Joe Cimino, Head Cultivator

Joe has fifteen years of experience growing both indoor and outdoor cannabis in both East Coast and West Coast environments. Joe is responsible for the entire cultivation process including: selection of strains and breeds based on in-depth knowledge of both plant genetics and consumer demands; start-to-finish grow cycles using state of the art sensors to closely monitor water, nutrient, PH, and humidity levels; meeting and adhering to all state guidelines on product testing for THC and CBD levels as well as pesticides, molds, metals, and other contaminants; achieving superior overall yield and quality consistent with the best indoor cannabis in today's market. Joe is a graduate of Boston University.

Our Technology

Good Greens utilizes the Aroya cannabis production platform which combines innovative hardware and software to allow for higher yields, consistent quality, and streamlined operations.

- **Rootzone Substrate Sensors:** Designed to collect highly accurate moisture, temperature and electrical conductivity (EC) readings from the growing medium, in our case, Grodan rockwool cubes.
- **Climate Stations:** Placed throughout the grow rooms to reliably and precisely monitor air temperature, relative humidity, barometric and vapor pressure.
- **Day Light Integral Sensors:** Allow for the accurate measurement of photosynthetically active radiation (PAR or PPF) from our LED grow lights.
- **In-Pipe EC Sensors:** Sensors in water tanks and irrigation pipes measure electrical conductivity which allows for the understanding of nutrient concentration. Paired with the substrate sensors, we are able to have a real time snapshot into the salt and nutrient levels across all spectrums of the plant growth cycle.
- **Moisture Content Analyzer:** State of the art technology utilizing chilled mirror dew point and capacitive hygrometer sensors to precisely measure water activity and moisture content of harvested flower throughout the drying process.

Our Story

Good Greens has been thoughtfully cultivating premium indoor cannabis in the California legal market since 2020. By leveraging over fifteen years of cultivation experience, utilizing the newest and most advanced growing and monitoring technologies, and partnering with best-in-class breeders, Good Greens seeks to bring its premium indoor cannabis flower and related product lines to the Massachusetts market.

Our Mission

(L) Price of the Securities

The Company is offering "securities" in the form of revenue sharing notes, which we refer to as "Notes." The Notes are being offered at their face amount. For example, you will pay \$1,000 for a Note with a face amount of \$1,000.

(M) Terms of the Securities

Overview

The Company is offering “securities” in the form of revenue sharing notes, which we refer to as the “Notes.” The Terms of the Notes are set forth in the Revenue Share Agreement accompanying this Form C in Appendix A. Copies of the Note and Revenue Sharing Agreement are attached to this Form C.

Summary of Terms

Revenue Percentage ¹	1.0 - 2.5% ²
Payment Deadline	2026-12-31
Maximum Payment Multiple ³ - Early Investors - All Other Investors	1.8 x 1.6 x
Sharing Start Date	The first day after disbursement that the company has revenues greater than one (\$1) dollar
First Payment Date	The last day of the calendar month ending not more than thirty days after the end of the first calendar year after the Sharing Start Date
Seniority	Subordinated
Securitization	Unsecured
Accrual Rate	4.21%

¹ as defined in the note agreement included in Appendix A

² The rate of revenue sharing is calculated on a linear scale with a minimum rate of 1.0% and a maximum rate of 2.5% and is rounded to the nearest 1/10th percent. The final rate is based on the amount raised and is calculated after the offering has successfully closed. As the amount raised in the offering increases, the rate of revenue sharing increases. For example, a hypothetical offering could result in the following revenue sharing percentages, depending on the amount raised:

Amount Raised	Revenue Sharing Percentage
\$200,000	1.0%
\$275,000	1.4%
\$350,000	1.8%
\$425,000	2.1%
\$500,000	2.5%

³ To reward early participation, the investors who contribute the first \$50,000.0 raised in the offering will receive a 1.8x cap. Investors who contribute after \$50,000.0 has been raised in the offering will receive a 1.6x cap.

Your Right to Payments under the Note

Your right to payments under the Note is set forth in the Note, together with a separate document called the Revenue Sharing Agreement. Copies of the Note and Revenue Sharing Agreement are attached to this Form C. Additionally, general terms are outlined below and in the Company's offering page.

Obligation to Contribute Capital

Once you pay for your Note, you will have no obligation to contribute more money to the Company, and you will not be personally obligated for any debts of the Company. However, under some circumstances you could be required by law to return some or all of a distribution you receive from the Company.

No Right to Transfer

You should plan to hold the Notes until maturity. The Notes will be illiquid (meaning you might not be able to sell them) for at least four reasons:

- The Revenue Sharing Agreement prohibits the sale or other transfer of Notes without the Company's consent.
- If you want to sell your Note the Company will have the first right of refusal to buy it, which could make it harder to find a buyer.
- Even if a sale were permitted, there is no ready market for Notes, as there would be for a publicly-traded stock.
- By law, for a period of one year you won't be allowed to transfer the Investor Shares except (i) to the Company itself, (ii) to an "accredited" investor, (iii) to a family or trust, or (iii) in a public offering of the Company's shares.

Security

The Notes are not secured by any assets of the Company or any assets of persons associated with the Company.

Modification of Terms of Notes

The terms of the Notes and the Revenue Sharing Agreement may be modified or amended with the consent of Investors holding 50% of the Notes, measured by the total amount outstanding under each Note.

Dilution of Rights

The Company has the right to create additional classes of securities, both equity securities and debt securities (e.g., other classes of promissory notes). Some of these additional classes of

securities could have rights that are superior to those of the Notes. For example, the Company could issue promissory notes that are secured by specific property of the Company.

The People Who Control the Company

Each of these people owns 20% or more of the total voting power of the Company:

Name of Holder	% of Voting Power (Prior to Offering)
Michael Cimino	37%

How the Exercise of Voting Rights Could Affect You

You will receive payments with respect to your Note only if the Company makes enough money to pay you, or, if the Company does not make enough money to pay you, if there is enough value in the collateral the Company pledged as security for the Notes.

The people with voting rights control the Company and make all the decisions about running its business. If they make good business decisions, it is more likely you will be paid. If they make poor business decisions, it is less likely you will be paid. For example, if they hire too many people and/or try to expand too quickly, the business could be harmed. The people with voting rights could also decide to file for bankruptcy protection, making it more difficult for you to be paid.

How the Notes are Being Valued

The Notes are being valued at their face value. We don't anticipate that we'll ever need to place a value on the Notes in the future.
