"Coordinating a time to meet with a person or a group of people is a seriously tedious task...in fact, more time might well be spent in orchestrating when to meet than the actual meeting itself, and so I am thrilled to invest in Arrangr and finally provide the world with a solution that is easy to use, is an amazing experience, and helps business move faster.

Over the past year, I have seen how a small, nimble team dedicated to a mission can achieve results beyond large bureaucratic organizations. The Arrangr team has provided a second-to-none immediate solution to making meeting scheduling simple and easy and is also charting a course for the future of scheduling via AI which is

and easy, and, is also charting a course for the future of scheduling via AI, which is close at hand.

Finally, the feedback I have received from people using my own Arrangr booking link and outbound invites has been very positive, and has dramatically made meeting scheduling a non-event."
