Robert Ayan

Founder and CEO at Rayyan Systems Inc.
Cambridge, Massachusetts, United States

Summary

Robert Ayan is Founder and CEO of Rayyan Systems, an AI / Machine Learning company that provides a SaaS web and mobile research collaboration tool for researchers to save time conducting systematic literature reviews and to extract greater value from repositories of curated, unstructured data sets that contain a wealth of knowledge.

Formerly, Robert served as Managing Partner of Cambridge Advisors, a consultancy specialized in human, social and economic development, where he delivered turn-key projects for public and private sector clients worldwide. Robert also served as Senior Advisor for Innovation and Entrepreneurship to a Presidential science diplomacy initiative. He served as Vice President of Business Development for Future Cities Development, Inc, a startup funded by Paypal's Peter Thiel that aimed to build innovative autonomous governments starting with a start-up city in Honduras. Robert previously served as Chief Strategist for a science park and on the development of a national innovation system for Jordan. He also delivered a national high growth strategy to accelerate the growth of technology startups for the USAID funded Jordan Competitiveness Program, an effort to attract \$1 billion in new investment and create 40,000 new jobs. He is an angel investor and technology entrepreneur, and served as the Program Manager of the MIT Entrepreneurship Center where he helped entrepreneurs commercialize their innovations. He was a product manager at LiveVault Corporation, an early broadband enabled cloud based, B2B, SaaS, technology startup acquired by Iron Mountain. Robert earned his Master of Business Administration from the Massachusetts Institute of Technology, and is an awarded Fellow of the MIT Carroll L. Wilson Circle, an intergenerational community of exceptional scholars, intellectuals and business entrepreneurs united around the concerns for global sustainability. Robert earned his Bachelor of Science in Business Administration from Boston

University, where he studied Computer Science and Management Information Systems.

Experience

Rayyan Systems Inc.

Chief Executive Officer

January 2020 - Present (3 years 7 months)

Boston, Massachusetts, United States

Rayyan Systems Inc. is a leading provider of collaboration and research tools that power the global research community in pursuit of accelerated scientific discovery. Rayyan is an AI-assisted research collaboration platform that enables researchers to identify, extract and synthesize relevant data in far less time to support evidence based decision making, including evidence based medicine.

Qatar Science & Technology Park

Entrepreneur In Residence

September 2019 - December 2019 (4 months)

Identifying promising Artificial Intelligence and Machine Learning research for commercialization with a high technology readiness level. Researching the attractiveness of potential commercial applications and market dynamics to determine optimal pathways for viable commercialization. Assembling the resources to launch a startup based on advanced AI/ML research.

Cambridge Advisors

Managing Partner

January 2007 - September 2019 (12 years 9 months)

Cambridge, MA

Cambridge Advisors is a global consultancy that specializes in developing integrated strategies to foster economic prosperity. We advise both public and private sector clients worldwide on the development of comprehensive strategies to achieve their objectives.

Brown University

Regional Manager

March 2013 - August 2016 (3 years 6 months)

Providence, Rhode Island, United States

Future Cities Development, Inc.

Vice President of Business Development
August 2011 - October 2012 (1 year 3 months)
Tegucigalpa, Honduras

Future Cities Development, Inc. was a startup backed by PayPal's Peter Thiel, and other prominent investors, and was formed to innovate the world's largest industry: government. Its aim was to benefit humanity by creating free societies. We envisioned a world where cities with innovative governance would eradicate poverty, elevate human rights, and create unprecedented prosperity for the human race. We would accomplish this by forming autonomous charter cities that would offer highly innovative forms of governance and government services that would set new standards with measurable socio-economic impact.

Global Innovation through Science and Technology
Senior Advisor
2010 - 2011 (1 year)
Washington, DC

Served as Senior Advisor to a presidential science diplomacy initiative under the Obama administration to improve foreign relations through innovation and entrepreneurship.
