Darye Henry

Venture-backed Founder building tools and strategies that help leaders build scalable organizations and products
Fishers, Indiana, United States

Summary

I am a product focused CEO, building a platform to enable youth service providers to offer exceptional learning opportunities outside of the school day. I believe in using the tremendous opportunities I've been given to build technology that can make a real difference in our world.

I have over 20 years of experience building software products and working in the start-up world. I have served as CTO for dozens of startups, helping founders navigate the world of developers, architecture, technology budgets, apps, vendors, platforms, etc, in order to ultimately deliver products the first time.

I work with numerous startups and companies with tech strategy, launching tech products, and implementing better development processes. Companies I've worked with include Powderkeg, DeliverEnd, Iris Works, Dulead, Lumatic, and many more.

As a consultant, I've worked with brands like the NFL, NHL, Spike TV. I've had my technology featured in Times Square, on The Today Show, and in NFL Training Camp Events.

I'm extremely fortunate to have a wonderful family and excellent mentors along the way. Couldn't do what I do without them.
