PRODUCTION

MADE ON AN INDUSTRIAL TETRA PAK LINE

SHORES cartons are formed, filled, sealed, and palletized on an automated line built for volume.

Advanced carton forming

Flat packaging material is shaped and sealed into cartons on the line itself.

Robotic line assembly

Automated handling from forming through fill.

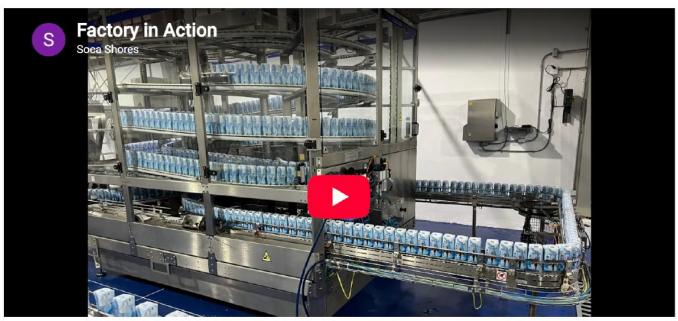

Never exposed to outside air

The carton is filled and sealed in a sterile environment, so the water never touches oxygen.

2,300 cases in six hours

Documented output from a single production run.

One 40-foot container — 2,300 cases — produced in a single six-hour run.

REVENUE CHANNELS

HOW SHORES REACHES CUSTOMERS

EXPANSION STRATEGY

BUILD WHERE WE'RE STRONGEST FIRST

Investment capital accelerates the markets where SHORES already has an advantage.

CARIBBEAN FIRST

SHORES already has distribution, relationships, and a home-market advantage—giving us a credible path to scale.

Capital enables inventory, distribution, retail placement, and market support.

Cayman underway. **Jamaica, Barbados, Tobago, and BVI next.**

U.S. FROM STRENGTH

The U.S. is larger, more expensive, and more crowded. SHORES enters from a stronger Caribbean base—not by building both markets at once.

10,800+ CASES
MANUFACTURED & MOVED
Across USVI, Florida, Georgia, New York, Cayman.

CAPITAL → CARIBBEAN SCALE → STRONGER U.S. ENTRY

OWN PART OF SOMETHING PEOPLE ALREADY USE EVERY DAY

SHORES is on shelves, in hotels, and moving through the Caribbean right now.

Most people can only buy a brand like this. This is the window where you can own a piece of it instead.

Minimum investment is $100.

EARLY INVESTORS GET A BETTER PRICE

The first $250,000 invested comes in at an $11.25M valuation cap instead of $15M. Same terms, same company — early investors simply buy a larger share for the same money.
