REGCF - RAISE TYPE

\$100 - MINIMUM INVESTMENT

SAFE - INVESTMENT TYPE

USDC-AVAX - CURRENCY

General Investment Information

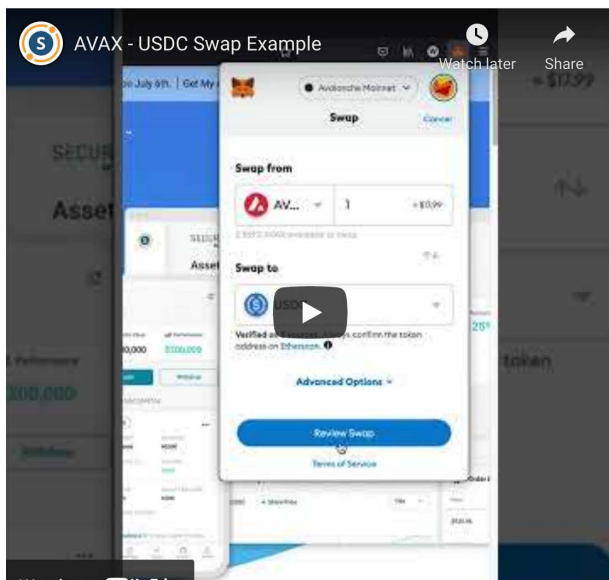

Investment opportunity to own a piece of a leading global oracle for all security token financial data and research.

How Are You Funding

Invest directly from your crypto wallet using USDC (AVAX) and instantly receive your tokens in your wallet via Avalanche!*

- USDC on AVAX will be transferred as part of a SAFE agreement in a blockchain transaction
- A small amount of AVAX will be required to fund the transaction
- A simple way to get USDC in your AVAX wallet is to use the 'Swap' feature to exchange AVAX for USDC. See the video below for an example. Make sure to swap for USDC and not USDC.E or another stablecoin.

Investment

USDC

100

This is an estimate of the units you will receive subject to funds arriving during the current investment phase and the exchange rate applied to the funds.

Minimum amount USDC100.00

Offering Details

Each token will be valued at \$5 USD with a minimum \$100 investment. STM tokens represent ownership in a Crowd SAFE Note.

Welcome to STM

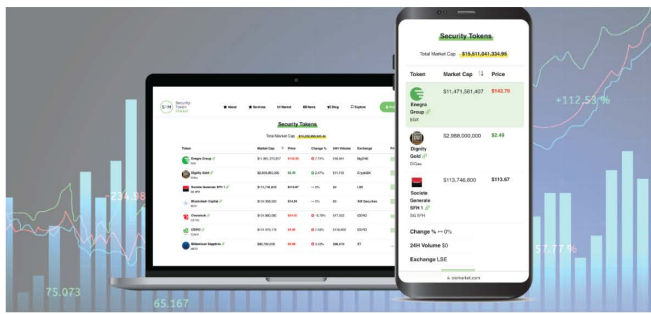

Further Investment Information

By establishing itself as a unique presence from the beginning, STM is positioned as a trusted voice in the security token industry. STM is a leading global source of data and news on tokenized assets, tracking over 200 tokenized securities from 10 different live marketplaces worldwide via API-integration.

Security Token Market aims to supply investors with a state-of-the-art terminal, containing centrally-located research, trading tools, and news. We hope to provide transparency and access to previously-illiquid assets and exposure to global capital markets. In addition to its tech platform, Security Token Market's media presence is growing considerably, utilizing a micro influencer distribution strategy to broadcast high quality industry content to all demographics of varying levels of industry expertise.

The industry has already surpassed a \$10B market cap in its secondary market, with an estimated \$50B in the primary market pipeline. With tokenization affecting most (if not all) assets around the world, it's projected to reach over \$4 Trillion by 2030, and Security Token Market is at the forefront of it all.

With STM Security Token Market

☰ Why Security Token Market

Team

Presence

Security Token Market has built technical infrastructure and hired an experienced team to drive the industry forward by setting the ideological standards demanded by traditional financial markets. The STM team consists of talented individuals whose backgrounds make each of them a value-add.

Dedication to consistency in quality and diligent research has resulted in over 250k unique users on STOMarket.com from 217 countries and territories, providing access to over 200 tokenized securities from markets around the world. STM's reach is further emphasized through its millions of social media impressions each year.

Content

STM has also produced 1000s of hours of audio/video content via the Security Token Show and other media properties, building a listener base of over 35k lifetime listeners and 2,700+ weekly What's Drippin' Newsletter subscribers. The passion-driven content strategy has expanded to 5 additional segments, complemented by monthly research, reports, and guest articles.

Thought Leadership

In addition, STM's analyst team releases trading analyses, market snapshots, and case studies that educate both the public and industry leaders on the available investment opportunities and market health. Security Token Market's value proposition consists of both data aggregation and its team's ability to interpret it.

Data

Security Token Market provides price transparency and data integrity via API integration with marketplaces around the world. We share this to a global audience of security token investors, enthusiasts, and interested parties, so everyone can feel confident in their research and investment decisions. We track over 500 primary and secondary market deals from varied asset classes around the globe.

Social Media

Security Token Market is also an industry influencer via its various social media channels. The STM Twitter and LinkedIn channels (@stomarket) are trusted sources in the security token industry. This commitment to public branding results in hundreds of thousands of recurring impressions per month, and over 5 million total in the past 12 months, across its published content, thought leadership, collaborative efforts, memes, and more.

Risks and Disclosures

Private market investments are speculative and considered risky, including potential loss of your investment, and may not be appropriate for every shareholder. Private

investments are generally an illiquid asset class; shareholders cannot sell their funds when they want to without potentially facing high losses. Any discussion of liquidity is purely speculative. Past performance is not indicative of future results.

Crowdfunded securities are generally offered by early stage companies and investors should be prepared to lose some or all of their investment. Investors should read all of the risks and disclosures prior to making any investment decisions.

Before registering at the Securitize Markets Platform and making an investment decision, Securitize Markets strongly recommends that all investors review the risks of investing in crowdfunded securities offerings and decide whether this investment suits them. No SEC evaluation is involved in Regulation Crowdfunding offerings. Your investment decision should be based totally on your own due diligence and assessment. Prospective investors acknowledge and agree they could lose some or all of their investment when determining a suitable investment for funding on Securitize Markets Platform and given the risks related to such decisions, which consist of losing their investment. Investors need to be able to afford to lose the entire amount they funded. Potential investors agree and acknowledge that they are responsible for conducting their research, accounting, and due diligence on the offerings posted on the Securitize Markets Platform. Neither Securitize Markets nor any of its officials, directors, personnel, marketers, associates, or representatives makes any assurance, specific or implied, of any type in any way related to the adequacy, accuracy, or completeness of any data on the Securitize Markets Platform or the usage of facts therein. Investors should conduct and may rely only upon any research, accounting, or due diligence review they determine to be appropriate. Investments aren't FDIC insured, can also lose cost, and aren't assured. As an investor, you are strongly advised to consult legal, tax, investment, accounting, or other professionals before investing, and to carefully review all of the specific risk disclosures provided as part of any offering materials and post any questions in the Issuer's comment section of their campaign page before making any investment decisions. Investments in companies on Securitize Market's platform involve a high degree of risk, regardless of any assurance company management provides. Every prospective investor should be aware of the risks involved.
