Ending Concrete Corrosion is a \$3.0 Trillion¹ Opportunity

- ✔ **First-of-its-kind nano-ceramic coating technology** that makes concrete infrastructure virtually immortal.
- ✔ Over **\$800,000 in revenue** since inception, with a strong demand pipeline and strategic partnerships for exponential growth.
- ✔ Tackling a **\$3.0 trillion* problem** with a scalable solution ready for global adoption.
- ✔ Dramatically **reduces CO2 emissions**, preserving our climate.

is going to be increasingly dealing with municipal interests.

PROBLEM

Fighting Concrete Corrosion Costs Billions Every Year

Concrete is essential for the construction of most modern infrastructure. But concrete corrodes over time because it's naturally porous and chemically fragile. This corrosion can lead to **collapsed bridges, broken dams, failed water systems, and more**. Even worse? Protective coatings like epoxy or polyurethane cannot be used to preserve infrastructure outdoors because they can't bond to concrete, or survive humidity and UV light exposure.

Coated with CeramycGuard™
Highway 295 Scenic Overlook, New Jersey, 2007

Our Coating Solution Makes Concrete Virtually Immortal

Zirconia's nano-ceramic coating, CeramycGuard™ is the only coating that chemically bonds to concrete, creating an ultra-durable ceramic surface. It literally becomes part of the concrete, so corrosives like salt, acid, and bacteria can't break through and cause corrosion. Our solution makes infrastructure virtually immortal.

TRACTION

There's Already \$1M+ in Our Sales Funnel²

Because our nano-ceramic coating outperforms the market, we've quickly won regulatory approvals, are running field trials with various government agencies, and are building a reputation of success with our customers. Zirconia has made over \$800,000 in revenue* since inception and now has over \$1 million in our sales funnel.

- ✓ Customers include Amazon, Tyson, UK Water, New Jersey DOT, SASE, Royal Atlantic Condominiums (FL), and California Water Districts
- ✓ Certified for wastewater infrastructure in the United Kingdom
- ✓ Approved by Miami-Dade County as a salt corrosion prevention coating
- ✓ Starting trials in Saudi Arabia for preventing corrosion of oil/gas cooling system which uses seawater for cooling, and suffers from salt corrosion
- ✓ Undergoing five water dam trials with U.S. state and federal agencies

COMPETITIVE ADVANTAGE

The Only Solution to Actually Stop Corrosion

Outdated solutions from the 1950's, like polyurethane and epoxy coatings, can't bond to concrete or be used outdoors. They rely on "adhesion," which weakens and fails.

Backed by four (3 issued, 1 pending) patents, Zirconia is the only solution that chemically bonds with concrete, creating an impenetrable barrier. Zirconia's nano-ceramic coating, CeramycGuard, is immortal and not affected by salts, freeze-thaw cycles or weathering.

No chemical bonds (epoxy) Competition

EXPANSION

Ready to Scale to \$50M in Sales

With billions spent annually on concrete repairs and inferior solutions, we're ready to scale aggressively. We have the ability to scale production for **over \$50 million in sales at an 80% gross margin³**. And, we're offering our sales reps double the commissions of our competitors (Sherwin Williams, PPG), so they are excited to sell our products.

ROADMAP

Exit Potential

We have a roadmap for reaching our goal of **\$7M revenue by 2026***. In a world where Duraflex sold for 7X revenue to Sherwin Williams⁴, we believe we can offer similar value to a multinational acquirer.

What's Next for Zirconia

- ✓ **Miami Dade County & Florida DOT product approval:** Zirconia protects against salt corrosion. Sales support for condominium renovations from salt corrosion.
- ✓ Distributor in Saudi Arabia Sipchem trial, Endurance Materials EU licensing deal. Project and Sales support.

Photo by: Martina Nollie, License: Creative Commons by-sa-3.0⁶

- ✓ Zirconia will hire an industry-experienced Field Supervisor
- ✓ Present at 8+ Trade shows in the Corrosion Industry (AMPP, NACE) and Commercial Construction in 2024
- ✓ Manufacture 6 months of inventory, fuels pipeline of sales.

SUSTAINABILITY

A Green-Tech Solution for Fighting Climate Change

"Build, Corrode, Demolish, Repeat." Thanks to Zirconia, this concrete corrosion cycle is a thing of the past.

Creating one pound of concrete creates one pound of carbon emissions⁵. But it doesn't have to be that way. Our technologies help reduce greenhouse gas emissions and other pollution, making infrastructure more durable, long lived, and sustainable.

Zirconia's coating extends the lifespan of concrete and steel infrastructure, making it virtually immortal, while reducing the need to remanufacture and remake concrete and steel structures, which cumulatively emit up to 16% of global climate change gases.

We're fighting for a more livable climate for this generation, as well as future generations.

TEAM

Meet the Visionaries Behind Zirconia

At the core of Zirconia's groundbreaking technology and ambitious mission lies a team of seasoned professionals, each bringing a wealth of experience and a proven track record of success in the construction and coating industries.

Benjamin Cook

Co-founder, CEO

Serial Entrepreneur, 30 years in business, sold GeoTree Ceramic Cement Co. for 5X exit for investors*.

Jad Costandi

General Manager

Process & Mechanical Engineer

FAQs

^ Why invest in startups?

Regulation CF allows investors to invest in startups and early-growth companies. This is different from helping a company raise money on Kickstarter; with Regulation CF Offerings, you aren't buying products or merchandise - you are buying a piece of a company and helping it grow.

^ How much can I invest?

Accredited investors can invest as much as they want. But if you are NOT an accredited investor, your investment limit depends on either your annual income or net worth, whichever is greater. If the number is less than \$124,000, you can only invest 5% of it. If both are greater than \$124,000 then your investment limit is 10%.

^ How do I calculate my net worth?

To calculate your net worth, just add up all of your assets and subtract all of your liabilities (excluding the value of the person's primary residence). The resulting sum is your net worth.

^ What are the tax implications of an equity crowdfunding investment?

We cannot give tax advice, and we encourage you to talk with your accountant or tax advisor before making an investment.

^ Who can invest in a Regulation CF Offering?

Individuals over 18 years of age can invest.

^ What do I need to know about early-stage investing? Are these investments risky?

voting power to direct the company due to dilution over time. You may also have to wait about five to seven years (if ever) for an exit via acquisition, IPO, etc. Because early-stage companies are still in the process of perfecting their products, services, and business model, nothing is guaranteed. That's why startups should only be part of a more balanced, overall investment portfolio.

^ When will I get my investment back?

The Common Stock (the "Shares") of Zirconia Inc (the "Company") are not publicly-traded. As a result, the shares cannot be easily traded or sold. As an investor in a private company, you typically look to receive a return on your investment under the following scenarios: The Company gets acquired by another company. The Company goes public (makes an initial public offering). In those instances, you receive your pro-rata share of the distributions that occur, in the case of acquisition, or you can sell your shares on an exchange. These are both considered long-term exits, taking approximately 5-10 years (and often longer) to see the possibility for an exit. It can sometimes take years to build companies. Sometimes there will not be any return, as a result of business failure.

^ Can I sell my shares?

Shares sold via Regulation Crowdfunding offerings have a one-year lockup period before those shares can be sold under certain conditions.

^ Exceptions to limitations on selling shares during the one-year lockup period:

In the event of death, divorce, or similar circumstance, shares can be transferred to:

- The company that issued the securities
- An accredited investor
- A family member (child, stepchild, grandchild, parent, stepparent, grandparent, spouse or equivalent, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law, including adoptive relationships)

^ What happens if a company does not reach their funding target?

If a company does not reach their minimum funding target, all funds will be returned to the investors after the close of the offering.

^ How can I learn more about a company's offering?

All available disclosure information can be found on the offering pages for our Regulation Crowdfunding offering.

^ What if I change my mind about investing?

You can cancel your investment at any time, for any reason, until 48 hours prior to a closing occurring. If you've already funded your investment and your funds are in escrow, your funds will be promptly refunded to you upon cancellation. To submit a request to cancel your investment please email: info@dealmakersecurities.com.

^ How do I keep up with how the company is doing?

At a minimum, the company will be filing with the SEC and posting on its website an annual report, along with certified financial statements. Those should be available 120 days after the fiscal year end. If the company meets a reporting exception, or eventually has to file more reported information to the SEC, the reporting described above may

What relationship does the company have with DealMaker Securities?

Once an offering ends, the company may continue its relationship with DealMaker Securities for additional offerings in the future. DealMaker Securities' affiliates may also provide ongoing services to the company. There is no guarantee any services will continue after the offering ends.
