Giovanni Valentin

Co-Founder & CEO @ HLTHi | Full-Stack Engineer with AI & Big Data Expertise
Riverview, Florida, United States

Summary

As Co-Founder and CEO of HLTHi, I'm leading the development of a next-generation virtual healthcare platform designed to make high-quality, real-time medical care as accessible and seamless as ordering a ride. My background is in full-stack software engineering, with deep expertise in artificial intelligence, big data, and building scalable systems. Over the past decade, I've led technical teams across healthcare, e-commerce, and cloud infrastructure, always focused on solving complex problems with elegant, practical solutions. At HLTHi, I oversee product development, engineering, provider operations, and go-to-market execution. We've built a full-stack telehealth ecosystem from the ground up — integrating real-time AI triage and documentation, FHIR-based EHR systems, automated provider onboarding and credentialing, and seamless Stripe-powered payment infrastructure. HLTHi is built to scale care intelligently, not bureaucratically — and our vision is to modernize how healthcare is accessed, delivered, and experienced. If you're an investor or partner interested in transforming the future of care, I'd love to connect.

Experience

HLTHi

Co-Founder

January 2024 - Present (1 year 7 months)
Brandon, Florida, United States

As the co-founder and sole software developer of HLTHi, I lead the integration of innovative AI solutions with healthcare to deliver accessible, affordable, and high-quality patient care across the United States. At HLTHi, our mission is to empower patients with direct, physician-only virtual care at costs significantly lower than typical out-of-pocket expenses or insurance co-pays.

I specialize in leveraging advanced AI technologies and custom machine learning models to streamline clinical workflows, enhance diagnostic accuracy,

and accelerate medical observations for healthcare providers. My expertise includes extensive work with FHIR data standards, enabling seamless interoperability and efficient data exchange that strengthens patient-provider interactions.

I deeply enjoy building technology that not only simplifies healthcare delivery but also makes quality medical care accessible from anywhere, transforming patient experiences through thoughtful and efficient digital innovation.

Outdoor Network - USA

Senior Web Developer Manager

July 2018 - Present (7 years 1 month)

Tampa/St. Petersburg, Florida Area

Florida Campers, LLC
