

Cloud-based lifetime storage

2-in-1 VMS &amp; Video Analytics Cloud

Cameras agnostic solution

## Product Overview

Camdog delivers an enterprise-level, cloud-based video surveillance as service (VSAAS) platform that is modern and user-friendly. Camdog merges AI-based built-in video analytics with a straightforward user-interface to provide full control when managing physical security across multiple locations.

Camdog's VSAAS is hardware agnostic. We support more than 20,000 IP camera models. We don't push you to use proprietary hardware. Camdog gives you the freedom of choice. We provide a fully modern, cloud-based video surveillance service that eliminates the need for DVR/NVRs, servers, device software, complicated installations, and manual configurations. All that you need is an Internet connection and your IP cameras. Camdog significantly reduces the initial costs of security infrastructure.

The Camdog delivers leading industry features in an easy-to-use cloud-based user-friendly interface. End-users can securely access the Camdog platform from any web browser or mobile device anytime, anywhere. With the Camdog platform

users can get instant alert notifications for any suspicious activity

investigate video footage for specific events, people, 500 classes of objects

integrate with third-party solutions for best-in-class performance.

guard their property with the unique Camdog mode

## Enterprise video surveillance becomes modern, UX friendly, and reliable

### Easy Deployment

- Device agnostics
- No DVR/NVRs, servers, or hard drives required
- Add new cameras in as little as one minute  
Reduces initial costs

### Reliable storage

- Lifetime cloud storage
- Industry-leading video latency
- End-to-end encryption and automatic updates

### Reliable streaming

- 24/7 continuous video monitoring
- ONVIF support
- 20,000+ cameras models supported

### Centralized Cloud Management

- Low bandwidth mode via “old” channels
- Possibility of managing thousands of cameras
- 24/7 access from any device anywhere

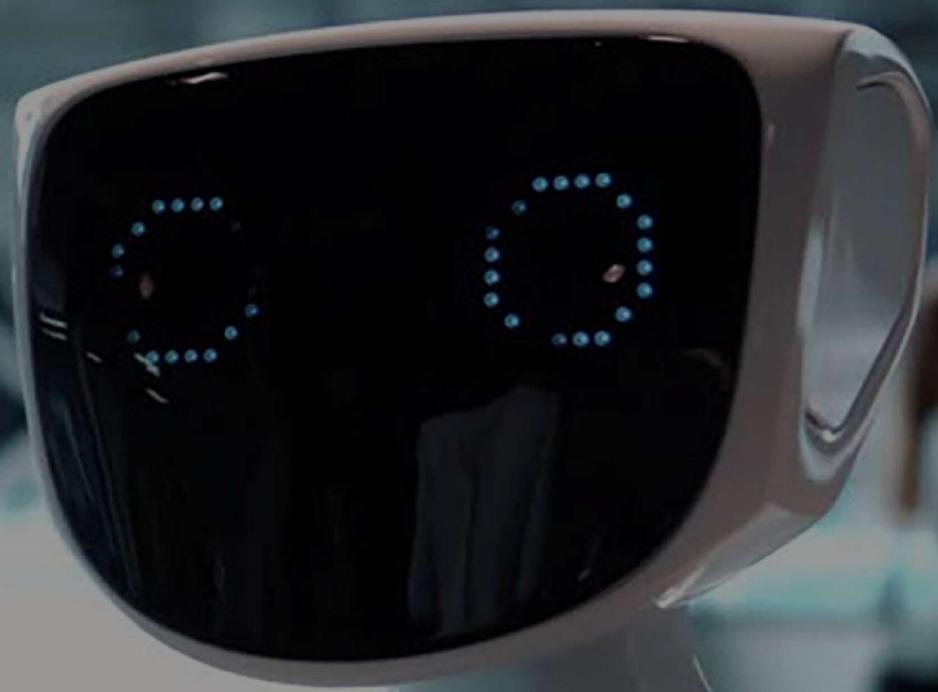

### User-friendly interface

- No training required - get started in minutes
- Receive instant alerts for predefined events.
- Built-in AI features at no additional cost

### AI-based built-in modes

- Camdog™ guard mode
- Humans detections mode
- Object detection mode

**People**

## Complete physical security managed effortlessly through an intelligent cloud-based VMS

### Advanced Cloud Management

- 24/7 secure, remote access
- Manage unlimited cameras, locations, and users
- Save and share unlimited video clips
- Lowest bandwidth and latency in the market

### Help with Investigations

- Quick video searches
- Group alerts- see only important events
- One minute video clips to help with searching
- Investigate across all cameras and locations

### Instant Alerts notifications

- Get instant notifications on any device
- Automatic alerts for suspicious activity
- Loitering detection
- Camera health monitoring and alerts

### Freedom of use

- Pay as you go plans
- No contracts
- Built-in scheduler to save costs
- Affordable price across the market

## How It Works

Connect any IP cam over wire or Wi-Fi and capture HD video footage

24/7 data recording to the Cloud. All video analytics run on the Cloud

View video from any browser or device .  
Everywhere

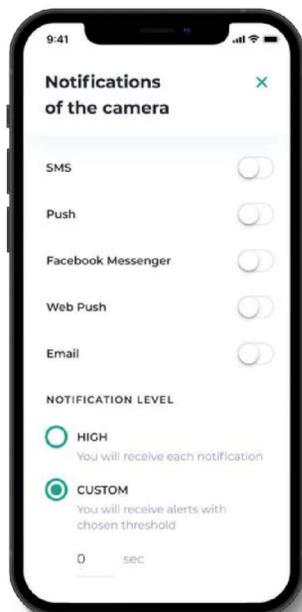

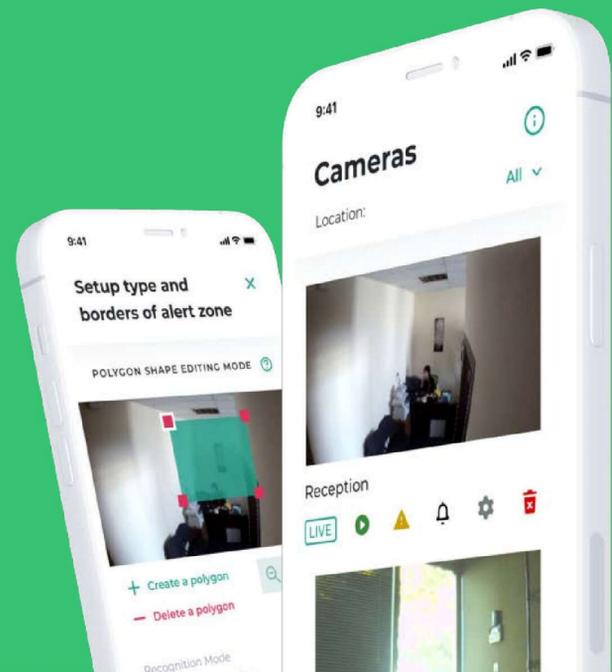

Choose detection mode and get immediate alerts

## Camdog Mobile Management

- Add new cameras in two clicks
- Access all cameras and locations from any device
- Built-in live video feed mode
- Monitor multiple locations at once with video walls
- Built-in push notifications

Available for:

You can use our mobile application on Android or iOS to receive real-time push notifications for alerts, manage your cameras and live video feed.

Don't worry about your data saving. We use 2-factor authentication for mobile access and SSL encrypted connections between mobile devices and cloud servers.

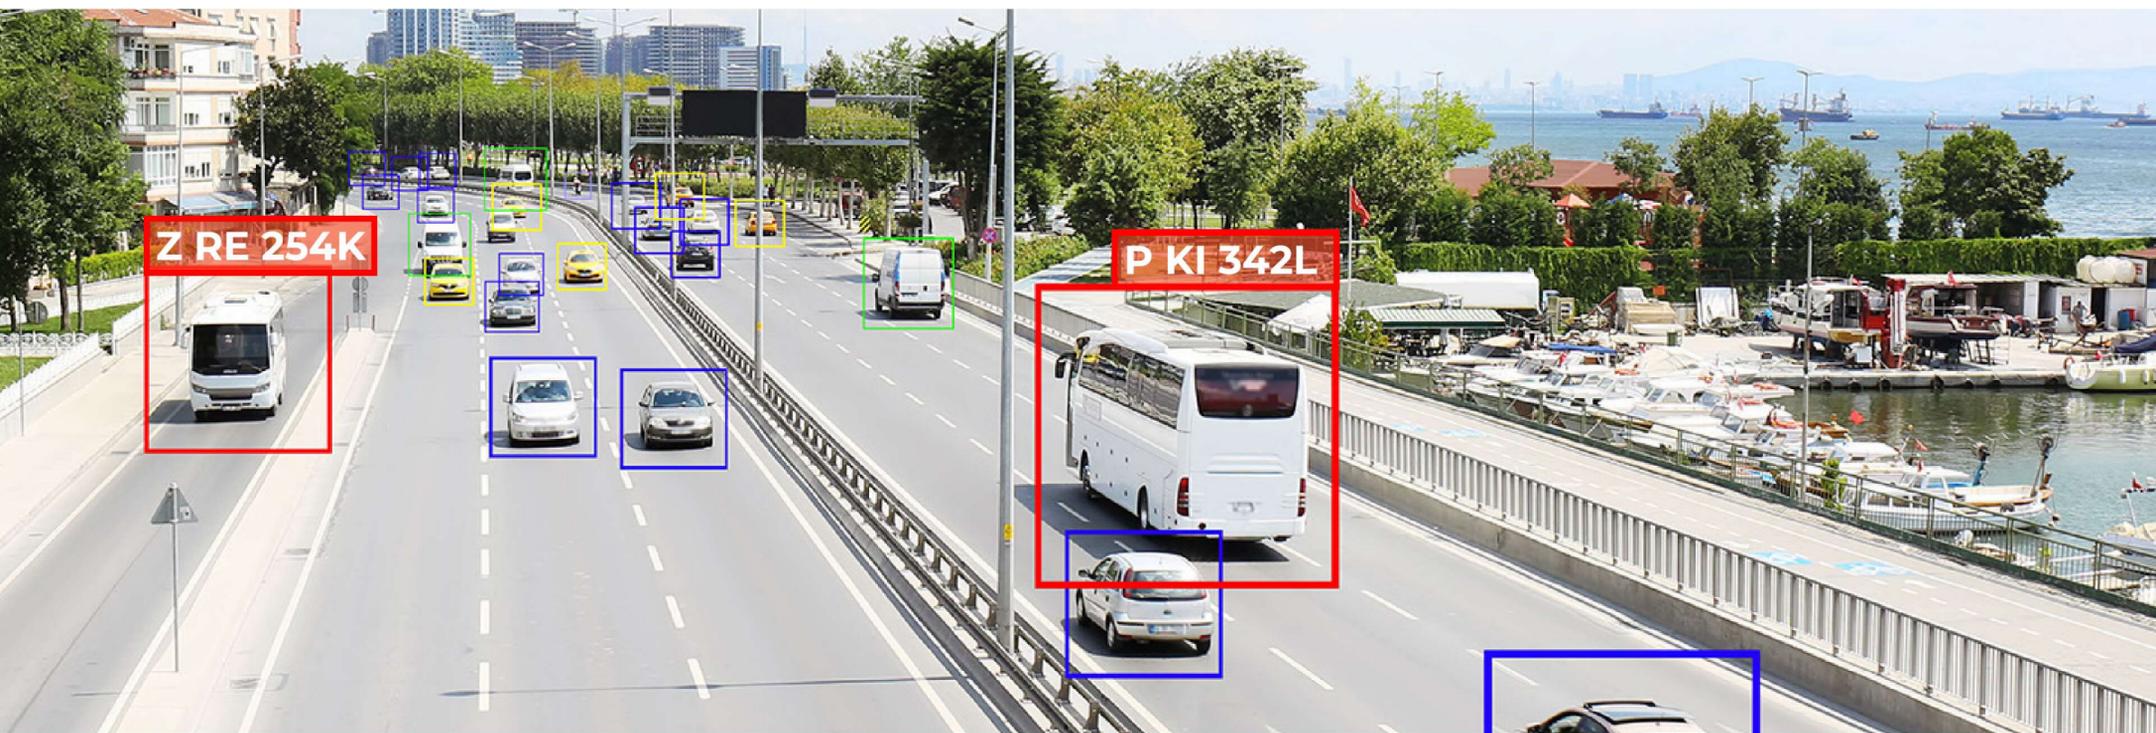

- Our AI-based Camdog™ algorithm monitors the object entrusted to it.
- You just need to select the object on the screen and arm it.
- Whether it's a car on a driveway or a mobile phone in a display case, the system will work when the object begins to leave the security zone.

## Benefits

- No servers or hard drives required
- Store footage locally and in the cloud
- Reduce costs by investing in what you need
- Video always accessible in full HD quality

## Features

- Full end-to-end encryption at rest and in-transit
- Secure, off-site backup of footage
- 24/7 continuous, real-time cloud storage
- Configure cloud storage on a per camera basis
- Footage stored in full HD video quality

## Get video evidence before the vehicle arrives or departure

Vehicle recognition as part of Object Detection mode and ALPR analytics helps businesses to obtain vehicle-related video evidence in a simple way.

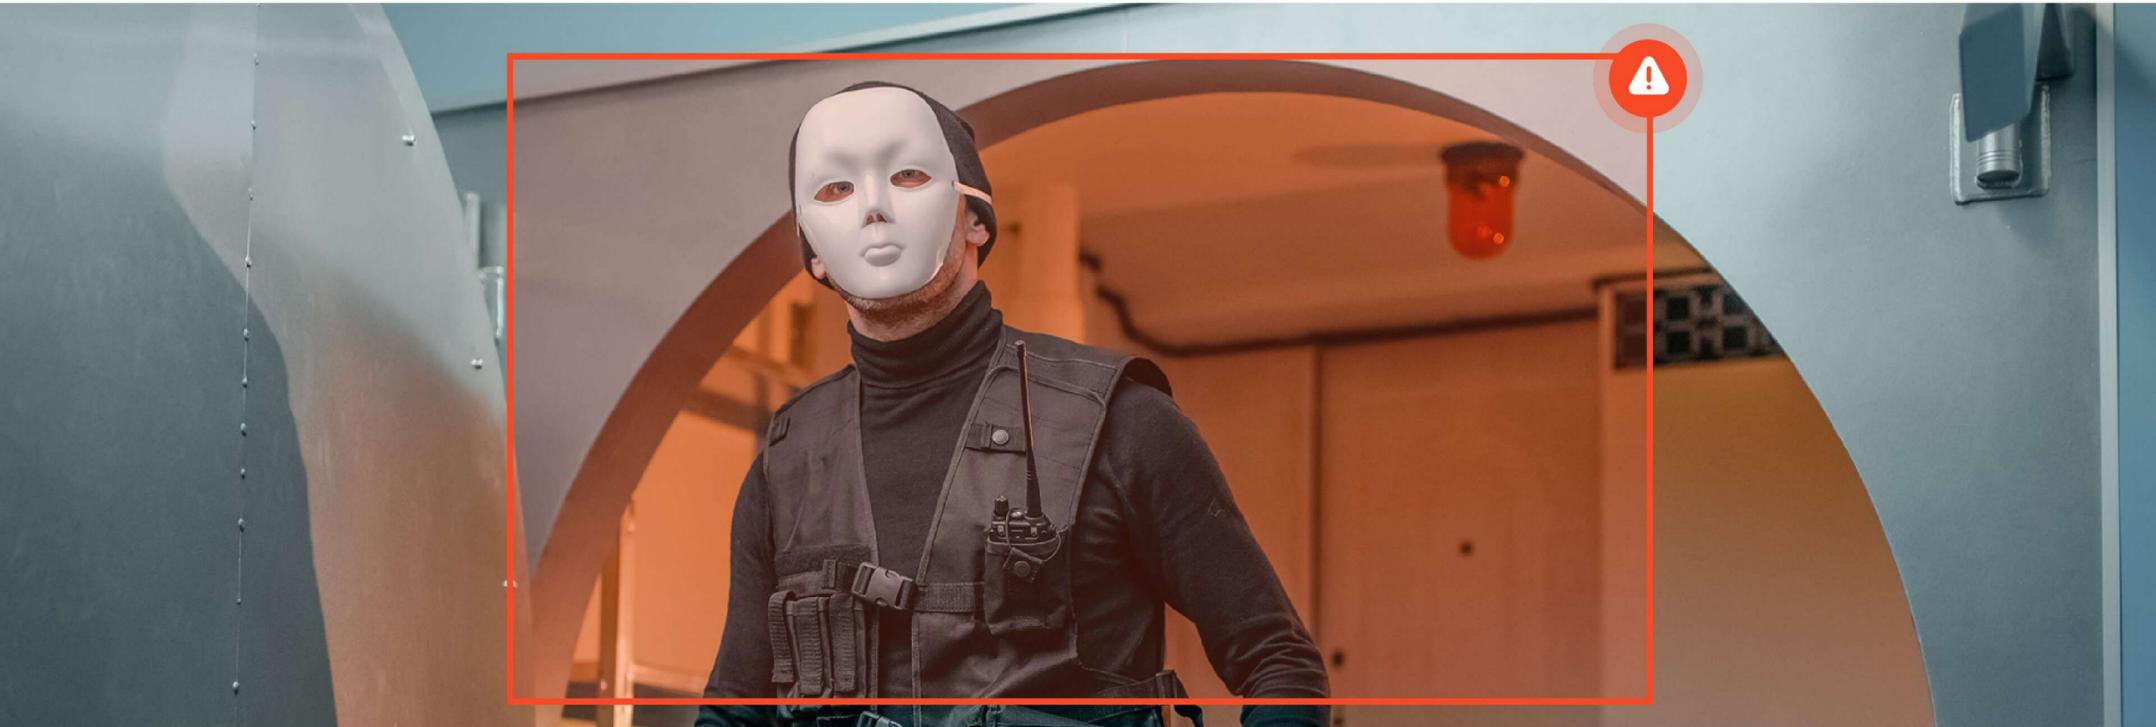

### Benefits

- Real-time alerts when vehicles are spotted
- Automatically create clips of vehicle events
- Capture and store unlimited license plates

### Features

- Acquire vehicle and license plate data
- Real-time alerts for vehicles and license plates
- US,CA,EU license plates in one DB
- Quickly search for vehicles/license plates
- One-minute auto-generated video clips for vehicle alerts
- Automatic vehicle counting
- Exportable vehicle counting data via CSV
- Constantly algorithms and DB improving through ML

## Immediate alerts when they are needed most of all

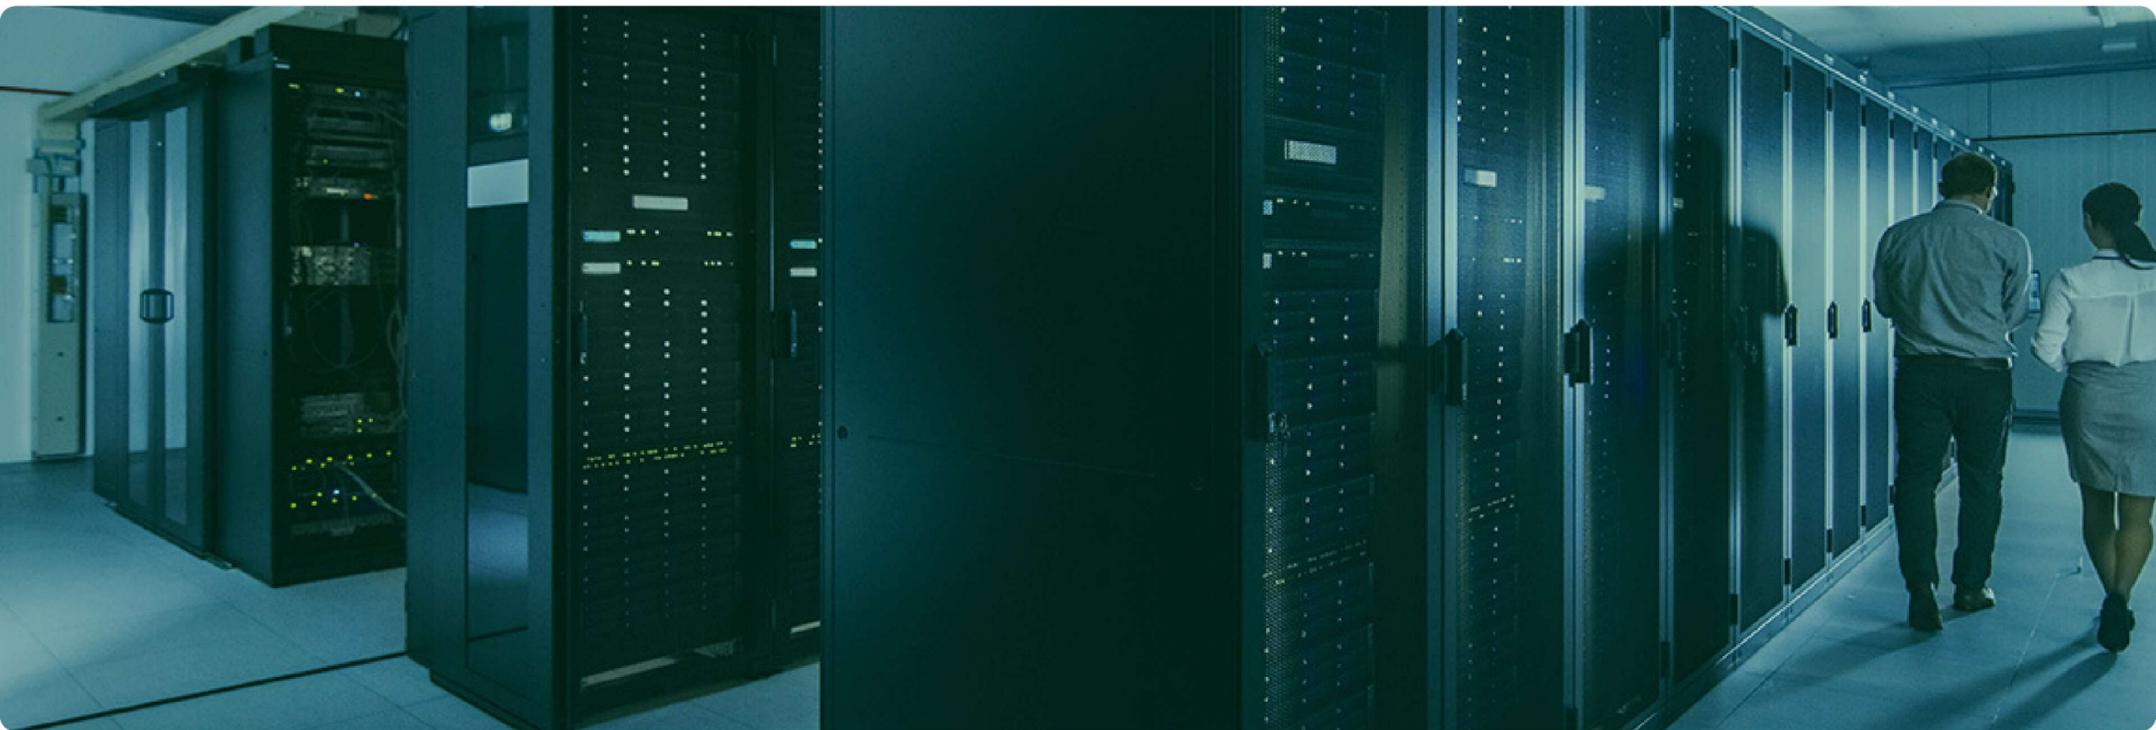

Loitering and suspicious activity detection algorithms from Camdog allow any business to add an additional level of security and peace of mind. Camdog checks what behaviors are normal for a particular environment and what are not and can send an immediate alert when something might need your attention.

### Benefits

- Automatic monitoring of your space
- Receive alerts of suspicious behavior
- Added layer of security for peace of mind
- Gets smarter and more powerful over time

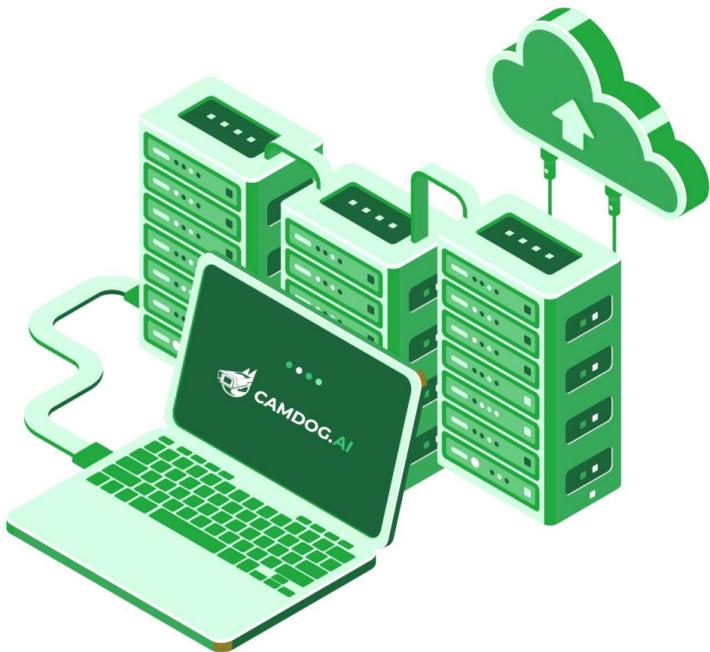

### Features

- Establish a baseline of what's normal
- 24/7 video monitoring your areas
- Instant notifications sent to any device
- Human posture analysis to monitor human behavior
- Search for suspicious activity
- AI-based algorithms

## Unlimited video storage

Camdog provides a lifetime of alerts and video saving with 24/7 cloud storage for data redundancy.

### Features

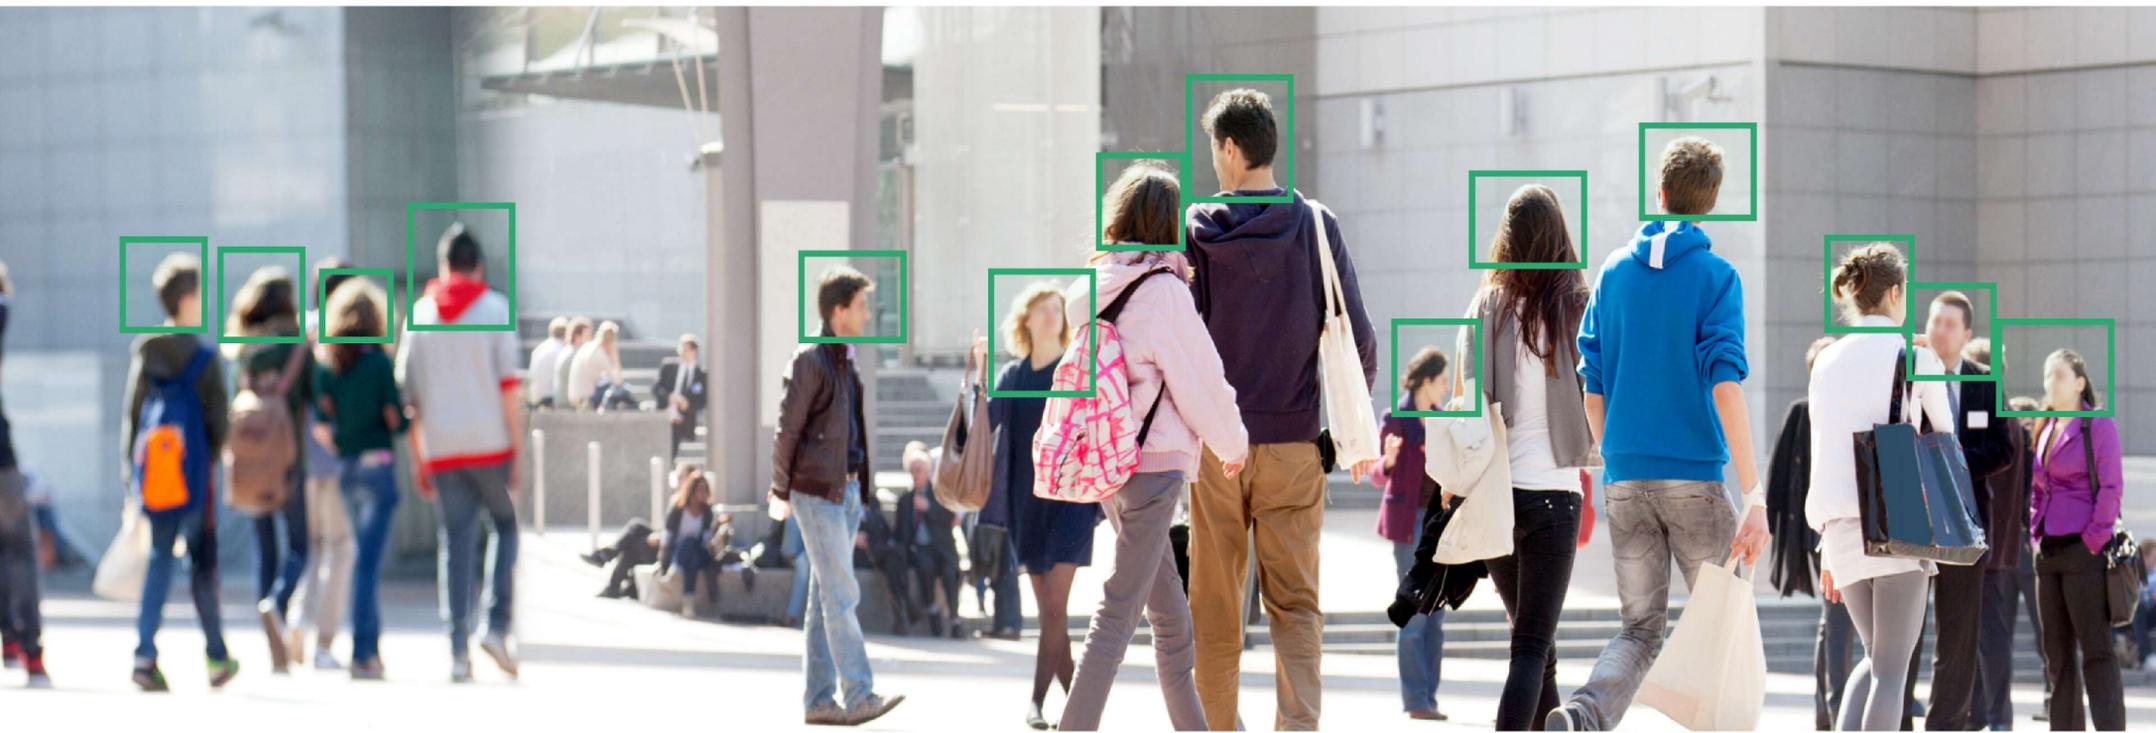

- We use Google Cloud as our storage partner
- Secure, off-site backup of footage
- 24/7 continuous, real-time cloud storage
- Configure cloud storage on a per camera basis
- Footage stored in full HD video quality

### Benefits

- No servers or hard drives required
- Reduce initial costs on useless DVR/NVR/Hub's
- Store "pure" footage in the cloud
- Video always accessible in full HD quality

# A new way of detecting people and understanding how to operate space more effectively with people counting data

Human detection mode helps businesses by reducing time to search for events on the footage. Reports with a unique “people counting” feature unlock new insights to make business operations more effective. This gives businesses the ability to get more useful data from video footage for better understanding and instant decision-making.

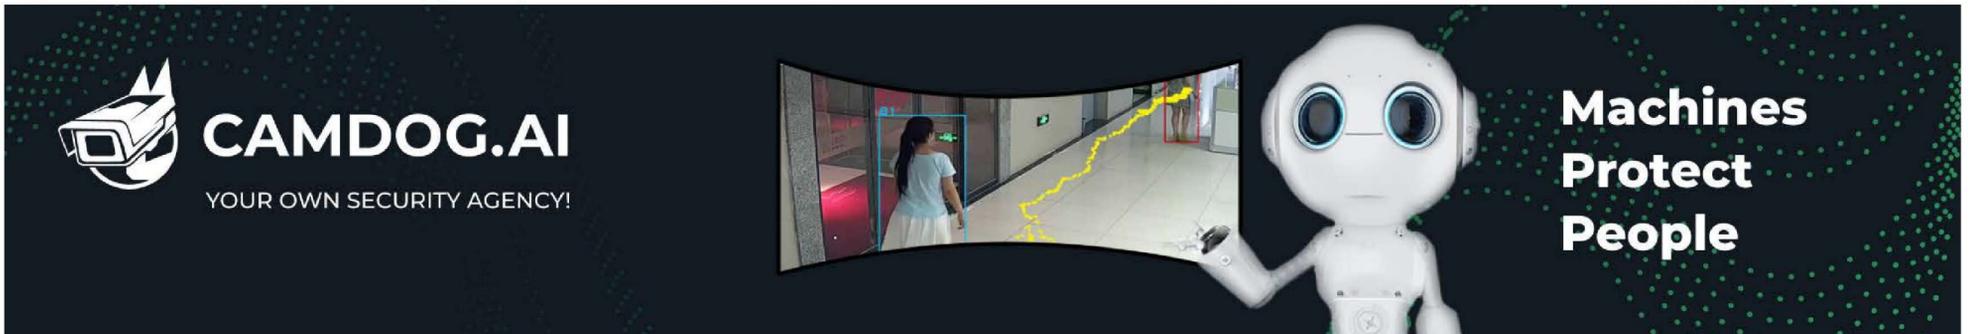

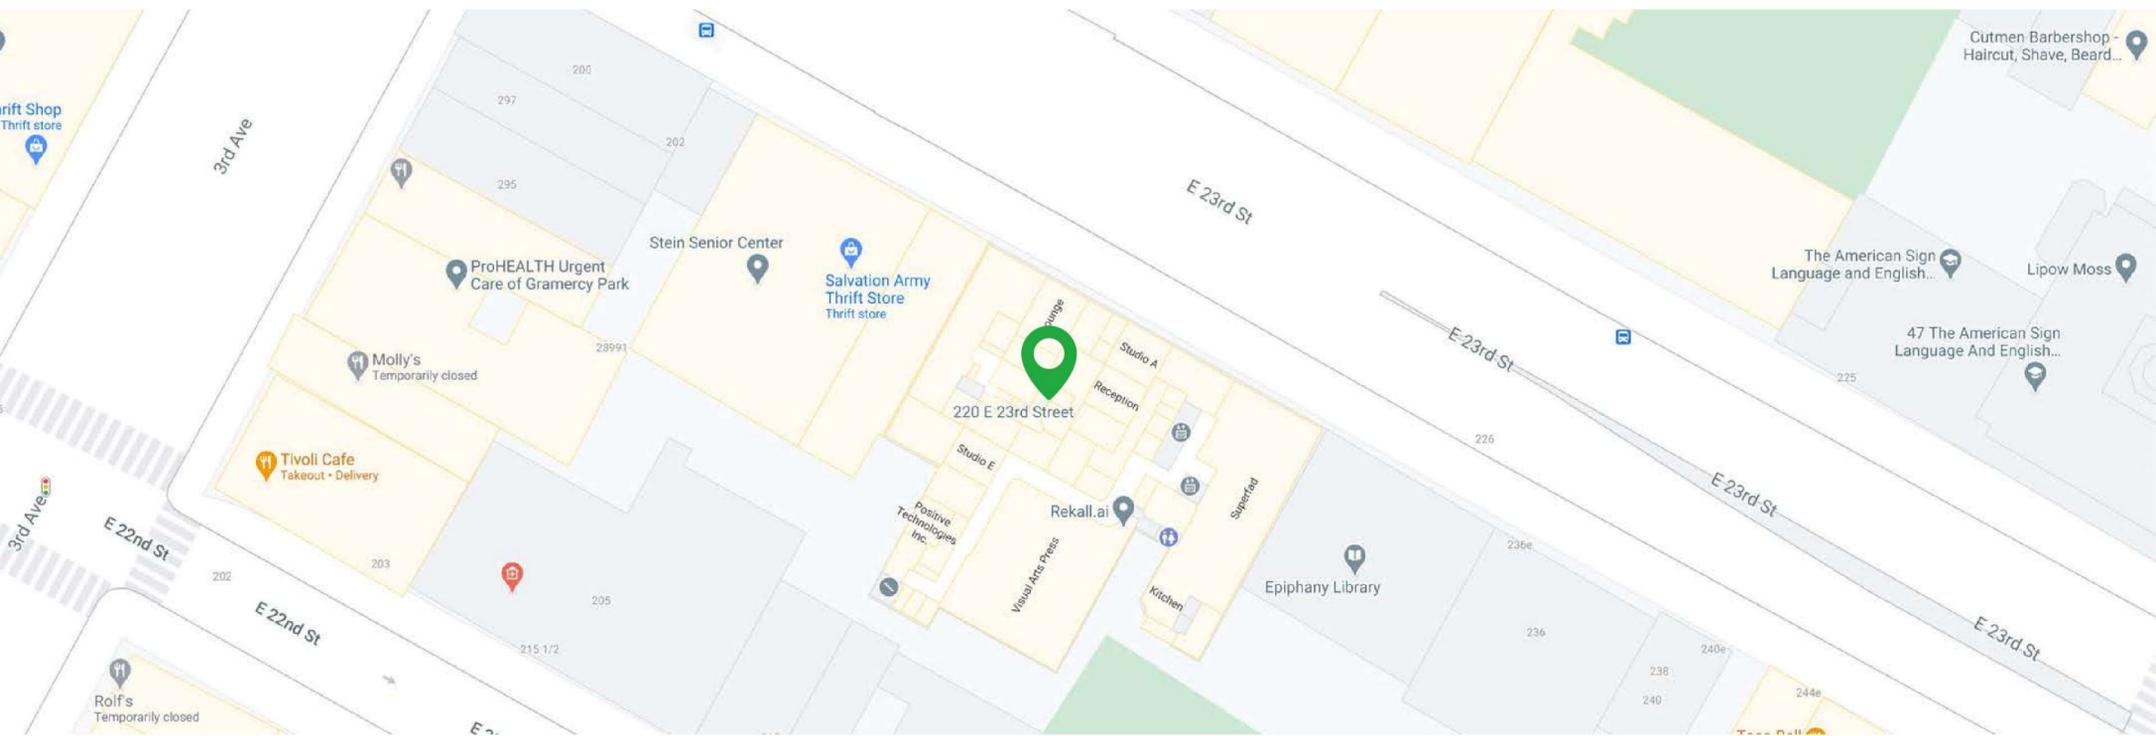

People counting gives business the ability to acquire useful data from video evidence for better understanding and operational decision-making.

## Benefits

- No complicated software required
- Identify only humans
- Real-time alerts with lifetime storage
- Review footage based on human events

## Features

- Detection only on humans
- Low false alarms
- Customized Region of interest (ROI)
- People counting
- 250 ms automatic threshold event saving
