Michael Arens

CEO @ Clean Earth Rovers: The first autonomous marine debris collection & water quality data system made in America | TedX speaker | Entrepreneur | content creator @ Invisible Oceans Project
Costa Mesa, California, United States

Summary

Hello! My name is Michael Arens I am an alumni from Xavier University. I am also the Founder of Clean Earth Rovers, a startup that focuses on developing technologies that clean fragile marine ecosystems of plastic pollutants.

I started Clean Earth Rovers in 2019 after two years of work and development on The Plastics Piranha. Taking this step has helped me to pursue my dreams of building a cleaner, more sustainable, tomorrow for myself and for generations to come. Ocean Plastic is one of the biggest issues we face as a society and we are here to create solutions that solve the problem.

At Clean Earth Rovers, we believe that using sustainable and autonomous technology will be the key to fighting the ocean plastic crisis. Making the means of collection more efficient and effective only helps us reach our goal of building a circular economy around sustainable and recycled packaging.

Being a student and an entrepreneur I am always willing to have a conversation to learn something new and talk about my vision with Clean Earth Rovers. Please feel free to connect and take time to look at www.cleanearthrovers.com

Experience

Clean Earth Rovers

Founder, CEO

March 2019 - Present (4 years 2 months)

Cintrifuse

Sustainable development lead, Entrepreneurs Change the World
