## Successfully Reversing Aging, Extended Longevity, Inc., Announces its Wefunder Campaign

June 06, 2022 04:11 AM Hawaii Standard Time

MAUI, Hawaii--(BUSINESS WIRE)-- Extended Longevity, a Hawaii-based longevity company focused on reversing the biomarkers of aging, announces a crowdfunding offering on Wefunder. You can learn about our offering here: <https://wefunder.com/extended.longevity.inc>

Extended Longevity has introduced a product line of ten (10) targeted phytotherapeutic formulations that have successfully demonstrated deceleration of the determinant factors of aging. The company is currently running medically supervised studies, with independent lab tests revealing that these formulations have regrown telomeres to lengths equivalent to a 10 year-old, significantly lowered inflammation, and rolled back the epigenetic clock by an astonishing 22% (15 years).

On the Extended Longevity website are case studies detailing before and after results of an initial test cohort, including a 68-year-old who successfully decelerated his epigenome biological age by 15 years, for two years in a row. "We now believe we have **flattened the aging curve**," said CEO and Founder Steven M Schorr, "and we have initiated additional testing through an IRB (Investigative Review Board) study whose results will be available in the fall." Additionally, the company has proven test results demonstrating a 14-year reduction in a 75-year-old, a 12-year reduction in a 58-year-old woman, and two 42-year-old men with age reversals of 10 and 12 years, among others. All have significantly regrown their telomeres to that of adolescents and maintain very low C-RP inflammation.

Extended Longevity has developed a patent-pending solution for aging with proven scientific results. This investment tranche will expand production capabilities, build brand awareness, and fund expanded ongoing trials to gather additional scientific data and show the continued success of its life-extending protocol.

CEO Steven Schorr is an entrepreneur and public company CEO and CSO with 48 years of experience. He is a patented inventor and scientist who has dedicated his career to creating data-driven products that work for the health and wellness industry.

Disclosures:

We are "testing the waters" to gauge investor interest in an offering under Regulation Crowdfunding. No money or other consideration is being solicited. If sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and only through Wefunder's platform. Any indication of interest involves no obligation or commitment of any kind.

## Having Successfully Reversed Aging, Extended Longevity, Inc., Opens Fundraise through Wefunder

May 23, 2022 10:11 AM Eastern Daylight Time

MAUI, Hawaii--(BUSINESS WIRE)-- [Extended Longevity](#), a Hawaii-based longevity company focused on reversing the biomarkers of aging, has launched a crowdfunding offering on [Wefunder](#), a portal that allows the public to get in early on some of the world's most exciting startups. You can learn about our offering here: <https://wefunder.com/extended-longevity-inc>

Extended Longevity has introduced a product line of ten targeted phytotherapeutic formulations that have demonstrated significant success in decelerating the determinant factors of aging. The company is currently running medically supervised studies, with independent lab tests revealing that these formulations have regrown telomeres to lengths consistent with preteens, significantly lowered levels of inflammation, and rolled back the epigenetic clock by an astonishing 15 years.

Available on the Extended Longevity [website](#) are case studies detailing before and after results of a small test cohort, including a 68-year-old who successfully decelerated his epigenome biological age by 15 years, for two years in a row. "We have **successfully flattened the aging curve,**" said CEO and Founder Steven M Schorr. Additionally, the company has proven test results demonstrating a 14-year reduction in a 75-year-old, a 12-year reduction in a 58-year-old woman, and two 42-year-old men with age reversals of 10 and 12 years, among others. All have significantly regrown their telomeres to that of adolescents and maintain very low C-RP inflammation.

The field of longevity science is the next great leap in human biology, and Extended Longevity boasts a patent-pending solution with proven scientific results. This investment tranche will expand production capabilities, build brand awareness, and fund expanded ongoing trials to gather additional scientific data and show the continued success of its life-extending protocol.

CEO Steven Schorr is an entrepreneur and executive with 47 years of experience. He is a patented inventor and scientist dedicated to creating data-driven products for the health and wellness industry.

Disclosures:

We are 'testing the waters' to gauge investor interest in an offering under Regulation Crowdfunding. No money or other consideration is being solicited. If sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and only through Wefunder's platform. Any indication of interest involves no obligation or commitment of any kind.
