Highlights

- 1 Legendary VC Tim Draper invested the first \$500K in Team Wildfire!
- 2 The U.S. spent \$4.4 Billion on wildfire suppression last year.
- 3 3 Patents Pending for innovative jet engine fire suppression technologies
- 4 Our solution is designed to suppress more fire per dollar than current methods.

- 5 Our StormCell prototype delivers a “mobile safety zone” for firefighters.
- 6 We're building partnerships with AI/Robotics, eco-friendly fire retardant, and other key companies.
- 7 Global Market: More countries than ever are desperate for powerful wildfire solutions.
- 8 Amazing TV coverage on TMZ -Teamwildfire.tv/TMZ

Our Team

Steve Wolf Founder & CEO

Problem-solving Engineer, Stunt & FX Coordinator, TV Producer, Author, Keynote Speaker, STEM Presenter of the Year. If it's impossible, count me in..

Communities worldwide are threatened by wildfire, and there's currently not a powerful technology to protect them. Firefighters are dying horrible and unnecessary deaths, because we're sending men to do a robot's job. Wildfires also release tons of CO2 and toxic smoke. We want to help stop the pollution and the loss of lives.

Andrew Amalfitano President & COO

Experienced senior manager with 30+ years of corporate and start-up leadership, wildland fire, search and rescue leader. Evangelist for the science of learning. Chief at Boulder Emergency Services.

Dan Eamon Government Relations

Experienced leader with a proven track record of building successful programs. Hired as the City's first emergency manager, I built a program capable of responding to the historic 2013 floods with no serious injuries or deaths.

Alanna Reed Marketing & Public Relations

10+ years of experience leading marketing, digital communication, community engagement, and strategic planning. Ran Emergency Comms for the City of Houston, now runs Emergency Communications for the City of San Antonio.

David Levitt VP of Product

NASA JPL Engineer

Tim Krebs Fraction CFO

Tim has helped launched over 50 startups, giving them well thought out financial projections.

Bringing the fight to the fire

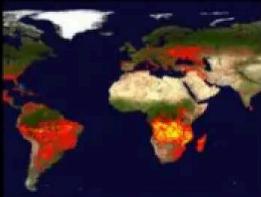

PROBLEM

Virtually every country is struggling to bring wildfires under control.

The UN predicts a 30% increase in wildfire devastation by 2050.

There's a desperate need for better technology and tactics.

Our planet's worst fires are being fought with technology that's not working

1750 BC 1904 1939

1903 1839 6000 BC

“We need a strong wind at our backs and heavy rains... We need a hurricane...”

4

We developed a firefighting “Hurricane on Wheels”

Jet engines + Mist injection chamber + All terrain platform = Hurricane on Wheels

Multiple patent pending system delivers Hurricane force winds, water, and suppressant. All weather, all terrain, 24/7 functionality. Real-time data to fire teams.

METHODS AND SYSTEMS FOR EXTINGUISHING FIRES
Application No: 63/185,463

5

MARKET SIZE

Wildfire response is a rocketing market, now at 11 \$Billion in the US, over \$70B internationally.

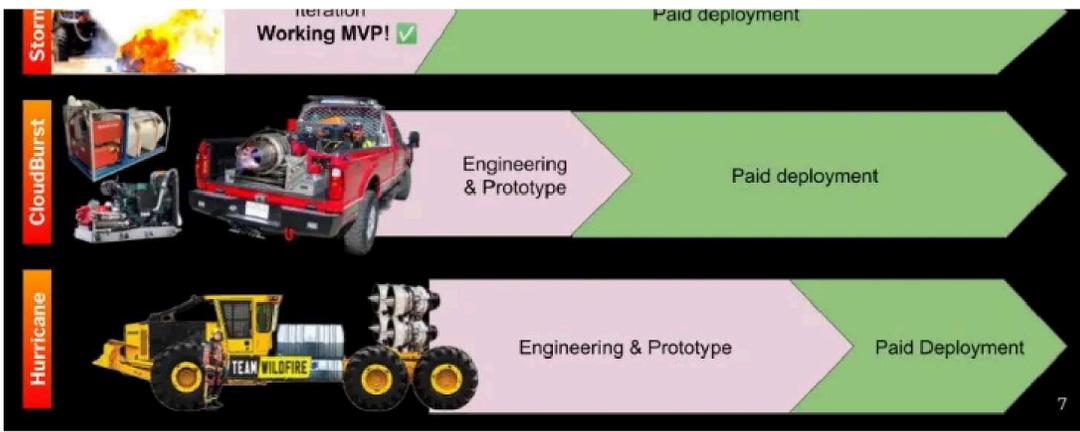

When wildfires erupt, the budget is “whatever it takes.”

Business Model

Team Wildfire is a **service-based** business, offering **Subscription and On-Demand** "Suppression as a Service" to fire agencies.

- Fire Suppression
- Evacuation Route Hardening
- Fire Prediction & Fire Management Software
- Reforestation

8

You can help stop this

Word on the street:

"If we don't get this tech fast, we'll have no chance against the kind of fires we're seeing."

**Greg Schwab, Chief
Boulder Rural Fire**

Word from the street:

"This is a crazy solution to a crazy problem. We need this."

**Tim Draper
1st Investor**
