Alyssa Hussong

Lead Environment Artist at Objective Reality Games
Jarrell

Summary

I maintain a good understanding of video game development and content creation including, but not limited to, modeling, blocking out/white boxing, collisions, particle effects, UV mapping techniques, texture painting, map baking, animation, blueprinting, material setup/UV layout, conceptual designs, development pipelines, technical parameters, and production goals.

I encourage you to view my professional portfolio of highly detailed 3D art with a focus on environments and variety of subject matter (buildings, props, natural landscapes/foilage, etc.) that demonstrates high-quality realistic modeling and texturing as well as a keen eye for spatial composition, lighting and building believable scenes. It can be accessed at www.alyssahussong.weebly.com.
