THE PROBLEM

Third-party “secured” crypto trades

Crypto exchanges have faced massive hacks and fraud (think Mt. Gox, FTX). Every year, billions disappear because third-party trading systems are vulnerable by design.

The problem? Exchanges can't offer self-custody for cross-chain trades (like BTC to ETH). Instead, they use bridges, liquidity pools, and other intermediary elements—adding risks.

While self-custody trading eliminates these risks, it has remained limited to **single-chain** networks. Trading crypto **cross-chain** with this standard of protocol security has **not** been possible—until now.

“Bitcoin exchange Mt. Gox filed for bankruptcy last week, saying hackers had **stolen the equivalent of \$460 million...**”

The New York Times

Jan 12, 2023

“FTX filed for bankruptcy in November after a run on customer deposits **exposed an \$8 billion hole in its accounts.**”

Cross-chain freedom + Self-custodial control

In a **market of 600+ exchanges**, Swopblock's ground-breaking innovation redefines crypto trading by offering the only cross-chain solution *with* protocol secured transactions: Leaving you in full control of your trades.

Swopblock reinvents crypto trading:

No Central Exchange

No DEX

No Platform

No Tokens

No Peer-to-Peer

Exchange crypto without an exchange.

Seamlessly trade between Bitcoin and Ethereum using
Swopblock's *protocol-driven liquid crypto*, **\$SWOBL**.

Trade crypto without the middle-man.

Experience the future of crypto trading—a revolutionary protocol-driven solution that puts you in full control. Trade cross-chain between BTC and ETH at real-time market prices, **completely trust-less** without any third-party meddlers.

Trade from your wallet.

Swoblock leverages the protocol security features already built-in to the native blockchains, enabling **direct wallet-to-wallet trading** with zero human intervention.

Trade with the market.

Instantly price-lock your orders into the flow of Swoblock's Liquidity Stream and enjoy **live trading** without the need to identify counter-parties or rely on an exchange party.

Introducing SWOBL: The people's universal medium of exchange.

SWOBL powers Swopblock's trading protocol—Liquefying previously isolated crypto-networks (like BTC or ETH) into a **universal-network**.

Owned by the people.

\$SWOBL is **fully distributed** across all users' wallets, putting the power of trade directly in the hands of the people

To empower the people.

As trading demand grows, the supply of \$SWOBL in circulation shrinks, **driving its value higher**—prospering \$SWOBL holders.

Swopblock is liberating \$billions in sidelined-bitcoin into circulation.

85% of Bitcoin

1

Capital Gains

As CRYPTO trading volume increases, the price of Swopblock's *medium of exchange* increases exponentially.

This fixed supply of inventory will be sold using our **ICO pricing protocol**, allowing Swopblock and the \$SWOBL community to **profit on these gains**.

2

Ordinary Income

Swopblock and the \$SWOBL community will profit from transaction fees and rewards.

3

License Subscriptions

Swopblock core software will be free to most, but will generate software license revenue for premium features.
