See our TESTIMONIALS:

“...The composting process could not be simpler, almost everything in the kitchen can go in the bin. Other compost companies limit the types of organic material that can go in the bin, but not Break It Down! Bones, some oil, coffee grounds, citrus, you name it. This was a big deciding factor in choosing a compost company...” - V.C., Atlassian

“...With their support, we have reduced our landfill waste to a minimal amount as we recycle and compost most everything in the building. They have helped us to solidify our ethical mission statement to reduce trash and continue to find ways to not only help the environment but the community as well.” – J.J., Odd Duck

“...the entire team provides value to a part of our industry that often gets ignored. Food waste is part of a restaurant's responsibility, and Break it Down helps round out the goal of utilizing each product to the fullest.” – R.L., La Condesa

We make it easy for businesses to divert the waste they create away from landfills. If you would like to discuss how we can help you set up a recycling and/or composting program message me via LinkedIn or email me at melanie@breakitdownaustin.com.
