Notes to the financial statements

December 31, 2021 and 2020

1. Nature of Business

Beyond Imagination, Inc (the “Company”), was organized under the laws of the State of Delaware on October 2, 2017. The Company is engaged in the development of the following technological projects:

- Beomni Robotics AI Platform which consists of three elements: 1) a general purpose humanoid robot that can be controlled by a human remotely via (2) our cloud platform and VR computer system, over time the data gained from use by the human to perform tasks trains (3) our Omni-Purpose AI Brain so that it can learn how to do the tasks autonomously. The ecosystem created will enable limitless applications, limited only by the imagination.
- Reach App is a platform and mobile app to enable a user to place digital objects in any space, and then depending on the viewer’s relationship to the user placing the digital objects, the viewer can see and even manipulate these objects. Neither the viewer nor the user need to physically be in the space the object has been placed if either user is connected via their phone to another phone that has its camera focused on an area. In this case, the viewer can digitally reach through the phone and place objects and move them about and both parties can see the object. The approach is to take augmented reality to next step, creating a social network that involves objects locked to geo locations that can be either public viewable based on their interests or the groups you align with or the friends in the platform that the user is connected to.

2. Summary of Significant Accounting Policies

a. *Basis of Accounting*

The Company uses the accrual basis of accounting, and their accounting period is the 12-month period ending December 31 of each year.

b. *Accounting Standards Codification*

The Financial Accounting Standards Board (“FASB”) has issued the FASB Accounting Standards Codification (“ASC”) that became the single official source of authoritative U.S. generally accepted accounting principles (“GAAP”), other than guidance issued by the Securities and Exchange Commission (SEC), superseding existing FASB, American Institute of Certified Public Accountants, emerging Issues Task Force and related literature. All other literature is not considered authoritative. The ASC does not change GAAP; it introduces a new structure that is organized in an accessible online research system.

c. *Use of Estimates*

Management of the Company has made a number of estimates and assumptions relating to the reporting of assets, liabilities, revenue and expenses, and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with GAAP. Significant items subject to such estimates and assumptions include the carrying amount of property and equipment; valuation allowances for receivables, and estimated recoverability of intangible assets. Actual results could differ from those estimates.
