

Dear \_\_\_\_\_

Happy New Year!

Thank you for showing your interest in Circle Optics! I see that you started to make a reservation in Wefunder, and I wanted to give you an update and share more about our campaign.

We have finalized perks and terms for the round. Here are the perks below for various funding levels:

So far we have raised over \$150,000 allowing us to hire a full-time engineer as well as unlocking additional funding from the National Science Foundation.

Achieving our campaign goal will allow us to do the following:

- \* design and deploy the commercialization roadmap for our camera system that goes beyond detect and avoid to detect and navigate for UAVs
- \* hiring additional full-time engineers
- \* hiring full-time sales support

For easy reference:

***We would love you to join us and part of the Circle Optics growth story!  
Please confirm your investment.***

Please let me know if I can answer any questions or support your participation in any way!

Thank you,

Jennifer
