**We are excited to tell you that Qnetic is now live on Wefunder!**

It means we are one step closer to enabling sustainable civilisation on earth. To support the mission to transition to clean sustainable energy—which is more urgent and vital than ever—please visit Wefunder and take a look.

**This is *equity crowdfunding***

We are very happy to be using Wefunder because it is a democratic and open way to raise funds. Ordinary people like you and I can invest even small amounts in serious startups, which is normally the privilege Venture Capitalists.

Qnetic is raising funds in the most democratic and open way possible: through equity crowdfunding on Wefunder. Please have a look and consider supporting the mission <http://wefunder.com/qnetic> [#energystorage](#) [#crowdfunding](#)

"We are 'testing the waters' to gauge investor interest in an offering under Regulation Crowdfunding. No money or other consideration is being solicited. If sent, it will not be accepted. No offer to buy securities will be accepted. No part of the purchase price will be received until a Form C is filed and only through Wefunder's platform. Any indication of interest involves no obligation or commitment of any kind."
