 27,892 deals.
