## Competition

Top Bins would compete for attention in the sports and recreation space.

While there may be little if any direct competition, Top Bins would need to compete with other activities for parents and adults time attention and resources.

In order to do this Top Bins would rely heavily on its unique experience - providing not only an insight into global soccer culture but an exciting and competitive arcade environment utilizing technology to improve health and skills.

The beauty of Top Bins is we see ourselves as a value add service to the entire soccer competition and not a competitor to any of them. If you are a travel program come and put your teams through the equipment and analyze their data - it is good enough for FC Barcelona.... If you are a rec team come and get some extra practice in or just keep playing in those cold winter months.

Chris Woods is a seasoned talent manager and attorney with a wealth of experience from over two decades working in the entertainment industry on both sides of the Atlantic.

He has an LLB Law Degree with Honors from Brunel University London and a post graduate diploma in legal practice from the College of Law, London. He has been admitted to the Roll of

Solicitors for England & Wales since 2004 and the New York State Bar since 2005.

He has always had a passion for soccer and in 2021 took on a volunteer role as the Soccer Director for Spring Hill Sports, a youth sports organization in America's 10th fastest growing city.

For me the simple answer to the question "Why should I invest in Top Bins" is summed up in one word.... Joy. The joy of the *beautiful game* is one of life's purest emotions. Now, ok I'm biased, I LOVE soccer! I have unlimited memories from a lifetime of highs as a United fan and lows as a more reluctant England supporter (don't say penalties!). Nonetheless, watching a child's face as he or she scores their first goal or the supportive fist bumps to a young goalkeeper after making a save is quite simply one of life's enjoyable experiences. Our goal at Top Bins is to spread the game...far and wide.... we want people to experience Soccer in a way that catches their hearts whether they have any desire of playing to a high standard or not.

We know that in these times there are many things competing for our children's attention and most of them involve screens and technology so we want to fully embrace technology but use it to bring people to a healthy and wholesome activity in the process.

The combination of technology and gamification of soccer is what we believe will help finally bring America to the top table of the global soccer community and along the way allow children to access the level of development technically only seen in the top European clubs WITHOUT the extreme costs associated with much of youth sports in America.

If you're passionate about soccer, we proudly invite you to invest in the beautiful game, and our community, by investing in Top Bins.
