RISK FACTORS

Risks Related to the Company's Business and Industry

The Project may not generate the number of Megawatts forecasted resulting in reduced revenues.

Hydroelectric power is a function of rainfall and runoff conditions in rivers and streams. If a drought occurs then flows are less and subsequently revenues are less. The reflective happens in wetter conditions. If a flood occurs, it can damage the equipment. All conditions are based on rainfall probably and the facility was designed to maximum return; however, outlying seasons do occur and sometime back-to-back.

Our revenues are dependent on the availability and functionality of the green infrastructure installed.

Mechanical errors do happen and sometimes happen when the river flow is ideal. Repair parts are sometime special ordered and need time to manufacture. Some aspects of infrastructure is located on land not owned by the Company. If the property owner damages or removes the infrastructure or terminates the Company's access agreement will no longer be generated. In the event the

property owner chooses to remove the facilities, make modifications that negate the intended purpose of the Project, or fails to allow the Company to operate, maintain, and repair the green infrastructure, then the property owner shall be deemed to be in breach of the access agreement and the Company shall have all right to recover actual damages from property owner equal to the amount of any lost revenue to the extent resulting from lost production from the facility. If the property owner decides to terminate the agreement early, the property owner will be subject to a termination penalty to make the Company and its investors whole.

The Company's success depends on the experience and skill of the board of directors, its executive officers and key employees.

In particular, the Company is dependent on staff and the Company has employment agreements. Although there can be no assurance that it will do so or that they will continue to be employed by the Company for a particular period of time. The loss of any member of the board of directors or executive officer could harm the Company's business, financial condition, cash flow and results of operations.

Although dependent on certain key personnel, the Company does not have any key man life insurance policies on any such people.

If anyone would die or become disabled, the Company will not receive any compensation to assist with such person's absence. The loss of such person could negatively affect the Company and its operations.

Electric rates vary from time to time and alternative sources could flood the market driving the electricity prices down.

The electric market has a full array of energy sources. Some sources are on demand in output (e.g. coal) and others are intermittent (e.g. solar with clouds and day/night). Assess to these sources impacts the price.

Regulatory restrictions.

New and evolving regulation is always at an ongoing refinement. Often new regulations increase cost to existing operations. Sometimes, facility can overcome new regulation while other times it can make the facility impractical to continue running.

We have not prepared any audited financial statements.

Therefore, you have no audited financial information regarding the Company's capitalization or assets or liabilities on which to make your investment decision. If you feel the information provided is insufficient, you should not invest in the Company.

We are subject to income taxes as well as non-income based taxes, such as payroll, sales, use, value-added, net worth, property and goods and services taxes, in both the U.S..

Significant judgment is required in determining our provision for income taxes and other tax liabilities. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe that our tax estimates are reasonable: (i) there is no assurance that the final determination of tax audits or tax disputes will not be different from what is reflected in our income tax provisions, expense amounts for non-income based taxes and accruals and (ii) any material differences could have an adverse effect on our financial position and results of operations in the period or periods for which determination is made.

The Company's business operations may be materially adversely affected by a pandemic such as the Coronavirus (COVID-19) outbreak.

In December 2019, a novel strain of coronavirus was reported to have surfaced in Wuhan, China, which spread throughout other parts of the world, including the United States. On January 30, 2020, the World Health Organization declared the outbreak of the coronavirus disease (COVID-19) a "Public Health Emergency of International Concern." On January 31, 2020, U.S. Health and Human Services Secretary Alex M. Azar II declared a public health emergency for the United States to aid the U.S. healthcare community in responding to COVID-19, and on March 11, 2020 the World Health Organization characterized the outbreak as a "pandemic." COVID-19 resulted in a widespread health crisis that adversely affected the economies and financial markets worldwide. The Company's business could be materially and adversely affected. The extent to which COVID-19 impacts the Company's business will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of COVID-19 and the actions to contain COVID-19 or treat its impact, among others. If the disruptions posed by COVID-19 or other matters of global concern continue for an extended period of time, the Company's operations may be materially adversely affected.

We face risks related to health epidemics and other outbreaks, which could significantly disrupt the Company's operations and could have a material adverse impact on us.

The outbreak of pandemics and epidemics could materially and adversely affect the Company's business, financial condition, and results of operations. If a pandemic occurs in areas in which we have material operations or sales, the Company's business activities originating from affected areas, including sales, materials, and supply chain related activities, could be adversely affected. Disruptive activities could include the temporary closure of facilities used in the Company's supply chain processes, restrictions on the export or shipment of products necessary to run the Company's business, business closures in impacted areas, and restrictions on the Company's employees' or consultants' ability to travel and to meet with customers, vendors or other business relationships. The extent to which a pandemic or other health outbreak impacts the Company's results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of a virus and the actions to contain it or treat its impact, among others. Pandemics can also result in social, economic, and labor instability which may adversely impact the Company's business.

If the Company's employees or employees of any of the Company's vendors, suppliers or customers become ill or are quarantined and in either or both events are therefore unable to work, the Company's operations could be subject to disruption. The extent to which a pandemic affects the Company's results will depend on future developments that are highly uncertain and cannot be predicted.

We face risks relating to public health conditions such as the COVID-19 pandemic, which could adversely affect the Company's customers, business, and results of operations.

Our business and prospects could be materially adversely affected by the COVID-19 pandemic or recurrences of that or any other such disease in the future. Material adverse effects from COVID-19 and similar occurrences could result in numerous known and currently unknown ways including from quarantines and lockdowns which impair the Company's business. If the Company purchases materials from suppliers in affected areas, the Company may not be able to procure such products in a timely manner. The effects of a pandemic can place travel restrictions on key personnel which

could have a material impact on the business. In addition, a significant outbreak of contagious diseases in the human population could result in a widespread health crisis that could adversely affect the economies and financial markets of many countries, resulting in an economic downturn that could reduce the demand for the Company's products and impair the Company's business prospects including as a result of being unable to raise additional capital on acceptable terms to us, if at all.

We are subject to potential liability due to environmental matters.

Under federal, state and local laws relating to protection of the environment ("Environmental Laws"), a current or previous owner or operator of real estate may be liable for contamination resulting from the presence or discharge of petroleum products or other hazardous or toxic substances on the property. These owners may be required to investigate and clean-up the contamination on the property as well as the contamination which has migrated from the property. Environmental Laws typically impose liability and clean-up responsibility without regard to whether the owner or operator knew of, or was responsible for, the presence of the contamination. This liability may be joint and several unless the harm is divisible and there is a reasonable basis for allocation of responsibility. In addition, the owner or operator of a property may be subject to claims by third parties based on personal injury, property damage and/or other costs, including investigation and clean-up costs, resulting from environmental contamination. Environmental Laws may also impose restrictions on the manner in which a property may be used or transferred or in which businesses may be operated. These restrictions may require expenditures. Under the Environmental Laws, any person who arranges for the transportation, disposal or treatment of hazardous or toxic substances may also be liable for the costs of investigation or clean-up of those substances at the disposal or treatment facility, whether or not the facility is or ever was owned or operated by that person.

Our tenants generally are required by their leases to operate in compliance with all applicable Environmental Laws, and to indemnify us against any environmental liability arising from their activities on the properties. However, we could be subject to strict liability by virtue of our ownership interest in the properties. Also, tenants may not satisfy their indemnification obligations under the leases.

We are also subject to the risk that any environmental assessments of our properties may not have revealed all potential environmental liabilities, any prior owner or prior or current operator of these properties may have created an environmental condition not known to us, or an environmental condition may otherwise exist as to any one or more of these properties. Any one of these conditions could have an adverse effect on our results of operations. Moreover, future environmental laws, ordinances or regulations may have an adverse effect on our results of operations and financial condition. Also, the current environmental condition of those properties may be affected by tenants and occupants of the properties, by the condition of land or operations in the vicinity of the properties (such as the presence of underground storage tanks), or by third parties unrelated to us.

Our business operations are susceptible to, and could be significantly affected by, adverse weather conditions and natural disasters that could cause significant damage to our properties.

Although we intend to obtain insurance for our properties, our insurance may not be adequate to cover business interruption or losses resulting from adverse weather or natural disasters. In addition, our insurance policies may include substantial self-insurance portions and significant

deductibles and co-payments for such events, and recent hurricanes in the United States have affected the availability and price of such insurance. As a result, we may incur significant costs in the event of adverse weather conditions and natural disasters. If we experience a loss that is uninsured or which exceeds our policy limits, we could incur significant costs and lose the capital invested in the damaged properties, as well as the anticipated future cash flows from those properties. In addition, if the damaged properties are subject to recourse indebtedness, we would continue to be liable for the indebtedness, even if these properties were irreparably damaged. In addition, certain of our properties may not be able to be rebuilt to their existing height or size at their existing location under current land-use laws and policies. In the event that we experience a substantial or comprehensive loss of one of our properties, we may not be able to rebuild such property to its existing specifications and otherwise may have to upgrade such property to meet current code requirements.

Our dependence on third-party subcontractors and equipment and material providers could result in material shortages and project delays and could reduce our profits or result in project losses, which could adversely affect our business.

We rely on third-party subcontractors and equipment and material providers. For example, we procure equipment and construction materials as needed when engaged in large construction projects. To the extent that we cannot engage subcontractors or acquire equipment and materials at reasonable costs or if the amount we are required to pay for subcontractors or equipment exceeds our estimates, our ability to complete a construction project in a timely fashion or at a profit may be impaired. In addition, if a subcontractor or a manufacturer is unable to deliver its services, equipment or materials according to the negotiated terms for any reason, including the deterioration of its financial condition, we may be required to purchase the services, equipment or materials from another source at a higher price. This may reduce the profit to be realized or result in a loss on a project for which the services, equipment or materials are needed, which may materially adversely affect us, including our results of operations and cash flow.

General economic conditions could have an adverse effect on our business and results of operations.

Our business is sensitive to general economic conditions, both nationally and locally, as well as international economic conditions. General poor economic conditions and the resulting effect of non-existent or slow rates of growth in the markets in which we operate could have an adverse effect on the demand for our real estate business. These poor economic conditions include higher unemployment, inflation, deflation, increased commodity costs, decreases in consumer demand, changes in buying patterns, a weakened dollar, higher transportation and fuel costs, higher consumer debt levels, higher tax rates and other changes in tax laws or other economic factors that may affect commercial and residential real estate. Specifically, high national or regional unemployment may arrest or delay any significant recovery of the residential real estate markets in which we operate, which could adversely affect the demand for our real estate assets.

We are susceptible to weather and natural disasters.

Our real estate operations are vulnerable to natural disasters, such as hurricanes, earthquakes, tsunamis, floods, fires, tornadoes and unusually heavy or prolonged rain, which could damage our real estate holdings and which could result in substantial repair or replacement costs to the extent not covered by insurance, a reduction in property values, or a loss of revenue, and could have an adverse effect on our ability to develop, lease and sell properties. The occurrence of natural

disasters could also cause increases in property insurance rates and deductibles, which could reduce demand for, or increase the cost of owning or developing our properties.

Uninsured losses may adversely affect our business.

We, or in certain instances, tenants of our properties, carry property and liability insurance policies with respect to the properties. This coverage has policy specifications and insured limits customarily carried for similar properties. However, certain types of losses (such as from earthquakes and floods) may be either uninsurable or not economically insurable. [Further, certain properties are located in areas that are subject to earthquake activity and floods.] Should a property sustain damage as a result of an earthquake or flood, we may incur losses due to insurance deductibles, co-payments on insured losses or uninsured losses. Additionally, we have elected to obtain insurance coverage for "certified acts of terrorism" as defined in the Terrorism Risk Insurance Act of 2002, as amended and reauthorized to date; however, our policies of insurance may not provide coverage for other acts of terrorism. Any losses from such other acts of terrorism might be uninsured. Should an uninsured loss occur, we could lose some or all of our capital investment, cash flow and anticipated profits related to one or more properties. This could have an adverse effect on our business and results of operations.

Under various federal, state or local laws, ordinances and regulations, a current or previous owner or operator of real estate may be required to investigate and clean up hazardous or toxic substances released at a property and may be held liable to a governmental entity or to third parties for property damage or personal injuries and for investigation and clean-up costs.

These laws often impose liability without regard to whether the owner or operator knew of, or was responsible for, the release of the hazardous or toxic substances. The presence of contamination or the failure to remediate contamination may adversely affect the owner's ability to sell or lease real estate or to borrow using the real estate as collateral. Other federal, state and local laws, ordinances and regulations require abatement or removal of asbestos-containing materials in the event of demolition or certain renovations or remodeling, the cost of which may be substantial for certain redevelopments, and also govern emissions of and exposure to asbestos fibers in the air. Federal and state laws also regulate the operation and removal of underground storage tanks. In connection with the ownership, operation and management of certain properties, we could be held liable for the costs of remedial action with respect to these regulated substances or tanks or related claims. The properties at issue have been subjected to varying degrees of environmental assessment at various times. However, the identification of new areas of contamination, a change in the extent or known scope of contamination or changes in cleanup requirements could result in significant costs.

The Securities represent an investment in a single type of property in a single geographic location, and are not a diversified investment.

We depend on third party service providers, suppliers and licensors in the development of the property.

In certain instances, we rely on single or limited service providers and outsourcing vendors or subcontractors because the relationship is advantageous due to quality, price, or lack of alternative sources. If production or service was interrupted and we were not able to find alternate third-party providers, we could experience disruptions in developing and maintain the property, including construction delays, cost overruns and redesigns. If outsourcing services are interrupted or not

performed or the performance is poor, this could impact our ability to execute our business plan and provide a return to our investors.

Terrorist-sponsored attacks, both foreign and domestic, could have adverse effects on our business and results of operations.

Terrorist attacks and threatened attacks have from time to time materially adversely affected the demand for properties/real estate and have also resulted in increased safety and security costs for us and the real estate industry generally. Additional terrorist attacks, even if not made directly on our properties, or the fear of such attacks or other hostilities, would likely have a further significant negative impact on us and the real estate industry. Terrorist-sponsored attacks, both foreign and domestic, could have adverse effects on our business and results of operations. These attacks could accelerate or exacerbate other industry risks and also have the potential to interfere with our business by disrupting our tenants ability to conduct their businesses.

Our operations are subject to special hazards that may cause personal injury or property damage, subjecting us to liabilities and possible losses which may not be covered by insurance.

Operating hazards inherent in our business, some of which may be outside our control, can cause personal injury and loss of life, damage to or destruction of property, plant and equipment and environmental damage. We maintain insurance coverage in amounts and against the risks we believe are consistent with industry practice, but this insurance may be inadequate or unavailable to cover all losses or liabilities we may incur in our operations. Our insurance policies are subject to varying levels of deductibles. Losses up to our deductible amounts are accrued based upon our estimates of the ultimate liability for claims incurred and an estimate of claims incurred but not reported. However, liabilities subject to insurance are difficult to estimate due to unknown factors, including the severity of an injury, the determination of our liability in proportion to other parties, the number of unreported incidents and the effectiveness of our safety programs. If we were to experience insurance claims or costs above our estimates, we may be required to use working capital to satisfy these claims rather than using working capital to maintain or expand our operations.

Economic downturns or reductions in government funding of infrastructure projects could reduce our revenues and profits and have a material adverse effect on our results of operations.

Our business is highly dependent on the amount and timing of infrastructure work funded by various governmental entities, which, in turn, depends on the overall condition of the economy, the need for new or replacement infrastructure, the priorities placed on various projects funded by governmental entities and federal, state or local government spending levels. Spending on infrastructure could decline for numerous reasons, including decreased revenues received by state and local governments for spending on such projects, including federal funding. The most recent recession caused a nationwide decline in home sales and an increase in foreclosures, which correspondingly resulted in decreases in property taxes and some other local taxes, which are among the sources of funding for municipal road, bridge and water infrastructure construction. State spending on highway and other projects can be adversely affected by decreases or delays in, or uncertainties regarding, federal highway funding, which could adversely affect us.

Environmental and other regulatory matters could adversely affect our ability to conduct our business and could require expenditures that could have a material adverse effect on our results of operations and financial condition.

Our operations are subject to various environmental laws and regulations relating to the management, disposal, and/or remediation of hazardous substances, climate change and the emission and discharge of pollutants into the air and water. We could be held liable for such contamination created not only from our own activities but also from the historical activities of others on our project sites or on properties that we acquire or lease. Our operations are also subject to laws and regulations relating to workplace safety and worker health, which, among other things, regulate employee exposure to hazardous substances. Violations of such laws and regulations could subject us to substantial fines and penalties, cleanup costs, third-party property damage or personal injury claims. In addition, these laws and regulations have become, and enforcement practices and compliance standards are becoming, increasingly stringent. Moreover, we cannot predict the nature, scope or effect of legislation or regulatory requirements that could be imposed, or how existing or future laws or regulations will be administered or interpreted, with respect to products or activities to which they have not been previously applied. Compliance with more stringent laws or regulations, as well as more vigorous enforcement policies of the regulatory agencies, could require us to make substantial expenditures for, among other things, pollution control systems and other equipment that we do not currently possess, or the acquisition or modification of permits applicable to our activities.

Our failure to comply with environmental laws could result in significant liabilities.

We are subject to numerous federal, state and local environmental laws and regulations governing our operations, including the handling, transportation, remediation and disposal of non-hazardous and hazardous substances and wastes, as well as emissions and discharges into the environment, including discharges to air, surface water, groundwater and soil. We also are subject to laws and regulations that impose liability and clean-up responsibility for releases of hazardous substances into the environment. The presence of contamination from or wastes on our properties or at a job site could interfere with ongoing operations. In addition, a part of our business is done in the Southwestern U.S. where we run a greater risk of fines, work stoppages or other sanctions for disturbing Native American artifacts and archeological sites.

New laws and regulations, stricter enforcement of existing laws and regulations, the discovery of previously unknown contamination or leaks, or the imposition of new clean-up requirements could require us to incur significant costs or could become the basis for new or increased liabilities that could harm our financial condition and results of operations. In certain instances, we have obtained indemnification or covenants from third parties (including predecessors or lessors) for some or all of such clean-up and other obligations and liabilities. However, such third-party indemnities or covenants may not cover all of our costs and such unanticipated obligations or liabilities, or future obligations and liabilities, may have a material adverse effect on our financial condition, results of operations and cash flows.

Risks Related to the Securities

The Notes will not be freely tradable until one year from the initial purchase date. Although the Notes/Bonds may be tradable under federal securities law, state securities regulations may apply and each Purchaser should consult with his or her attorney.

You should be aware of the long-term nature of this investment. There is not now and likely will not be a public market for the Rainplan DC1 Green Infrastructure Notes/Bonds. Because the Rainplan DC1 Green Infrastructure Notes/Bonds have not been registered under the Securities Act or under the securities laws of any state or non-United States jurisdiction, the Rainplan DC1 Green

Infrastructure Notes/Bonds have transfer restrictions and cannot be resold in the United States except pursuant to Rule 501 of Regulation CF. It is not currently contemplated that registration under the Securities Act or other securities laws will be effected. Limitations on the transfer of the Rainplan DC1 Green Infrastructure Notes/Bonds may also adversely affect the price that you might be able to obtain for the Rainplan DC1 Green Infrastructure Notes/Bonds in a private sale. Purchasers should be aware of the long-term nature of their investment in the Company. Each Purchaser in this Offering will be required to represent that it is purchasing the Securities for its own account, for investment purposes and not with a view to resale or distribution thereof.

Neither the Offering nor the Securities have been registered under federal or state securities laws, leading to an absence of certain regulation applicable to the Company.

No governmental agency has reviewed or passed upon this Offering, the Company or any Securities of the Company. The Company also has relied on exemptions from securities registration requirements under applicable state securities laws. Investors in the Company, therefore, will not receive any of the benefits that such registration would otherwise provide. Prospective investors must therefore assess the adequacy of disclosure and the fairness of the terms of this Offering on their own or in conjunction with their personal advisors.

No Guarantee of Return on Investment

There is no assurance that a Purchaser will realize a return on its investment or that it will not lose its entire investment. For this reason, each Purchaser should read the Form C and all Exhibits carefully and should consult with its own attorney and business advisor prior to making any investment decision.

A majority of the Company is owned by a small number of owners.

Prior to the Offering the Company's current owners of 20% or more beneficially own up to 100% of the Company. Subject to any fiduciary duties owed to our other owners or investors under Delaware law, these owners may be able to exercise significant influence over matters requiring owner approval, including the election of directors or managers and approval of significant Company transactions, and will have significant control over the Company's management and policies. Some of these persons may have interests that are different from yours. For example, these owners may support proposals and actions with which you may disagree. The concentration of ownership could delay or prevent a change in control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company, which in turn could reduce the price potential investors are willing to pay for the Company. In addition, these owners could use their voting influence to maintain the Company's existing management, delay or prevent changes in control of the Company, or support or reject other management and board proposals that are subject to owner approval.

The Company has the right to extend the Offering deadline.

The Company may extend the Offering deadline beyond what is currently stated herein. This means that your investment may continue to be held in escrow while the Company attempts to raise the Minimum Amount even after the Offering deadline stated herein is reached. Your investment will not be accruing interest during this time and will simply be held until such time as the new Offering deadline is reached without the Company receiving the Minimum Amount, at which time it will be returned to you without interest or deduction, or the Company receives the Minimum Amount, at which time it will be released to the Company to be used as set forth herein. Upon or shortly after release of such funds to the Company, the Securities will be issued and distributed to you.

There is no present market for the Securities and we have arbitrarily set the price.

We have arbitrarily set the price of the Securities with reference to the general status of the securities market and other relevant factors. The Offering price for the Securities should not be considered an indication of the actual value of the Securities and is not based on our net worth or prior earnings. We cannot assure you that the Securities could be resold by you at the Offering price or at any other price.

The Securities will be effectively subordinate to any of our debt that is secured.

The Securities will be unsecured, unguaranteed obligations of the Company and will be effectively subordinated to any present or future secured debt obligations that we may incur in the future to the extent of the value of the assets securing that debt. The effect of this subordination is that if we are involved in a bankruptcy, liquidation, dissolution, reorganization or similar proceeding, or upon a default in payment on, or the acceleration of, any of our secured debt, if any, our assets that secure debt will be available to pay obligations on the Securities only after all debt under our secured debt, if any, has been paid in full from those assets. Holders of the Securities will participate in any remaining assets ratably with all of our other unsecured and unsubordinated creditors, including trade creditors. We may not have sufficient assets remaining to pay amounts due on any or all of the Securities then outstanding.

We are permitted to incur more debt, which may increase our risk of the inability to pay interest and principal on the Securities when it comes due.

We are not restricted from incurring additional secured or unsecured debt or other liabilities. If we incur additional debt or liabilities, your security may be subordinate to the payment of principal or interest on such other future debt and our ability to pay our obligations on the Securities could be adversely affected. We expect that we will from time to time incur additional debt and other liabilities. In addition, we are not restricted from paying dividends or issuing or repurchasing our equity interests.

The provisions of the Securities relating to a liquidation event or change of control transactions will not necessarily protect you.

The provisions in the Securities will not necessarily afford you protection in the event of a transaction that may adversely affect you, including a reorganization, restructuring, merger or other similar transaction involving us. These transactions may not involve a "liquidation event" or "change of control" which would trigger these protective provisions. Except in certain circumstances, the Securities will not permit the holders of the Securities to require us to repurchase the Securities in the event of a takeover, recapitalization or similar transaction.

We may not be able to repurchase all of the Securities upon a liquidation event or change of control repurchase event.

Upon the occurrence of events constituting a liquidation event or change of control, we will be required to offer to repurchase the Securities. We may not have sufficient funds to repurchase the Securities in cash at such time or have the ability to arrange necessary financing on acceptable terms. In addition, our ability to repurchase the Securities for cash may be limited by law or the terms of other agreements relating to our indebtedness outstanding at the time.

We may not be able to generate sufficient cash flow to meet our interest payment obligations on the Securities.

Our ability to generate sufficient cash flow from operations to make scheduled interest payments on the Securities will depend on our future financial performance, which will be affected by a

range of economic, competitive, and business factors, many of which are outside of our control. The Company will be in default if it is unable to pay interest or principal when due, which could force us to discontinue our business. If we do not generate sufficient cash flow from operations, we may have to undertake alternative financing plans, such as refinancing or restructuring our debt, selling assets, reducing or delaying capital investments, or seeking to raise additional capital. We cannot assure you that any refinancing would be possible, that any assets could be sold, or, if sold, of the timing of the sales and the amount of proceeds realized from those sales, or that additional financing could be obtained on acceptable terms, if at all, or would be permitted under the terms of the agreements governing our indebtedness then outstanding. Our inability to generate sufficient cash flow to satisfy our interest payments on the Securities would severely negatively impact your investment in the Securities.

You will not have a vote or influence on the management of the Company.

Substantially all decisions with respect to the management of the Company will be made exclusively by the officers, directors, managers or employees of the Company. You, as a Purchaser, will have a very limited ability to vote on issues of Company management and will not have the right or power to take part in the management of the Company and will not be represented on the board of directors or managers of the Company. Accordingly, no person should purchase a Security unless he or she is willing to entrust all aspects of management to the Company.

In addition to the risks listed above, businesses are often subject to risks not foreseen or fully appreciated by the management. It is not possible to foresee all risks that may affect us. Moreover, the Company cannot predict whether the Company will successfully effectuate the Company's current business plan. Each prospective Purchaser is encouraged to carefully analyze the risks and merits of an investment in the Securities and should take into consideration when making such analysis, among other, the Risk Factors discussed above.

THE SECURITIES OFFERED INVOLVE A HIGH DEGREE OF RISK AND MAY RESULT IN THE LOSS OF YOUR ENTIRE INVESTMENT. ANY PERSON CONSIDERING THE PURCHASE OF THESE SECURITIES SHOULD BE AWARE OF THESE AND OTHER FACTORS SET FORTH IN THIS FORM C AND SHOULD CONSULT WITH HIS OR HER LEGAL, TAX AND FINANCIAL ADVISORS PRIOR TO MAKING AN INVESTMENT IN THE SECURITIES. THE SECURITIES SHOULD ONLY BE PURCHASED BY PERSONS WHO CAN AFFORD TO LOSE ALL OF THEIR INVESTMENT.

BUSINESS

Description of the Business

Alpine Pacific, Inc is currently reaching the next growth stage and seeking:

- Add capacity within the current fleet
- Larger projects that offer advantages in economics of scale.
- Acquiring distressed assets that need TLC.

Business Plan

Alpine Pacific believes there is an opportunity to be involved with Hydro Electric power in the US by focusing on the following types of assets:

- Smaller dams: Dams under 1 MW in size.
- Neglected Dams: Many dams gained FERC Exemptions in the 1980's; operators are retiring.
- Complications: Other FERC Licensed dams are due for re-licensing, owners don't want complications.
- Operating plants: Higher yielding, new development exists; but operating projects provide immediate yield.
- Northeast US: Good infrastructure, higher electric rates, REC subsidies exist.

Alpine Pacific will generate revenues by increasing the operational efficiency of small hydroelectric generation facilities through specific management and maintenance activities:

Site Improvement: Often times, facilities have been neglected. Basic safety, aesthetics and cleanliness improvements can save on insurance costs. A scheduled maintenance program can help.

Automation: Updating the site with cameras, monitors and APP based programs allow site to be monitored real time, improving production and reducing labor costs.

Modification/Update: Upgrading older equipment, rebalancing a turbine or replacing a bearing with a new one can improve plant efficiency. Deferred maintenance is often a problem at older plants.

Negotiate Better Terms: Efforts to improve upon or extend PPA prices and power sale term as well as seeking out subsidies (RECs, grants, etc.) can make a profound impact on profitability.

Alpine currently owns, operates and manages 4 hydroelectric power projects and 11 water treatment facilities in the US.

Overview

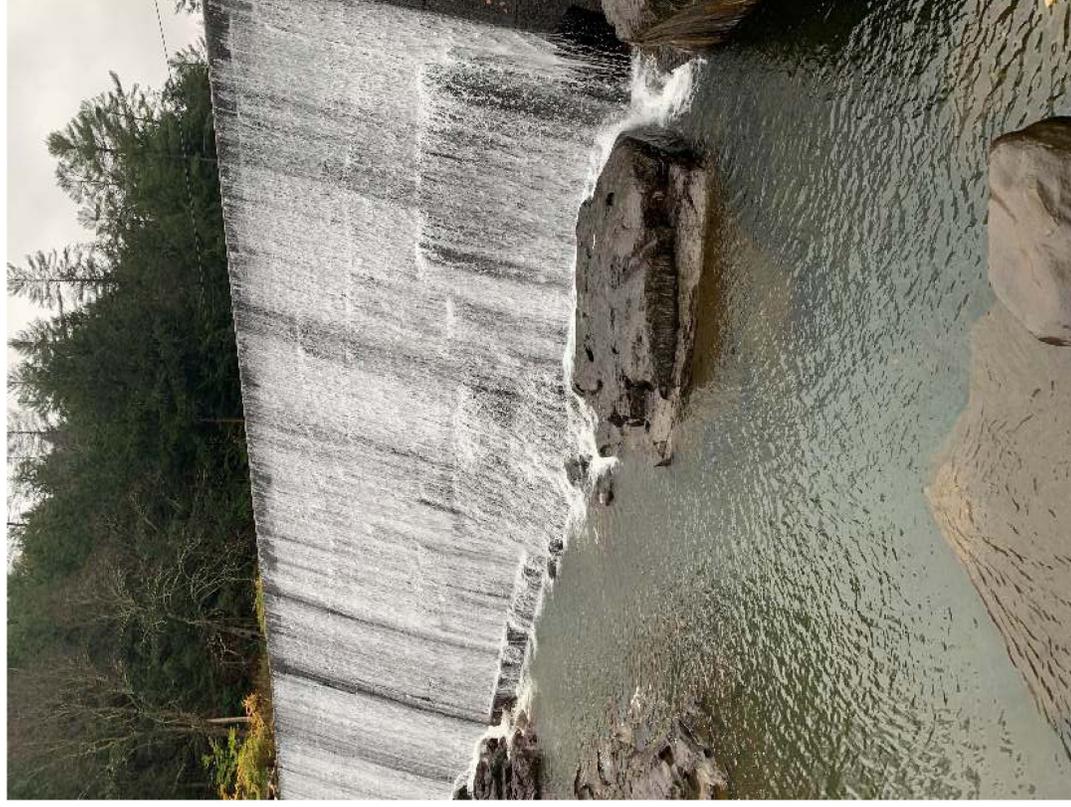

Alpine Pacific, Inc is an owner, operator and developer of small hydroelectric power and water treatment facilities in the United States.

Alpine currently owns, operates and manages 4 hydroelectric power projects and 11 water treatment facilities in the US.

Project Sizes

Project Size: \$1,900,000 (approx.)

Funding: \$1,500,000 equity

\$400,000 bank financing

\$200,000 crowdfunding

Structure: Corporation

Portfolio: US baes utilities
(water/sewer/hydroelectric)

Term: 10-years

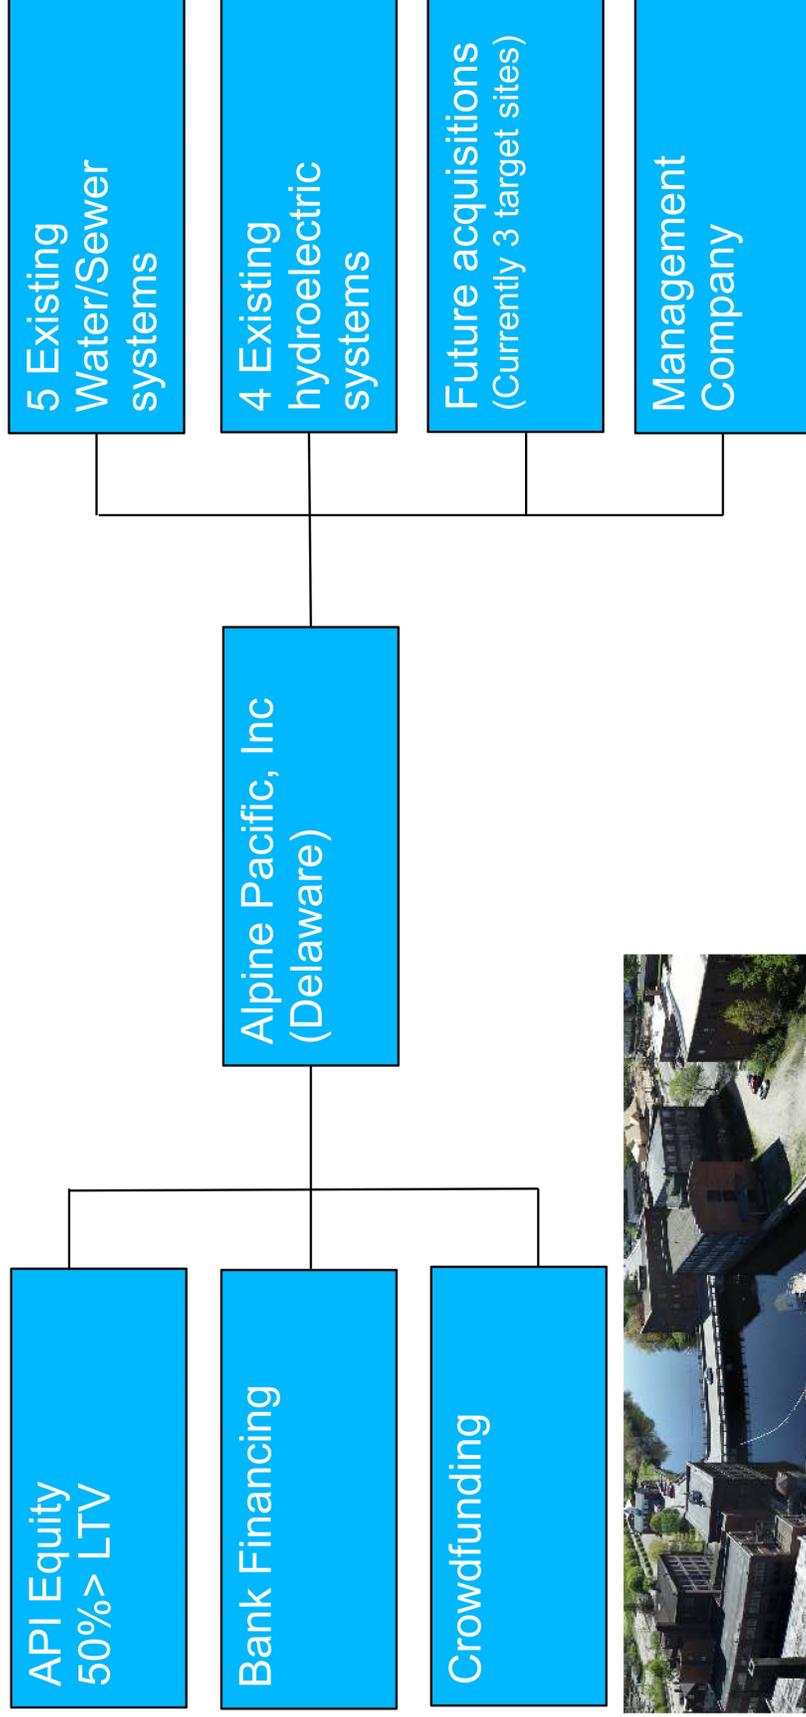

Target yield: 8% debt financing

Investment Period: Close January/February

Financing Structure

Alpine Pacific, Inc is currently reaching the next growth stage and seeking:

- Add capacity within the current fleet
- Larger projects that offer advantages in economics of scale.
- Acquiring distressed assets that need TLC.

Hydro – Why Now?

By being part of a hydro electric project, investors have access to:

1. Infrastructure exposure to renewable energy. Doing your part!
2. Diversification; exposure to an investment that is NOT correlated to global equity and fixed income markets.
3. Asset-backed investment; downside protected by the assets of the project.
4. Strong cash flowing project from an operating business. Annual return of capital and upside appreciation.
5. Inflation hedge; commodity prices are going up, so is price of electricity!
6. Low technology risk, hydroelectric production is well understood, predictable and durable.

Current Opportunity

There is an opportunity to be involved with Hydro Electric power in the US.

Where? How? Why?

- Smaller dams Dams under 1 MW in size. Big PE money = big projects.... Small gets overlooked!
- Neglected Dams Many dams gained FERC Exemptions in the 1980's; operators are retiring.
- Complications Other FERC Licensed dams are due for re-licensing, owners don't want complications.
- Operating plants Higher yielding, new development exists; but operating projects provide immediate yield.
- Northeast US Good infrastructure, higher electric rates, REC subsidies exist

Solid cash flows persist from **asset backed investments**. Returns are **uncorrelated to equity and debt** markets and can provide an inflation hedge. Hydroelectric generation presents **no technology risk** and typically has a well understood history of operation!

7.2 All votes of Members shall be in accordance with their then existing Percentage Interests of the Company. The act of a majority of the Percentage Interests present at a meeting at which a quorum is present shall be the act of the Members, unless the vote of a greater proportion or number is required by the Act, the Articles of Organization, or this Operating Agreement.

7.3 The following matters shall require the unanimous consent of all Members in the Company: (a) Dissolution and winding up of the Company; (b) The sale, exchange, or transfer of all or substantially all of the assets of the Company; (c) Amendment of this Agreement; (d) Disposal, conveyance, encumbrance, lease, or transfer of any tangible or intangible asset of the Company, outside the ordinary course of business; (e) Causing the Company to enter into any contract or other agreement that has a value of \$10,000 or greater; and (f) Any loan made by or to the Company with a value of \$5,000 or greater.

Such proxy shall be filed with the Company before or at the time of the meeting. No proxy shall be valid after three months from date of execution, unless otherwise provided in the proxy.

7.5 Unless otherwise provided by law, any action required to be taken at a meeting of the Members, or any other action which may be taken at a meeting of the Members, may be taken without a meeting if a consent in writing, setting forth the action so taken, shall be signed by all the Members entitled to vote with respect to the subject thereof.

8. Profits, Losses, and Distributions

8.1 Except as provided herein, net profits and losses of the Company shall be allocated to the Members in accordance with their Percentage Interests in the Company, and in accordance with the portion of the year during which the Members have held their respective interests. All items of income and loss shall be considered to have been earned ratably over the fiscal year of the Company, except that gains and losses arising from the disposition of assets shall be taken into account as of the date of disposition.

8.2 To the extent required by law, income, gain, loss and deduction attributable to property contributed to the Company by a Member shall be allocated among the Members in accordance with Section 704(c) of the Internal Revenue Code.

8.3 At such times and in such amounts as a majority of the Members, in their discretion, determine appropriate, Cash Available for Distribution shall be distributed to the Members in proportion to their Percentage Interest.

8.4 Notwithstanding anything in this section, if the Company has more than one Member, no Member shall be allocated net loss to the extent such allocation would cause a negative account balance in

such Member's Capital Account at the end of the taxable year to which such allocation relates. No Member shall have an obligation to restore a deficit Capital Account balance upon liquidation of the Company or liquidation of its Interest in the Company.

9. Accounting

9.1 The Company books shall be kept on the same method of accounting used for federal income tax purposes, and in accordance with reasonable accounting principles. The fiscal year of the Company shall end on December 31. Members shall be entitled to review the records of the Company at all reasonable times.

9.2 To the extent required by law, a Capital Account shall be maintained for each Member, and shall be credited with the amount of each Member's Capital Contribution to the Company. Each Member's Capital Account shall be maintained in accordance with Section 704(b) of the Internal Revenue Code and the accompanying Treasury Regulations.

9.3 Any books of account, records, data, and financial matters involving the company, Justin Ahmann shall be designated a partner.

9.4 Should there be any controversy with the IRS or any other taxing authority involving the company, Justin Ahmann shall be designated a tax matters partner.

10. Transfers of Interest

10.1 Except as otherwise provided herein, no Member may voluntarily or involuntarily, directly or indirectly, dissociate, sell, transfer, assign, pledge, or otherwise dispose of or mortgage or encumber any part of such Member's Interest in the Company without the unanimous consent of all Members of the Company. Any such transfer disposition or encumbrance shall be of no force or effect.

10.2 A Member may transfer a Membership Interest to another Member by gift, or to a trust for the benefit of the Member or any other Member. If any Interests have been transferred by gift to another Member or to a trust for the benefit of the Member or another Member, the Interest so transferred shall nonetheless continue to be subject to the restrictions on transfer established in this Section 10.

10.3 Any other transfer of any Membership Interest (including a new issue) may be made to any Prospective Transferee if the transfer and the purchase price are approved by a unanimous vote of the Members. If the Members do not unanimously approve a transfer to the Prospective Transferee, a Member wishing to transfer, assign, or otherwise sell such Member's Interest in the Company must first make a written offer to sell, transfer, or assign such Membership Interest to the Company (an "Offer").

10.4 An Offer to transfer shall consist of a statement attached to the Offer setting forth: (i) a statement of intention to transfer, (ii) the name and address of the person or entity who is to obtain the Membership Interest ("Prospective Transferee"), (iii) the Percentage Interest to be transferred (the "Offered Interest"), and (iv) the terms of the transfer, including the purchase price.

10.5 The Company shall have 30 days in which to elect to purchase the Offered Interest. If no election of the Company to purchase is made, the offering Member shall make a written Offer to transfer,

assign or sell his or her Offered Interest to the other Members. Each Member shall within 30 days thereafter be entitled to purchase a portion of the Offered Interest offered based on the ratio of the Membership Interest the Member then owns to the total Membership Interests owned by all the non-selling Members, except that if any Member does not purchase his portion of the Offered Interest offered, such portion shall then be available to the other Members on a proportional basis.

10.6 If all parties entitled to purchase refuse to exercise the option to purchase all of the Offered Interest, under this Agreement, the remaining Offered Interest of such selling Member may be sold, transferred, or assigned to the Prospective Transferee.

10.7 The following purchase events shall trigger options to purchase in the Company and the other Members as if the purchase event was an Offer under Section 10.4 of this Agreement, and the Purchase Price shall be determined according to Section 10.7:

10.7.1 Dissolution of Marriage. The disposition or proposed disposition of any Interest in a legal divorce or legal separation, by court decree or otherwise, other than a transfer from a spouse to a Member.

10.7.2 Bankruptcy. The filing of a petition for the voluntary or involuntary bankruptcy of a Member, unless the petition is dismissed within thirty days after the date of filing.

10.7.3 Foreclosure. A foreclosure or attempted foreclosure of any interest in the Membership Interest pledged by Member to any third party, or any attachment, garnishment, assignment, execution, seizure, or any other actual or attempted involuntary taking of the Interest by or for the benefit of creditors of a Member, including any tax authority.

10.7.4 Disability. The disability of any Member who is then an employee of the Company. For purposes of this Agreement, "disabled" means a physical or mental condition which prevents the Member from performing substantial and material duties required by his employment for a period of 6 consecutive months. If the Company and the other Members fail to exercise their option to purchase as set forth in this Section 10.7, then any remaining Membership Interest shall transfer to the spouse, trustee, guardian, conservator, or other successor of the Member.

10.8 If a written bona fide offer to purchase the Interest is approved unanimously by the Members, the price and terms of sale to the Prospective Transferee shall be those contained in such bona fide offer. For transfers pursuant to Section 10.3 and 10.5, the price and terms of the sale shall be the price and terms set forth in the attachment to the Offer. For transfers to the Company or the Members pursuant to Sections 10.7.1 through Section 10.7.4 and Section 10.12, the price shall be that value established by the Members for the year of the sale. The Members have established the 2017 value of the Company in Exhibit B. Each year thereafter, the Members will meet and agree to a value of the Company for the current year. If the Members fail to establish a value of the Company for the current year, the value of the Company shall be the value established in the preceding year plus ten percent.

10.8.1 For transfers pursuant to Section 10.7.4 and Section 10.12 the purchase price shall be calculated by multiplying the established value of the Company by the Percentage Interest being

transferred. For example, if the established value of the Company is \$1,000,000, and the transferred Interest is 49%, the value of the transferred Interest is \$490,000.

10.8.2 For transfers pursuant to 10.7.1, 10.7.2 and 10.7.3, the Purchase Price shall be calculated based on the established value of the Percentage Interest being transferred, taking into account discounts for lack of marketability and lack of control.

10.8.3 For transfers to the Company or the Members (other than as specified in Section 10.12, the purchaser shall pay at least an amount sufficient to constitute an aggregate 10% down payment. Any remaining balance of the purchase price may be paid in 120 equal monthly payments, beginning one month after the initial down payment, with interest at the annual Applicable Federal Mid-Term Rate, as specified in Section 7872 of the Code that is in effect on the Closing Date. The interest rate shall remain fixed for the full term of the payments even though the Applicable Federal Rate may subsequently change, provided however, that the interest rate shall in not exceed the maximum rate then permitted under applicable usury laws.

10.8.4 The obligation to pay the balance of the purchase price shall be represented by a promissory note completed to show the amount of principal owing, the date of the note, the amount of the monthly payment, and the interest rate, and the note shall be signed and delivered by the purchaser or purchasers at closing.

10.8.5 If part of the purchase price is to be paid in installments, the purchaser agrees to grant a security interest in the purchased Interest in favor of the Seller.

10.9 Upon the transfer of any interest in the Company in compliance with this Section 10, the rights of such Member to share in the net income and net loss of the Company, to receive distributions from the Company and to transfer pursuant to Section 10 shall devolve upon such transferee, as the case may be, subject to the terms and conditions of this Agreement. All the other rights possessed as a Member in connection with the transferred interest shall terminate unless the transferee is admitted to the Company as a Substitute Member pursuant to the provisions of Section

10.10. No other transfer of any Interest (including issue of new Interests) shall be effective, and the Company shall not record or recognize any such transfer, until there has been compliance with the provisions of this Agreement. 10.10 No transferee of a Member shall be admitted as a Member unless all of the following conditions have been satisfied: the transfer complies with this Section 10; the further written unanimous consent of the Members to such transferee being admitted as a Member is first obtained, which consent may be arbitrarily withheld; the prospective transferee has executed an instrument accepting and agreeing to be bound by all the terms and conditions of this Agreement; and all requirements of the Act regarding the admission of a transferee Member have been complied with by the transferee, the transferring Member and the Company; and

10.11 Upon any event that terminates the continued membership of the last remaining Member, the personal or other legal representative of the last remaining Member may agree in writing to continue the Company, and may agree to the admission of the personal or other legal representative of such Member to the Company as a Member, effective as of the occurrence of the event that terminated the continued membership of the last remaining Member.

10.12 Each Member shall apply for and be the owner of life insurance on the life of the other Member. Each Member agrees to pay all premiums as they become due and if so requested to give proof of payment to the insured. In the event the premium is not paid within 10 days after its due date, the insured may make the payment, which shall be considered a loan from the policy owner. No Member may execute any loans against, impair, or in any manner encumber any of the policies without the written consent of the other Member.

10.13 Upon the death of a Member, the other Member must purchase all the Member's Interest, and the decedent Member's estate must sell that Interest at the price specified in Section 10.8.1 of this Agreement.

10.14 If the purchase price for the Interest is less than or equal to the amount of the proceeds received by the remaining Member from the insurance on the life of the deceased Member, any excess of the proceeds over the purchase price shall be retained by the surviving Member.

10.15 If the purchase price for the Interest of the deceased Member exceeds the amount of the insurance proceeds, an amount equal to the proceeds of the insurance on the life of the deceased Member must be paid in cash on the date of the purchase of the Interest, and the balance of the purchase price must be paid in accordance with Section 10.8.3.

11. Dissolution

11.1 The Company may be dissolved, and the affairs of the Company shall be wound up upon the happening of one of the following events: the dissolution and winding up is approved by a unanimous vote of the Members; entry of a judicial decree of dissolution, operation of state law; or failure to agree to continue the Company as provided in Section 10.11.

11.2 Prior to making distributions in dissolution to the Members, the Member shall first pay or make provision for all of the debts and liabilities of the Company, including payment of any loans or other debts to Members and their affiliates, and all expenses of liquidation. The Company, at its discretion, may distribute the water rights owned by the Company to another entity. Subject to the right of the Members to set up cash reserves as they deem reasonably necessary for any contingent or unforeseen liabilities or obligations of the Company, the proceeds of liquidation and any other funds of the Company shall be distributed in the following order of priority:

11.2.1 First, to Members in proportion to their Capital Account balances.

11.2.2 Thereafter, the balance, if any, to the Members in proportion to their Percentage Interests.

12. Other Provisions

12.1 This Agreement and all questions arising under it shall be determined in accordance with the laws of the state of Delaware. In the event that the Company transacts business in another jurisdiction, the Company shall register in such other jurisdictions as a foreign Incorporation Company authorized to transact business in such jurisdiction.

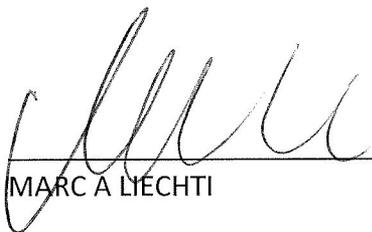

12.2 This Agreement may be altered, amended, restated, or repealed and a new Agreement may be adopted only by the unanimous action of all the Members.

12.3 This Agreement shall bind and extend to the heirs, representatives, successors, and assigns of the parties hereto, including their creditors.

12.4 Any notice required by the terms of this Agreement shall be sufficient if served by mail, addressed to either party at their last known address, and the date of mailing such notice shall be considered as the date of service of such notice.

12.5 Any dispute arising out of this Agreement shall be submitted to mediation prior to any arbitration or other legal action, with the costs of such mediation shared equally by the parties. 12.6 The effective date of this Agreement shall be the date that this Agreement is fully executed by the undersigned Members.
