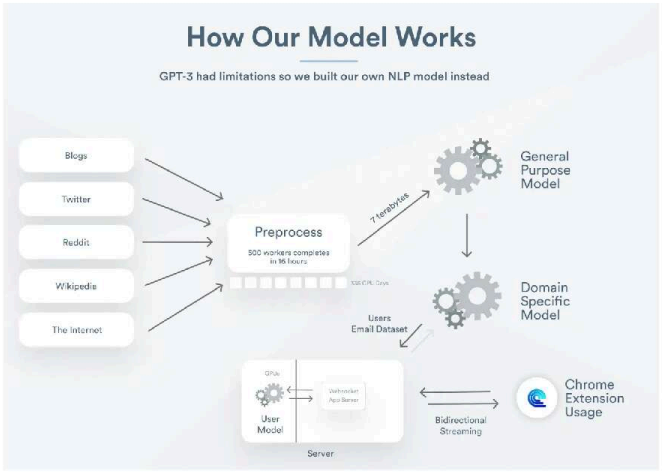
We built our own model to power diverse and real-time use-cases



Business model

- We have a **freemium business model**
- So far, we've been focusing on **free users - and our user base has grown significantly.**
- We launched monetization a year ago and are **ready to scale** it with this cash injection
- We have a large number of business users and are ready to start expand into **team accounts and enterprise** ❤️‍🔥

What's Next:

USE OF FUNDS! We've strategized on the best way to take the support from you, develop the product, and build up our community even further:

- **Product Development:**🛠️ We have been developing deep end-to-end workflow automation / web agents !
- Plus The creation of Plugins, including image Generation & Scheduling
- Improve our user interface
- Substantially build out bottoms up **Enterprise Sales** 💰 with more **customized features** - thereby further developing our product
- **Marketing and Customer Acquisition** 👥: We just launched the monetized version of the product a year ago, and are ready to scale
- Through an affiliate program, we would love to establish an advisory committee of **user and influencer affiliates** who provide **regular feedback** on the product, and how it can be improved for our most popular use cases!
- Enhance our community and user engagement!

Team Expansion🤓**:** Hire skilled professionals in engineering, design, and sales.

Operating Expenses✅**:** Cover essential costs like technology infrastructure and office space

office space.
