SUMMARY

PROBLEM Increasingly uncertain and extreme weather events due to climate change cost the industry and government billions of dollars each year.

SOLUTION Faster, higher resolution, custom weather analytics and forecasting to more accurately predict and prepare for extreme weather phenomena.

PRODUCT A NanoSat constellation that takes 3D wind measurements to reliably provide the most accurate weather and early hurricane forecasts.

TRACTION \$108 Million Invested by NASA and DoD over a 10-year span., Winner of NASA's 2018 Innovation in Earth Science and Remote Sensing Award., Our work onboard the ISS is frequently featured in stories and technical write ups by NASA.

CUSTOMERS DTN, IBM, NOAA

BUSINESS MODEL Subscription/recurring payment

MARKET Approx. Market Size: \$2.7B

COMPETITION TWA is the first company to routinely 3D map clouds and winds globally; currently, there are no competing offerings in the marketplace.

TEAM Chief Scientists from MIT, the Air Force Geophysics Lab & Times' "Most 100 Influential People" list; COO with \$300M+ in revenue generation & 2 exits.

VISION To save lives, reduce climate event damages by billions, and build a better world through more accurate weather forecasts.

USE OF FUNDS Build, launch and operate 2 NanoSats that will enable product delivery to customers.
