Nektar Baziotis

Artificial Intelligence | EdTech | Entrepreneur
Santa Monica, California, United States

Summary

Follow me for Artificial Intelligence and E-Learning strategies, resources, and job openings!

Nektar Baziotis is an experienced entrepreneur and technology leader with over 20 years of experience in international business development, IT project management, IT business consulting, e-learning, and artificial intelligence. As the founder of ICARUS AI Inc. and co-founder of ENKI Inc. and Apogee Information Systems, Nektar has successfully implemented large-scale IT products and services for the United Nations, the European Commission, the European Parliament, organizations, companies, and startups across multiple countries.

Nektar has been featured in various magazines for his expertise in artificial intelligence, e-learning strategies, and implementation roadmaps. He holds a BA in Mathematics from AUTH GR, a Master of Business Administration from Sheffield UK, and has completed additional studies in artificial intelligence from MIT US and entrepreneurship from Wharton US.

At ICARUS AI, Nektar leads a team of experts who have developed an adaptable e-learning platform that combines knowledge management, machine learning, and cognitive understanding. He has deployed a strategy for combining e-learning and artificial intelligence, positioning ICARUS AI as a leading technological innovation. Nektar is driven and ambitious, constantly seeking new ways to revolutionize the e-learning industry.
