Ivan Ramon Chicchon

CEO at Implant Club/ EdTech/AR & Ai Applications for Surgeons
Stockton, California, United States

Summary

I started an EdTech business called Implant Ninja in 2017. It is an online education platform for dental surgery. Since its creation, it has helped thousands of doctors worldwide to learn new clinical procedures. It has now become an industry-recognized brand in dentistry.

Based on demand from our students at Implant Ninja, we founded our own implant brand, called Implant Club in 2020. Implant Club opened to early users in December 2021. We are currently fundraising to go to market with Implant Club.

Check out the book we just released. It recounts the story of how I faced \$800,000 in student debt and lived to tell the tale.

Experience

Implant Club

Founder

March 2020 - Present (3 years 7 months)

Stockton, California

I have had the unique opportunity to create our own implant brand. Due to our strong market positioning and crafting an offer that is desperately needed in our industry, we have experienced a high demand for our implants. We currently have a loyal fanbase waiting to use our system.

Implant Ninja

Founder & CEO

March 2016 - Present (7 years 7 months)

Stockton, California Area

I started this online education company after I graduated from my residency. Now it is the leading platform for implant education and grosses \$1.7MM+ per year from a loyal fanbase of repeat customers.

I lead a hybrid team of in-person and remote team of 15 members in other parts of the world.

With over 5,000 students around the world, Implant Ninja is a household name among young dentists. Through a combination of online and physical learning tools, Implant Ninja teaches a wide range of subjects to a highly engaged community.

In this experience I built a streamlined system for creating and fine tuning industry leading educational material that can be mass distributed to students around the world. In a short time, our work has helped thousands of doctors in a scalable manner.

Implant Ninja Dental Center

Prosthodontist

June 2016 - January 2020 (3 years 8 months)

Stockton, California Area

I provide start-to-finish dental implant procedures for patients. The surgery and prosthetics are completed under one roof. My work is focused on All-on-Four dental implants, full mouth rehabilitation, and complex dental rehabilitation. We use a Cone Beam CT, 3D Printer, and Scanner to help deliver the best outcome possible.

Millennium Dental

Practice Limited to Cosmetic and Implant Dentistry

September 2014 - June 2016 (1 year 10 months)

Perform surgical and restorative treatments for complex dental rehabilitation. My work includes: veneers, extensive crown & bridge, dental implants, implant dentures such as All-on-Four or zirconium implant bridges.

Huron Dental

Practice Limited to Implant Surgery

March 2014 - September 2015 (1 year 7 months)

Ann Arbor, Michigan

Surgical dental implant procedures only (including bone grafting). The owner (prosthodontist) would fabricate the final prosthetics.
