LEAD INVESTOR

Karthikeyan Mohan

Som is a driven and passionate individual when it comes to investing. Som and Thomas have put their decade of High-Risk investing experience into a product that is simple to use for a retail investor. Quantbase is an excellent platform that provides the retail users with the automated approach to high-risk investing in these modern times with crypto, NFT to name a few. I am excited to be part of this venture. Retail investors in these modern times need to act quick for high returns in these times and Quantbase aims at providing this.

Invested \$8,000 this round

Highlights

- 1 Nearly \$300k+ raised from hedge fund execs, VC, YC alumni, and a NYT-featured influencer w/ 600k followers

- 4 High risk investing has exploded from \$0.5T in assets in 2020, to nearly \$5T today
- 5 Team has past exits, background at hedge funds, portfolio management, full-stack software, and AI
- 6 SEC-registered investment advisor

Our Team

Thomas Stewart Co-Founder and CEO

Full-stack SWE. UVA. Graduated HS in 2 years, published a physics paper at 16, and started working in the UVA particle physics lab at 17. Before Quantbase, I built 3 profit-generating businesses - including a successful exit in March 2020.

Thomas Stewart Co-Founder and CEO

Full-stack SWE. UVA. Graduated HS in 2 years, published a physics paper at 16, and started working in the UVA particle physics lab at 17. Before Quantbase, I built 3 profit-generating businesses - including a successful exit in March 2020.

We're builders and investors ourselves. Quantbase started as a collection of personal portfolios we've developed from years of experience automating high risk investing, including in a \$1m+ institutional fund, automating strategies from investment papers and hedge fund research.

Som Mohapatra Co-Founder and CIO

Full stack SWE, RPA developer, and institutional portfolio manager. UVA. Published a book in

college, have been automating high-risk investing in stocks and crypto for nearly a decade.

Pitch

Quantbase
High-risk fully automated funds for retail investors.

Seed Round Financing

High-Risk Investing Today is the Wild West

Retail investors have to do all the work themselves

The Problem

Time

Skill

Diversification

The problem is a lack of standardization in high-risk investing

Our Solution

Evaluate

Deposit

Hands Off

Quantbase is standardizing high risk investing

Who Wants This?

We've gotten to a \$50M AUM waitlist with \$0 ad spend

Market Size

High-risk investing is huge and growing fast - high-risk funds are inevitable

Competitive Landscape

	Quantbase	Titan	Robinhood	Betterment	Vanguard
Passive for investor	Orange	Orange	Grey	Orange	Orange
Transparency in investment picks	Orange	Grey	Grey	Orange	Orange
Offers crypto	Orange	Orange	Orange	Orange	Grey
Definition of high risk	Crypto, quant strats, leverage, NFTs, wine, art, etc.	Innovation focused stocks	Self-select options + stocks	80/20 US stocks + bonds	Small-cap stocks

We're unapologetically for high-risk investors

How Quantbase Works

Pick a fund to invest in

We currently allow ACH transactions. Soon to come: debit, IRAs, crypto wallets, Acorns-esque services

Follow your

Quantbase, in the background:

1. Connects users to pertinent brokerages (for equities, crypto, alternative assets)
2. Automatically creates accounts with KYC information
3. Takes investment/divestment amount (in \$) and manages investment/divestment in direct assets through brokerages → we hold none of the user's money

Follow your holdings

A dedicated dashboard to track holdings by fund, by asset, and by asset class.

4. Rebalances strategies and portfolios **automatically**
5. Tracks **cost basis per asset** for tax season

1-3% transaction fee

Investor behavior data
Internal hedge fund

We want a monopoly on the 20% of each investor's wallet reserved for risk

3 Core Risks

Long term moat

LT customer acq.

Platform risk

Talking about risk seems to be a community-builder
