RISK FACTORS

2. General Disclosures

A CROWDFUNDING INVESTMENT INVOLVES RISK. YOU SHOULD ONLY INVEST IN THIS OFFERING IF YOU CAN AFFORD TO LOSE YOUR ENTIRE INVESTMENT.

IN MAKING AN INVESTMENT DECISION, INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE ISSUER AND THE TERMS OF THE OFFERING, INCLUDING THE MERITS AND RISKS INVOLVED. THESE SECURITIES HAVE NOT BEEN RECOMMENDED OR APPROVED BY ANY FEDERAL OR STATE SECURITIES COMMISSION OR REGULATORY AUTHORITY. FURTHERMORE, THESE AUTHORITIES HAVE NOT PASSED UPON THE ACCURACY OR ADEQUACY OF THIS DOCUMENT.

THE U.S. SECURITIES AND EXCHANGE COMMISSION DOES NOT PASS UPON THE MERITS OF ANY SECURITIES OFFERED OR THE TERMS OF THE OFFERING, NOR DOES IT PASS UPON THE ACCURACY OR COMPLETENESS OF ANY OFFERING DOCUMENT OR LITERATURE.

THESE SECURITIES ARE OFFERED UNDER AN EXEMPTION FROM REGISTRATION; HOWEVER, THE U.S. SECURITIES AND EXCHANGE COMMISSION HAS NOT MADE AN INDEPENDENT DETERMINATION THAT THESE SECURITIES ARE EXEMPT FROM REGISTRATION.

3. Material Factors that Make an Investment in the Company Speculative or Risky

Risk Factors Related to the Company and its Business:

Our business, results of operations, and financial condition may be impacted by the recent coronavirus (COVID-19) outbreak.

With respect to the ongoing and evolving coronavirus (COVID-19) outbreak, which was designated as a pandemic by the World Health Organization on March 11, 2020, the outbreak has caused substantial disruption in international and U.S. economies and markets. The outbreak has potential to have an adverse impact on our industry and, if repercussions of the outbreak are prolonged, could have a significant adverse impact on our business, which could be material. Our management cannot at this point estimate the impact of the outbreak on its business and no provision for this outbreak is reflected in the accompanying financial statements.

We are an early-stage company and have not yet generated any profits.

Eysz, Inc. was formed in 2018. Accordingly, the company has a limited history upon which an evaluation of its performance and future prospects can be made. Our current and proposed operations are subject to all the business risks associated with new enterprises. These include likely fluctuations in operating results as the Company reacts to developments in its market, managing its growth and the entry of competitors into the market.

Our financials were prepared on a “going concern” basis.

Our financial statements were prepared on a “going concern” basis. Certain matters, as described in the accompanying financial statements indicate there may be substantial doubt about the company's ability to continue as a going concern. Our ability to continue operations is dependent upon our ability to generate sufficient cash flows from operations to meet our obligations, which the company has not been able to accomplish to date, and/or to obtain additional capital financing.

Any valuation of the company at this stage is difficult to assess.

The valuation for the offering was established by the company. Unlike listed companies that are valued publicly through market driven stock prices, the valuation of private companies, especially startups, is difficult to assess and you may risk overpaying for your investment.

We have an evolving business model.

Our business model is one of innovation, including continuously working to establish and expand our portfolio of products and/or services to our clients. It is unclear whether these products/services will be successful. Further, we will continuously try to offer additional types of products/services, and we cannot offer any assurance that any of them will be successful. From time to time we may also modify aspects of our business model relating to our product/service offerings. We cannot offer any assurance that these or any other modifications will be successful or will not result in harm to the business. We may not be able to manage growth effectively, which could damage our reputation, limit our growth, and negatively affect our operating results.

We are in a highly regulated industry.

We are a software company in the healthcare industry, and we are regulated by the Food and Drug Administration (FDA) as a medical device. Hence, we are required to comply with complex laws and regulations at both the state and federal level. If we expand to international markets in the future, we will also become subject to the respective laws and regulations of the respective international markets. In particular, we are subject to extensive regulation covering the quality, labeling, promotion, reporting distribution, and manufacturing of our products. In addition, we are subject to ensuring and maintaining privacy and security of personal health information. We continue to monitor and respond to changes in the regulatory landscape, however there can be no assurance that our operations will not be challenged or impacted by such changes or enforcement of these laws and regulations.

We depend on key personnel and face challenges recruiting needed personnel.

Our future success depends on the efforts of a small number of key personnel, including our Founder and Chief Executive Officer, Rachel Kuperman, and our Co-founder and Chief Operating Officer, Parth Amin. In addition, due to our limited financial resources and the specialized expertise required, we may not be able to recruit the individuals needed for our business needs. There can be no assurance that we will be successful in attracting and retaining the personnel we require to operate and be innovative.

We are dependent on general economic conditions.

Our ability to grow as a business is dependent not only having a successful business model but also having access to investors. Investment dollars are disposable income. Our business model is thus dependent on national and international economic conditions. Adverse national and international economic conditions may reduce the future availability of investment dollars, which would negatively impact our growth and ultimately our revenues and possibly our ability to continue operations. It is not possible to accurately predict the potential adverse impacts on the company, if any, of current economic conditions on its financial condition, operating results and cash flow.

Changes to healthcare policies as set by the U.S. government may have a material adverse impact on our business.

In response to perceived increases in health care costs in recent years, there have been and continue to be proposals by the federal government, state governments, regulators, and third-party payors to control these costs and, more generally, to reform the U.S. health care system. Certain of these proposals could limit the prices we are able to charge for our products or the amounts of reimbursement available for our products and could limit the acceptance and availability of our products. The adoption of some or all of these proposals could have a material adverse effect on our business, financial condition and results of operations.

We face significant market competition.

We develop and provide solutions to help clinicians manage the neurological health of their patients better. We compete against a variety of established companies in the market as well likely new entrants into the market. Some of these follow a regulatory and reimbursement model that is different from ours and might provide them competitive advantages. Additionally, some competitors and future competitors may be better capitalized than us and have established distribution channels, which would give them a significant advantage in marketing and operations. As a result, we may not be able to compete effectively against these companies or their products, which may adversely impact our business.

We may not be able to protect all of our intellectual property.

Our profitability may depend in part on our ability to effectively protect our proprietary rights, including obtaining trademarks for our brand names, protecting our products and websites, maintaining the secrecy of our internal workings and preserving our trade secrets, as well as our ability to operate without inadvertently infringing on the proprietary rights of others. There can be no assurance that we will be able to obtain future protections for our intellectual property or defend our current trademarks and future trademarks and patents. Further, policing and protecting our intellectual property against unauthorized use by third parties is time-consuming and expensive, and certain countries may not even recognize our intellectual property rights. There can also be no assurance that a third party will not assert infringement claims with respect to our products or technologies. Any litigation for both protecting our intellectual property or defending our use of certain technologies could have material adverse effect on our business, operating results and financial condition, regardless of the outcome of such litigation.

We have a history of losses. If we do not become profitable or maintain profitability in the future, we may not be able to continue to operate.

Although we had modest net income in 2019, we had a net loss of \$263,018 in 2020. We have not generated any significant revenues to date. Before we are able to generate any material level of revenues, we will incur significant additional losses. We expect to substantially increase our research and development and sales and marketing and general and administrative expenses. As a result, we will need to generate significant revenues to achieve and maintain profitability in the future. We cannot assure you that we will achieve profitable operations or maintain them if achieved. Failure to achieve or maintain profitability will materially and adversely affect our business.

We may not be able to manage future growth effectively.

If our business plan is successful, we may experience significant growth in a short period of time and potential scaling issues. Should we grow rapidly, our financial, management and operating resources may not expand sufficiently to adequately manage our growth. If we are unable to manage our growth, our costs may increase disproportionately, our future revenues may stop growing or decline and we may face

dissatisfied customers. Our failure to manage our growth may adversely impact our business and the value of your investment.

Our revenues and profits are subject to fluctuations.

It is difficult to accurately forecast our revenues and operating results, and these could fluctuate in the future due to a number of factors. These factors may include adverse changes in: reimbursement policies, healthcare policies, regulatory frameworks, competition, and general economic conditions, our ability to market our products/services, headcount and other operating costs, and general industry and regulatory conditions and requirements. The company's operating results may fluctuate from year to year due to the factors listed above and others not listed. At times, these fluctuations may be significant and could impact our ability to operate our business.

If the Company cannot raise sufficient funds it will not succeed.

Even if the maximum offering amount is raised under this offering, the company is likely to need additional funds in the future in order to grow, and if it cannot raise those funds for whatever reason, including reasons relating to the company itself or to the broader economy, it may not survive. If the company manages to raise only a portion of funds sought, it will have to find other sources of funding for some of the plans outlined in "Use of Proceeds." We do not have any alternative sources of funds committed.

There is only a small minimum amount set as a condition to closing this Offering.

Because this is a "best efforts" offering with only a small minimum amount, we will have access to any funds tendered once we receive this minimum amount of commitment from investors. This might mean that any investment made could be the only investment in this offering, leaving the company without adequate capital to pursue its business plan or even to cover the expenses of this offering.

Risk Factors Related to the Securities and the Offering:

The Securities will not be freely tradable until one year from the initial purchase date. Although the Securities may be tradable under federal securities law, state securities regulations may apply, and each investor should consult with his or her attorney.

You should be aware of the long-term nature of this investment. There is not now and likely will not be a public market for the Securities. Because the Securities have not been registered under the Securities Act or under the securities laws of any state or non-United States jurisdiction, the Securities have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be affected. Limitations on the transfer of the Crowd SAFEs may also adversely affect the price that you might be able to obtain for the Crowd SAFEs in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

Neither the Offering nor the Securities have been registered under federal or state securities laws, leading to an absence of certain regulation applicable to the Company.

No governmental agency has reviewed or passed upon this Offering, the Company or any Securities of the Company. The Company also has relied on exemptions from securities registration requirements under

applicable state securities laws. Investors in the Company, therefore, will not receive any of the benefits that such registration would otherwise provide. Prospective investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering on their own or in conjunction with their personal advisors.

There is no guarantee of return on your investment.

There is no assurance that an investor will realize a return on its investment or that it will not lose its entire investment. For this reason, each investor should read the Form C and all Exhibits carefully and should consult with its own attorney and business advisor prior to making any investment decision.

There is no current market for our Securities.

There is no formal marketplace for the resale of the Securities or the underlying shares of stock. These securities are illiquid and there will not be an official current price for them, as there would be if we were a publicly traded company with a listing on a stock exchange. Investors should assume that they may not be able to liquidate their investment for some time or be able to pledge their shares as collateral. Further, some investors are required to assign their voting rights as a condition to investing. This assignment of voting rights may further limit an investor's ability to liquidate their investment. Since we have not established a trading forum for our stock, there will be no easy way to know what the Crowd Safe is "worth" at any time.

The Company may never receive a future equity financing or elect to convert the Securities upon such future financing.

The Company may never undergo a liquidity event such as a sale of the Company or an IPO. If neither the conversion of the Securities nor a liquidity event occurs, the Purchasers could be left holding the Securities in perpetuity. The Securities have numerous transfer restrictions and will likely be highly illiquid, with potentially no secondary market on which to sell them. The Securities are not equity interests, have no ownership rights, have no rights to the Company's assets or profits and have no voting rights or ability to direct the Company or its actions.

Future fundraising may affect the rights of investors.

In order to expand, the company is likely to raise funds again in the future, either by offerings of securities or through borrowing from banks or other sources. The terms of future capital raising, such as loan agreements, may include covenants that give creditors greater rights over the financial resources of the company.

Voting control will be given to a small number of shareholders.

Investors in this platform would not be able to influence our policies or any corporate matters, including the election of directors, changing to our company governance documents, expanding employee option pool, or actions including mergers, consolidation, asset sales and other major actions requiring stockholder approval. Some of the larger stockholders include, or have the right to designate, executive officers and directors of our Board. These few people and entities make all major decisions regarding the company. As a minority shareholder and a signatory to any potential proxy agreements for voting, you will not have a say in these decisions.

Affiliates of the Company, including officers, directors and existing shareholders of the Company, may invest in this Offering and their funds will be counted toward the Company achieving the Target Amount.

There is no restriction on affiliates of the Company, including its officers, directors and existing shareholders, investing in the Offering. As a result, it is possible that if the Company has raised some funds, but not reached the Target Amount, affiliates can contribute the balance so that there will be a closing. The Target Amount is typically intended to be a protection for investors and gives investors confidence that other investors, along with them, are sufficiently interested in the Offering and the Company and its prospects to make an investment of at least the Target Amount. By permitting affiliates to invest in the offering and make up any shortfall between what non-affiliate investors have invested and the Target Amount, this protection is largely eliminated. Investors should be aware that no funds other than their own and those of affiliates investing along with them may be invested in this Offering.

The Company has the right to extend the Offering deadline.

The Company may extend the Offering deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Minimum Amount even after the Offering deadline stated herein is reached. Your investment will not be accruing interest during this time and will simply be held until such time as the new Offering deadline is reached without the Company receiving the Minimum Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Minimum Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after release of such funds to the Company, the Securities will be issued and distributed to you.

The Company has the right to end the Offering early.

The Company may also end the Offering early; if the Offering reaches its Maximum Amount after 30-calendar days but before the deadline, the Company can end the Offering with five business days' notice. This means your failure to participate in the Offering in a timely manner, may prevent you from being able to participate – it also means the Company may limit the amount of capital it can raise during the Offering by ending it early.

In addition to the risks listed above, businesses are often subject to risks not foreseen or fully appreciated by the management. It is not possible to foresee all risks that may affect us. Moreover, the Company cannot predict whether the Company will successfully effectuate the Company's current business plan. Each prospective investor is encouraged to carefully analyze the risks and merits of an investment in the Securities and should take into consideration when making such analysis, among others, the Risk Factors discussed above.

The Company has the right to sell securities in concurrent or subsequent offerings on terms that are better than the terms of this offering.

The Company may concurrently (or following the closing of this offering) offer securities in a separate offering under Regulation D of the Securities Act of 1933, as amended or under another applicable exemption from the registration requirements of the Securities Act and the terms of such concurrent offering may be more favorable to investors in that concurrent offering than the terms of the offering contemplated

by this offering statement are to investors in this offering. This means that other investors may receive more senior securities, securities with a lower valuation cap or based upon a lower premoney valuation, securities with more rights such as participation rights, rights of first refusal, co-sale rights, voting rights, information rights or registration rights. The issuance of such other securities may be dilutive to you and may reduce the amount that you would receive if there is a liquidation or sale of the Company. Any amounts raised in such concurrent offering or the terms of any such concurrent offering will not be considered by the Company to be a material change such that the Company will not make a further amendment to this Form C to disclose the consummation of any such concurrent offering.

THE SECURITIES OFFERED INVOLVE A HIGH DEGREE OF RISK AND MAY RESULT IN THE LOSS OF YOUR ENTIRE INVESTMENT. ANY PERSON CONSIDERING THE PURCHASE OF THESE SECURITIES SHOULD BE AWARE OF THESE AND OTHER FACTORS SET FORTH IN THIS FORM C AND SHOULD CONSULT WITH HIS OR HER LEGAL, TAX AND FINANCIAL ADVISORS PRIOR TO MAKING AN INVESTMENT IN THE SECURITIES. THE SECURITIES

SHOULD ONLY BE PURCHASED BY PERSONS WHO CAN AFFORD TO LOSE ALL OF THEIR INVESTMENT.

While the Company expects to use the net proceeds from the Offering in the manner described above, it cannot specify with certainty the particular uses of the net proceeds that it will receive from this Offering. Accordingly, the Company will have broad discretion in using these proceeds.

5. How does the Company Intend to use the Proceeds of this Offering?

Total Use of Proceeds	\$37,500	\$1,006,500

The chart above is not inclusive of fees paid for payments to financial and legal service providers, and escrow related fees, all of which were incurred in preparation of the campaign and are due in advance of the closing of the campaign. At the conclusion of the Offering, in addition to the fee paid to the Intermediary consisting of five percent (5%) commission based on the amount of investments raised in the Offering, the Intermediary will also receive a number of Securities of the Company that is equal to two percent (2.0%) of the total number of Securities sold by the Company in the Offering.

The Company does have discretion to alter the use of proceeds as set forth above. The Company may alter the use of proceeds due to a change in business or market conditions.

6. How will the Company Complete the Transaction and Deliver Securities to the Investors?

If we reach the Maximum Amount prior to the deadline, we may conduct an initial closing of the Offering early if we provide notice about the new offering deadline at least five business days prior to the new offering deadline (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment). Bioverge Portal, LLC will notify investors if we conduct an initial closing. Thereafter, we may conduct additional closings from time to time at our and Bioverge Portal, LLC's discretion until the deadline date.

7. How Can an Investor Cancel an Investment Commitment?

Investors may cancel an investment commitment until 48 hours prior to the deadline identified in these offering materials.

The intermediary will notify investors when the target offering amount has been met.

If the issuer reaches the target offering amount prior to the deadline identified in the offering materials, it may close the Offering early if it provides notice about the new offering deadline at least five business days prior to such new offering deadline (absent a material change that would require an extension of the offering and reconfirmation of the investment commitment).

If an investor does not cancel an investment commitment before the 48-hour period prior to the offering deadline, the funds will be released to the issuer upon closing of the Offering and the investor will receive securities in exchange for his or her investment.

If an investor does not reconfirm his or her investment commitment after a material change is made to the offering, the investor's investment commitment will be cancelled and the committed funds will be returned.

OWNERSHIP AND CAPITAL STRUCTURE

8. Description of the terms of the securities being offered.

To view a copy of the Crowd SAFE you will purchase, please see Exhibit A, Investor Contracts. The main terms of the Crowd SAFEs are provided below.

General

A Crowd SAFE is similar to a SAFE (Simple Agreement for Future Equity) security where an investor makes a cash investment in our company, but gets company stock at a later date, in connection with a specific event. A Crowd SAFE is not a debt instrument. It is intended to be an alternative to a convertible note that is beneficial for both our company and you as an investor.

Events Triggering Conversion of the Crowd SAFE

The Crowd SAFE will only convert into capital stock of our company upon the occurrence of an Equity Financing or Subsequent Equity Financing and then only at our option.

The Crowd SAFE defines Equity Financing as the first sale (or series of related sales) by us of our preferred stock following the closing of this offering from which we receive gross proceeds of not less than \$1,000,000.00 (excluding the aggregate amount of securities converted into preferred stock in connection with such sale (or series of related sales)).

In connection with an Equity Financing, we may, at our option, convert the Crowd SAFE into shares of our preferred stock that are issued in connection with the Equity Financing, which we refer to as Conversion Stock, equal to the quotient obtained by dividing the outstanding principal amount of the Crowd SAFE (i.e., the investment amount) by the Conversion Price, which is defined below. The issuance of Conversion Stock will be on the same terms and conditions applicable to the stock sold in the Equity Financing; provided, however, that you will receive shares of a shadow series, as we describe below, with certain limited rights.

The Conversion Price applicable to an Equity Financing is the lower of:

(A) the product of (i) one minus any applicable Discount (which is 20% of Major Investors (as defined below)) multiplied by (ii) the price paid per share for preferred stock by investors in the Equity Financing, or

(B) the quotient resulting from dividing (i) the Valuation Cap by (ii) the total number of our shares of capital stock that are outstanding on a fully diluted basis (assuming for this purpose the exercise, exchange or conversion of all securities exercisable or exchangeable for, or convertible into, our capital stock), immediately prior to the closing of the Equity Financing but excluding (i) the issuance of all shares of capital stock reserved and available for future issuance under any of the Company's existing equity incentive plans, (ii) convertible promissory notes issued by the Company, (iii) any SAFEs, and (iv) any equity securities that are issuable upon conversion of any outstanding convertible promissory notes or SAFEs.

Only Major Investors will be entitled to the 20% discount described in the definition of Conversion Price above. A Major Investor is any investor who purchases at least \$50,000 of Crowd SAFEs in this Offering.

The Valuation Cap is equal to \$15 million for investors who invest during the first 120 days of the Offering (until July 27, 2021) and is equal to \$18 million for investors who invest after the first 120 days of the Offering (after July 27, 2021).

The shadow series is a series of our preferred stock that is identical in all respects to the shares of preferred stock issued in the Equity Financing (e.g., if the Company sells Series A Preferred Stock in the Equity Financing, the shadow series would be Series A-1 Preferred Stock), except that the liquidation preference per share of the shadow series shall equal the Conversion Price

The investors will grant their vote on any matter that is submitted to a vote or for the consent of the stockholders of our company (except for on matters required by law) by irrevocable proxy to the board of directors of the Company.

Liquidity Event

A Liquidity Event is defined as a Change of Control or an IPO.

A Change of Control is basically (a) a transaction where a person or group of people become the owners of more than 50% of our voting securities, (b) a merger or other business combination where our stockholders end up owning less than 50% of the voting securities of the surviving company after the merger or business combination or (c) a sale lease or other disposition of all or substantially all of the assets of our company.

An IPO is a firm commitment underwritten initial public offering of the common stock of our company pursuant to an effective registration statement that we file with the SEC.

If there is a Liquidity Event before any Equity Financing, you will, at your option, either (i) receive a cash payment equal to the amount you invested or (ii) automatically receive from us a number of shares of our

Common Stock equal to the amount you invested divided by the Liquidity Price (defined below), if you fail to select the cash option. The cash amount will be due and payable by the Company to you immediately prior to, or concurrent with, the consummation of the Liquidity Event. If there are not enough funds to pay you and holders of other Crowd SAFEs (collectively, the “Cash-Out Investors”) in full, then all of the Company’s available funds will be distributed with equal priority and pro rata among the Cash-Out Investors in proportion to your respective investment amounts.

The Liquidity Price means the price per share equal to (x) the Valuation Cap divided by (y) the Liquidity Capitalization.

The Liquidity Capitalization means number, as of immediately prior to the Liquidity Event, of shares of the Company’s capital stock (on an as-converted basis) outstanding, assuming exercise or conversion of all outstanding vested and unvested options, warrants and other convertible securities, but excluding: (i) shares of Common Stock reserved and available for future grant under any equity incentive or similar plan; (ii) any SAFEs; and (iii) convertible promissory notes.

Dissolution Event

If there is a Dissolution Event before the Company will distribute its entire assets legally available for distribution with equal priority among the (i) you (on an as converted basis based on a valuation of Common Stock as determined in good faith by the Company’s board of directors at the time of Dissolution Event), (ii) all other holders of instruments sharing in the assets of the Company at the same priority as holders of Common Stock upon a Dissolution Event and (iii) and all holders of Common Stock.

A Dissolution Event means (i) a voluntary termination of operations, (ii) a general assignment for the benefit of the Company’s creditors, (iii) the commencement of a case (whether voluntary or involuntary) seeking relief under Title 11 of the United States Code (the “Bankruptcy Code”), or (iv) any other liquidation, dissolution or winding up of the Company (excluding a Liquidity Event), whether voluntary or involuntary.

Termination of Crowd SAFE

The Crowd SAFEs will terminate upon the earlier of: (a) a conversion of the entire purchase price under the Crowd SAFEs into Conversion Stock; or (b) the payment or setting aside of amounts due to the investor pursuant a Liquidity Event or a Dissolution Event.

Additional Transfer Restrictions

In addition, you may not transfer the Crowd SAFEs or any securities into which they are convertible to any of our competitors, as determined by us in good faith.

IPO Lock Up

Furthermore, upon the event of an initial public offering, the equity interest into which the Crowd SAFEs are converted will be subject to a lock-up period and may not be sold for up to 180 days following such initial public offering.

No Voting Rights, No Shareholders Agreement and No Anti-Dilution Rights

The Crowd SAFEs do not have any voting rights. Further, upon conversion of the Crowd SAFEs into Conversion Shares, shadow series shareholders shall grant their vote on any matter that is submitted to a vote or for the consent of the members of the Company (except for on matters required by law) by irrevocable proxy to the board of directors of the Company.

The Company does not have any shareholder/equity holder agreements in place.

The Securities do not have anti-dilution rights.

Company May Issue Senior Securities or Securities with Better Terms in a Concurrent Offering

The Company may concurrently offer securities in a separate offering under Regulation D of the Securities Act of 1933, as amended or under another applicable exemption from the registration requirements of the Securities Act and the terms of such concurrent offering may be more favorable to investors in that concurrent offering than the terms of the offering contemplated by this offering statement are to investors in this offering. Any amounts raised in such concurrent offering or the terms of any such concurrent offering will not be considered by the Company to be a material change such that the Company will not make a further amendment to this Form C to disclose the consummation of any such concurrent offering. See “Risk Factors -- The Company has the right to sell securities in concurrent or subsequent offerings on terms that are better than the terms of this offering.”

9. Do the securities offered have voting rights?

No

10. Are there any limitations on any voting or other rights identified above?

Yes: There are no voting rights

11. How may the terms of the Securities offered be modified?

The Crowd SAFE may be amended by a written agreement between the Company and the holders of the majority in the Purchase Amount of Crowd SAFEs.

RESTRICTIONS ON TRANSFER

The Securities being offered may not be transferred by any purchaser of such Securities during the one year period beginning when the Securities were issued, unless such Securities are transferred:

- (1) to the issuer;
- (2) to an accredited investor;
- (3) as part of an offering registered with the U.S. Securities and Exchange Commission; or

(4) to a member of the family of the purchaser or the equivalent, to a trust controlled by the purchaser, to a trust created for the benefit of a member of the family of the purchaser or the equivalent, or in connection with the death or divorce of the purchaser or other similar circumstance.

NOTE: The term “accredited investor” means any person who comes within any of the categories set forth in Rule 501(a) of Regulation D, or who the seller reasonably believes comes within any of such categories, at the time of the sale of the securities to that person.

The term “member of the family of the purchaser or the equivalent” includes a child, stepchild, grandchild, parent, stepparent, grandparent, spouse or spousal equivalent, sibling, mother-in-law,

father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of the purchaser, and includes adoptive relationships. The term “spousal equivalent” means a cohabitant occupying a relationship generally equivalent to that of a spouse.

DESCRIPTION OF ISSUER’S SECURITIES

12. The following includes the authorized and outstanding securities of the Company and the material terms of the Company’s securities

Class of Security	Securities (or Amount) Authorized	Securities (or Amount) Outstanding	Has Voting Rights	Has Other Rights?
Common Stock	10,000,000	7,536,566	Yes	Yes
Other	SAFE Notes	\$1,299,000	No	No

Class of Security	Securities Reserved for Issuance upon Exercise or Conversion
Options	625,611
Other	SAFE Notes

13. How may the rights of the Securities being offered in this Offering be materially limited, diluted or qualified by the rights of any other class of security identified above?

Because the Investor holds no voting rights, the holders of a majority-in-interest of voting rights in the Company could limit the Investor's rights in a material way. For example, those interest holders could vote to change the terms of the agreements governing the Company's operations or cause the Company to engage in additional offerings (including potentially a public offering). These changes could result in further limitations on the voting rights the Investor will have as an owner of equity in the Company, for example by diluting those rights or limiting them to certain types of events or consents.

To the extent applicable, in cases where the rights of holders of convertible debt, SAFEs, or other outstanding options or warrants are exercised, or if new awards are granted under our equity compensation plans, an Investor's interests in the Company may be diluted. This means that the pro-rata portion of the Company represented by the Investor's securities will decrease, which could also diminish the Investor's voting and/or economic rights. In addition, as discussed above, if a majority-in-interest of holders of securities with voting rights cause the Company to issue additional equity, an Investor's interest will typically also be diluted. Based on the risk that an Investor's rights could be limited, diluted or otherwise qualified, the Investor could lose all or part of his or her investment in the securities in this offering, and may never see positive returns.

14. Are there any differences not reflected above between the securities being offered and each other class of security of the issuer?

No

15. How could the exercise of rights held by the principal shareholders identified in the section entitled "Principal Security Holders" above affect the purchasers of the securities being offered?

As holders of a majority-in-interest of voting rights in the Company, the shareholders may make decisions with which the investor disagrees, or that negatively affect the value of the investor's securities in the Company, and the investor will have no recourse to change these decisions. The investor's interests may conflict with those of other investors, and there is no guarantee that the Company will develop in a way that is optimal for or advantageous to the investor.

For example, the shareholders may change the terms of the articles of incorporation for the Company, change the terms of securities issued by the Company, change the management of the Company, and even force out minority holders of securities. The shareholders may make changes that affect the tax treatment of the Company in ways that are unfavorable to you but favorable to them. They may also vote to engage in new offerings and/or to register certain of the Company's securities in a way that negatively affects the

value of the securities the Investor owns. Other holders of securities of the Company may also have access to more information than the Investor, leaving the Investor at a disadvantage with respect to any decisions regarding the securities he or she owns.

Investors' exit may affect the value of the Company and/or its viability. In cases where the rights of holders of convertible debt, SAFEs, or other outstanding options or warrants are exercised, or if new awards are granted under our equity compensation plans, an Investor's interests in the Company may be diluted. This means that the pro-rata portion of the Company represented by the Investor's securities will decrease, which could also diminish the investor's voting and/or economic rights. In addition, as discussed above, if a majority-in-interest of holders of securities with voting rights cause the Company to issue additional stock, an investor's interest will typically also be diluted.

16. How are the securities being offered being valued?

The offering price for the securities offered pursuant to this Form C has been determined arbitrarily by the Company and does not necessarily bear any relationship to the Company's book value, assets, earnings or other generally accepted valuation criteria. In determining the offering price, the Company did not employ investment banking firms or other outside organizations to make an independent appraisal or evaluation. Accordingly, the offering price should not be considered to be indicative of the actual value of the securities offered hereby.

The initial amount invested in a Crowd SAFE is determined by the investor, and we do not guarantee that the Crowd SAFE will be converted into any particular number of shares of Preferred Stock. As discussed in the section captioned "Ownership and Capital Structure – 1. Description of the terms of the securities being offered." above, when we engage in an offering of equity interests involving Preferred Stock, Investors may receive a number of shares of Preferred Stock calculated as either (i) the total value of the Investor's investment, divided by the price of the Preferred Stock being issued to new Investors, or (ii) if the price of the Preferred Stock being issued to new Investors is more than the Valuation Cap, the amount invested divided by the quotient of (a) the Valuation Cap divided by (b) the total amount of the Company's capitalization at that time calculated as discussed in the section captioned "Ownership and Capital Structure – 1. Description of the terms of the securities being offered." above. The Valuation Cap is equal to \$15 million for investors who invest during the first 120 days of the Offering (until July 27, 2021) and is equal to \$18 million for investors who invest after the first 120 days of the Offering (after July 27, 2021). Because there will likely be no public market for our securities prior to an initial public offering or similar liquidity event, the price of the Preferred Stock that Investors will receive, and/or the total value of the Company's capitalization will be determined by our board of directors. Among the factors we may consider in determining the price of Preferred Stock are prevailing market conditions, our financial information, market valuations of other companies that we believe to be comparable to us, estimates of our business potential, the present state of our development and other factors deemed relevant.

In the future, we will perform valuations of our stock (including both common stock and Preferred Stock) that take into account, as applicable, factors such as the following:

- unrelated third-party valuations;
- the price at which we sell other securities in light of the relative rights, preferences and privileges of those securities;
- our results of operations, financial position and capital resources;
- current business conditions and projections;
- the marketability or lack thereof of the securities;

- the hiring of key personnel and the experience of our management;
- the introduction of new products;
- the risk inherent in the development and expansion of our products;
- our stage of development and material risks related to our business;
- the likelihood of achieving a liquidity event, such as an initial public offering or a sale of our company given the prevailing market conditions and the nature and history of our business;
- industry trends and competitive environment;
- trends in consumer spending, including consumer confidence;
- overall economic indicators, including gross domestic product, employment, inflation and interest rates; and the general economic outlook.

We will analyze factors such as those described above using a combination of financial and market-based methodologies to determine our business enterprise value. For example, we may use methodologies that assume that businesses operating in the same industry will share similar characteristics and that the Company's value will correlate to those characteristics, and/or methodologies that compare transactions in similar securities issued by us that were conducted in the market.

17. What are the risks to purchasers of the securities relating to minority ownership in the issuer?

An Investor in the Company will likely hold a minority position in the Company, and thus be limited as to its ability to control or influence the governance and operations of the Company.

The marketability and value of the Investor's interest in the Company will depend upon many factors outside the control of the Investor. The Company will be managed by its officers and be governed in accordance with the strategic direction and decision-making of its Board of Directors, and the Investor will have no independent right to name or remove an officer or member of the Board of Directors of the Company.

Following the Investor's investment in the Company, the Company may sell interests to additional investors, which will dilute the percentage interest of the Investor in the Company. The Investor may have the opportunity to increase its investment in the Company in such a transaction, but such an opportunity cannot be assured.

The amount of additional financing needed by the Company, if any, will depend upon the maturity and objectives of the Company. The declining of an opportunity or the inability of the Investor to make a follow-on investment, or the lack of an opportunity to make such a follow-on investment, may result in substantial dilution of the Investor's interest in the Company.

17. What are the risks to purchasers associated with corporate actions including:

a. Additional Issuances of Securities

Following the Investor's investment in the Company, the Company may sell interests to additional investors, which will dilute the percentage interest of the Investor in the Company. The Investor may have the opportunity to increase its investment in the Company in such a transaction, but such an opportunity cannot be assured. The amount of additional financing needed by the Company, if any, will depend upon the maturity and objectives of the Company. The declining of an opportunity or the inability of the Investor to make a follow-on investment, or the lack of an opportunity to make such a follow-on investment, may result in substantial dilution of the Investor's interest in the Company

b. Issuer Repurchases of Securities

The Company may have authority to repurchase its securities from shareholders, which may serve to decrease any liquidity in the market for such securities, decrease the percentage interests held by other similarly situated investors to the Investor, and create pressure on the Investor to sell its securities to the Company concurrently.

c. A Sale of the Issuer or of Assets of the Issuer

As a minority owner of the Company, the Investor will have limited or no ability to influence a potential sale of the Company or a substantial portion of its assets. Thus, the Investor will rely upon the executive management of the Company and the Board of Directors of the Company to manage the Company so as to maximize value for shareholders. Accordingly, the success of the Investor's investment in the Company will depend in large part upon the skill and expertise of the executive management of the Company and the Board of Directors of the Company. If the Board of Directors of the Company authorizes a sale of all or a part of the Company, or a disposition of a substantial portion of the Company's assets, there can be no guarantee that the value received by the Investor, together with the fair market estimate of the value remaining in the Company, will be equal to or exceed the value of the Investor's initial investment in the Company.

d. Transactions with Related Parties

The Investor should be aware that there will be occasions when the Company may encounter potential conflicts of interest in its operations. On any issue involving conflicts of interest, the executive management and Board of Directors of the Company will be guided by their good faith judgement as to the Company's best interests. The Company may engage in transactions with affiliates, subsidiaries or other related parties, which may be on terms which are not arm's-length, but will be in all cases consistent with the duties of the management of the Company to its shareholders. By acquiring an interest in the Company, the Investor will be deemed to have acknowledged the existence of any such actual or potential conflicts of interest and to have waived any claim with respect to any liability arising from the existence of any such conflict of interest.

18. Material Terms of Indebtedness of the Company

The Company has no material indebtedness as of borrowed money, provided that from an accounting perspective, the Company has outstanding SAFE securities in the amount of \$1.4M that are classified as long term debt, as reflected in the financial statements.

Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion and analysis of our financial condition and results of operations together with our financial statements and the related notes and other financial information included elsewhere in this offering. Some of the information contained in this discussion and analysis, including information regarding the strategy and plans for our business, includes forward-looking statements that involve risks and uncertainties. You should review the "Risk Factors" section for a discussion of important factors that could cause actual results to differ materially from the results described in or implied by the forward-looking statements contained in the following discussion and analysis.

Eysz, Inc. was incorporated on May 31, 2018 in the State of Delaware. Eysz has derived limited revenue (from a one-time prize from a competition) since inception and the Company cannot reliably estimate how much revenue it will receive in the future, if any. We plan to develop and deploy software that will be

regulated by and require clearance from the Food and Drug Administration. This is one of many regulatory factors that will influence our revenue.

While Eysz has earned a small profit in 2019, the Company cannot reliably estimate how much profit it may generate in the future, if any. We will likely require additional financing in excess of the proceeds from the Offering in order to perform operations over the lifetime of the Company. We plan to initiate another capital raise either in parallel with this offering or directly after the completion of this offering to accredited investors. Although the valuation cap offered to investors in this Offering is meant to protect investors in future financing, the Company cannot reliably estimate the terms of any future financing. Although capital may be available for early-stage companies, there is no guarantee that the Company will receive any investments from investors. Because of the complexities and uncertainties in establishing a new business strategy, it is not possible to adequately project whether the proceeds of this offering will be sufficient to enable us to implement our strategy. This complexity and uncertainty will be increased if less than the maximum amount of securities offered in this offering is sold.

1. Events

(a) Equity Financing.

(i) If an Equity Financing occurs before this instrument terminates in accordance with Sections 1(b)-(d) (“First Equity Financing”), the Company shall promptly notify the Investor of the closing of the First Equity Financing and of the Company’s discretionary decision to either (1) continue the term of this Crowd SAFE without converting the Purchase Amount to Capital Stock; or (2) issue to the Investor a number of shares of the CF Shadow Series of the Capital Stock (whether Preferred Stock or another

classes issued by the Company) sold in the First Equity Financing. The number of shares of the CF Shadow Series of such Capital Stock shall equal the quotient obtained by dividing (x) the Purchase Amount by (y) the applicable Conversion Price (such applicable Conversion Price, the “**First Equity Financing Price**”).

(ii) If the Company elects to continue the term of this Crowd SAFE past the First Equity Financing and another Equity Financing occurs before the termination of this Crowd SAFE in accordance with Sections 1(b)-(d) (each, a “**Subsequent Equity Financing**”), the Company shall promptly notify the Investor of the closing of the Subsequent Equity Financing and of the Company’s discretionary decision to either (1) continue the term of this Crowd SAFE without converting the Investor’s Purchase Amount to Capital Stock; or (2) issue to the Investor a number of shares of the CF Shadow Series of the Capital Stock (whether Preferred Stock or another class issued by the Company) sold in the Subsequent Equity Financing. The number of shares of the CF Shadow Series of such Capital Stock shall equal to the quotient obtained by dividing (x) the Purchase Amount by (y) the First Equity Financing Price.

(b) Liquidity Event.

(i) If there is a Liquidity Event before the termination of this instrument and before any Equity Financing, the Investor will, at its option, either (i) receive a cash payment equal to the Purchase Amount (subject to the following paragraph) or (ii) automatically receive from the Company a number of shares of Common Stock equal to the Purchase Amount divided by the Liquidity Price, if the Investor fails to select the cash option. In connection with this Section 1(b)(i), the Purchase Amount will be due and payable by the Company to the Investor immediately prior to, or concurrent with, the consummation of the Liquidity Event. If there are not enough funds to pay the Investor and holders of other Crowd SAFEs (collectively, the “**Cash-Out Investors**”) in full, then all of the Company’s available funds will be distributed with equal priority and pro rata among the Cash-Out Investors in proportion to their Purchase Amounts.

(ii) If there is a Liquidity Event after one or more Equity Financings have occurred but before the termination of this instrument, the Investor will, at its option, either (i) receive a cash payment equal to the Purchase Amount (as described in the foregoing paragraph) or (ii) automatically receive from the Company a number of shares of the most recent issued Capital Stock (whether Preferred Stock or another class issued by the Company) equal to the Purchase Amount divided by the First Equity Financing Price, if the Investor fails to select the cash option. Shares of Capital Stock granted in connection therewith shall have the same liquidation rights and preferences as the shares of Capital Stock issued in connection with the Company’s most recent Equity Financing.

If the Company’s board of directors determines in good faith that delivery of Capital Stock to the Investor pursuant to Section 1(b)(i)(2) or Section 1(b)(ii)(2) would violate applicable law, rule or regulation, then the Company shall deliver to Investor in lieu thereof, a cash payment equal to the fair market value of such Capital Stock, as determined in good faith by the Company’s board of directors.

(c) **Dissolution Event.** If there is a Dissolution Event before this instrument terminates in accordance with Sections 1(a) or 1(b), subject to the preferences applicable to any series of Preferred Stock, the Company will distribute its entire assets legally available for distribution with equal priority among the (i) Investors (on an as converted basis based on a valuation of Common Stock as determined in good faith by the Company’s board of directors at the time of Dissolution Event), (ii) all other holders of instruments

sharing in the assets of the Company at the same priority as holders of Common Stock upon a Dissolution Event and (iii) and all holders of Common Stock.

(d) **Termination.** This instrument will terminate (without relieving the Company or the Investor of any obligations arising from a prior breach of or non-compliance with this instrument) upon the earlier to occur: (i) the issuance of shares, whether in Capital Stock or in the CF Shadow Series, to the Investor pursuant to Section 1(a) or Section 1(b); or (ii) the payment, or setting aside for payment, of amounts due to the Investor pursuant to Sections 1(b) or 1(c).

- (i) There is then in effect a registration statement under the Securities Act covering such proposed disposition and such disposition is made in accordance with such registration statement; or
- (ii) The Investor shall have notified the Company of the proposed disposition and shall have furnished the Company with a detailed statement of the circumstances surrounding the proposed disposition and, if reasonably requested by the Company, the Investor shall have furnished the Company with an opinion of counsel reasonably satisfactory to the Company that such disposition will not require registration of such shares under the Securities Act.

(e) The Investor agrees that it shall not make any disposition of this instrument or any underlying securities to any of the Company's competitors, as determined by the Company in good faith.

(f) The Investor understands and agrees that the Company will place the legend set forth below or a similar legend on any book entry or other forms of notation evidencing this Crowd SAFE and any certificates evidencing the underlying securities, together with any other legends that may be required by state or federal securities laws, the Company's charter or bylaws, any other agreement between the Investor and the Company or any agreement between the Investor and any third party:

- (d) The Investor is not entitled, as a holder of this instrument, to vote or receive dividends or be deemed the holder of Capital Stock for any purpose, nor will anything contained herein be construed to confer on the Investor, as such, any of the rights of a stockholder of the Company or any right to vote for the election of directors or upon any matter submitted to stockholders at any meeting thereof, or to give or withhold consent to any corporate action or to receive notice of meetings, or to receive subscription rights or otherwise until shares have been issued upon the terms described herein.
- (e) Neither this instrument nor the rights contained herein may be assigned, by operation of law or otherwise, by either party without the prior written consent of the other; *provided, however*, that this instrument and/or the rights contained herein may be assigned without the Company's consent by the Investor to any other entity who directly or indirectly, controls, is controlled by or is under common control with the Investor, including, without limitation, any general partner, managing member, officer or director of the Investor, or any venture capital fund now or hereafter existing which is controlled by one or more general partners or managing members of, or shares the same management company with, the Investor; and *provided, further*, that the Company may assign this instrument in whole, without the consent of the Investor, in connection with a reincorporation to change the Company's domicile.
- (f) In the event any one or more of the terms or provisions of this instrument is for any reason held to be invalid, illegal or unenforceable, in whole or in part or in any respect, or in the event that any one or more of the terms or provisions of this instrument operate or would prospectively operate to invalidate this instrument, then such term(s) or provision(s) only will be deemed null and void and will not affect any other term or provision of this instrument and the remaining terms and provisions of this instrument will remain operative and in full force and effect and will not be affected, prejudiced, or disturbed thereby.
- (g) All securities issued under this instrument may be issued in whole or fractional parts.
- (h) All rights and obligations hereunder will be governed by the laws of the State of Delaware, without regard to the conflicts of law provisions of such jurisdiction.
- (i) Any dispute, controversy or claim arising out of, relating to or in connection with this instrument, including the breach or validity thereof, shall be determined by final and binding arbitration administered by the American Arbitration Association (the "AAA") under its Commercial Arbitration Rules and Mediation Procedures ("Commercial Rules"). The award rendered by the arbitrator shall be final, non-appealable and binding on the parties and may be entered and enforced in any court having jurisdiction. There shall be one arbitrator agreed to by the parties within twenty (20) days of receipt by respondent of the request for arbitration or, in default thereof, appointed by the AAA in accordance with its

(j) Commercial Rules. The place of arbitration shall be the State and County where the Company's principal office is located at the time of the arbitration. Except as may be required by law or to protect a legal right, neither a party nor the arbitrator may disclose the existence, content or results of any arbitration without the prior written consent of the other parties.

(k) The parties acknowledge and agree that for United States federal and state income tax purposes this Crowd SAFE is, and at all times has been, intended to be characterized as stock, and more particularly as common stock for purposes of Sections 304, 305, 306, 354, 368, 1036 and 1202 of the Internal Revenue Code of 1986, as amended. Accordingly, the parties agree to treat this Crowd SAFE consistent with the foregoing intent for all United States federal and state income tax purposes (including, without limitation, on their respective tax returns or other informational statements).

(l) The Investor hereby grants to the Board of Directors of the Company (the "**Board**") an irrevocable proxy with respect to all of the shares of Capital Stock or CF Shadow Series issuable upon conversion of this Crowd SAFE (the "**Shares**") under Section 212 of the Delaware General Corporation Law to vote the Shares in any manner that the Board may determine in its sole and absolute discretion. For the avoidance of doubt, the Board, as the holder of the irrevocable proxy (rather than the Investor) will vote the Shares with respect to all shareholder meetings and other actions (including actions by written consent in lieu of a meeting) on which holders of Shares may be entitled to vote. The Board hereby agrees to vote all Shares consistently with the majority of the shares on which the CF Shadow Series is based. This proxy revokes any other proxy granted by the Investor at any time with respect to the Shares. The Board shall have no duty, liability or obligation whatsoever to the Investor arising out of the Board's exercise of this irrevocable proxy. The Investor expressly acknowledges and agrees that (i) the Investor will not impede the exercise of the Board's rights under this irrevocable proxy and (ii) the Investor waives and relinquishes any claim, right or action the Investor might have, as a stockholder of the Company or otherwise, against the Board or any of its affiliates or agents (including any officers, managers, employees or attorneys) in connection with any exercise of the irrevocable proxy granted hereunder. This irrevocable proxy shall expire as to those Shares on the earlier of (i) the date that such Shares are converted into Common Stock of the Company or (ii) the date that such Shares are converted to cash or a cash equivalent, but shall continue as to any Shares not so converted.

Management's Responsibility for the Financial Statements

Accountant's Responsibility

Our responsibility is to conduct the review in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. Those standards require us to perform procedures to obtain limited assurance as a basis for reporting whether we are aware of any material modifications that should be made to the financial statements for them to be in accordance with accounting principles generally accepted in the United States of America. We believe that the results of our procedures provide a reasonable basis for our conclusion.

Accountant's Conclusion

Based on our review, we are not aware of any material modifications that should be made to the accompanying financial statements in order for them to be in conformity with accounting principles generally accepted in the United States of America.

Going Concern

EYSZ, INC.

NOTES TO FINANCIAL STATEMENTS

As of December 31, 2020 and 2019 and for the years ended

NOTE 1: NATURE OF OPERATIONS

Eysz, Inc. (the “Company”), is a corporation organized on May 31, 2018 under the laws of Delaware. The Company is a developer of seizure detection software created to treat brain disorders worldwide. The software runs an algorithm that uses oculometric data such as eye movements to easily interface and integrate with other eye-tracking systems and therapeutic devices reliably detect when the seizure will occur, enabling clinicians and other professionals to find the possible reason and cause to administer serious diseases.

NOTE 2: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America (GAAP).

The Company adopted the calendar year as its basis of reporting.

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Risks and Uncertainties

The Company is dependent upon additional capital resources for its planned principal operations and is subject to significant risks and uncertainties; including failing to secure funding to continue to operationalize the Company’s plans or failing to profitably operate the business. The Company also has unknown impacts from the ongoing COVID-19 pandemic.

Cash Equivalents and Concentration of Cash Balance

The Company considers all highly liquid securities with an original maturity of less than three months to be cash equivalents. The Company’s cash and cash equivalents in bank deposit accounts, at times, may exceed federally insured limits. As of December 31, 2020 and 2019, the Company’s cash balances exceeded FDIC insured limits by \$697,995 and \$156,041, respectively.

Accounts Receivable

The Company assesses its receivables based on historical loss patterns, aging of the receivables, and assessments of specific identifiable customer accounts considered at risk or uncollectible. The Company also considers any changes to the financial condition of its customers and any other external market factors that could impact the collectability of the receivables in the determination of the allowance for doubtful accounts. As of December 31, 2020 and 2019, the Company carried no receivables and no allowance against such.

EYSZ, INC.

NOTES TO FINANCIAL STATEMENTS

As of December 31, 2020 and 2019 and for the years ended

Property and Equipment

Property and equipment are recorded at cost when purchased. Depreciation is recorded for property and equipment using the straight-line method over the estimated useful lives of assets. The Company reviews the recoverability of all long-lived assets, including the related useful lives, whenever events or changes in circumstances indicate that the carrying amount of a long-lived asset might not be recoverable. The Company's property and equipment consisted of the following as of December 31, 2020 and 2019:

	<u>2020</u>	<u>2019</u>
Equipment	\$ 84,431	\$ 8,307
Less: Accumulated depreciation	<u>(7,849)</u>	<u>(133)</u>
Property and equipment net	<u>\$ 76,582</u>	<u>\$ 8,174</u>

Depreciation expense of \$7,716 and \$133 was recorded on these assets for the years ended December 31, 2020 and 2019, respectively.

Intangible Assets

Intangible assets are recorded at historical cost. These assets are related to legal costs incurred in pursuing patents and licensing agreements to protect the Company's intellectual property. The Company amortizes patents and licensing agreements over the 20-year useful life. As of December 31, 2020 and 2019, costs totaling \$75,421 and \$45,090 associated with patents and licensing agreements had been recorded, respectively. Amortization expense of \$2,865 and \$747 has been recorded for the years ended December 31, 2020 and 2019, respectively. The net carrying value of the intangible assets as of December 31, 2020 and 2019 was \$71,809 and \$44,343, respectively. The Company evaluates the capitalized costs for impairment and concluded no impairment exist as of December 31, 2020.

Subscription Receivable

The Company records stock issuances at the effective date. If the subscription is not funded upon issuance, the Company records a subscription receivable as an asset on the balance sheet. When subscription receivables are not received prior to the issuance of financial statements at a reporting date in satisfaction of the requirements under FASB ASC 505-10-45-2, the subscription receivable is reclassified as a contra account to stockholders' equity/(deficit) on the balance sheet.

Fair Value of Financial Instruments

Financial Accounting Standards Board ("FASB") guidance specifies a hierarchy of valuation techniques based on whether the inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect market assumptions. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurement) and the lowest priority to unobservable inputs (Level 3 measurement). The three levels of the fair value hierarchy are as follows:

See accompanying Independent Accountant's Review Report

EYSZ, INC.

NOTES TO FINANCIAL STATEMENTS

As of December 31, 2020 and 2019 and for the years ended

Level 1 - Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date. Level 1 primarily consists of financial instruments whose value is based on quoted market prices such as exchange-traded instruments and listed equities.

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly (e.g., quoted prices of similar assets or liabilities in active markets, or quoted prices for identical or similar assets or liabilities in markets that are not active).

Level 3 - Unobservable inputs for the asset or liability. Financial instruments are considered Level 3 when their fair values are determined using pricing models, discounted cash flows or similar techniques and at least one significant model assumption or input is unobservable.

The carrying amounts reported in the balance sheets approximate their fair value.

Revenue Recognition

Grant revenue is primarily generated through research and development grant programs offered by federal, state and local governments, and is recognized using the milestone method, prescribed by FASB ASC 605-28, as the Company satisfies its obligations over the life of the contract. Each individual contract or grant lists each of the deliverables to be completed by the Company, the date those deliverables are to be completed and delivered, and the fee related to each individual deliverable. Revenues is recognized on each deliverable as it is completed (and delivered) over the life of the contract. Grant revenue for the years ended December 31, 2020 and 2019 were \$123,113 and \$150,000, respectively. The Company records grant revenue as a part of revenue from operations given that grant revenue is viewed as an ongoing function of its intended operations. The revenue from grants is not viewed as incidental or peripheral which would result in the presentation of grant revenue as other income. The Company recognizes non-refundable grant revenue when the performance obligations have been met, a funding application has been submitted, and approval and payment is reasonably assured.

Research and Development

Research and development costs are expensed as incurred. The Company recorded \$145,902 and \$17,510 of research and development costs for the years ended December 31, 2020 and 2019, respectively.

Advertising Costs

The Company expenses advertising costs as they are incurred. Advertising expense for the periods ended December 31, 2020 and 2019 totaled \$0 and \$8,588, respectively.

Income Taxes

The Company uses the liability method of accounting for income taxes as set forth in ASC 740, *Income Taxes*. Under the liability method, deferred taxes are determined based on the temporary differences between the financial statement and tax basis of assets and liabilities using tax rates expected to be in effect during the years in which the basis differences reverse. A valuation allowance is recorded when

EYSZ, INC.
NOTES TO FINANCIAL STATEMENTS
As of December 31, 2020 and 2019 and for the years ended

the effect during the years in which the basis differences reverse. A valuation allowance is recorded when it is unlikely that the deferred tax assets will be realized.

The Company assesses its income tax positions and records tax benefits for all years subject to examination based upon its evaluation of the facts, circumstances and information available at the reporting date. In accordance with ASC 740-10, for those tax positions where there is a greater than 50% likelihood that a tax benefit will be sustained, our policy is to record the largest amount of tax benefit that is more likely than not to be realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where there is less than 50% likelihood that a tax benefit will be sustained, no tax benefit will be recognized in the financial statements. The Company has determined that there are no material uncertain tax positions.

The Company accounts for income taxes with the recognition of estimated income taxes payable or refundable on income tax returns for the current period and for the estimated future tax effect attributable to temporary differences and carryforwards. Measurement of deferred income items is based on enacted tax laws including tax rates, with the measurement of deferred income tax assets being reduced by available tax benefits not expected to be realized in the immediate future.

The Company had taxable income from operations in 2019 of \$37,983. The Company used their NOL carryforward from 2018 of \$6,877, to reduce taxable income to \$31,106. The Company pays Federal and California income taxes and has used an effective blended rate to derive a net tax liability of \$9,564 as of December 31, 2019. The Company has recorded an income tax expense of \$9,564 for the year ended December 31, 2019. For the year ended December 31, 2020, the Company carried its net taxable losses back to offset the 2019 income and recorded a \$3,405 income tax receivable related to this carryback. With state tax payments, the net tax benefit was \$2,605 for the year ended December 31, 2020. The Company estimates it will have a net operating loss carryforward of \$295,799 as of December 31, 2020. The Company pays federal and California income taxes at a combined effective rate of approximately 28% and has used this effective rate to derive net deferred tax asset of \$57,888 as of December 31, 2020, resulting from its net operating loss carryforwards (deferred tax asset of \$82,775), differences in depreciation/amortization methods (deferred tax liability of \$30,677) and research and development credits (deferred tax asset of \$5,790). Due to uncertainty as to the Company's ability to generate sufficient taxable income in the future to utilize the net operating loss carryforwards, the Company has recorded a full valuation allowance to reduce the net deferred tax asset to zero as of December 31, 2020.

The Company has evaluated its income tax positions and has determined that it does not have any uncertain tax positions. The Company will recognize interest and penalties related to any uncertain tax positions through its income tax expense.

The Company may in the future become subject to federal, state and local income taxation though it has not been since its inception, other than minimum state tax. The Company is not presently subject to any income tax audit in any taxing jurisdiction, though its 2018-2020 tax years remain open to examination.

EYSZ, INC.

NOTES TO FINANCIAL STATEMENTS

As of December 31, 2020 and 2019 and for the years ended

NOTE 3: GOING CONCERN

The accompanying financial statements have been prepared on a going concern basis, which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. The Company is a business that has sustained a net loss of \$263,018 for the year ended December 31, 2020, has negative operating cash flows for the year ended December 31, 2020, has an accumulated deficit of \$208,529 as of December 31, 2020, and has a concentration of revenue derived from grants. These factors, among others, raise substantial doubt about the ability of the Company to continue as a going concern for a reasonable period of time.

The Company's ability to continue as a going concern in the next twelve months following the date the financial statements were available to be issued is dependent upon its ability to produce revenues and/or obtain financing sufficient to meet current and future obligations and deploy such to produce profitable operating results. Management has evaluated these conditions and plans to generate revenues and raise capital as needed to satisfy its capital needs. No assurance can be given that the Company will be successful in these efforts.

The financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amount and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

NOTE 4: STOCKHOLDERS' EQUITY/(DEFICIT)

Capital Structure

The Company has authorized 10,000,000 shares of \$0.0001 par value common stock. As of December 31, 2020, and 2019, 6,427,076 and 5,957,868 shares of common stock were issued and outstanding, respectively. The Company also has 263,929 shares of common stock held in treasury stock.

Stock Issuances

The stock issuances were conducted under terms of restricted stock purchase agreements and are subject to vesting terms of 2-4 years. The vesting is contingent upon continuous service with the Company and other terms defined in the agreements, which provide the Company the right to repurchase unvested shares at \$0.0001 per share. As of December 31, 2020 and 2019, 5,621,963 and 2,315,273 of the issued and outstanding shares had vested, respectively.

The Company recognizes the fair value of restricted stock issuances over the vesting periods. Stock-based compensation expense of \$6,427 and \$6,609 was recognized the years ended December 31, 2020 and 2019, respectively. Total unrecognized compensation cost related to restricted stock issuances amounted to \$14,291 as of December 31, 2020 and will be recognized over a weighted average period of 28 months.

In 2020, the Company issued restricted stock purchase agreements for 469,208 shares of common stock, which resulted in subscription receivable of \$469. The CEO provided contributions totaling \$233 for the year ended December 31, 2020.

EYSZ, INC.
NOTES TO FINANCIAL STATEMENTS

In 2019, the Company issued restricted stock purchase agreements for 1,221,797 shares of common stock, resulting in proceeds of \$122.

In 2019, the Company's CEO contributed back 263,929 shares of common stock to the Company, which are included in treasury stock.

In 2019, the Company's CEO provided contributions of \$45,051.

In 2018, the Company's CEO was issued a restricted stock purchase agreement for 5,000,000 shares of common stock for total proceeds of \$500. The CEO also contributed \$5,393 during 2018.

Equity Compensation Plan

The Company adopted the *2019 Stock Incentive Plan* (the "Plan"). The Plan permits the grant of incentive stock options, non-statutory stock options, and other equity-based awards to attract and retain employees and consultants. Under the Plan, the Company issues stock options and restricted stock having a term of up to ten years and a strike price of no less than fair market value of common stock. Restricted stock is subject to vesting restrictions determined on a case-by-case basis. Upon termination of employment or services, the Company may exercise its repurchase option over unvested equity interests.

The Company has reserved 625,611 shares of common stock under the Plan. As of December 31, 2020 and 2019, 356,893 were available for grant under the Plan. Shares issued under the Plan totaled 268,718 for the years ended December 31, 2020 and 2019, respectively, and are included in the issuances discussed above.

NOTE 5: SAFE AGREEMENTS

In 2020 and 2019, the Company issued simple agreements for future equity (SAFE Agreement) in exchange for cash investments of \$1,100,000 and \$274,000, respectively. The SAFE Agreements entitle the holder to convert the SAFE agreements into the Company's preferred stock. The terms provide for automatic conversion of the SAFE agreements' purchase amounts divided by the conversion price into the Company's preferred stock if and upon a qualified equity financing event, which is generally defined as a transaction or series of transactions involving the issuance of the Company's stock at a fixed pre-money valuation. The number of shares of preferred stock the SAFE agreement converts into is the Purchase Amount divided by the price per share determined by the lesser of: a) a pre-money valuation on the Company's then outstanding capitalization (as further defined in the agreements), or b) a discount rate to the share pricing in the triggering equity financing. \$635,000 of the outstanding SAFE agreements provide for a valuation cap of \$15,000,000 and a 20% discount, \$689,000 of the outstanding SAFE agreements provide for a valuation cap of \$8,000,000 and a 20% discount, and \$50,000 of the outstanding SAFE agreements provide for a valuation cap of \$8,000,000 and a 0% discount.

In the case of a liquidation event (as defined in the SAFE agreement), the SAFE agreement is convertible into either: A) cash of the purchase amount; B) the number of shares determined by dividing the purchase amount by the price per share in the liquidation event.

EYSZ, INC.
NOTES TO FINANCIAL STATEMENTS
As of December 31, 2020 and 2019 and for the years ended

If and upon a dissolution event, the purchase amount of the SAFE agreements is payable after satisfaction of debts and ahead of common stock in liquidation priority.

As of December 31, 2020, and 2019, \$1,374,000 and \$274,000 of SAFE agreements were outstanding.

NOTE 6: CONCENTRATIONS

The Company's revenue sources carry significant concentrations. For the years ended December 31, 2020 and 2019, there were two granting agencies that represented over 10% of total revenue and represented concentrations of risk which were approximately 99% and 100% of total revenues, respectively. Should the Company lose these funding sources it would significantly impair the Company's ability to continue as a going concern.

NOTE 7: COMMITMENTS AND CONTINGENCIES

The Company may be subject to pending legal proceedings and regulatory actions in the ordinary course of business. The results of such proceedings cannot be predicted with certainty, but the Company does not anticipate that the final outcome, if any, arising out of any such matter will have a material adverse effect on its business, financial condition or results of operations.

NOTE 8: RECENT ACCOUNTING PRONOUNCEMENTS

In February 2016, the FASB issued ASU 2016-02, *Leases* (Topic 842). This ASU requires a lessee to recognize a right-of-use asset and a lease liability under most operating leases in its balance sheet. The ASU is effective for annual and interim periods beginning after December 15, 2021, including interim periods within those fiscal years. Early adoption is permitted. We are continuing to evaluate the impact of this new standard on our financial reporting and disclosures.

In June 2018, the FASB issued ASU No. 2018-07, *Compensation - Stock Compensation (Topic 718): Improvements to Nonemployee Share-Based Payment Accounting* ("ASU 2018-07"). ASU 2018-07 eliminates the separate accounting model for nonemployee share-based payment awards and generally requires companies to account for share-based payment transactions with nonemployees in the same way as share-based payment transactions with employees. The accounting remains different for attribution, which represents how the equity-based payment cost is recognized over the vesting period, and a contractual term election for valuing nonemployee equity share options. ASU 2018-07 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018 with early adoption permitted. The Company has adopted this standard effective January 1, 2019.

In May 2014, the FASB issued ASU No. 2014-09, *Revenue from Contracts with Customers* (Topic 606) and has issued subsequent amendments to this guidance. This new standard will replace all current guidance on this topic and eliminate all industry-specific guidance. The new revenue recognition standard provides a unified model to determine when and how revenue is recognized. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration for which the entity expects to be entitled in exchange for those goods or services. The guidance is effective for interim and annual periods beginning after December 31, 2018. The standard may be applied either retrospectively to

each period presented or as a cumulative-effect adjustment as of the date of adoption. The Company has adopted this standard effective January 1, 2019.

Management does not believe that any other recently issued, but not yet effective, accounting standards could have a material effect on the accompanying financial statements. As new accounting pronouncements are issued, we will adopt those that are applicable under the circumstances.

NOTE 9: SUBSEQUENT EVENTS

Restricted Stock Issuance

In 2021, the Company issued a restricted stock purchase agreement for 1,109,490 shares of common stock. The restricted stock purchase agreement establishes a vesting period of four years, with a one year cliff.

Management's Evaluation

Management has evaluated subsequent events through March 9, 2021, the date the balance sheet was available to be issued. Based on this evaluation, no additional material events were identified which require adjustment or disclosure in these financial statements.

Seizure:

A seizure usually starts with a sudden change in movement or awareness. Some seizures are so subtle that the person may not recognize they are having one.

Epilepsy is a debilitating neurological disease characterized by recurring, unprovoked seizures and does not discriminate when it comes to age, gender, and ethnicity. In many parts of the world, people with epilepsy and their families suffer from stigma and discrimination - even here in the US.

Epilepsy is one of the most common conditions affecting the brain. When counting both children and adults in the US, about 5.1 million people in the US have a history of epilepsy and about 3.4 million people in the US have active epilepsy (1.2% of the total US population).

The Problem

With Unreliable Seizure Data, Doctors are Guessing

A Clinician's Perspective

Patients expect their physician to make the best decisions possible with the goal of minimizing side effects. The problem is physicians rarely have an accurate picture of how patients experience tolerability.

With more than 99% of seizures occurring outside of the hospital setting, no seizure data which is the current standard of care as recommended by the American Academy of Neurology. However, studies have shown patient-r

This means that doctors are guessing which of the > 20 medicines are likely to work for a given patient. The current standard of care of patient-report data for measuring treatment outcomes results in a prolonged trial-and-error treatment cycle.

In the featured video, Dr. David Ficker, neurologist with the Epilepsy Center at UC Gardner Neuroscience Institute, explains the "trial and error" treatment approach. For people with epilepsy, the cycle results in poor quality of life, poor treatment adherence, and excessive costs.

quality of life. Taking medication and monitoring for seizures is a core part of the life of a person with epilepsy. Seizure monitoring can be really stressful. People with epilepsy frequently do not know if they have had a seizure although they do sometimes notice the after-effects such as missed time or a headache. Caregivers can miss seizures because they may not be in the same room or not know if an event is a seizure. Take a moment to watch the video of Amy and David sharing the parent's perspective on epilepsy.

People taking anti-seizure medications may experience side effects including dizziness, fatigue, weight gain, speech problems, memory problems, and more. These side effects can be really bad, so much so that 40% of patients choose not to take their medication regularly. It can be difficult for people with epilepsy to communicate their side effects to clinicians and explain how the side effects are impacting the m.

Using a Patient 's Eye Movements . Doctors Can Get the Data They Need

Eysz is developing an AI-driven digital health solution - to measure disease progression and provide the data clinicians need to assist them in developing a personalized care plan.

Eysz Epilepsy Management Platform

The eye-tracking system records passive eye movements and the data is then retrieved and analyzed. The platform then produces a physician report with information about personalized dose response.

With our solution, we believe by enabling personalized care:

patients will have an improved quality of life with fewer seizures and side effects;

providers and payers will see a reduction in wait times, admissions, and stays;

and researchers will be able to accelerate new therapies at a lower cost.

Large Market Opportunity with Minimal Competition

Market Opportunity

There are roughly 3.4 million people with epilepsy in the US of which roughly 2.7 million lose consciousness (LOC), with an additional 150,000 new people diagnosed with epilepsy each year. This represents a large market opportunity for a global market, with room to expand to Europe and Asia - as there are few alternatives internationally. In addition, there are more than 75 new investigational drugs entering the market. Benefit from software like Eysz to monitor patients enrolled in these studies and optimize

Eysz's business model targets two primary customers: providers (neurologists) and pharmaceutical researchers. Eysz's Software-as-a-Service (SaaS) model for providers charging a fee per patient per month for the application for additional codes in the future. Pharmaceutical researchers will study.

Competition

Currently, the primary competition is paper-based and digital seizure diaries that are companies that have developed or are developing solutions to track seizures but (electromyography) limit the type of seizures they can address. Other technologies exist but have difficulty identifying clinical seizures. At Eysz, we are focused on dealing with a clinically accepted sensitivity and specificity. More importantly, we believe in outcomes but also non-seizure outcomes.
