## Experience

IronCircles

Cofounder

March 2022 - Present (1 year 7 months)

Portland, OR

IronCircles is a decentralized platform that generates private social networks. Each network is secured with Forward Secrecy encryption, has a ton of configurable privacy options, and is invitation only.

I spend the majority of my time coding, but it's a startup, so really a little of everything.

Clinicient

VP of Engineering and IT

June 2014 - February 2022 (7 years 9 months)

Portland, Oregon Area

Helping a healthcare SaaS scaleup take their organization and platform to the next level.

Currently responsible for:

Technology Strategy and Execution

Software Engineering and Quality Assurance

Technical Operations

Information Security

IBM

CIO of Seterus

April 2010 - June 2014 (4 years 3 months)

Beaverton, OR

Chief Information Officer for Seterus, a wholly owned subsidiary of IBM specializing in mortgage servicing of delinquent loans.

Responsible for strategy, architecture, information security, technology governance, business intelligence, software development/support, quality assurance, and technology operations.

Strong focus on automation, cost reduction and compliance.

Merrill Lynch

Director of Servicing Technology

November 2004 - April 2010 (5 years 6 months)

Technology Leader for a global software development team consisting of architects, developers, database administrators, and lights on support staff.

Responsible for annual technology budget, individual project budgets and schedules, architecture, design, development, and the overall quality of the end deliverable.

Trillium Software, Inc.

Chief Technical Officer

June 1998 - November 2004 (6 years 6 months)

Chief Technology Officer responsible for strategy, architecture, software development, quality assurance, and infrastructure. Also worked closely with the sales/marketing teams to develop and drive product strategy.
